The CBI requires a Schedule of material changes in the composition of the portfolio during the financial year. These are defined as aggregate purchases of a security exceeding one per cent of the total value of purchases for the financial year and aggregate disposals greater than one per cent of the total value of sales. At a minimum the largest 20 purchases and 20 sales must be given or all purchases and sales if less than 20. A full listing of the portfolio changes for the financial year is available, upon request, at no cost from the Administrator.

The CBI requires a Schedule of material changes in the composition of the portfolio during the financial year. These are defined as aggregate purchases of a security exceeding one per cent of the total value of purchases for the financial year and aggregate disposals greater than one per cent of the total value of sales. At a minimum the largest 20 purchases and 20 sales must be given or all purchases and sales if less than 20. A full listing of the portfolio changes for the financial year is available, upon request, at no cost from the Administrator.

For the financial year ended 31 October 2024

iSHARES \$ TIPS 0-5 UCITS ETF (continued)

The CBI requires a Schedule of material changes in the composition of the portfolio during the financial year. These are defined as aggregate purchases of a security exceeding one per cent of the total value of purchases for the financial year and aggregate disposals greater than one per cent of the total value of sales. At a minimum the largest 20 purchases and 20 sales must be given or all purchases and sales if less than 20. A full listing of the portfolio changes for the financial year is available, upon request, at no cost from the Administrator.

The CBI requires a Schedule of material changes in the composition of the portfolio during the financial year. These are defined as aggregate purchases of a security exceeding one per cent of the total value of purchases for the financial year and aggregate disposals greater than one per cent of the total value of sales. At a minimum the largest 20 purchases and 20 sales must be given or all purchases and sales if less than 20. A full listing of the portfolio changes for the financial year is available, upon request, at no cost from the Administrator.

The CBI requires a Schedule of material changes in the composition of the portfolio during the financial year. These are defined as aggregate purchases of a security exceeding one per cent of the total value of purchases for the financial year and aggregate disposals greater than one per cent of the total value of sales. At a minimum the largest 20 purchases and 20 sales must be given or all purchases and sales if less than 20. A full listing of the portfolio changes for the financial year is available, upon request, at no cost from the Administrator.

The CBI requires a Schedule of material changes in the composition of the portfolio during the financial year. These are defined as aggregate purchases of a security exceeding one per cent of the total value of purchases for the financial year and aggregate disposals greater than one per cent of the total value of sales. At a minimum the largest 20 purchases and 20 sales must be given or all purchases and sales if less than 20. A full listing of the portfolio changes for the financial year is available, upon request, at no cost from the Administrator.

For the financial year ended 31 October 2024

iSHARES MSCI EUROPE QUALITY DIVIDEND ESG UCITS ETF (continued)

The CBI requires a Schedule of material changes in the composition of the portfolio during the financial year. These are defined as aggregate purchases of a security exceeding one per cent of the total value of purchases for the financial year and aggregate disposals greater than one per cent of the total value of sales. At a minimum the largest 20 purchases and 20 sales must be given or all purchases and sales if less than 20. A full listing of the portfolio changes for the financial year is available, upon request, at no cost from the Administrator.

iSHARES II PLC

Shari'ah Investment Manager's report (unaudited)

SHARI'AH COMPLIANT FUNDS

iShares II plc has 4 Shari'ah compliant funds, namely:

- iShares \$ Sukuk UCITS ETF.
- iShares MSCI EM Islamic UCITS ETF;
- iShares MSCI USA Islamic UCITS ETF;
- iShares MSCI World Islamic UCITS ETF (collectively, "the Funds").

These Funds are the subject of additional controls and procedures that enable them to achieve their investment objective as set out below. The Funds aim to reflect the performance of emerging markets, US equities and global equities respectively, screening the individual constituents of the relevant stock indices for compliance with Shari'ah investment principles.

RISK FACTORS

The benchmark index and its constituent holdings will be retrospectively determined as being Shari'ah compliant by the MSCI Shari'ah Board. The performance of the Funds is measured against the specific benchmark index which is stated by this index provider to be compliant with Shari'ah. The Funds will gain exposure to the component securities of the benchmark index in accordance with the guidance and advice provided by the Shari'ah Panel and Sukuk Panel. As a consequence, this may mean that the Funds underperform other investment funds with comparable investment objectives that do not seek to adhere to Islamic investment criteria (for example the inability to invest in interest bearing securities or participate in securities lending).

Neither the Funds, the Manager nor the Investment Manager makes any representation or warranty either expressly or implied, with respect to the fairness, correctness, accuracy, reasonableness or completeness of such determination. In the event that the status of such Shari'ah compliance should change, neither the Funds, the Manager nor the Investment Manager accepts liability in relation to such change, but will endeavour to inform each investor as soon as reasonably practicable following such change.

Although the Funds intend to observe Shari'ah at all times, no such assurance can be given as, for example, there may be occasions when the Funds' Investments do not fully comply with such criteria for factors outside the control of the Funds.

Compliance with Shari'ah may result in the benchmark index changing its component securities with limited notice, in which case the Investment Manager may be required to dispose of investments in circumstances that are less advantageous than might otherwise be the case. Similarly, cash balances held by the Funds from time to time may be deposited on terms which shall grant no return on the sum deposited for the benefit of the Funds.

INVESTMENT AND BORROWING RESTRICTIONS

Shari'ah investment principles do not allow investment in companies which are directly active in, or derive more than 5% of their revenue (cumulatively) from, the following activities:

- (a) alcohol: distillers, vintners and producers of alcoholic beverages, including producers of beer and malt liquors, owners and operators of bars and pubs;
- (b) tobacco: cigarettes and other tobacco products manufacturers and retailers;
- (c) pork related products: companies involved in the manufacture and retail of pork products;
- (d) financial services: commercial banks involved in retail banking, corporate lending, investment banking; companies involved in mortgage and mortgage related services; providers of financial services, including insurance, capital markets and specialised finance; credit agencies; stock exchanges; specialty boutiques; consumer finance services, including personal credit, credit cards, lease financing, travel related money services and pawn shops; financial institutions primarily engaged in investment management, related custody and securities fee based services; companies operating mutual funds, closed-end funds and unit investment trusts; financial institutions primarily engaged in investment banking and brokerage services, including equity and debt underwriting, mergers and acquisitions; securities lending and advisory services institutions; and insurance and reinsurance brokerage firms, including companies providing property, casualty, life disability, indemnity or supplemental health insurance;

iSHARES II PLC

Shari'ah Investment Manager's report (unaudited) (continued)

INVESTMENT AND BORROWING RESTRICTIONS (continued)

- (e) defence/weapons: manufacturers of military aerospace and defence equipment, parts or products, including defence electronics and space equipment;
- (f) gambling/casino: owners and operators of casinos and gaming facilities, including companies providing lottery and betting services;
- (g) music: producers and distributors of music, owners and operators of radio broadcasting systems;
- (h) hotels: owners and operators of hotels;
- (i) cinema: companies engaged in the production, distribution and screening of movies and television shows, owners and operators of television broadcasting systems and providers of cable or satellite television services; and/or
- (j) adult entertainment: owners and operators of adult entertainment products and activities.

