BLACKROCK SOLUTIONS FUNDS ICAV

BACKGROUND

BlackRock Solutions Funds ICAV (the “Entity”) is an Irish collective asset-management vehicle. The Entity was incorporated in Ireland on 20 July 2020 with segregated liability between its funds and is organised under the laws of Ireland and is regulated by the Central Bank of Ireland (“CBI”) pursuant to the Irish Collective Asset-Management Vehicles Act 2015 (the “ICAV Act 2015”) as an Irish collective asset-management vehicle pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) (the “UCITS Regulations”).

The Entity is structured as an umbrella fund and comprises of separate funds (“Fund”) of the Entity. The shares of each Fund may be grouped into different classes of shares (each a “share class”). Each Fund will represent a separate portfolio of assets and may consist of one or more share classes. Each share class may apply different subscription and redemption provisions, charges, fees or brokerage arrangements. The creation of an additional class of shares will be notified to the CBI in advance. The portfolio of assets maintained for each Fund will be invested in accordance with the investment objectives and policies applicable to each Fund as set out in the prospectus.

While assets and liabilities that are specific to a share class within a Fund would be attributable to (and should be borne by) only that share class, there is no segregation of liabilities between share classes as a matter of Irish law. Due to the lack of segregation of liabilities as a matter of law, there is a risk that the creditors of a share class may bring a claim against the assets of the Fund notionally allocated to other share classes.

As a matter of Irish law, the assets of one Fund will not be available to meet the liabilities of another. However, the Entity is a single legal entity that may operate or have assets held on its behalf or be subject to claims in other jurisdictions that may not necessarily recognise such segregation of liability.

The term “Fund” shall be deemed to mean either a Fund or Funds of the Entity, or if the context so requires, the Manager or its delegate acting for the accounts of the relevant Fund. The term “BlackRock” and “Investment Manager” are used to represent BlackRock Investment Management (UK) Limited as appropriate. All references to “redeemable shares” shall be deemed to mean redeemable participating shares when Fund shares are classified as financial liabilities. The term “Directors” means the directors of the ICAV.

Further details, including the investment objectives and minimum subscription requirements, are set out in the Entity’s prospectus.

Fund details

The Entity had 15 Funds in operation as at 30 September 2024.

Further information on the index investment strategies used is detailed below:

- Enhanced index strategies differ from pure-index tracking strategies in that they invest in a similar universe of instruments but aim to take overweight and/or underweight positions relative to the benchmark in order to generate some outperformance.

Performance summary

The following table compares the realised Fund performance against the performance of the relevant benchmark index during the financial period ended 30 September 2024.

Further information on these performance measures and calculation methodologies used is detailed below:

- Fund returns disclosed are the performance returns for the primary share class for the Funds, net of fees, which has been selected as a representative share class. The primary share class represents the class of share invested in by the majority of investors in the Fund and also takes into account other relevant factors such as the Fund’s base currency. The return of the primary share class disclosed may differ to the aggregate Fund performance for all share classes as reported in the financial statements primarily due to the impact of foreign currency translation and share class specific expenses. Performance returns for any other share class can be made available on request.
- For Funds that commenced trading and/or fully redeemed during the financial period, returns are shown from the date the Fund commenced trading and/or to the date the Fund fully redeemed.
- Fund returns are based on the net asset value (“NAV”) calculated in accordance with the prospectus for the financial period under review with any dividends reinvested. Returns less than 0.005% are rounded down to zero. Additionally, due to Financial Reporting Standard 104 (“FRS 104”) requirements which apply to the financial statements, there may be differences between the NAV per share as recorded in the financial statements and the NAV per share calculated in accordance with the prospectus.

Global economic overview

Global equities, as represented by the MSCI All Country World Index, returned 9.67% (in USD terms) during the six months ended 30 September 2024. Equities gained amid milder inflation (the rate of increase in the prices of goods and services) and a shift in monetary policy from the world's largest central banks. However, heightened geopolitical tensions during the six-month period, including the war in the Middle East and attacks on Red Sea shipping lanes, raised the prospect of disruption to the global economy.

INVESTMENT MANAGER'S REPORT (continued)

Global economic overview (continued)

Having slowed somewhat at the start of 2024, economic growth in the US outperformed analysts' expectations in the second quarter. Demand from companies for workers remained high for most of the six-month period, but there were signs of weakness in the US jobs market in August 2024. In Japan, gross domestic product ("GDP") recovered strongly in the second quarter due to rising private consumption. The UK economy rebounded from a mild recession with positive growth in the first and second quarters as services and production output accelerated. The Eurozone also returned to growth, helped by the strong performance of several of the bloc's smaller nations, including Ireland, Spain and Portugal. Eurozone inflation remained moderate, as consumer spending was tepid and consumer confidence remained below pre-pandemic levels.

Most emerging markets continued to expand, although geopolitical conflict and high interest rates presented significant economic challenges. Chinese GDP grew more slowly than expected, amid concerns about the country's real estate sector and weak retail sales. However, the announcement of a new round of stimulus measures in late September 2024 was received very positively by investors. India's economy continued to post strong growth, and industrial production grew on an annual basis throughout the period.

