

Institutional Cash Series overview

Managing cash in-house can be challenging, especially in volatile markets. Outsourced cash management can offer the experience, scale and resources to respond quickly to changes impacting your cash investments.

BlackRock's cash management investment style aims to provide maintenance of capital, liquidity and yield – in that order.

Supported by careful analysis of credit worthiness, interest rate trends and relative value opportunities, we seek to produce consistent and competitive investment returns on a risk-adjusted basis.¹

Elevate cash management

Potential advantages of using BlackRock Cash Management money market funds

Scale & liquidity

Managed with high levels of liquidity offering investors same- or next-day liquidity depending on the share class.

A range of money market funds to suit both short- and medium-term liquidity needs.

Diversification²

Seek to mitigate risk by allocating to multiple high-quality issuers and money market sectors.

Concentration risk is managed through diverse issuer and repurchase agreement counterparty selection.³

Sustainability

The BlackRock Cash Management platform is fully ESG integrated, meaning we incorporate material ESG factors to enhance risk-adjusted returns regardless of whether a fund has a sustainable objective.

The BlackRock cash management platform offers a range of investment solutions to meet our clients' sustainability focused investment preferences.⁴

Ring-fencing of assets

The invested assets are ring-fenced from BlackRock and from the fund's custodian, so in case of a solvency event with these parties the assets within the fund would not be impacted.

Outsourced investment expertise

Continual yield curve analysis to seek attractive risk-adjusted yield.

Yield will never be sought at the expense of stability of principal or liquidity.

Credit analysis

Strong emphasis on credit analysis, which is fully integrated into our global platform.

All holdings in the BlackRock money market funds are thoroughly researched by our credit analytics team.

¹ Capital at risk. The value of investments and the income from them can fall as well as rise and are not guaranteed. You may not get back the amount originally invested.

² Diversification and asset allocation may not fully protect you from market risk. ³ Risk management cannot fully eliminate the risk of investment loss. ⁴ The environmental, social, and governance ('ESG') considerations may affect an investment team's decision to invest in certain investment opportunities from time to time. Results may differ from portfolios that do not apply similar ESG considerations to their investment process.

Key features of our fund range

Our fund offering under the Institutional Cash Series (ICS) provides a range of **Undertakings for Collective Investment in Transferable Securities** (UCITS) money market fund solutions and strategies in **US Dollar** to cater to your investment needs.

A Money Market Fund (MMF) is not a guaranteed investment vehicle. An investment in MMFs is different from an investment in deposits; the principal invested in an MMF is capable of fluctuation and the risk of loss of the principal is to be borne by the investor. The MMF does not rely on external support for guaranteeing the liquidity of the MMF or stabilising the NAV per share. Further information about the funds, including the methods used by the MMF to value the assets of the MMF and calculate the NAV, are available at blackrock.com/cash. Figures shown in \$ refer to USD. Source: BlackRock as of February 2024.

⁵Fund can price to 2 decimal places if full mark-to-market NAV does not deviate more than 20 bps. If 20 bps tolerance is breached, fund will price to 4 decimal places using full mark-to-market NAV.

⁶The Fund is rated by an external rating agency. Such rating is solicited and financed by BlackRock. Source: BlackRock, Moody's, S&P, Fitch as at February 2024.

	<p>Applicable to BlackRock ICS US Dollar Ultra Short Bond Fund only The 3-Month compounded SOFR in arrears rate should be used by investors to compare the performance of the Fund.</p>

Fund specific risks

Applicable to BlackRock ICS US Dollar Ultra Short Bond Fund

Accumulating share class risk: On any day where the net return (i.e. return less costs and expenses) of the Fund is negative an Accumulating Share Class of the fund will see a decrease in the NAV per Share.

The Fund seeks to exclude companies engaging in certain activities inconsistent with ESG criteria. Investors should therefore make a personal ethical assessment of the Fund's ESG screening prior to investing in the Fund. Such ESG screening may adversely affect the value of the Fund's investments compared to a fund without such screening.

Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.

Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Money Market Funds

Money Market Funds do not generally experience extreme price variations. Changes in interest rates will impact the Fund. Levels of credit risk are affected by longer weighted average maturity and weighted average life of the Fund.

Applicable to BlackRock ICS US Treasury Fund

Accumulating share class risk: On any day where the net return (i.e. return less costs and expenses) of the Fund is negative an Accumulating Share Class of the fund will see a decrease in the NAV per Share.

The Fund seeks to exclude companies engaging in certain activities inconsistent with ESG criteria.

Investors should therefore make a personal ethical assessment of the Fund's ESG screening prior to investing in the Fund.

Such ESG screening may adversely affect the value of the Fund's investments compared to a fund without such screening.

Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.

Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Applicable to BlackRock ICS US Dollar Liquidity Fund

Accumulating share class risk: On any day where the net return (i.e. return less costs and expenses) of the Fund is negative an Accumulating Share Class of the fund will see a decrease in the NAV per Share.

The Fund seeks to exclude companies engaging in certain activities inconsistent with ESG criteria. Investors should therefore make a personal ethical assessment of the Fund's ESG screening prior to investing in the Fund. Such ESG screening may adversely affect the value of the Fund's investments compared to a fund without such screening.

Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.

Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Money Market Funds: Money Market Funds do not generally experience extreme price variations. Changes in interest rates will impact the Fund. Levels of credit risk are affected by longer weighted average maturity and weighted average life of the Fund.

FOR PROFESSIONAL CLIENTS AND QUALIFIED INVESTORS ONLY

Capital at risk. The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

Past performance is not a reliable indicator of current or future results and should not be the sole factor of consideration when selecting a product or strategy.

Changes in the rates of exchange between currencies may cause the value of investments to diminish or increase. Fluctuation may be particularly marked in the case of a higher volatility fund and the value of an investment may fall suddenly and substantially. Levels and basis of taxation may change from time to time.