The Funds will also not invest in any company:

- (a) having a ratio of interest-bearing debt to equity (book value of interest-bearing debt to market value of equity) of more than 33.33%;
- (b) whose cash (including balances with banks) and interest-bearing securities is more than 33.33% of total market capitalisation;
- (c) whose receivables are equal to or greater than 70% of total assets; and/or
- (d) whose total assets are made up solely of cash, including balances with banks, non-tangible assets and/or accounts receivables.

In addition, the Funds will not make use of any of the following financing methods and instruments:

- (a) fixed income instruments such as bonds, with the exception of iShares \$ Sukuk UCITS ETF;
- (b) interest-based instruments or accounts;
- (c) derivatives;
- (d) short selling; or
- (e) securities lending.

SHARI'AH PANEL

Compliance with Shari'ah in the operations of the iShares MSCI EM Islamic UCITS ETF, iShares MSCI USA Islamic UCITS ETF and iShares MSCI World Islamic UCITS ETF ("the Shari'ah Funds") shall be determined by the Shari'ah Panel. The Shari'ah Panel consists of Shari'ah scholars with expertise in Islamic investment. The Shari'ah Panel's primary duties and responsibilities are to:

- (i) advise on the Shari'ah aspects of the Shari'ah Funds,
- (ii) issue an opinion, by way of a Fatwa, ruling or guidelines as to whether the activities of the Shari'ah Funds comply with Shari'ah and
- (iii) make recommendations or issue guidance as to how the Shari'ah Funds could be made Shari'ah compliant. The Investment Manager may also, from time to time, utilise alternative methods for gaining exposure to the component securities of the Benchmark Index (e.g. ADRs/GDRs or other collective investment schemes) and may request the Shari'ah Panel to assess the proposed method of investment for compliance with Shari'ah law. The Investment Manager relies on the Shari'ah Panel's advice and guidance in ensuring that the Shari'ah Funds operate in a manner which is Shari'ah compliant.

The Shari'ah Panel will not be responsible for matters relating to:

- (i) the management and supervision of the Company and its Funds, operations or vendors (not pertaining to Shari'ah),
- (ii) the application of Irish or other jurisdictional law,

- (v) determining in individual cases what form of security is appropriate to be held in order to match the return of the underlying securities in any such index (equity, depository or otherwise) provided always that the MSCI Shari'ah Board has determined generally that such form of security is compliant with Shari'ah.

Following guidance of the Shari'ah Panel, the Investment Manager will ensure that any provisions or references to investment methods or techniques in the prospectus, which would otherwise be available to the Shari'ah Funds in pursuing their investment policies, are not availed of to the extent they are not Shari'ah compliant. The Shari'ah Panel will advise on alternative investment techniques for the Shari'ah Funds which comply with the Shari'ah Funds' investment policies and are Shari'ah compliant.

The Shari'ah Panel has issued a Fatwa in respect of the Shari'ah Funds. The Shari'ah Panel has issued an annual Shari'ah compliance certificate for the Shari'ah Funds.

Conflicts of interest relating to the investment of the Shari'ah Funds' assets may arise between members of the Shari'ah Panel and the Shari'ah Funds. In the event that a conflict of interest does arise, members of the Shari'ah Panel will endeavour, so far as they are reasonably able, to ensure that it is resolved fairly and that investment opportunities are allocated on a fair and equitable basis. Subject to this, members of the Shari'ah Panel may effect transactions where those conflicts arise and shall not be liable to account for any profit, commission or other remuneration arising.

Remuneration of the Shari'ah Panel is paid by the Investment Manager of the Shari'ah Funds.

SUKUK FUND PANEL

Compliance with Shari'ah in the operations of the Sukuk Fund shall be determined by the Sukuk Fund Panel. The Sukuk Fund Panel consists of Shari'ah scholars with expertise in Islamic investment. The Sukuk Fund Panel's primary duties and responsibilities are to

- (i) advise on the Shari'ah aspects of the Sukuk Fund,
- (ii) issue an opinion, by way of a Fatwa, ruling or guidelines as to whether the activities of the Sukuk Fund comply with Shari'ah and
- (iii) make recommendations or issue guidance as to how the Sukuk Fund could be made Shari'ah compliant. The Investment Manager relies on the Sukuk Fund Panel's advice and guidance in ensuring that the Sukuk Fund operates in a manner which is Shari'ah compliant.

The Sukuk Fund Panel will not be responsible for matters relating to

- (i) the management and supervision of the Company and its Funds, operations or vendors (not pertaining to Shari'ah),
- (ii) the application of Irish or other jurisdictional law,
- (iii) determining what is the appropriate method to calculate income purification of the underlying securities.

Following guidance of the Sukuk Fund Panel, the Investment Manager will ensure that any provisions or references to investment methods or techniques in the Prospectus, which would otherwise be available to the Sukuk Fund in pursuing its investment policy, are not availed of to the extent they are not Shari'ah compliant. The Sukuk Fund Panel will advise on alternative investment techniques for the Sukuk Fund which comply with the Sukuk Fund's investment policy and are Shari'ah compliant.

The Sukuk Fund Panel has issued a Fatwa in respect of the Sukuk Fund. Subject to the Sukuk Fund's compliance with Shari'ah, the Sukuk Fund Panel will issue an annual Shari'ah compliance certificate for the Sukuk Fund.