Central banks in the west started to loosen monetary policy. The US Federal Reserve (the "Fed") reduced interest rates by 0.5% in September 2024, while continuing to reduce some of the accumulated bond holdings on its balance sheet. By this point, both the Bank of England ("BoE") and the European Central Bank ("ECB") had already cut interest rates. Furthermore, the ECB continued to reduce the size of its balance sheet by allowing some of its outstanding bonds to mature without reinvestment. Having raised interest rates in March 2024, the Bank of Japan ("BoJ") did so again in July. These were the first increases in borrowing costs in Japan since 2007.

Global equity performance was strong overall: declining inflation made it increasingly likely that monetary policy would continue to loosen, although signs of slowing economic growth caused concern among investors in August. US stocks posted robust gains as the US economy performed better than most developed countries, with major technology stocks advancing on hopes that developments in artificial intelligence would drive growth. European stocks rose as declining inflation boosted hopes of further interest-rate cuts. Stocks in Asia also gained, with particularly sharp rises at the end of the six-month period following the announcement of a new stimulus package in China. Emerging markets stocks posted solid returns, helped by the prospect of monetary policy loosening in developed economies. Globally, bonds and equities that factor companies' environmental, social and governance ("ESG") characteristics faced regulatory concerns and shifting investor sentiment. ESG funds experienced positive inflows overall. Although European investment held up, there were outflows in the US following politicians' attempts to impose restrictions on investing in ESG-focused funds.

Global government bond yields (which move inversely to prices) rose early in the six-month period as inflation remained stubbornly above central bank targets. However, US Treasury yields fell sharply in August and September 2024 on rising expectations of a large interest-rate cut by the Fed. Yields on UK gilts and European government bonds followed a similar trajectory, although yields on French government bonds rose particularly sharply after the surprise announcement of national elections in June 2024. Japanese government bond yields rose following changes to the BoJ's yield curve control policy and increases in interest rates but fell back late in the six-month period due to the strengthening yen. Global corporate bond performance was broadly positive; increasing bond yields attracted investors, and continued resilience in the global economy alleviated credit concerns, particularly for high-yield bonds.

In commodities markets, Brent crude oil prices rose in April as continued instability in the Middle East perturbed investors but fell back following global production increases and concerns about global growth. Gold prices increased significantly amid rising geopolitical tensions, the possibility of Fed interest rate reductions and rising demand from investors in Asia. Copper prices also rose due to supply constraints and demand from decarbonisation and electrification efforts.

In the foreign exchange markets, the US dollar was down relative to other major global currencies. The US dollar fell against sterling, the euro, the Japanese yen and the Chinese yuan.

Coutts UK ESG Insights Equity Fund

Fund performance review and activity

Over the six months to 30 September 2024, the Fund's performance return was 4.64% and the active return was (0.76%), underperforming its benchmark index which returned 5.40% (active return is the difference between the Fund's return and the benchmark index).

UK equities rose in the second and third quarter, despite experiencing a decline in September. Over the six-month period, the UK benchmark rose by 5.40%, supported by positive returns in consumer staples and financials names. Inflation fell steadily during the 6-month period. On 1 August 2024, the BoE cut its policy rate by 25 basis points, lowering it to 5.00%. The underperformance was mainly driven by stock selection within consumer staples and financials, which were the best performing sectors in absolute returns. Active risk in the portfolio was near 1.4% at month end, which is within the target range. Most of the active risk contribution came from stock specific factors, as intended.

INVESTMENT MANAGER'S REPORT (continued)

Coutts UK ESG Insights Equity Fund (continued)

Fund performance review and activity (continued)

During the six-month period the following were the largest contributors to and detractors from the Fund's return relative to the benchmark index:

Largest contributors		Largest detractors	
Sector	Effect on Fund return	Sector	Effect on Fund return
Consumer discretionary [#]	0.12%	Consumer staples [#]	(0.34%)
Health care ^o	0.09%	Financials [#]	(0.27%)
Materials ^o	0.09%	Industrials [#]	(0.22%)
Energy ^o	0.03%	Information technology [#]	(0.16%)
		Real estate [#]	(0.06%)

[#]Overweight position - held more exposure than the benchmark index.

^oUnderweight position - held less exposure than the benchmark index.

Over the six-month period, underperformance was primarily driven by positions within the consumer staples and financials sectors. Specifically, the Fund's underweights in companies like Haleon Plc and Tesco Plc detracted 24 basis points and 19 basis points respectively. Within financials, the exclusion of Natwest Group Plc drove the largest single-name detraction, reducing active performance by 30 basis points. The Fund has no exposure to this issuer, which is restricted by investment guidelines. The consumer discretionary sector contributed positively, with Kingfisher Plc adding 27 basis points. The company overweight was driven by its positive BSI Intel score.

