BLACKROCK INDEX SELECTION FUND

BACKGROUND

BlackRock Index Selection Fund (the "Entity") is an open-ended unit trust established on 27 February 1996 as an umbrella fund under the laws of Ireland. The Entity was constituted by the Trust Deed dated 27 February 1996 between BlackRock Asset Management Ireland Limited (the "Manager") and J.P. Morgan Bank (Ireland) plc (the "Trustee") and is governed by an amended and restated Trust Deed dated 4 December 2009 and any deeds supplemental thereto. The Entity is authorised as a unit trust with segregated liability between the funds pursuant to the Unit Trusts Act, 1990 (the "Act"). The Entity is authorised and supervised by the Central Bank of Ireland ("CBI") pursuant to the provisions of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) (the "UCITS Regulations").

The Entity is constituted as an umbrella fund and comprises of separate funds ("Fund") of the Entity. The units of each Fund may be grouped into different classes of units (each a "unit class"). Each Fund will represent a separate portfolio of assets and may consist of one or more unit classes. Each unit class may apply different subscription and redemption provisions, charges, fees or brokerage arrangements. The creation of an additional class of units will be notified to the CBI in advance. The portfolio of assets maintained for each Fund will be invested in accordance with the investment objectives and policies applicable to each Fund as set out in the prospectus and supplement. The assets of each Fund shall belong exclusively to that Fund, shall be segregated from the assets of other Funds, shall not be used to discharge directly or indirectly the liabilities of or claims against any other Fund and shall not be available for any such purpose.

The term "Fund" shall be deemed to mean either a Fund or Funds of the Entity, or if the context so requires, the Manager or its delegate acting for the accounts of the relevant Fund. The term "BlackRock" and "Investment Manager" are used to represent BlackRock Advisors (UK) Limited as appropriate. All references to "redeemable units" shall be deemed to mean redeemable participating units when Fund units are classified as financial liabilities. The term "Directors" means the directors of the Manager.

Further details, including the investment objectives and minimum subscription requirements, are set out in the Entity's prospectus and supplement.

Changes to the Entity during the financial period

On 9 July 2020, the Sterling (Hedged) D Distributing Class was launched for the iShares Developed Real Estate Index Fund (IE).

On 9 September 2020, an updated prospectus was issued for the Entity to facilitate the following changes:

- iShares Developed World ex Tobacco Index Fund (IE) changed its benchmark index from MSCI World ex Tobacco ex Controversial Weapons Index to MSCI World ESG Screened Index.
- iShares Developed World ex Tobacco Index Fund (IE) changed its name to iShares Developed World ESG Screened Index Fund (IE).

On 24 September 2020, the US Dollar Institutional Distributing Class was relaunched for the iShares Europe Index Fund (IE).

On 9 October 2020, the Singapore Dollar (Hedged) Flexible Accumulating Class was launched for the iShares Developed World Index Fund (IE).

On 2 November 2020, a new supplement was issued for the Entity to facilitate the approval of iShares Emerging Market Screened Equity Index Fund (IE) by the CBI.

On 5 November 2020, Justin Mealy was appointed as an executive director to the Manager.

Fund details

The Entity had 14 Funds in operation as at 30 November 2020.

United Kingdom exit from European Union

On 31 January 2020, the United Kingdom (the "UK") formally withdrew and ceased being a member of the European Union (the "EU"). Following this, the UK entered into a transition period which lasted for the remainder of 2020, during which period the UK was subject to applicable EU laws and regulations. The transition period expired on 31 December 2020, and EU law no longer applies in the UK.

On 30 December 2020, the UK and the EU signed an EU-UK Trade and Cooperation Agreement ("UK/EU Trade Agreement"), which applies from 1 January 2021 and sets out the foundation of the economic and legal framework for trade between the UK and the EU. As the UK/EU Trade Agreement is a new legal framework, the implementation of the Agreement may result in uncertainty in its application and periods of volatility in both the UK and wider European markets throughout 2021 and beyond. The UK's exit from the EU is expected to result in additional trade costs and disruptions in this trading relationship. While the UK/EU Trade Agreement provides for the free trade of goods, it provides only general commitments on market access in services together with a "most favoured nation" provision which is subject to many exceptions. Furthermore, there is the possibility that either party may impose tariffs on trade in the future in the event that regulatory standards between the EU and the UK diverge. The terms of the future relationship may cause continued uncertainty in the global financial markets, and adversely affect the performance of the Funds.