Conflicts of interest relating to the investment of the Sukuk Fund's assets may arise between members of the Sukuk Fund Panel and the Sukuk Fund. In the event that a conflict of interest does arise, members of the Sukuk Fund Panel will endeavour, so far as they are reasonably able, to ensure that it is resolved fairly. Subject to this, members of the Sukuk Fund Panel may effect transactions where those conflicts arise and shall not be liable to account for any profit, commission or other remuneration arising.

PURIFICATION OF DIVIDENDS

Investors are responsible for ensuring the purification of dividends received from the Shari'ah Funds where such dividends include prohibited income (e.g. interest earnings). Investors shall be notified on the dividend declaration date of the percentage of prohibited income in any dividend to be paid to them which will require purification. Pure and impure dividend amounts reported to investors will be based on MSCI's calculation to ensure consistency with the Benchmark Index. Neither the Shari'ah Funds, the Manager nor the Investment Manager is responsible for MSCI's calculation of the pure and impure dividend amounts.

**Annual Shariah Pronouncement given to BlackRock Advisors (UK) Limited by the panel of
Shariah scholars with regard to the iShares Funds**

In the name of Allah, the Most Gracious, the Most Merciful
All praise is due to Allah, the Cherisher of the Worlds
Peace and blessings be upon the Prophet of Allah, on his Family and all his companions

1. INTRODUCTION

- 1.1 The panel of independent Shariah scholars appointed by BlackRock Advisors (UK) Limited has conducted the annual review of the iShares funds ("**Products**"). The Products were initially approved, by the panel of Shariah scholars appointed at the time, on 14 November 2007, and launched on the London Stock Exchange on 10 December 2007.
- 1.2 The Products are designed to offer investors a long term return by tracking closely the performance of: (i) the MSCI World Islamic Index; (ii) the MSCI Emerging Markets Islamic Index; or (iii) the MSCI USA Islamic Index (each an "**Index**", together, "**the Indices**") by investing in a portfolio of Shariah compliant equities that as far as practicable mirror the component constituents of the relevant Index.

2. THE PRODUCTS

The Products reflect the fact that the constituents of the Indices are likely to change from time to time. Potential investors may obtain a breakdown of the constituents of the Products from the official iShares website (www.ishares.com) or from BlackRock Advisors (UK) Limited (as Investment Manager). The securities held by the Products are traded from time to time for efficient portfolio management and to maintain replication of the respective Indices.

3. LIMITATIONS

- 3.1 The purpose of this annual Shariah Pronouncement is to confirm the on-going Shariah compliance of the Products only, the names of which are:
- a) iShares MSCI World Islamic UCITS ETF;
 - b) iShares MSCI EM Islamic UCITS ETF; and
 - c) iShares MSCI USA Islamic UCITS ETF.
- 3.2 This annual Shariah Pronouncement does not approve the structure of any underlying fund other than those named in section 3.1 - any such fund which intends to utilise the Product must obtain its own Shariah pronouncement as to the overall compliance of its establishment and the principles and methods by which it will operate.

4. PRONOUNCEMENT

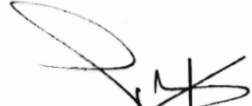

The Shariah Panel, having conducted the annual review of the Products as set out above and having deliberated on such matters as the Shariah Panel considered material, hereby rules that the Products, which aim to achieve a long term return by tracking the performance of the Indices by investing in a portfolio of Shariah compliant equities within a Shariah compliant framework, are in compliance with Shariah.

And Allah knows best.

**ISHARES \$ SUKUK UCITS ETF
ANNUAL SHARIAH COMPLIANCE CERTIFICATE
FINANCIAL PERIOD – 2023-2024**

The Shariah Supervisory Board (“SSB”) of Amanie Advisors Ltd. (“Amanie”), through Amanie, has performed its Shariah audit on the business activities of BlackRock’s iShares \$ Sukuk UCITS ETF (the “The Fund”) during the period 20 December 2023 - 31 December 2024 (FY 2023-2024). Amanie has performed its supervision to enable it to express an opinion on the Fund’s level of compliance with the provisions and principles of Shariah, as well as with fatwas, resolutions and specific guidelines that were issued by it from time to time.

Premised on the information and explanations that were provided and based on Shariah audit exercise, Amanie has found that the Fund has performed its Shariah compliant business activities as per the relevant Shariah requirements and in a **Very Good** manner. Controls evaluated are adequate, appropriate, and effective to provide reasonable assurance that Shariah risks are being managed and objectives should be met.

Allah Almighty knows best.

TRANSACTIONS WITH CONNECTED PERSONS (UNAUDITED)

In accordance with the requirements of the CBI, the Manager shall ensure that any transactions carried out between each Fund and the Manager or Depositary to a Fund, the delegates or sub-delegates of the Manager or Depositary (excluding any non-group company sub-custodians appointed by a Depositary) and any associated or group company of the Manager, Depositary, delegate or sub-delegate ("Connected Persons") must be conducted at arm's length and in the best interests of the shareholders.

The Directors are satisfied that there are arrangements in place, as evidenced by written procedures, to ensure that the obligations set out above are applied to all transactions with Connected Persons and that transactions with Connected Persons entered into during the financial year complied with this obligation.

TRANSACTION COSTS (UNAUDITED)

Disclosed in the table below are separately identifiable transaction costs incurred by each Fund for the financial year ended 31 October 2024. These include all brokers' commission, settlement fees, stamp duties and broker fees charges on equities, exchange traded futures contracts and certain debt instruments.

TRANSACTION COSTS (UNAUDITED) (continued)

Not all transaction costs are separately identifiable. For certain debt instruments, transaction costs will be included in the purchase and sales price of the investment and are not separately disclosed.

SOFT COMMISSIONS (UNAUDITED)

There were no soft commission arrangements entered into by the Investment Manager on behalf of the Funds during the financial year ended 31 October 2024.

CROSS INVESTMENTS (UNAUDITED)

As at 31 October 2024, there were no cross-umbrella investments held by any Fund within the Entity.

GLOBAL EXPOSURE (UNAUDITED)

The Management Company is required by regulation to employ a risk management process, which enables it to monitor accurately and manage the global exposure from FDIs which each Fund gains as a result of its strategy ("global exposure").

The Management Company uses the methodology known as the "commitment approach" in order to measure the global exposure of each Fund and manage the potential loss to them due to market risk.

The commitment approach is a methodology that aggregates the underlying market or notional value of FDI to determine the global exposure of each Fund to FDI.