The following table details the significant active positions, where the Fund is overweight (holds more exposure than the benchmark index) and underweight (holds less exposure than the benchmark index), as at 30 September 2024 and 31 March 2024:

Largest overweight positions			
30 September 2024		31 March 2024	
Sector	Weighting	Sector	Weighting
Consumer discretionary	0.80%	Information technology	1.02%
Communication services	0.76%	Consumer discretionary	0.99%
Real estate	0.73%	Industrials	0.82%

Largest underweight positions			
30 September 2024		31 March 2024	
Sector	Weighting	Sector	Weighting
Health care	(1.02%)	Materials	(0.98%)
Energy	(1.00%)	Utilities	(1.03%)
Financials	(0.77%)	Energy	(1.48%)

Coutts US ESG Insights Equity Fund

Fund performance review and activity

Over the six months to 30 September 2024, the Fund's performance return was 10.30% and the active return was 0.15%, outperforming its benchmark index which returned 10.15% (active return is the difference between the Fund's return and the benchmark index).

The US equity market experienced an uptick during the past six months, and an increase in market volatility during the third quarter. The benchmark returned a positive 10.15%, bolstered by returns in information technology names. US stocks were affected by two large selloffs in August and September, triggered by perceived increased risk surrounding geopolitical risk and trade restrictions in key industries like semiconductors, as well as fears of recession. However, the market quickly recovered due to robust macroeconomic data and the prospect of lower future interest rates. During its September meeting, the Fed cut its policy rate by 50 basis points. Stock selection within the industrials and financials sectors drove the outperformance of the Fund over the six-month period. Active risk in the portfolio was close to 1% and within the target range, with most of the active risk contribution coming from stock-specific factors, as intended.

Over the six-month period, the outperformance of the Fund was reinforced by overweighted positions driven by their high BSI Intel score. For instance, Trane Technologies Plc and Moody's Corp both added 20 basis points. Within health care, deduction came from Edwards Lifesciences Corp ((10) basis points), which was overweighted based on a high BSI Intel score, while Eli Lilly, which was underweighted during the period, detracted 8 basis points. Within the information technology sector, the chip maker Intel Corporation affected active performance negatively, as the overweight in this issuer detracted 14 basis points.

Over the six months to 30 September 2024, the Fund's performance return was 3.44% and the active return was 0.59%, outperforming its benchmark index which returned 2.85% (active return is the difference between the Fund's return and the benchmark index).

The European equity market experienced a slight uptick during the second and third quarters. The EU ex-UK benchmark rose by 2.85%, underperforming its developed markets peers. Industrials, financials and health care emerged as the best performing sectors. The ECB cut its policy rate by 25 basis points twice during this period, as inflation continued to cool. The active performance was largely driven by stock selection within Industrials names. Active risk in the portfolio was near 1% at September month-end, which is within the target range. Most of the active risk contribution came from stock specific factors, as intended.

Over the six-month period, outperformance was largely supported by overweighted positions within the industrials sector. For example, ABB Ltd and Schneider Electric added 20 basis points and 15 basis points respectively. The overweight position in these issuers was driven by their positive BSI Intel scores. Within the health care sector, the overweight in Sonova Holding AG was the top contributor to active performance, adding 22 basis points. Underperformance within the information technology sector was mainly driven by the overweight position the fund held in Stmicroelectronics NV, which detracted 32 basis points during the period. Within materials, which was the worst performing sector, the overweight in Umicore SA was the largest detractor, reducing active performance by 15 basis points.

Fund performance review and activity

Over the period to 31 July 2024, the Fund's performance return was 5.96% and the active return was (0.67%), underperforming its benchmark index which returned 6.63% (active return is the difference between the Fund's return and the benchmark index).

Financial markets in the UK saw mostly positive performance, though there was heightened volatility during the summer months. Disappointing UK economic data raised concerns about the risk of a slowdown, while investor unease over the profitability of heavy investments in artificial intelligence prompted a shift away from growth and quality stocks. An interest rate hike by the Bank of Japan also added pressure, as investors unwound carry trades that had been based on borrowing cheap yen to fund higher-yielding investments.

The market began to recover towards the end of the quarter, as the BoE signaled a more dovish policy stance, following the Fed's 0.5% interest rate cut. Additionally, stronger-than-expected economic data from the UK and stimulus measures from China helped to improve investor sentiment and support a more optimistic outlook.

[#]Overweight position - held more exposure than the benchmark index.

[⊖]Underweight position - held less exposure than the benchmark index.

The overweight to consumer discretionary was the largest positive contributor over the period, followed by the Fund's overweight to financials. The largest detractors over this period were mostly underweight positions. The main detractor was the underweight to consumer staples, followed by the health care sector and materials.

The Fund closure was part of the asset re-allocation at Coutts where Coutts were moving all their portfolios to reduce their home bias towards UK assets. This meant that the allocation to UK equity would reduce dramatically and the active fund would be subscale and not in scope for multi manager. The transition began in May where Coutts redeemed from the Funds over multiple tranches.

In July the final tranches of outflows were processed, and the fund struck its final net asset value on 31 July 2024. On this day, remaining units were redeemed.