Volatility resulting from this uncertainty may mean that the returns of the Funds' investments are affected by market movements, the potential decline in the value of Sterling or Euro, and the potential downgrading of sovereign credit ratings of the UK or an EU member state.

Outbreak of COVID-19

An outbreak of an infectious respiratory illness caused by a novel coronavirus known as COVID-19 was first detected in China in December 2019 and has now developed into a global pandemic. The impact of this significant event on the Funds' financial risk exposure is disclosed in Note 3.1.

The Manager has assessed the impact of market conditions arising from the COVID-19 outbreak on the Funds' ability to meet their investment objectives. Based on the latest available information, the Funds continue to be managed in line with their investment objectives, with no disruption to the operations of the Funds and the publication of Net Asset Values ("NAV").

BLACKROCK INDEX SELECTION FUND

INVESTMENT MANAGER'S REPORT

Investment objective

BlackRock Market Advantage Strategy Fund

The investment objective of the Fund is to seek to provide a total return, taking into account both capital and income returns over the long-term. This objective will be effected through strategic exposure to multiple asset classes which, through diversification, is expected to generate growth with comparatively lower risk than exposure to worldwide equities alone.

iShares Developed Real Estate Index Fund (IE)

The investment objective of the Fund is to provide unitholders with a total return, taking into account both capital and income returns, which reflects the total return of the FTSE EPRA/NAREIT Developed Index, the Fund's Benchmark Index.

iShares Developed World ESG Screened Index Fund (IE)

The investment objective of the Fund is to provide a total return, taking into account both capital and income returns, which reflects the total return of the developed world equity markets excluding companies that are involved in or generate a majority of their revenue and income from activities that may have a detrimental impact from the environmental, social and governance ("ESG") perspective.

iShares Developed World Index Fund (IE)

The investment objective of the Fund is to provide a total return, taking into account both capital and income returns, which reflects the total return of the developed world equity markets.

iShares Edge EM Fundamental Weighted Index Fund (IE)

The investment objective of the Fund is to provide a total return, taking into account both capital and income returns, which reflects the total return of the global emerging equity market.

iShares Emerging Markets Index Fund (IE)

The investment objective of the Fund is to provide a total return, taking into account both capital and income returns, which reflects the total return of the global emerging equity market.

iShares EMU Index Fund (IE)

The investment objective of the Fund is to provide a total return, taking into account both capital and income returns, which reflects the total return of the equity market in the European Economic and Monetary Union (the "EMU").

iShares Europe ex-UK Index Fund (IE)

The investment objective of the Fund is to provide a total return, taking into account both capital and income returns, which reflects the total return of the equity market in Europe apart from the UK.

iShares Europe Index Fund (IE)

The investment objective of the Fund is to provide a total return, taking into account both capital and income returns, which reflects the total return of the European equity market.

iShares Japan Index Fund (IE)

The investment objective of the Fund is to provide a total return, taking into account both capital and income returns, which reflects the total return of the equity market in Japan.

iShares North America Index Fund (IE)

The investment objective of the Fund is to provide a total return, taking into account both capital and income returns, which reflects the total return of the equity market in the United States and Canada.

iShares Pacific Index Fund (IE)

The investment objective of the Fund is to provide a total return, taking into account both capital and income returns, which reflects the total return of the equity market in the Pacific Rim, excluding Japan.

iShares UK Index Fund (IE)

The investment objective of the Fund is to provide a total return, taking into account both capital and income returns, which reflects the total return of the equity market in the UK.

iShares US Index Fund (IE)

The investment objective of the Fund is to provide a total return, taking into account both capital and income returns, which reflects the total return of the equity market in the United States.

¹ For physically replicating funds, the investment management approach is to buy a portfolio of securities that as far as practicable consist of the securities that make up the benchmark index, in similar proportion to the weights represented in the benchmark index over a defined period of time. For non-replicating funds, the investment management approach aims to match the main risk characteristics of the benchmark index by investing in a portfolio that is primarily made up of securities that represent the benchmark index. The objective is to generate a return which is as close as practicable to the total return of the benchmark index net of transaction costs and gross of fees and other cost.

² No performance measure is calculated for this Fund.

Performance summary and tracking error

The following table compares the realised Fund performance against the performance of the relevant benchmark index/performance measure during the financial period ended 30 November 2020. It also discloses the anticipated tracking error of the Fund (disclosed in the prospectus on an ex-ante basis) against the actual realised tracking error of the Fund as at 30 November 2020.