Pursuant to the relevant regulations, global exposure for a Fund utilising the commitment approach must not exceed 100% of the Fund's NAV.

LEVERAGE (UNAUDITED)

The use of FDIs may expose a Fund to a higher degree of risk. In particular, FDI contracts can be highly volatile, and the amount of initial margin is generally small relative to the size of the contract so that transactions may be leveraged in terms of market exposure. A relatively small market movement may have a potentially larger impact on FDIs than on standard bonds or equities. Leveraged FDI positions can therefore increase a Fund's volatility.

REPORT ON REMUNERATION (UNAUDITED)

The below disclosures are made in respect of the remuneration policies of the BlackRock group ("BlackRock"), as they apply to BlackRock Asset Management Ireland Limited (the "Manager"). The disclosures are made in accordance with the Directive 2009/65/EC on the coordination of laws, regulations and administrative provisions relating to undertakings for collective investment in transferable securities ("UCITS"), as amended, including in particular by Directive 2014/91/EU of the European Parliament and of the council of 23 July 2014, (the "Directive"), and the "Guidelines on sound remuneration policies under the UCITS Directive and AIFMD" issued by the European Securities and Markets Authority.

BlackRock's UCITS Remuneration Policy (the "UCITS Remuneration Policy") will apply to the EEA entities within the BlackRock group authorised as a manager of UCITS funds in accordance with the Directive, and will ensure compliance with the requirements of Article 14b of the Directive, and to UK entities within the BlackRock group authorised by the FCA as a manager of a UK UCITS fund.

The Manager has adopted the UCITS Remuneration Policy, a summary of which is set out below.

Remuneration Governance

BlackRock's remuneration governance in EMEA operates as a tiered structure which includes: (a) the Management Development and Compensation Committee ("MDCC") (which is the global, independent remuneration committee for BlackRock, Inc.; and (b) the Manager's board of directors (the "Manager's Board"). These bodies are responsible for the determination of BlackRock's remuneration policy on a regular basis and being responsible for its implementation.

The implementation of the remuneration policy is annually subject to central and independent review for compliance with policies and procedures for remuneration adopted by the MDCC and by the Manager's Board. The most recent review found no fundamental issues. The remuneration disclosure is produced and owned by MDCC and the Manager's Board.

No material changes were made to the remuneration policy in 2023.

a) MDCC

The MDCC's purposes include:

- providing oversight of:
 - BlackRock's executive compensation programmes;
 - BlackRock's employee benefit plans; and
 - such other compensation plans as may be established by BlackRock from time to time for which the MDCC is deemed as administrator.
- reviewing and discussing the compensation discussion and analysis included in the BlackRock, Inc. annual proxy statement with management and approving the MDCC's report for inclusion in the proxy statement;
- reviewing, assessing and making reports and recommendations to the BlackRock, Inc. Board of Directors (the "BlackRock, Inc. Board") as appropriate on BlackRock's talent development and succession planning, with the emphasis on performance and succession at the highest management levels; and
- supporting the boards of the Entity's EMEA regulated entities in meeting their remuneration-related obligations by overseeing the design and implementation of EMEA remuneration policy in accordance with applicable regulation.

The MDCC directly retains its own independent compensation consultant, Semler Brossy Consulting Group LLC, who has no relationship with BlackRock, Inc. or the BlackRock, Inc. Board that would interfere with its ability to provide independent advice to the MDCC on compensation matters.

The BlackRock, Inc. Board has determined that all of the members of the MDCC are "independent" within the meaning of the listing standards of the New York Stock Exchange (NYSE), which requires each meet a "non-employee director" standard.

iSHARES II PLC

REPORT ON REMUNERATION (UNAUDITED) (continued)

a) MDCC (continued)

The MDCC held 7 meetings during 2023. The MDCC charter is available on BlackRock, Inc.'s website (www.blackrock.com).

Through its regular reviews, the MDCC continues to be satisfied with the principles of BlackRock's compensation policy and approach.

b) The Manager's Board

The Managers's Board in its supervisory function has the task of supervising, approving and providing oversight of the UCITS Remuneration Policy as it applies to the Manager and its Identified Staff (as defined below).

The responsibilities of the supervisory function include:

- approve, maintain and oversee the implementation of the UCITS Remuneration Policy;
- determine and oversee the remuneration of the members of the management body, provided that insofar the relevant Manager does not have a separate supervisory function, the remuneration of the member of the management body is determined by the MDCC;
- approve any subsequent material exemptions or changes to the UCITS Remuneration Policy and carefully consider and monitor their effects;
- take into account the inputs provided by all competent corporate functions (i.e., risk management, compliance, human resources, strategic planning, etc.) in the design and oversight of the UCITS Remuneration Policy.

Decision making process

Remuneration decisions for employees are made once annually in January following the end of the performance year. This timing allows full-year financial results to be considered along with other non-financial goals and objectives. Although the framework for remuneration decision-making is tied to financial performance, significant discretion is used to determine individual variable remuneration based on achievement of strategic and operating results and other considerations such as management and leadership capabilities.

No set formulas are established, and no fixed benchmarks are used in determining annual incentive awards. In determining specific individual remuneration amounts, a number of factors are considered including non-financial goals and objectives and overall financial and investment performance. These results are viewed in the aggregate without any specific weighting, and there is no direct correlation between any particular performance measure and the resulting annual incentive award. The variable remuneration awarded to any individual(s) for a particular performance year may also be zero.

Annual incentive awards are paid from a bonus pool.

The size of the projected bonus pool, including cash and equity awards, is reviewed throughout the year by the MDCC and the final total bonus pool is approved after year-end. As part of this review, the MDCC receives actual and projected financial information over the course of the year as well as final year-end information. The financial information that the MDCC receives and considers includes the current year projected income statement and other financial measures compared with prior year results and the current year budget. The MDCC additionally reviews other metrics of BlackRock's financial performance (e.g., net inflows of AUM and investment performance) as well as information regarding market conditions and competitive compensation levels.

The MDCC regularly considers management's recommendation as to the percentage of preincentive operating income that will be accrued and reflected as a compensation expense throughout the year for the cash portion of the total annual bonus pool (the "accrual rate"). The accrual rate of the cash portion of the total annual bonus pool may be modified by the MDCC during the year based on its review of the financial information described above. The MDCC does not apply any particular weighting or formula to the information it considers when determining the size of the total bonus pool or the accruals made for the cash portion of the total bonus pool.