Fund performance review and activity

Over the six months to 30 September 2024, the Fund's performance return was 6.37% and the active return was (3.78%), underperforming its benchmark index which returned 10.15% (active return is the difference between the Fund's return and the benchmark index).

Financial markets generally saw positive performance, though volatility increased over the summer months. Disappointing US economic data sparked concerns about a potential recession, while growing uncertainty about the returns on massive investments in artificial intelligence led to a shift away from growth and quality stocks. An interest rate hike by the Bank of Japan further intensified market pressure, as investors unwound carry trades that had previously taken advantage of borrowing cheap yen to invest in higher-yielding assets.

However, markets rebounded later in the quarter as the Fed implemented a more dovish stance, cutting interest rates, which helped ease investor concerns. Additionally, stronger-than-expected economic growth in the US and stimulus measures in China supported renewed optimism and improved sentiment across global markets.

During the six month period the following were the largest contributors to and detractors from the Fund's return relative to the benchmark index:

Largest contributors		Largest detractors

Consumer staples [#]	0.50%	Information technology [⊖]	(2.74%)

		Energy [⊖]	(0.31%)

[#]Overweight position - held more exposure than the benchmark index.

[⊖]Underweight position - held less exposure than the benchmark index.

The Fund's allocation to consumer staples has been the largest contributor to performance. This was followed by the Fund's exposure to financials and health care. The largest detractor over this horizon has been the underweight to information technology.

Over the six month period to end 30 September 2024, investment grade corporate credit spreads have been drifting tighter. This has positively impacted the Fund's returns. Spread moves were largely supported by favourable technicals through strong investor demand for attractive all-in-yields as well as primary market issuances that were well absorbed during this period. During this period, rates have generally rallied which has also been supportive of Fund returns.

During the six month period the following were the largest contributors to and detractors from the Fund's return relative to the benchmark index:

Fund performance review and activity

Over the six months to 30 September 2024, the Fund's active return was 0.14%, outperforming its benchmark index (active return is the difference between the Fund's return and the benchmark index).

US inflation continued its disinflationary trajectory, with US CPI falling to 2.5% from 3.4% over the review period. On the back of easing inflation and rising unemployment, the Fed started its cutting cycle in September, with a 50 basis points cut, over a conventional 25 basis points.

The Fund held overweights in bonds with 7-10 & 20-25 year maturities, whereas underweights were primarily concentrated in 5-7 & 15-20 years maturities.

During the financial period, the following were the largest contributors to and detractors from the Fund's return relative to the benchmark index:

QMM Actively Managed US Equity Fund

Fund performance review and activity

Since inception of the Fund on 11 April 2024 to 30 September 2024, the Fund's performance return was 8.94% net and the active return was (2.57%), underperforming its benchmark index which returned 11.51% (active return is the difference between the Fund's return and the benchmark index).

Over the period, US equities rose amid persistent inflation concerns, geopolitical tensions, and mixed economic data. Rate cut expectations and easing inflation provided support, though sovereign bonds struggled with more gradual rate cuts. Gains for US equities were driven largely by megacap stocks like the "Magnificent 7," while broader equity performance remained narrow. Against this backdrop, the Fund's underperformance has been driven by security selection while sector allocation contributed positively overall. Security selection was challenged most notably in the information technology and consumer discretionary sectors. This was in part driven by the narrow market rally that saw a select few mega-cap stocks to significantly outperformance their sectors.

Since inception of the Fund, the following were the largest contributors to and detractors from the Fund's return relative to the benchmark index.

Largest contributors		Largest detractors

[#]Overweight position - held more exposure than the benchmark index.

[Ⓞ]Underweight position - held less exposure than the benchmark index.

Over the period, exposures in the real estate, materials and utilities sectors made the largest active contribution, all driven by security selection. Exposures to the information technology and consumer discretionary sectors detracted from relative performance, driven by security selection, with underweights to Apple, Nvidia and Tesla among the top detractors. Overweights to financials, health care and consumer staples also detracted from active performance but to a lesser extent.

Since inception to end 30 September 2024, the Fund's performance return was 5.93% and the active return was (0.56%), underperforming its benchmark index which returned 6.49% (active return is the difference between the Fund's return and the benchmark index return).

Since inception of the Fund to end 30 September 2024, high yield corporate credit spreads have been drifting tighter. However, given the defensive positioning of the Fund, this has negatively impacted Fund returns. On the other hand, the rally in rates seen during this period has been a positive for the Fund's performance. The Fund maintains its cautious risk profile primarily driven by valuations.

Since inception of the Fund the following were the largest contributors to and detractors from the Fund's return relative to the benchmark index:

Largest contributors		Largest detractors	
Sector	Effect on Fund return	Sector	Effect on Fund return
Rates [#]	0.04%	Industrials [⊖]	(0.37%)

Government related [#]	0.01%		

[#]Overweight position - held more exposure than the benchmark index.

[⊖]Underweight position - held less exposure than the benchmark index.