Further information on these performance measures and calculation methodologies used is detailed below:

- Fund returns disclosed are the performance returns for the primary unit class for each Fund, net of fees, which has been selected as a representative unit class. The primary unit class represents the class of unit invested in by the majority of investors in the Fund and also takes into account other relevant factors such as the Fund's base currency. The returns disclosed for the comparative are in the same currency as the primary unit class, unless otherwise stated. Performance returns for any other unit class can be made available on request.
- Fund returns are based on the NAV calculated in accordance with the prospectus for the financial period under review with any dividends reinvested. Due to Financial Reporting Standard 104 Interim Financial Reporting ("FRS 104") requirements which apply to the financial statements, there may be differences between the NAV per unit as recorded in the financial statements and the NAV per unit calculated in accordance with the prospectus.
- Each Fund's total expense ratio ("TER") is accrued on a daily basis throughout the financial period, which can impact the measurement of a tracking error in a positive or negative manner depending on the performance in the market and the TER rate applied. The extent and magnitude of this effect on performance measurement is subject to the timing of the market performance relative to the performance period of the Fund and can be greater than the headline TER in a positive market and lower than the TER in a negative market. The TER expresses the sum of all fees, operating costs and expenses, with the exception of direct trading costs, charged to each Fund's assets as a percentage of the average Fund assets based on a twelve-month period ended 30 November 2020.
- Anticipated tracking error is based on the expected volatility of differences between the returns of a fund and the returns of its benchmark index.
- Realised tracking error is the annualised standard deviation of the difference in monthly returns between a fund and its benchmark index. Tracking error shows the consistency of the returns relative to the benchmark index over a defined period of time. The realised tracking error is annualised and calculated using data from the preceding 36 month observation period. Where a Fund has not been trading for 36 months, the annualised tracking error since inception has been presented.

BLACKROCK INDEX SELECTION FUND

INVESTMENT MANAGER'S REPORT (continued)

Global economic overview

Global equities, as represented by the MSCI All Country World Index ("ACWI") (in US Dollar terms), posted a return of 22.29% for the six months ended 30 November 2020. The period was characterised by recovery from the sharp decline in financial markets that followed the emergence and spread of the COVID-19 in early 2020. As countries adapted to the restrictions and behavioural changes necessitated by the pandemic, economies began to re-open and most commercial activity resumed. For the first half of the reporting period, equities gained substantially amid aggressive policy responses from governments and central banks and new treatments for COVID-19. In early September 2020, some indices surpassed pre-pandemic highs, even as economic data indicated substantial weakness. While stocks gave back some of those gains throughout September and October 2020, news that multiple vaccines had shown high effectiveness rates and were ready to be put into production reassured investors and provided a strong boost to equities in the period's final month.

Prior to the beginning of the reporting period, driven by the COVID-19 outbreak, bond performance diverged significantly based on credit quality, as investors sought out higher-rated bonds in the face of uncertainty. However, the US Federal Reserve's (the "Fed") implementation of an unprecedented corporate bond purchasing facility provided significant support to US corporate bond prices. Consequently, the reporting period saw a reversal of the flight from risk as investor appetite for corporate bonds, particularly lower-quality, higher-yield bonds, increased substantially. As a result, corporate bonds posted a positive performance, with returns for high-yield bonds notably outpacing investment-grade bonds.

Demand was also high for treasuries, even as issuance increased to fund deficit spending. However, yields on treasury bonds stayed near historic lows throughout the reporting period, resulting in modestly negative returns.

Stocks in emerging markets posted a remarkable advance for the reporting period. These stocks were initially among the most affected by the outbreak of COVID-19 pandemic, as lockdowns and factory closures in China weighed on Chinese markets. Many of the emerging Asian economies that have substantial trade with China also suffered significant supply and demand shocks. However, emerging market equities rebounded sharply as infection rates slowed and economies reopened, and China reported economic data indicating a strong recovery. Emerging market bond prices posted a solid return for the 6-month period, advancing due to optimism about the pace of the economic recovery.

In the commodities market, gold prices rose, touching an all-time high in August 2020 as investors sought alternative stores of value amid a large increase in the money supply. Oil prices, which had fallen sharply at the onset of the pandemic, advanced as the prospects for continued economic growth improved.

Looking at currencies, the US Dollar declined against most global currencies, reflecting unprecedented monetary stimulus, record low interest rates, and the continued spread of COVID-19 infections in the US. The Euro, the Sterling, the Japanese yen, and the Swiss franc all advanced against the US Dollar.

