

Performance, Portfolio Breakdowns and Net Assets information as at: 31-Aug-2024.

INVESTMENT OBJECTIVE

The fund aims to provide investors with the performance of the Bloomberg Global Aggregate Corporate Bond Index (AUD Hedged), before fees and expenses. The index is designed to measure the AUD hedged performance of the global investment grade corporate fixed-rate debt market.

WHY IHCB ?

1. Simple, low - cost exposure to investment grade corporate bonds across global markets and sectors in a single fund.
2. Use at the core of your portfolio to seek stability and pursue diversified sources of income
3. Gain international exposure while seeking to minimise the impact of Australian dollar volatility on your returns

GROWTH OF 10,000 AUD SINCE INCEPTION

Unit Class ■

Benchmark ■

The chart reflects the performance of a hypothetical investment in the fund of \$AUD10,000 over a specified period in time (M/YY). The performance of the hypothetical investment is based on the actual past performance of the fund over the specified period.

CUMULATIVE AND ANNUALISED PERFORMANCE

	Cumulative					Annualised		
	1m	3m	6m	YTD	1y	3y	5y	S.I.
Unit Class	1.05	3.74	4.15	2.72	7.57	-2.90	-0.60	2.10
Benchmark	1.08	3.85	4.32	2.88	7.79	-2.68	-0.29	2.47

CALENDAR YEAR PERFORMANCE

	2019	2020	2021	2022	2023
Unit Class	11.52	6.15	-1.46	-14.80	5.93
Benchmark	11.39	7.02	-0.99	-15.45	7.03

The performance figures represent past performance of the fund. Past performance is not a reliable indicator of future performance. Fund performance figures shown are calculated after fund management fees and expenses, and assume reinvestment of distributions. Unless otherwise stated, performance figures are in Australian dollars and performance for periods greater than one year is annualised. Performance is calculated to the last business day of the month. Investment return and principal value of an investment will fluctuate so that an investor's units, when sold or redeemed, may be worth more or less than the original cost. Current performance may be higher or lower than the performance shown. An iShares ETF is not actively managed. You cannot invest directly in an index.

SUSTAINABILITY CHARACTERISTICS

Sustainability Characteristics can help investors integrate non-financial, sustainability considerations into their investment process. These metrics enable investors to evaluate funds based on their environmental, social, and governance (ESG) risks and opportunities. This analysis can provide insight into the effective management and long-term financial prospects of a fund.

The metrics below have been provided for transparency and informational purposes only. The existence of an ESG rating is not indicative of how or whether ESG factors will be integrated into a fund. The metrics are based on MSCI ESG Fund Ratings and, unless otherwise stated in fund documentation and included within a fund's investment objective, do not change a fund's investment objective or constrain the fund's investable universe, and there is no indication that an ESG or Impact focused investment strategy or exclusionary screens will be adopted by a fund. For more information regarding a fund's investment strategy, please see the fund's prospectus.

MSCI ESG Fund Rating (AAA-CCC)	A	MSCI ESG % Coverage	95.66%
MSCI ESG Quality Score (0-10)	6.79	MSCI ESG Quality Score - Peer Percentile	40.37%
Fund Lipper Global Classification	Bond Global Corporates LC	Funds in Peer Group	109
MSCI Weighted Average Carbon Intensity (Tons CO2E/\$M SALES)	193.40	MSCI Weighted Average Carbon Intensity % Coverage	94.00%
MSCI Implied Temperature Rise % Coverage	83.43%	MSCI Implied Temperature Rise (0-3.0+ °C)	> 2.0° - 2.5° C

All data is from MSCI ESG Fund Ratings as of **21-Aug-2024**, based on holdings as of **31-July-2024**. As such, the fund's sustainable characteristics may differ from MSCI ESG Fund Ratings from time to time.

To be included in MSCI ESG Fund Ratings, 65% (or 50% for bond funds and money market funds) of the fund's gross weight must come from securities with ESG coverage by MSCI ESG Research (certain cash positions and other asset types deemed not relevant for ESG analysis by MSCI are removed prior to calculating a fund's gross weight; the absolute values of short positions are included but treated as uncovered), the fund's holdings date must be less than one year old, and the fund must have at least ten securities.

