Yields will fluctuate as market conditions change. ² The 7-Day yield is computed in accordance with methods prescribed by the SEC. The 7-Day SEC yield excludes distributed capital gains/losses. ³ The fund's current yield more closely reflects the current earnings of the fund than the total net return quotations. ⁴ Weighted Average Maturity: Calculated by the final maturity for a security and the interest rate reset date held in the portfolio. This is a way to measure a fund's sensitivity to potential interest rate changes. ⁵ Weighted Average Life: Measurement of a fund's sensitivity to a deteriorating credit environment; potential credit spread changes or tightening liquidity conditions. The WAL calculation is based on a security's stated final maturity date or, when relevant, the date of the demand feature when the fund may receive payment of principal and interest. ⁶ BlackRock provides compensation in connection with obtaining or using third-party ratings and rankings.