Economic conditions at the beginning of the reporting period were substantially weakened by the travel and business restrictions put in place to counteract COVID-19. This disruption led to a significant economic contraction, although economic stimulus, adaptation, and the resumption of economic activity meant improving conditions for the duration of the reporting period. The economies of the US, Eurozone, and Japan all shrank significantly in the second quarter of 2020 before returning to growth in the third quarter. The Chinese economy rebounded sooner than most, growing throughout the reporting period and providing support for the region's recovery.

Governments responded to the economic slowdown with both fiscal and monetary stimulus. The US made substantial stimulus payments to businesses and individuals, and many other countries around the world also provided fiscal stimulus to boost their economies. The Fed maintained short-term interest rates near zero, and along with other influential central banks, implemented a major bond-buying program to stabilise debt markets. The Fed further committed to a near-zero interest rate policy through 2022 in a bid to promote longer-term economic expansion.

Fund performance review and activity

BlackRock Market Advantage Strategy Fund

Over the six-month period to 30 November 2020, the Fund's return was 10.39%.

The Fund's managers invest strategically across a broad spectrum of assets (such as shares and bonds) using a 'risk factor' approach. This is based on their view that six macroeconomic ('macro') factors drive risk and return in markets: economic growth (captured through developed market stocks, real estate and commodities), real rates (inflation-linked bonds), inflation (break-even inflation rates – a measure of inflation expectations relating to the difference between the yields of inflation-linked and nominal bonds), credit (high yield and investment grade bonds), emerging markets (emerging market shares and bonds) and liquidity (small-cap stocks).

The Fund's positive performance was driven primarily by exposure to five of the six macro factors: economic growth, real rates, emerging markets, liquidity and credit. As shown by the table below, the Inflation factor was the sole negative detractor.

During the six-month period the following were the largest contributors to and detractors from the Fund's return:

Largest contributors		Largest detractors	
Macro factor	Effect on Fund return	Macro factor	Effect on Fund return
Economic	+6.18%	Inflation	(4.58%)
Real Rates	+4.57%		
Emerging	+1.84%		
Liquidity	+1.61%		
Credit	+0.78%		

BLACKROCK INDEX SELECTION FUND

INVESTMENT MANAGER'S REPORT (continued)

Fund performance review and activity (continued)

BlackRock Market Advantage Strategy Fund (continued)

The strategy has delivered strong returns over the summer as markets recovered from one of the sharpest and deepest drawdowns in history, experienced in March. The support of sizable stimulus measures from central banks and governments globally, coupled with the easing of lockdown measures in areas such as Europe, boosted investor sentiment. Economic data improved substantially from the lows, but as we entered into September, faster-moving indicators showed that the rate of improvement may be slowing. The strategy finished the reporting period with significant gains. Lower uncertainty following the US election and announcements by three different drug makers around a breakthrough for an effective COVID-19 vaccine gave investors confidence on future economic growth.

The economic growth factor rallied and was the largest contributor to returns over the reporting period. This was off the back of news of economies reopening sooner than expected, monetary and fiscal policy continuing to provide support and the encouraging vaccine news. Developed equities were the largest contributor to factor returns as the vaccination announcements drove double-digit gains across developed market equity indices. Meanwhile, commodities were the second largest contributor within the factor as a weaker US Dollar and strong Chinese demand drove solid gains across sectors, with oil prices staging a recovery from earlier losses.

The real rates factor was additive over the reporting period as global central banks continued to deliver unprecedented levels of stimulus. All inflation-linked bond markets represented in the factor positively contributed, led by US TIPS (Treasury Inflation Protected Securities) then followed by Australian and Canadian linkers.

The emerging factor also made a positive contribution with strong relative performance across emerging equities and debt exposures. Emerging equities outperformed their developed market counterparts as many developing countries have been successful in containing the COVID-19 pandemic. Macro data confirmed that China's economy is operating at levels seen before the pandemic and the country is further ahead in the recovery process compared to its Western counterparts. Strong demand for China's exports and healthy domestic spending has been driving the Chinese economy, leading to growth rates well above those seen in other countries. Emerging local rates and US Dollar-denominated debt were also beneficial to the factor.

The liquidity factor recorded positive performance as gains from the factor's volatility selling strategies were accompanied by the relative outperformance of small-cap equities vs their large-cap counterparts. The Russell 2000 Index hit a new all-time high in November, posting its largest monthly gain ever as the rotation away from recent "stay-at-home" tech winners and into traditional pro-cyclicals benefited small-cap stocks.