Following the end of the performance year, the MDCC approves the final bonus pool amount.

REPORT ON REMUNERATION (UNAUDITED) (continued)

b) The Manager's Board (continued)

As part of the year-end review process the Enterprise Risk and Regulatory Compliance departments report to the MDCC on any activities, incidents or events that warrant consideration in making compensation decisions.

Individuals are not involved in setting their own remuneration.

Control functions

Each of the control functions (Enterprise Risk, Legal & Compliance, and Internal Audit) has its own organisational structure which is independent of the business units and therefore staff members in control functions are remunerated independently of the businesses they oversee. The head of each control function is either a member of the Global Executive Committee ("GEC"), the global management committee, or has a reporting obligation to the board of directors of BlackRock Group Limited, the parent company of all of BlackRock's EMEA regulated entities, including the Manager.

Functional bonus pools are determined with reference to the performance of each individual function. The remuneration of the senior members of control functions is directly overseen by the MDCC.

Link between pay and performance

There is a clear and well defined pay-for-performance philosophy and compensation programmes which are designed to meet the following key objectives as detailed below:

- appropriately balance BlackRock's financial results between shareholders and employees;
- attract, retain and motivate employees capable of making significant contributions to the long-term success of the business;
- align the interests of senior employees with those of shareholders by awarding BlackRock Inc.'s stock as a significant part of both annual and long-term incentive awards;
- control fixed costs by ensuring that compensation expense varies with profitability;
- link a significant portion of an employee's total compensation to the financial and operational performance of the business;
- promote sound and effective risk management across all risk categories, including sustainability risk;
- discourage excessive risk-taking (sustainability related or otherwise); and
- ensure that client interests are not negatively impacted by remuneration awarded on a short-term, mid-term and/or long-term basis.

Driving a high-performance culture is dependent on the ability to measure performance against objectives, values and behaviours in a clear and consistent way. Managers use a 5-point rating scale to provide an overall assessment of an employee's performance, and employees also provide a self-evaluation. The overall, final rating is reconciled during each employee's performance appraisal. Employees are assessed on the manner in which performance is attained as well as the absolute performance itself.

In keeping with the pay-for-performance philosophy, ratings are used to differentiate and reward individual performance – but don't pre-determine compensation outcomes. Compensation decisions remain discretionary and are made as part of the year-end compensation process.

When setting remuneration levels other factors are considered, as well as individual performance, which may include:

- the performance of the Manager, the funds managed by the Manager and/or the relevant functional department;
- factors relevant to an employee individually, relationships with clients and colleagues, teamwork, skills, any conduct issues and, subject to any applicable policy, the impact that any relevant leave of absence may have on contribution to the business);
- the management of risk within the risk profiles appropriate for BlackRock's clients;

Link between pay and performance (continued)

- strategic business needs, including intentions regarding retention;
- market intelligence;
- criticality to business; and
- supporting the firm's approaches to environmental, social and governance factors and diversity, equity and inclusion.

A primary product tool is risk management and, while employees are compensated for strong performance in their management of client assets, they are required to manage risk within the risk profiles appropriate for their clients. Therefore, employees are not rewarded for engaging in high-risk transactions outside of established parameters. Remuneration practices do not provide undue incentives for short-term planning or short-term financial rewards, do not reward unreasonable risk and provide a reasonable balance between the many and substantial risks inherent within the business of investment management, risk management and advisory services.

BlackRock operates a total compensation model for remuneration which includes a base salary, which is contractual, and a discretionary bonus scheme.

BlackRock operates an annual discretionary bonus scheme. Although all employees are eligible to be considered for a discretionary bonus, there is no contractual obligation to make any award to an employee under its discretionary bonus scheme. In exercising discretion to award a discretionary bonus, the factors listed above (under the heading "Link between pay and performance") may be taken into account in addition to any other matters which become relevant to the exercise of discretion in the course of the performance year.

Discretionary bonus awards for all employees, including executive officers, are subject to a guideline that determines the portion paid in cash and the portion paid in BlackRock, Inc. stock and subject to additional vesting/clawback conditions. Stock awards are subject to further performance adjustment through variation in BlackRock, Inc.'s share price over the vesting period. As total annual compensation increases, a greater portion is deferred into stock. The MDCC adopted this approach in 2006 to substantially increase the retention value and shareholder alignment of the compensation package for eligible employees, including the executive officers. The portion deferred into stock vests into three equal instalments over the three years following grant.

Supplementary to the annual discretionary bonus as described above, equity awards may be made to select individuals to provide greater linkage with future business results. These long-term incentive awards have been established individually to provide meaningful incentive for continued performance over a multi-year period recognising the scope of the individual's role, business expertise and leadership skills.

Selected senior leaders are eligible to receive performance-adjusted equity-based awards from the "BlackRock Performance Incentive Plan" ("BPIP"). Awards made from the BPIP have a three-year performance period based on a measurement of As Adjusted Operating Margin¹ and Organic Revenue Growth². Determination of pay-out will be made based on the firm's achievement relative to target financial results at the conclusion of the performance period. The maximum number of shares that can be earned is 165% of the award in those situations where both metrics achieve pre-determined financial targets. No shares will be earned where the firm's financial performance in both of the above metrics is below a pre-determined performance threshold. These metrics have been selected as key measures of shareholder value which endure across market cycles.

A limited number of investment professionals have a portion of their annual discretionary bonus (as described above) awarded as deferred cash that notionally tracks investment in selected products managed by the employee. The intention of these awards is to align investment professionals with the investment returns of the products they manage through the deferral of compensation into those products. Clients and external evaluators have increasingly viewed more favourably those products where key investors have "skin in the game" through significant personal investments.

¹As Adjusted Operating Margin: As reported in BlackRock's external filings, reflects adjusted Operating Income divided by Total Revenue net of distribution and servicing expenses and amortisation of deferred sales commissions.

²Organic Revenue Growth: Equal to net new base fees plus net new Aladdin revenue generated in the year (in Dollars)

Identified Staff

The UCITS Remuneration Policy sets out the process that will be applied to identify staff as Identified Staff, being categories of staff of the Manager, including senior management, risk takers, control functions and any employee receiving total remuneration that takes them into the same remuneration bracket as senior management and risk takers, whose professional activities have a material impact on the risk profiles of the Manager or of the funds it manages.

