Investment Objective and Strategies

The investment objective of the Fund is to provide long-term capital growth by replicating, to the extent possible, the performance, net of expenses, of an index selected at the discretion of BlackRock Canada that is designed to measure the performance of U.S. companies in the aerospace & defense sector, as determined by the index provider. The Fund currently seeks to replicate the performance of the Dow Jones U.S. Select Aerospace & Defense Index (the "Index"). Under normal market conditions, the Fund will primarily invest in U.S. equity securities and/or securities of one or more exchange-traded funds managed by BlackRock Canada or an affiliate ("iShares ETFs"). The Index is comprised of equity securities of issuers in the Dow Jones U.S. Broad Stock Market Index that are categorized into the GICS sub-sectors of Aerospace (2713) and Defense (2717). Aerospace companies in the Index can include manufacturers, assemblers and distributors of aircraft and aircraft parts. Defense companies in the Index can include producers of components and equipment for the defense industry, such as military aircraft, radar equipment and weapons.

The Fund uses an indexing strategy to achieve its investment objective. Under this strategy, the Fund seeks to replicate the performance of the Index, net of expenses, by employing, directly or indirectly through investment in one or more iShares ETFs and/or through the use of derivatives, a replicating strategy or sampling strategy. A replicating strategy is an investment strategy intended to replicate the performance of the Index by investing, directly or indirectly, primarily in a portfolio of index securities in substantially the same proportions as they are represented in the Index. A sampling strategy is an investment strategy intended to replicate the performance of the Index by investing, directly or indirectly, primarily in a representative portfolio of securities that has an aggregate investment profile similar to the Index. The securities selected are expected to have, in the aggregate, investment characteristics, fundamental characteristics and liquidity measures similar to those of the Index, as more fully described in the Fund's prospectus.

The Fund's current principal investment strategy is to employ a replicating strategy.

Risk

The risks of investing in the Fund are described in the prospectus. There have been no changes to the Fund since the commencement of the Fund on September 6, 2023 that materially affected the risk level of the Fund.

Results of Operations

The Fund commenced operations on September 6, 2023. The Fund's net asset value was \$3.2 million at December 31, 2023, which represents an increase of \$3.0 million due to subscriptions to the Fund and an increase of \$0.2 million due to investment operations less distributions paid.

The Fund has a distribution policy that requires it to distribute sufficient net income and net realized capital gains so that it will not be liable to pay income tax under Part I of the *Income Tax Act* (Canada). Amounts included in the calculation of net income and net realized capital gains of the Fund for a taxation year, that must be distributed in accordance with the distribution policy, sometimes include amounts that have not actually been received by the Fund.

The Fund may borrow cash in accordance with the restrictions in National Instrument 81-102 – *Investment Funds*, and, in accordance with the terms of exemptive relief, as a temporary measure to fund the portion of any distributions payable to unitholders that represents amounts that have not yet been received by the Fund. Pursuant to such relief, the borrowing may not be for a period longer than 45 days, and the Fund is limited to borrowing up to the amount of the distribution that is payable to, but has not yet been received, by the Fund and, in any event, not more than 5% of the net assets of the Fund. For the period ended December 31, 2023, the Fund did not borrow any cash.

BTC and/or BRAL bear all operational costs directly related to securities lending as well as the cost of borrower default indemnification. The Fund did not engage in securities lending activities during the period ended December 31, 2023.

BlackRock Canada relies on a positive recommendation and standing instruction that it has received from the IRC with respect to the securities lending activities of the Fund, including the appointment of and payment to its affiliates as securities lending agents. The standing instruction requires BlackRock Canada to comply with its current policy and procedures regarding securities lending and to report periodically to the IRC.

^(a) The Fund commenced operations on September 06, 2023.

^(b) This information is derived from the Fund's audited annual financial statements and is not a reconciliation of the beginning and ending net assets per unit. The net assets per unit presented in the financial statements is the same as the net asset value per unit calculated for Fund pricing purposes.

^(c) Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of units outstanding over the period.

^(d) Distributions were paid in cash or automatically reinvested in additional units of the Fund, or both.

^(e) The tax characteristics of distributions are reported annually by the Fund to CDS Clearing and Depository Services Inc. ("CDS"). CDS makes this information available to brokers who provide it to unitholders through standard tax reporting.

^(h) The trading expense ratio ("TER") represents total commissions and other portfolio transaction costs expressed as an annualized percentage of average daily net asset value during the stated period. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a fund's portfolio turnover rate in a period, the greater the trading costs payable by the fund in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

^(k) Closing market price on the last trading day of the period or year, as applicable, as reported on the Exchange.