The increasingly hopeful tone during the summer months, central bank support and the search for yield benefitted to the credit factor as investors turned to more pro-cyclical and higher-yielding exposures. While government bond yields (which move inversely to prices) were stable, credit spreads (the difference in yield between US treasuries and lower-rated bonds) narrowed across both investment grade and high yield markets – leading to positive returns.

While government bond yields remained near all-time lows, we have slowly witnessed break-even inflation rates move gradually higher as investors have become more optimistic on the growth outlook. Nominal bonds underperformed their inflation-linked counterparts in the majority of markets, driving a negative return for the inflation factor.

The following table details the significant portfolio weightings at 30 November 2020 and 31 May 2020:

30 November 2020		31 May 2020	
Asset class	Weighting	Asset class	Weighting
Developed Market Sovereign Debt	36.27%	Developed Market Sovereign Debt	31.70%
Emerging Market Sovereign Debt	24.12%	Emerging Market Sovereign Debt	25.10%
Investment Grade Debt	16.64%	Inflation Linked Debt	17.10%
Inflation Linked Debt	5.14%	Investment Grade Debt	10.20%
High Yield Debt	4.75%	High Yield Debt	2.65%
Emerging Market Equities	3.59%	Commodities	3.95%
Commodities	3.55%	Emerging Market Equities	3.66%
Developed Equities	2.20%	Developed Equities	2.13%
Developed Small Cap Equities	1.78%	Developed Small Cap Equities	1.91%
Volatility	1.27%	Volatility	0.81%
Property	0.71%	Property	0.74%

The real rates factor (e.g. inflation-linked bonds) is currently signaling an extreme valuation of 3 standard deviations rich compared to historical levels. While valuations for the factor have appeared relatively rich over the past few years (around 1-2 standard deviations), it is now at its most expensive level in almost a decade. In response in September, we have reallocated 5% risk from real rates into the remaining factors pro-rata, except for the inflation factor.

BLACKROCK INDEX SELECTION FUND

NOTES TO THE FINANCIAL STATEMENTS

1. General information

The Entity is an open-ended unit trust domiciled and incorporated under the laws of Ireland as a unit trust. The Entity is authorised by the CBI and is governed by the provisions of the UCITS Regulations.

2. Significant accounting policies

2.1 Basis of preparation

The financial statements of the Entity are prepared in accordance with FRS 104 applicable in the United Kingdom and Republic of Ireland. The principal accounting policies and estimation techniques are consistent with those applied to the previous annual financial statements.

All amounts have been rounded to the nearest thousand, unless otherwise indicated.

2.2 Changes in accounting presentation

2.2.1 Nature of change in presentation

Cash equivalents

Investments in low volatility net asset value money market funds, are now classified as "Cash equivalents" on the condensed Balance Sheet rather than "Financial assets at fair value through profit or loss".

2.2.2 Reasons for change in presentation

Cash equivalents

Investments in low volatility net asset value money market funds by their nature are more appropriately classified as a cash equivalent as it more accurately reflects the economic substance of these transactions. The change had no impact on the NAV of the Fund.

The application of this change in presentation has resulted in a reclassification which increased the value of "Cash equivalents" and decreased the value of "Financial assets at fair value through profit or loss" on the condensed Balance Sheet as per the table below.

Fund name	Currency	Condensed Balance Sheet amount reclassified '000	
		30 November 2020	31 May 2020
BlackRock Market Advantage Strategy Fund	EUR	341,199	359,517

3. Financial risks

Each Fund's investment activities expose it to the various types of risk which are associated with the financial instruments and markets in which it invests. The risks are substantially consistent with those disclosed in the previous annual financial statements with the exception of those outlined below.

3.1 Market risk arising from price risk

Price risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting similar financial instruments traded in the market. Local, regional or global events such as war, acts of terrorism, the spread of infectious illness or other public health issue, recessions, or other events could have a significant impact on each Fund and market prices of its investments.

An outbreak of an infectious respiratory illness caused by a novel coronavirus known as COVID-19 was first detected in China in December 2019 and has now developed into a global pandemic. This coronavirus has resulted in travel restrictions, closed international borders, enhanced health screenings at ports of entry and elsewhere, disruption of and delays in healthcare service preparation and delivery, prolonged quarantines, cancellations, supply chain disruptions, and lower consumer demand, as well as general concern and uncertainty. The impact of COVID-19 has adversely affected the economies of many nations across the entire global economy, individual issuers and capital markets, and could continue to extents that cannot necessarily be foreseen. In addition, the impact of infectious illnesses in emerging market countries may be greater due to generally less established healthcare systems. Public health crises caused by the COVID-19 outbreak may exacerbate other pre-existing political, social and economic risks in certain countries or globally. The duration of the COVID-19 outbreak and its effects cannot be determined with certainty.