Overweight US rates positioning contributed to returns over the period as did overweights to securitized assets through asset backed securities. In addition, small overweights in government related agency debt also added. Positive contributions were offset by underweight positions in industrials particularly through consumer non-cyclicals, energy, capital goods and basic industry, which detracted from performance alongside underweights in utilities.

The following table details the significant active positions, where the Fund was overweight (held more exposure than the benchmark index and underweight (held less exposure than the benchmark index, as at 30 September 2024).

Largest overweight positions

Cash still remains one of the biggest overweights reflecting the rather cautious stance maintained by the Fund since inception. As high yield credit spreads trade at historical tights, the Fund continues to hold underweight exposures through industrials, financials and utilities.

Fund performance review and activity (continued)

Over the period, European equities ultimately recorded gains but experienced bouts of volatility. Early on, markets declined as weaker economic data signaled a eurozone slowdown, and the announcement of French parliamentary elections heightened political uncertainty. In quarter three, the ECB continued easing with a further 25 basis point interest rate cut in September which bolstered investor confidence. As a result, European equities rebounded, accompanied by a preference for defensive assets over cyclicals. Against this backdrop, the Fund's experienced underperformance from a combination of security selection and sector allocation. Key overweight exposures haven't delivered positive active performance and whereas select underweight names have rallied, contrary to the portfolio managers' expectations. Notably, negative semiconductor sentiment was also a headwind for the Fund.

Since inception of the Fund, the following were the largest contributors to and detractors from the Fund's return relative to the benchmark index.

Largest contributors		Largest detractors	
Sector	Effect on Fund return	Sector	Effect on Fund return
Consumer discretionary [#]	0.14%	Health care [⊖]	(0.80%)

		Communication services [⊖]	(0.19%)

[#]Overweight position - held more exposure than the benchmark index.

[⊖]Underweight position - held less exposure than the benchmark index.

Exposures in the consumer discretionary sector were the largest contributors to active returns over the period, driven by security selection, followed by exposures in consumer staples due to the Fund's underweight. With that said, exposures to health care and Industrials were the top detractors, both driven by security selection, followed by underweights to financials and communication services.

North American stocks experienced an uptick during the period. Despite significant selloffs in US equities between August and September, the market quickly recovered due to robust macroeconomic data and the prospect of lower future interest rates. In its September meeting, the Bank of Canada cut the interest rate by 25 basis points, lowering it to 4.25%. Meanwhile, the Fed reduced its target rate by 50 basis points for the first time since the rate hikes began. Stock selection within the information technology, health care, and communication services sectors, particularly during the second quarter of 2024, had a negative impact on performance. Active risk in the portfolio was around 1% at September month-end, within the target range. Most of the active risk contribution came from stock specific factors, as intended.

[#]Overweight position - held more exposure than the benchmark index.

[⊖]Underweight position - held less exposure than the benchmark index.

Most of the Fund's underperformance came from the health care, information technology and communication services sectors. The weak performance of the information technology sector can be partially attributed to the overweight position in Intel Corporation, which detracted 15 basis points, and an underweight position in Broadcom Inc, which detracted 17 bps. Similarly, security selection within the health care and communication services sectors was detractive. Regarding the Consumer Discretionary sector, the Fund held an overweight position in Best Buy Inc, which contributed 27 basis points to active performance. Within materials, the overweight in CRH Public Limited Plc was the strongest contributor, adding 17 basis points.

The following table details the significant active positions, where the Fund was overweight (held more exposure than the benchmark index and underweight (held less exposure than the benchmark index), as at 30 September 2024:

Fund performance review and activity

Since the Fund's inception on 21 May 2024 to 30 September 2024, the Fund's performance return was 8.78% and the active return was 0.13%, outperforming its benchmark index which returned 8.65% (active return is the difference between the Fund's return and the benchmark index).

Emerging markets delivered broadly positive returns during the period considered, outperforming most of their developed markets peers in the third quarter of 2024. The returns were influenced by the Chinese government's announcement of an economic stimulus at the end of September. This announcement led to all major Chinese indices delivering double-digit returns, marking their best-performing week since 1998. Positive contributions came from Chinese and Taiwanese stocks. Indian stocks dragged the active performance of the Fund, which had exposure to Indian markets through index futures only. The sector attribution shows that stock selection within financials contributed positively. Active risk in the portfolio was around 1% at September month-end and within the target range. Most of the active risk contribution come from stock specific factors, as intended.

Within financials, stock selection contributed 25 basis points to active performance. For example, an overweight in Fubon Financial Holding Ltd, driven by a positive BSI Intel score, added 32 basis points. Similarly, Geely Automobile Holdings Ltd, a consumer discretionary company, added 16 basis points. The Fund held an overweight in Walmart De Mexico V, which detracted 16 basis points and explains most of the underperformance within the consumer staples sector.

The following table details the significant active positions, where the Fund was overweight (held more exposure than the benchmark index and underweight (held less exposure than the benchmark index), as at 30 September 2024:

Fund performance review and activity

Since inception to end 30 September 2024, the Fund's performance return was 4.62% and the active return was 0.13%, outperforming its benchmark index which returned 4.49% (active return is the difference between the Fund's return and the benchmark index return).