The list of Identified Staff will be subject to regular review, being formally reviewed in the event of, but not limited to:

- organisational changes;
- new business initiatives;
- changes in significant influence function lists;
- changes in role responsibilities; and
- revised regulatory direction.

Quantitative Remuneration Disclosure

BlackRock applies the proportionality principle in respect of staff identified as "Identified Staff". BlackRock bases its proportionality approach on a combination of factors that it is entitled to take into account based on relevant guidelines. The application of proportionality has been assessed based on the criteria set down in the ESMA Guidelines - i.e., criteria in terms of size, internal organisation and nature, scope and complexity of the activities; group of persons, who have only collectively a material impact on the risk profile of the Manager; and structure of the remuneration of identified staff.

The Manager is required under the Directive to make quantitative disclosures of remuneration. These disclosures are made in line with BlackRock's interpretation of currently available regulatory guidance on quantitative remuneration disclosures. As market or regulatory practice develops BlackRock may consider it appropriate to make changes to the way in which quantitative remuneration disclosures are calculated. Where such changes are made, this may result in disclosures in relation to a fund not being comparable to the disclosures made in the prior year, or in relation to other BlackRock fund disclosures in that same year.

Remuneration information at an individual Fund level is not readily available. Disclosures are provided in relation to (a) the staff of the Manager; (b) staff who are senior management; and (c) staff who have the ability to materially affect the risk profile of the Fund, including individuals who, although not employed by the Manager, are assigned by their employer to carry out services for the Manager.

All individuals included in the aggregated figures disclosed are rewarded in line with BlackRock's remuneration policy for their responsibilities across the relevant BlackRock business area. As all individuals have a number of areas of responsibilities, only the portion of remuneration for those individuals' services attributable to the Fund is included in the aggregate figures disclosed.

Members of staff and senior management of the Manager typically provide both UCITS and non-UCITS related services in respect of multiple funds, clients and functions of the Manager and across the broader BlackRock group. Conversely, members of staff and senior management of the broader BlackRock group may provide both UCITS and non-UCITS related services in respect of multiple funds, clients and functions of the broader BlackRock group and of the Manager. Therefore, the figures disclosed are a sum of each individual's portion of remuneration attributable to the Manager according to an objective apportionment methodology which acknowledges the multiple-service nature of the Manager and the broader BlackRock group. Accordingly, the figures are not representative of any individual's actual remuneration or their remuneration structure.

The amount of the total remuneration awarded to the Manager's staff in respect of the Manager's financial year ending 31 December 2023 is USD 224.7 million. This figure is comprised of fixed remuneration of USD 123.0 million and variable remuneration of USD 101.7 million. There were a total of 3,870 beneficiaries of the remuneration described above.

Quantitative Remuneration Disclosure (continued)

The amount of the aggregate remuneration awarded by the Manager in respect of the Manager's financial year ending 31 December 2023, to its senior management was USD 15.5 million, and to other members of its staff whose actions potentially have a material impact on the risk profile of the Manager or its funds was USD 30.3 million. These figures relate to the entire Manager and not to the Entity.

EFFICIENT PORTFOLIO MANAGEMENT AND SECURITIES FINANCING TRANSACTIONS (UNAUDITED)

Efficient portfolio management techniques

The Entity may, on behalf of each Fund and subject to the conditions and within the limits laid down by the CBI, employ techniques and instruments relating to transferable securities for efficient portfolio management purposes. Transactions for the purposes of efficient portfolio management may be undertaken with a view to achieving a reduction in risk, a reduction in costs or the generation of additional capital or income for the Fund with an appropriate level of risk, taking into account the risk profile of the relevant Fund and the general provisions of the Directive. These techniques and instruments may include investments in FDI such as interest rate and bond futures (which may be used to manage interest rate risk), index futures (which may be used to manage cash flows on a short term basis), options (which may be used to achieve cost efficiencies, for example where the acquisition of the option is more cost effective than purchasing of the underlying asset), swaps (which may be used to manage currency risk) and investments in money market instruments and/or money market collective investment schemes. New techniques and instruments may be developed which may be suitable for use by the Entity and the Entity (subject to the Central Bank's requirements) may employ such techniques and instruments.

A Fund may enter into securities lending, repurchase and/or reverse repurchase agreements for the purposes of efficient portfolio management subject to the conditions and limits set out in the Central Bank UCITS Regulations and in accordance with the requirements of the CBI.

The underlying exposure obtained through FDIs and the identity of the counterparties to these FDIs at the financial year end are disclosed on the relevant Fund's schedule of investments.

Securities lending

All securities lending transactions entered into by each Fund are subject to a written legal agreement between each Fund and the securities lending agent, BlackRock Advisors (UK) Limited, a related party to the Entity, and separately between the securities lending agent and the approved borrowing counterparty. Collateral received in exchange for securities lent is transferred under a title transfer arrangement and is delivered to and held in an account with a tri-party collateral manager in the name of the Depositary on behalf of each Fund. Collateral received is segregated from the assets belonging to each Fund's Depositary or the securities lending agent.

The following table details the value of securities on loan as a proportion of each Fund's total lendable assets and NAV, as at 31 October 2024. Total lendable assets represent the aggregate value of assets forming part of a Fund's securities lending programme. This excludes any assets held by the Fund that are not considered lendable due to any market, regulatory, investment or other restriction.

All revenue generated from securities lending activities during the financial year net of the Securities Lending Agent's fee will be returned to the relevant Fund (see further the operating income note). If there is securities lending revenue generated, the Securities Lending Agent will receive a fee of 37.5% of such securities lending revenue and will pay any third party operational and administrative costs associated with, and incurred in respect of, such activity, out of its fee. To the extent that the securities lending costs payable to third parties exceed the fee received by the Securities Lending Agent, the Securities Lending Agent will discharge any excess amounts out of its own assets.

Analysis of collateral type, quality and maturity tenor (continued)

A recognised equity index contains at least 20 equities where no single equity represents more than 20% of the total index and no five equities combined represent more than 60% of the total index.

The maturity tenor analysis for fixed income securities received or posted as collateral is based on the respective contractual maturity date, while for equity securities received or posted as collateral are presented as open transactions as they are not subject to a contractual maturity date.

All cash received or posted as collateral has an open maturity tenor as it's not subject to a contractual maturity date.