4. Fair value hierarchy

Each Fund classifies financial instruments measured at fair value using a fair value hierarchy. The fair value hierarchy has the following categories:

Level 1: The unadjusted quoted price in an active market for identical assets or liabilities that the entity can access at the measurement date.

Level 2: Inputs other than quoted prices included within Level 1 that are observable (i.e. developed using market data) for the asset or liability, either directly or indirectly. This category includes instruments valued using: quoted market prices in active markets for similar instruments; quoted prices for identical or similar instruments in markets that are considered less than active; or other valuation techniques where all significant inputs are directly or indirectly observable from market data.

Level 3: Inputs are unobservable (i.e. for which market data is unavailable) for the asset or liability. This category includes all instruments where the valuation techniques used include inputs not based on market data and these inputs could have a significant impact on the instrument's valuation. This category also includes instruments that are valued based on quoted prices for similar instruments where significant entity determined adjustments or assumptions are required to reflect differences between the instruments and instruments for which there is no active market.

BLACKROCK INDEX SELECTION FUND

NOTES TO THE FINANCIAL STATEMENTS (continued)

4. Fair value hierarchy (continued)

Specific valuation techniques used to value financial instruments classified as level 2 and/or level 3 include:

- (i) for debt and equity instruments the use of quoted market prices or dealer quotes for similar instruments;
- (ii) for foreign equities, using independent fair value adjustment factors to reflect the difference between the last market close and the valuation point of each Funds;
- (iii) for interest rate swaps, the present value of the estimated future cash flows based on observable yield curves;
- (iv) for foreign currency forwards, present value of future cash flows based on the forward exchange rates at the balance sheet date;
- (v) for foreign currency options, option pricing models; and
- (vi) for other financial instruments, discounted cash flow analysis.

All of the resulting fair value estimates are included in level 2 except for unlisted equity securities, a contingent consideration receivable and certain derivative contracts, where the fair values have been determined based on present values and the discount rates used were adjusted for counterparty or own credit risk.

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

The determination of what constitutes 'observable' inputs requires significant judgement. The Directors consider observable inputs to be market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

Irish tax

Under current law and practice, the Entity qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. On that basis it is not chargeable to Irish tax on its income or gains. However, Irish tax may arise on the occurrence of a 'chargeable event'. A chargeable event includes any distribution payments to unitholders or any encashment, redemption, cancellation or transfer of units and the holding of units at the end of each eight year period beginning with the acquisition of such units.

No Irish tax will arise on the Entity in respect of chargeable events in respect of:

- a) A unitholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997, as amended, are held by the Entity; or the Entity has been authorised by the Irish Revenue to make gross payments in the absence of appropriate declarations; and
- b) Certain exempted Irish tax resident unitholders who have provided the Entity with the necessary signed annual declarations.

Overseas tax

Dividends, interest and capital gains (if any) received on investments made by the Entity may be subject to withholding taxes imposed by the country from which the investment income/gains are received, and such taxes may not be recoverable by the Entity or its unitholders.

For financial reporting purposes, and in accordance with FRS 104, the Entity must recognise a provision for deferred tax payable arising from material timing differences between the taxation of unrealised gains in the financial statements and actual realisable taxable profits.

BLACKROCK INDEX SELECTION FUND

NOTES TO THE FINANCIAL STATEMENTS (continued)

9. Related party transactions

Parties are considered to be related if one party has the ability to control the other party or is able to exercise significant influence over the other party, in making financial or operational decisions.

The following entities were related parties to the Entity during the financial period ended 30 November 2020:

Manager: Promoter, Investment Manager, Distributor and Securities Lending Agent: Sub-Investment Manager: Representative in Switzerland:	BlackRock Asset Management Ireland Limited BlackRock Advisors (UK) Limited BlackRock Institutional Trust Company, N.A. BlackRock Asset Management Switzerland Limited
---	--

The ultimate holding company of the Manager, Investment Manager, Promoter, Distributor, Securities Lending Agent, Sub-Investment Manager and Representative in Switzerland is BlackRock, Inc. a company incorporated in Delaware USA. During the period, PNC Financial Services Group, Inc. ("PNC"), was a substantial shareholder in BlackRock, Inc. PNC did not provide any services to the Entity during the financial periods ended 30 November 2020 and 30 November 2019.

