**ADDITIONAL INFORMATION 1. Exposure Breakdowns:** Allocations are subject to change. Total allocation percentages may not equal 100% due to rounding or omission of holdings of less than 1%. **2. Credit ratings:** Credit ratings on the fund's holdings are received from S&P, Moody's and Fitch and the median rating is converted to the equivalent S&P category. Unrated securities are not necessarily of lower quality. **3. Average Yield to Maturity (YTM):** The discount rate that equates the present value of a bond's cash flows with its market price (including accrued interest). The fund's Average YTM is the weighted average of the fund's individual bond holding YTM's based upon Net Asset Value. The measure does not include fees and expenses. For callable bonds, YTM is the yield-to-worst. **Weighted Average Maturity:** The average length of time to the repayment of principal for the holdings in the fund. This metric considers the likelihood that holdings will be called or prepaid before the scheduled maturity date. **12m Trailing Yield:** This is the yield an investor would have received if they had held the fund over the last 12 months, assuming the most recent NAV. It is calculated in AUD by summing all income distributions with ex-dates within the past 12 months and then dividing by the most recent NAV. **Effective Duration:** Measures the responsiveness of a portfolio's price to change in interest rates. It is adjusted for changes in the projected cash flows of fund holdings as a result of interest rate changes, considering the likelihood that holdings will be called or prepaid before the scheduled maturity date, and is based on proprietary BlackRock models.