Since inception of the Fund to end 30 September 2024, investment grade corporate credit spreads have been drifting tighter. This has positively impacted Fund returns. Spread moves were largely supported by favourable technicals through strong investor demand for attractive all-in-yields as well as primary market issuances that were well absorbed during this period. During this period, rates have generally rallied which has also been supportive of Fund returns.

Since inception of the Fund the following were the largest contributors to and detractors from the Fund's return relative to the benchmark index:

Fund performance review and activity (continued)

Overweight positions in government related agency and local authority debt contributed to returns as did overweight rates positioning particularly in the US. While overweights in electric utilities added to returns, underweights to water utilities and natural gas detracted. Underweights to industrial sectors like consumer non-cyclicals, transportation, technology and capital goods also detracted from returns.

The following table details the significant active positions, where the Fund was overweight (held more exposure than the benchmark index and underweight (held less exposure than the benchmark index, as at 30 September 2024 and 31 May 2024).

Fund performance review and activity

From inception to 30 September 2024, the Fund's active return was 0.06%, underperforming its benchmark index (active return is the difference between the Fund's return and the benchmark index).

On the back of cooling inflation and central banks cutting rates, credit performed strongly over the quarter. Following the Fed's 50 basis points rate cut at its September meeting, China indicated significant demand stimulus measures. Concurrently, softer economic data from Europe suggests that the ECB may increase their cadence of rate cuts, whilst Japan's new Prime Minister is expected to continue the Bank of Japan's policy normalisation.

The Fund held overweights in technology, capital goods and insurance whereas underweights were primarily concentrated in communication, transportation and banking sub-sectors.

Since the inception date the following were the largest contributors to and detractors from the Fund's return relative to the benchmark index:

Largest contributors		Largest detractors	
Maturity bucket	Effect on Fund return	Maturity bucket	Effect on Fund return
Technology [#]	0.22%	Electric [⊘]	(0.09%)
Capital goods [#]	0.15%	Transportation [⊘]	(0.04%)

[#]Overweight position - held more exposure than the benchmark index.

[⊘]Underweight position - held less exposure than the benchmark index.

Overweight within selected technology and capital goods issuers added to performance whilst underweight allocations to selected electric and transportation names detracted.

NOTES TO THE FINANCIAL STATEMENTS

1. General information

The Entity is structured as an Irish collective asset-management vehicle and is authorised by the CBI and is governed by the provisions of the UCITS Regulations with its registered office at 1-2 Victoria Buildings, Haddington Road, Dublin 4, Ireland.

2. Significant accounting policies

2.1 Basis of preparation

The financial statements of the Entity are prepared in accordance with Financial Reporting Standard 104 Interim Financial Reporting ("FRS 104") applicable in the United Kingdom and Republic of Ireland. The principal accounting policies and estimation techniques are consistent with those applied to the previous annual financial statements. All amounts have been rounded to the nearest thousand, unless otherwise indicated.

3. Financial risks

Each Fund's investment activities expose it to the various types of risk which are associated with the financial instruments and markets in which it invests. The risks are substantially consistent with those disclosed in the previous annual financial statements.

3.1 Market risk arising from price risk

Price risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting similar financial instruments traded in the market. Local, regional or global events such as war, acts of terrorism, the spread of infectious illness or other public health issue, recessions, or other events could have a significant impact on each Fund and the market price of its investments.

4. Fair value hierarchy

Each Fund classifies financial instruments measured at fair value using a fair value hierarchy. The fair value hierarchy has the following categories:

Level 1: The unadjusted quoted price in an active market for identical assets or liabilities that the entity can access at the measurement date.

Level 2: Inputs other than quoted prices included within Level 1 that are observable (i.e. developed using market data) for the asset or liability, either directly or indirectly. This category includes instruments valued using: quoted market prices in active markets for similar instruments; quoted prices for identical or similar instruments in markets that are considered less than active; or other valuation techniques where all significant inputs are directly or indirectly observable from market data.

Level 3: Inputs are unobservable (i.e. for which market data is unavailable) for the asset or liability. This category includes all instruments where the valuation techniques used include inputs not based on market data and these inputs could have a significant impact on the instrument's valuation. This category also includes instruments that are valued based on quoted prices for similar instruments where significant entity determined adjustments or assumptions are required to reflect differences between the instruments and instruments for which there is no active market.