Reuse of collateral received

Non-cash collateral received by way of title transfer collateral arrangement in relation to securities lending cannot be sold, re-invested or pledged.

The following table summarises the returns earned by each Fund's during the financial year ended 31 October 2024 from the reinvestment in money market funds of cash collateral received in respect of OTC derivative transactions. These returns represent the accumulative total return of the representative money market fund for the twelve month period ended 31 October 2024. These returns do not take into account any interest payable to the counterparty under the relevant collateral arrangements.

SUSTAINABILITY-RELATED DISCLOSURES (UNAUDITED)

Glossary and key definitions

The periodic report disclosures set out below are presented for the year ended 31 October 2024, the “reference period”. Comparative information is presented for the financial year ended 31 October 2023, the “previous reference period”.

All data presented for the Fund’s investments and other quantitative measures disclosed has been calculated based on an average of the value of investments traded and held on or around each applicable rebalance date of the Fund’s benchmark index, within the reference period for which the relevant Funds met the criteria of an Article 8 fund. For metrics that are presented with sustainability indicators, the relevant metric calculation relates to the investments for which the underlying ESG data is available, rather than all investments held by the Fund.

All such data presented is unaudited and was not subject to an assurance provided by the Fund’s auditor or a review by a third party.

The term “Assets” shall be deemed to mean the total value investments held by the Fund throughout the reference period. The total value of investments shall include net short positions (including net short positions achieved through derivatives). BlackRock has taken a proportionate approach to the calculation of taxonomy alignment of its funds, by excluding any exposures achieved through derivatives (including both long and short positions) from the calculation of the degree to which investments made by a fund is in economic activities that qualify as environmentally sustainable under the EU Taxonomy.

Investments shall include cash and cash equivalents as set out by Article 53 of the regulatory technical standards under the Delegated Regulation (EU) 2022/1288. However, FRS102 requires cash and cash equivalents to be treated separately. Therefore, there will be a difference in presentation for the purposes of the overall annual report. Cash and cash equivalents are presented on a settlement date basis.

Sustainable Investments: BlackRock defines Sustainable Investments as investments in issuers or securities that contribute to an environmental or social objective, do not significantly harm any of those objectives and where investee companies follow good governance practices. BlackRock refers to relevant sustainability frameworks to identify the alignment of the investment to environmental or social objectives.

Do no significant harm (“DNSH”): The assessment undertaken by BlackRock to determine whether an investment does no significant harm to any environmental or social objective under SFDR. BlackRock has developed a set of criteria across all Sustainable Investments to assess whether an investment does significant harm, which considers both third party data points as well as fundamental insights. Investments are screened against these criteria using system-based controls and any which are considered to be causing significant harm do not qualify as Sustainable Investments.

Sustainability Factors: Environmental, social and employee matters, respect for human rights, anti-corruption and antibribery matters.

SUSTAINABILITY-RELATED DISCLOSURES (UNAUDITED) (continued)

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

iShares Dow Jones Global Sustainability Screened UCITS ETF

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● How did the sustainability indicators perform?

The following table provides information about the performance of the sustainability indicators used to measure the attainment of each of the environmental and social characteristics promoted by the Fund, as further detailed in the Fund's prospectus.

| Sustainability Indicator | Metric | 2024 | 2023 | 2022 |
|---|---|-------|-------|-------|
| Exclusion of issuers involved in certain activities deemed to have negative environmental and/or social outcomes (listed above) | % market value exposure to issuers involved in certain activities deemed to have negative environmental and/or social outcomes (listed above) | 0.00% | 0.00% | 0.00% |
| Exclusion of issuers identified as being involved in ESG related controversies | % market value exposure to companies identified as being involved in ESG related controversies | 0.00% | 0.00% | 0.00% |

● ...and compared to previous periods?

The above table provides information about the performance of the sustainability indicators for the previous reference period (see section "How did the sustainability indicators perform?").

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This section is not applicable for this Fund as it did not commit to holding Sustainable Investments during the reference period, however, certain Sustainable Investments may form part of the Fund's investment portfolio.

● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This section is not applicable for this Fund as it did not commit to holding Sustainable Investments during the reference period, however, certain Sustainable Investments may form part of the Fund's investment portfolio.

- How were the indicators for adverse impacts on sustainability factors taken into account?

This section is not applicable for this Fund as it did not commit to holding Sustainable Investments during the reference period, however, certain Sustainable Investments may form part of the Fund's investment portfolio. Please refer to the section below, "How did this financial product consider principal adverse impacts on sustainability factors?", which describes how the Fund considered PAIs on sustainability factors.

- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

This section is not applicable for this Fund as it did not commit to holding Sustainable Investments during the reference period, however, certain Sustainable Investments may form part of the Fund's investment portfolio.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The following table provides information about the impact of the principal adverse sustainability indicators taken into consideration by this Fund. The Fund considered the impact of the principal adverse sustainability indicators through the promotion of environmental and social characteristics ("E&S criteria") set out above (see To what extent were the environmental and/or social characteristics promoted by this financial product met?). The Investment Manager has determined that these PAIs have been considered as part of the investment selection criteria of the benchmark index at each index rebalance. The Fund's specific sustainability indicator may not align with the full scope of the regulatory definition of the corresponding PAI outlined in Annex 1 supplementing Regulation (EU) 2019/2088 Regulatory Technical Standards ("RTS").

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

For the reference period, the Fund's investment alignment with EU Taxonomy is shown in the graphs below.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