IMPORTANT INFORMATION:

Certain information contained herein (the "Information") has been provided by MSCI ESG Research LLC, a RIA under the Investment Advisers Act of 1940, and may include data from its affiliates (including MSCI Inc. and its subsidiaries ("MSCI")), or third party suppliers (each an "Information Provider"), and it may not be reproduced or disseminated in whole or in part without prior written permission. The Information has not been submitted to, nor received approval from, the US SEC or any other regulatory body. The Information may not be used to create any derivative works, or in connection with, nor does it constitute, an offer to buy or sell, or a promotion or recommendation of, any security, financial instrument or product or trading strategy, nor should it be taken as an indication or guarantee of any future performance, analysis, forecast or prediction. Some funds may be based on or linked to MSCI indexes, and MSCI may be compensated based on the fund's assets under management or other measures. MSCI has established an information barrier between equity index research and certain Information. None of the Information in and of itself can be used to determine which securities to buy or sell or when to buy or sell them. The Information is provided "as is" and the user of the Information assumes the entire risk of any use it may make or permit to be made of the Information. Neither MSCI ESG Research nor any Information Party makes any representations or express or implied warranties (which are expressly disclaimed), nor shall they incur liability for any errors or omissions in the Information, or for any damages related thereto. The foregoing shall not exclude or limit any liability that may not by applicable law be excluded or limited.

GLOSSARY

MSCI ESG % Coverage: Percentage of the fund's holdings for which the MSCI ESG ratings data is available. The MSCI ESG Fund Rating, MSCI ESG Quality Score, and MSCI ESG Quality Score - Peer Percentile metrics are displayed for funds with at least 65% coverage.

Effective Duration: Effective duration is a measure of a fund's interest-rate sensitivity. Put simply, the longer a fund's duration, the more sensitive the fund is to shifts in interest rates. So a fund with a duration of 10 years is twice as volatile as a fund with a five-year duration.

MSCI ESG Fund Rating (AAA-CCC): The MSCI ESG Rating is calculated as a direct mapping of ESG Quality Scores to letter rating categories (e.g. AAA = 8.6-10). The ESG Ratings range from leader (AAA, AA), average (A, BBB, BB) to laggard (B, CCC).

MSCI Implied Temperature Rise (0-3.0+ °C): Implied Temperature Rise (ITR) is used to provide an indication of alignment to the temperature goal of the Paris Agreement for a company or a portfolio. ITR employs open source 1.55°C decarbonization pathways derived from the Network of Central Banks and Supervisors for Greening the Financial System (NGFS). These pathways can be regional and sector specific and set a net zero target of 2050. We make use of this feature for all GHG scopes. A net zero emissions economy is one that balances emissions and removals. Because the ITR metric is calculated in part by considering the potential for a company within the fund's portfolio to reduce its emissions over time, it is forward looking and prone to limitations. As a result, BlackRock publishes MSCI's ITR metric for its funds in temperature range bands. The bands help to underscore the underlying uncertainty in the calculations and the variability of the metric.

MSCI ESG Quality Score - Peer Percentile: The fund's ESG Percentile compared to its Lipper peer group.

MSCI Weighted Average Carbon Intensity % Coverage: Percentage of the fund's holdings for which MSCI Carbon Intensity data is available. The MSCI Weighted Average Carbon Intensity metric is displayed for funds with any coverage. Funds with low coverage may not fully represent the fund's carbon characteristics given the lack of coverage.

Funds in Peer Group: The number of funds from the relevant Lipper Global Classification peer group that are also in ESG coverage.

Fund Lipper Global Classification: The fund peer group as defined by the Lipper Global Classification.

MSCI Implied Temperature Rise % Coverage: Percentage of the fund's holdings for which MSCI Implied Temperature Rise data is available. The MSCI Implied Temperature Rise metric is displayed for funds with at least 65% coverage.

MSCI ESG Quality Score (0-10): The MSCI ESG Quality Score (0 - 10) for funds is calculated using the weighted average of the ESG scores of fund holdings. The Score also considers ESG Rating trend of holdings and the fund exposure to holdings in the laggard category. MSCI rates underlying holdings according to their exposure to industry specific ESG risks and their ability to manage those risks relative to peers.

MSCI Weighted Average Carbon Intensity (Tons CO2E/\$M SALES): Measures a fund's exposure to carbon intensive companies. This figure represents the estimated greenhouse gas emissions per \$1 million in sales across the fund's holdings. This allows for comparisons between funds of different sizes.

Yield to Maturity: Yield to Maturity (YTM) is the discount rate that equates the present value of bond's cash flows with its market price (including accrued interest). The fund YTM is the weighted average of fund's individual bond holding YTM's based upon Net Asset Value ('NAV'). The measure does not include fees and expenses. For callable bonds, YTM is the Yield-to-Worst.