Specific valuation techniques used to value financial instruments classified as level 2 and level 3 include:

- (i) for debt and equity instruments, the use of quoted market prices or dealer quotes for similar instruments;
- (ii) for investments which are a share of participation in an investee collective investment scheme ("CIS") and investments in ETFs where the Fund typically trades the units held at the latest NAV for that ETF, are valued at the unaudited NAV, and where available the independently audited NAV, on the valuation date of such unit of participation as calculated by the administrator of the investee CIS and ETF and in accordance with the requirements of the scheme of which the relevant investment is a share of participation. The unaudited NAV of the underlying investee CIS and ETF is reflected gross of any redemption costs which may potentially arise upon redemption from the underlying CIS and ETF. The unaudited NAV of the underlying investee CIS and ETF may be subject to adjustments upon issuance of their respective independently audited financial statements and such adjustments may be material to the Fund's financial statements;
- (iii) for foreign equities, using independent fair value adjustment factors to reflect the difference between the last market close and the valuation point of each Fund;
- (iv) for defaulted debt instruments, the use of recent transactions and defaulted equity instruments for which market data is unavailable;
- (v) for interest rate swaps, the present value of the estimated future cash flows based on observable yield curves;
- (vi) for total return swaps, the value of the estimated cash flows based on the market value of the underlying reference asset/s or index at the balance sheet date;
- (vii) for inflation swaps, the present value of the estimated future cash flows based on observable yield curves. Certain zero coupon inflation swaps may be valued using a single quote from the swap counterparty, where the model and inputs are not market observable.
- (viii) for foreign currency forwards, present value of future cash flows based on the forward exchange rates at the balance sheet date;

NOTES TO THE FINANCIAL STATEMENTS (continued)

4. Fair value hierarchy (continued)

(ix) for SPAC PIPE commitments, the use of underlying quoted market prices and application of discounts for lack of marketability, volatility and deal probabilities;

(x) for foreign currency options, option pricing models; and

(xi) for other financial instruments, discounted cash flow analysis.

All of the resulting fair value estimates are included in level 2 except for unlisted equity securities, a contingent consideration receivable and certain derivative contracts, where the fair values have been determined based on present values and the discount rates used were adjusted for counterparty or own credit risk.

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

The determination of what constitutes 'observable' inputs requires significant judgement. The Directors consider observable inputs to be market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

Irish tax

Under current law and practice, the Entity qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. On that basis it is not chargeable to Irish tax on its income or gains. However, Irish tax may arise on the occurrence of a 'chargeable event'. A chargeable event includes any distribution payments to shareholders or any encashment, redemption, cancellation or transfer of shares and the holding of shares at the end of each eight year period beginning with the acquisition of such shares.

No Irish tax will arise on the Entity in respect of chargeable events in respect of:

- A shareholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997, as amended, are held by the Entity; or the Entity has been authorised by the Irish Revenue to make gross payments in the absence of appropriate declarations; and
- Certain exempted Irish tax resident shareholders who have provided the Entity with the necessary signed annual declarations; and
- Any transaction (which might otherwise be a chargeable event) in relation to shares held in a recognised clearing system as designated by order of the Irish Revenue Commissioners (such as CREST) will not constitute a chargeable event. It is the current intention of the Directors that all the shares in the Entity will be held in CREST or another recognised clearing system.

Overseas tax

Dividends, interest and capital gains (if any) received on investments made by the Entity may be subject to withholding taxes imposed by the country from which the investment income/gains are received, and such taxes may not be recoverable by the Entity or its shareholders.

For financial reporting purposes, and in accordance with FRS 102, the Entity must recognise a provision for deferred tax payable arising from material timing differences between the taxation of unrealised gains in the financial statements and actual realisable taxable profits.

The Organisation for Economic Co-operation and Development ("OECD") issued model rules for a new global minimum tax framework ("Pillar Two") which is effective for accounting periods beginning on or after 31 December 2023. As at the period end, the Entity is still currently assessing whether the Funds is in the scope of Pillar Two as well as the potential exposure, if any, to Pillar Two income taxes.

Holdings in other funds managed by BlackRock/BlackRock affiliates

Investments in funds managed by BlackRock, Inc. and investments that are BlackRock affiliates are listed below and marked on the relevant Funds' schedules of investments. For underlying funds which are subject to investment management fees, these have been rebated back to the Fund.

The Entity invested in the following funds which are also managed by the Manager. For income earned on these related party funds please refer to the operating income. Further information on the fees charged from investing in these underlying funds is presented in the table below. These disclosed fees are the maximum charges capped as per the prospectus of the underlying funds and actual fees charged may be lower:

Investments	Fee paid by Fund
Investment Company – UCITS authorised in Ireland by CBI	
<i>BlackRock ICS Euro Liquid Environmentally Aware Fund</i>	<i>Annual expense capped at 0.03% of NAV¹</i>

¹The Manager of these investments will be responsible for discharging from its fee the annual expenses of the Funds. Where actual fees and costs incurred exceed the amount paid to the Manager, the excess will be discharged by the Manager from its own assets.

All related party transactions were carried out at arm's length in the ordinary course of business. The terms and returns received by the related parties in making the investments were no more favourable than those received by other investors investing into the same share classes.

Significant investors

As at 30 September 2024 and 31 March 2024, there were no shares of any Fund held by any subsidiaries, other related parties of the BlackRock Group or funds managed by the Manager and any Fund did not have any shareholders with voting rights of 20% or more.