The Investment Manager has sub-delegated certain portfolio management functions to the Sub-Investment Manager presented in table below:

Fund name	Sub-Investment Manager
BlackRock Market Advantage Strategy Fund	BlackRock Institutional Trust Company, N.A.

The Investment Manager will arrange for the fees and expenses of the Sub-Investment Manager to be paid out of the Investment Manager's own fees.

The Directors as at 30 November 2020 are presented in the table below:

Director	Employee of the BlackRock Group	Director of BlackRock affiliates and/or other funds managed by BlackRock
William Roberts	No	Yes
Patrick Boylan	Yes	Yes
Paul Freeman	No	Yes
Justin Mealy	Yes	No
Barry O'Dwyer	Yes	Yes
Adele Spillane	Yes	Yes
Catherine Woods	No	No

The Directors who are also employees of the BlackRock Group are not entitled to receive Directors' fees.

The Entity reimburses the Manager for the portion of fees paid to the Directors on its behalf.

Holdings in other funds managed by BlackRock

Investments in funds managed by BlackRock, Inc. and BlackRock affiliates are listed below and marked on the relevant Fund's schedules of investments. For underlying funds which are subject to investment management or performance fees, these have been rebated back to the Fund.

The Entity invested in the following funds which are also managed by the Manager. Further information on the fees charged from investing in these underlying funds is presented in the table below. These disclosed fees are the maximum charges capped as per the prospectus of the underlying funds and actual fees charged may be lower:

Investments	Fee paid by Fund
Investment Company - UCITS authorised in Ireland by CBI	
BlackRock ICS Euro Liquid Environmentally Aware Fund - Agency (Acc T0) Shares	Annual expense capped at 0.03% of NAV ¹

The CBI requires a schedule of material changes in the composition of the portfolio during the financial period. These are defined as aggregate purchases of a security exceeding one per cent of the total value of purchases for the financial period and aggregate disposals greater than one per cent of the total value of sales. At a minimum the largest 20 purchases and 20 sales must be given or all purchases and sales if less than 20. A full listing of the portfolio changes for the financial period is available, upon request, at no cost from the Administrator.

CALENDAR YEAR PERFORMANCE

The following table summarises the performance on a calendar year basis for each Fund registered for distribution in Switzerland.

The Fund performance figures are based on the NAV calculated in accordance with the prospectus for the calendar year under review with any dividends reinvested. Due to FRS 104 requirements which apply to the financial statements, there may be differences between the NAV per unit as recorded in the financial statements and the NAV per unit calculated in accordance with the prospectus.

The returns disclosed are the performance returns for the primary unit class for each Fund, net of fees, which has been selected as a representative unit class. The primary unit class represents the class of unit invested in by the majority of investors in the Fund and also takes into account other relevant factors such as the Fund's base currency. Performance returns for any other unit class can be made available on request.

CALENDAR YEAR PERFORMANCE (CONTINUED)

Past performance is not a guide to future performance and should not be the sole factor of consideration when selecting a product. All financial investments involve an element of risk. Therefore, the value of your investment and the income from it will vary and your initial investment amount cannot be guaranteed. The performance figures do not consider charges and fees that may be levied at the time of subscription or redemption of units. Levels and bases of taxation may change from time to time.

¹TER disclosed is the synthetic TER in line with Swiss Funds & Asset Management Association ("SFAMA") requirements.

TRANSACTIONS WITH CONNECTED PERSONS

In accordance with the requirements of the CBI, the Manager shall ensure that any transactions carried out between each Fund and the Manager or Trustee to a Fund, the delegates or sub-delegates of the Manager or Trustee (excluding any non-group company sub-custodians appointed by a Trustee) and any associated or group company of the Manager, Trustee, delegate or sub-delegate ("Connected Persons") must be conducted at arm's length and in the best interests of the unitholders.

The Directors are satisfied that there are arrangements in place, as evidenced by written procedures, to ensure that the obligations set out above are applied to all transactions with Connected Persons and that transactions with Connected Persons entered into during the financial period complied with this obligation.

SOFT COMMISSIONS

There were no soft commission arrangements entered into by the Investment Manager on behalf of each Fund during the financial period ended 30 November 2020.