No provisions have been recognised by the Funds against amounts due from related parties at the financial period end date (31 March 2024: Nil).

No amounts have been written off during the financial period in respect of amounts due to or from related parties (31 March 2024: Nil).

No commitments secured or unsecured or guarantees have been entered into with related parties during the financial period (31 March 2024: Nil).

11. Credit facility

The Funds entered into a credit facility with JPMorgan Chase Bank, N.A. ("JPMorgan") whereby JPMorgan, together with other syndicated lenders, made a portion of a USD 2.150 billion credit facility available to the Funds. The portion of the USD 2.150 billion credit facility will be allocated to the Funds based on the credit facility agreement dated 19 April 2024. This credit facility will be utilised by the Funds for temporary funding purposes, including, without limitation, the funding of investor redemptions. Any interest and commitment fees in relation to drawdowns from such credit facility are paid out of the assets of the Funds. Any new Funds will not automatically be subject to a credit line and will therefore be required to be added by way of a joinder process. This process includes, inter alia, any necessary due diligence being carried out by the lenders in order to approve the addition of the new Funds. During this year, such Funds will not be subject to, or able to draw down on, any credit line. Furthermore, there is no guarantee that the addition of any new Funds will be approved by the lenders, or that credit will be available to a Fund since the credit line is subject to availability (on an equitable allocation basis) between the Funds and other BlackRock Funds participating in the credit agreement. As such, certain Funds may not be subject to the credit line and will not incur any fees with respect to same.

A loan commitment fee is charged on a daily basis in relation to this credit facility. The loan commitment fee is charged at 0.10% on the outstanding balance.

No portion of the credit facility was used during the period from 1 April 2024 to 30 September 2024.

12. Commitments and contingent liabilities

There were no significant commitments or contingent liabilities as at 30 September 2024 and 31 March 2024.

NOTES TO THE FINANCIAL STATEMENTS (continued)

13. Subsequent events

There have been no events subsequent to the financial period end, which, in the opinion of the Directors, may have had an impact on the financial statements for the financial period ended 30 September 2024.

14. Approval date

The financial statements were approved by the Directors on 29 November 2024.

The CBI requires a schedule of material changes in the composition of the portfolio during the financial period. These are defined as aggregate purchases of a security exceeding one per cent of the total value of purchases for the financial period and aggregate disposals greater than one per cent of the total value of sales. At a minimum the largest 20 purchases and 20 sales must be given or all purchases and sales if less than 20. A full listing of the portfolio changes for the financial period is available, upon request, at no cost from the Administrator.

The CBI requires a schedule of material changes in the composition of the portfolio during the financial period. These are defined as aggregate purchases of a security exceeding one per cent of the total value of purchases for the financial period and aggregate disposals greater than one per cent of the total value of sales. At a minimum the largest 20 purchases and 20 sales must be given or all purchases and sales if less than 20. A full listing of the portfolio changes for the financial period is available, upon request, at no cost from the Administrator.

The CBI requires a schedule of material changes in the composition of the portfolio during the financial period. These are defined as aggregate purchases of a security exceeding one per cent of the total value of purchases for the financial period and aggregate disposals greater than one per cent of the total value of sales. At a minimum the largest 20 purchases and 20 sales must be given or all purchases and sales if less than 20. A full listing of the portfolio changes for the financial period is available, upon request, at no cost from the Administrator.

The CBI requires a schedule of material changes in the composition of the portfolio during the financial period. These are defined as aggregate purchases of a security exceeding one per cent of the total value of purchases for the financial period and aggregate disposals greater than one per cent of the total value of sales. At a minimum the largest 20 purchases and 20 sales must be given or all purchases and sales if less than 20. A full listing of the portfolio changes for the financial period is available, upon request, at no cost from the Administrator.

Securities lending

All securities lending transactions entered into by each Fund are subject to a written legal agreement between each Fund and the securities lending agent, BlackRock Investment Management (UK) Limited, a related party to the Entity, and separately between the securities lending agent and the approved borrowing counterparty. Collateral received in exchange for securities lent is transferred under a title transfer arrangement and is delivered to and held in an account with a tri-party collateral manager in the name of the Depositary on behalf of each Fund. Collateral received is segregated from the assets belonging to each Fund's Depositary or the securities lending agent.

All securities lending transactions entered into by each Fund are subject to a written legal agreement between each Fund and the securities lending agent, BlackRock Investment Management (UK) Limited, a related party to the Entity, and separately between the securities lending agent and the approved borrowing counterparty. Collateral received in exchange for securities lent is pledged and held in an account with a tri-party collateral manager in the name of the Depositary on behalf of each Fund. Collateral received is segregated from the assets belonging to each Fund's Depositary or the securities lending agent.

The following table details the value of securities on loan as a proportion of each Fund's total lendable assets and NAV as at 30 September 2024 and the income earned for the period ended 30 September 2024. Total lendable assets represent the aggregate value of assets forming part of a Fund's securities lending programme. This excludes any assets held by the Fund that are not considered lendable due to any market, regulatory, investment or other restriction.