BLACKROCK INDEX SELECTION FUND

EFFICIENT PORTFOLIO MANAGEMENT AND SECURITIES FINANCING TRANSACTIONS

Efficient portfolio management techniques

The Directors may, on behalf of each Fund and subject to the conditions and within the limits laid down by the CBI and the prospectus, employ techniques and instruments relating to transferable securities, including investments in OTC FDIs provided that such techniques and instruments are used for efficient portfolio management purposes or to provide protection against exchange risk or for direct investment purposes, where applicable.

The underlying exposure obtained through FDI and at the identity of the counterparties to these FDIs at the financial period end are disclosed on the relevant Fund's schedules of investments.

Securities lending and total return swaps

All securities lending transactions entered into by each Fund are subject to a written legal agreement between each Fund and the securities lending agent, BlackRock Advisors (UK) Limited, a related party to the Entity, and separately between the securities lending agent and the approved borrowing counterparty. Collateral received in exchange for securities lent is transferred under a title transfer arrangement and is delivered to and held in an account with a tri-party collateral manager in the name of the Trustee on behalf of each Fund. Collateral received is segregated from the assets belonging to each Fund's Trustee or the securities lending agent.

All OTC FDIs and total return swaps (including CFDs) are entered into by each Fund under an International Swaps and Derivatives Associations, Inc. Master Agreement ("ISDA Master Agreement") or similar agreement. An ISDA Master Agreement is a bilateral agreement between the Fund and a counterparty that governs OTC FDIs (including total return swaps and CFDs) entered into by the parties. The parties' exposures under the ISDA Master Agreement are netted and collateralised together, therefore any collateral disclosures provided are in respect of all OTC FDIs entered into by a Fund under the ISDA Master Agreement, not just total return swaps and CFDs.

All collateral received/posted by each Fund under the ISDA Master Agreement is transferred bilaterally under a title transfer arrangement.

The collateral received/posted by each under the ISDA Master Agreement in respect of variation margin is transferred bilaterally under a title transfer arrangement. Collateral received by each Fund in respect of variation margin is held in an account in the name of the Trustee on behalf of each Fund. Collateral received is segregated from the assets belonging to the Fund's Trustee. The collateral posted by the Fund under the ISDA Master Agreement that constitutes the Independent Amount (sometimes referred to as initial margin) is posted by the Fund under a security interest arrangement.

The following table details the value of securities on loan as a proportion of each Fund's total lendable assets and NAV and the value of total return swaps as a proportion of the Fund's NAV, as at 30 November 2020 and the income/returns earned for the period ended 30 November 2020. Total lendable assets represent the aggregate value of assets forming part of a Fund's securities lending programme. This excludes any assets held by the Fund that are not considered lendable due to any market, regulatory, investment or other restriction. The value of total return swaps is based on the underlying exposure value on a gross absolute basis.

Income earned during the period by the Funds from securities lending transactions is disclosed in the Fund's notes to the financial statements.

The total income earned from securities lending transactions is split between the relevant Fund and the Securities Lending Agent. Each Fund's receives at least 62.5% while securities lending agent receives up to 37.5% of such income with all operational costs borne out of the securities lending agent's share.

All returns and costs from total return swaps will accrue to each Fund's and are not subject to any returns or costs sharing arrangements with the Fund's Manager or any other third parties.

Investment grade securities are those issued by an entity with a minimum investment grade credit rating from at least one globally recognised credit rating agency; Standard & Poor's, Moody's or Fitch.

A recognised equity index contains at least 20 equities where no single equity represents more than 20% of the total index and no five equities combined represent more than 60% of the total index.

The maturity tenor analysis for fixed income securities received or posted as collateral is based on the respective contractual maturity date, while for equity securities, ETFs received or posted as collateral are presented as open transactions as they are not subject to a contractual maturity date.

All cash received or posted as collateral has an open maturity tenor as it is not subject to a contractual maturity date.

Reuse of collateral received

Non-cash collateral received by way of title transfer collateral arrangement in relation to securities lending transactions and OTC FDIs cannot be sold, re-invested or pledged.

As at 30 November 2020, all cash collateral received in respect of OTC derivative transactions by each Fund was re-invested in money market funds managed by the Manager or its affiliates, as disclosed in the Fund's schedules of investments. Each Fund is the legal owner of inbound collateral and can sell the assets and withhold the cash in the case of default.

The following table summarises the returns earned by each Fund's during the financial period ended 30 November 2020 from the re-investment in money market funds of cash collateral received in respect of OTC derivative transactions. These returns represent the accumulative total return of the representative money market fund for the six month period ended 30 November 2020. These returns do not take into account any interest payable to the counterparty under the relevant collateral arrangements.