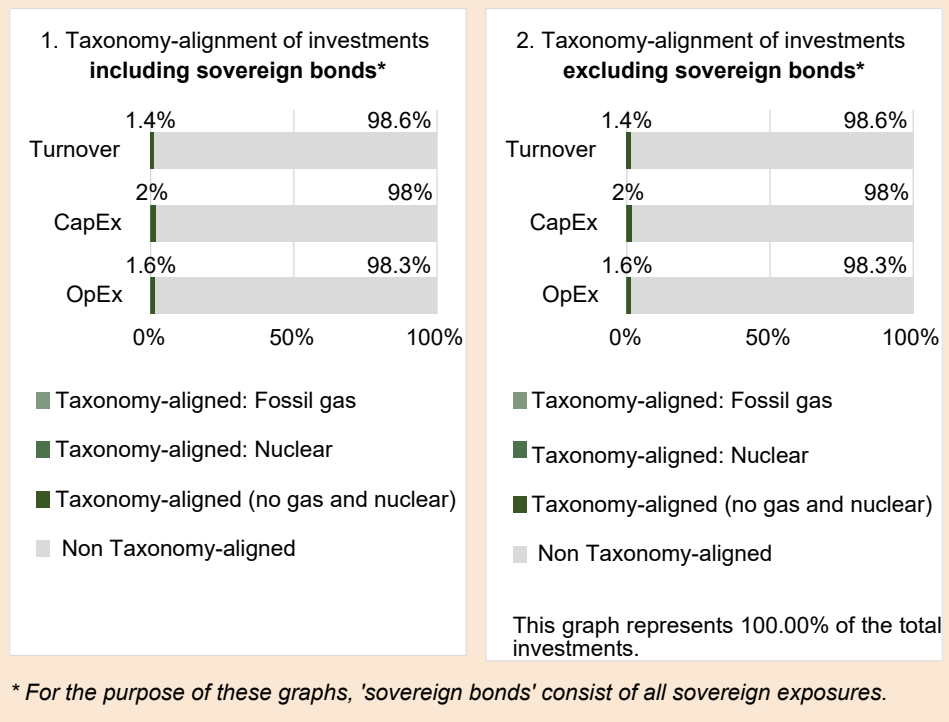

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

For the reference period, 0% of the Fund's total investments were held in sovereign exposures.

The investments held by the Fund during the reference period contributed to the following EU Taxonomy environmental objectives:

| Environmental objectives | % of Investments |
|---------------------------|------------------|
| Climate Change Mitigation | 1.44% |
| Climate Change Adaptation | 0.00% |

The data presented in the table above was not subject to an assurance provided by the Fund's auditor or a review by a third party. The assessment of EU Taxonomy alignment is based on data from a third-party vendor. The source of this data is a combination of equivalent and reported data. Equivalent data that matches the technical criteria under EU Taxonomy generates an eligibility or alignment result for those companies for which we do not have reported data.

What was the share of investments made in transitional and enabling activities?

For the reference period, the Fund's investments in transitional and enabling activities were as follows:

| | % of Investments |
|-------------------------|------------------|
| Transitional Activities | 0.04% |
| Enabling Activities | 0.69% |

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the previous reference period, 0% of the Fund's investments were aligned with EU Taxonomy.

 Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

This section is not applicable for this Fund as it did not commit to holding Sustainable Investments during the reference period, however, certain Sustainable Investments may form part of the Fund's investment portfolio.

What was the share of socially sustainable investments?

This section is not applicable for this Fund as it did not commit to holding Sustainable Investments during the reference period, however, certain Sustainable Investments may form part of the Fund's investment portfolio.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "#2 Other" included cash, money market funds and derivatives, however such holdings did not exceed 20%. Such investments were used for the purpose of efficient portfolio management, except for derivatives used for currency hedging for any currency hedged share class. Any ESG rating or analyses applied by the index provider applied only to the derivatives relating to individual issuers used by the Fund. Derivatives based on financial indices, interest rates, or foreign exchange instruments were not considered against minimum environment or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund met the environmental and social characteristics by tracking the environment and social characteristics of the benchmark index. The benchmark index methodology incorporates the environmental and social characteristics outlined (see section "To what extent were the environmental and/or social characteristics of the Fund met?").

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

For the reference period, the Fund has designated the benchmark index as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund. The performance of the Fund compared to the benchmark index is outlined below.

How does the reference benchmark differ from a broad market index?

The benchmark index excluded issuers that did not meet its ESG selection criteria from its broad market index, the Dow Jones Sustainability World Enlarged Index. The ESG selection criteria that is excluded is set out above (see To what extent were the environmental and/or social characteristics promoted by this financial product met?). Further details regarding the methodology of the benchmark index (including its constituents) are available on the index provider's website at <https://www.spglobal.com/spdji/en/indices/esg/dow-jones-sustainability-world-index-ex-alcohol-toba-co-gambling-armaments-firearms/#overview>.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The Fund achieved the environmental and social characteristics it promotes through a portfolio that is primarily made up of securities that represent the Fund's benchmark index.

How did this financial product perform compared with the reference benchmark?

| Sustainability Indicator | Metric | Fund | Reference benchmark |
|---|---|-------|---------------------|

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● How did the sustainability indicators perform?

The following table provides information about the performance of the sustainability indicators used to measure the attainment of each of the environmental and social characteristics promoted by the Fund, as further detailed in the Fund's prospectus.

| Sustainability Indicator | Metric | 2024 | 2023 | 2022 |
|---|---|--------|--------|------------------|
| Exclusion of issuers involved in certain activities deemed to have negative environmental and/or social outcomes (listed above) | % market value exposure to issuers involved in certain activities deemed to have negative environmental and/or social outcomes (listed above) | 0.00% | 0.00% | 0.00% |

| Exclusion of issuers with an MSCI ESG rating below BBB | % market value exposure to issuers with an MSCI ESG rating below BBB | 0.00% | 0.00% | 0.00% |

¹The Fund's commitment to a minimum proportion of investments qualifying as Sustainable Investments became effective on 1 January 2023, and as a result was not reported on as part of the 2022 periodic report.

● ...and compared to previous periods?

The above table provides information about the performance of the sustainability indicators for the previous reference period (see section "How did the sustainability indicators perform?").

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the reference period, the Fund invested 34.17% of its holdings in Sustainable Investments in pursuit of its investment objective.

The Fund's investments qualifying as Sustainable Investments were either in:
 (1) issuers involved in activities deemed to contribute to positive environmental and/or social impacts, or
 (2) issuers which have committed to one or more active carbon emissions reduction target(s) approved by the Science Based Targets initiative (SBTi).
 (3) fixed income securities which have been classified as "green bonds".

To be classified as a green bond, a bond's proceeds must be exclusively and formally applied to fund projects that fall within one or more qualifying environmental categories including alternative energy, energy efficiency, pollution prevention and control, sustainable water, green building and climate adaptation.

The Fund's investments were assessed against their revenue exposure to positive sustainable impacts in line with the United Nations' Sustainable Development Goals, the EU Taxonomy and other sustainability-related frameworks. The positive environmental impacts considered as part of this assessment may have related to themes such as climate change and natural capital and identify issuers that may have derived revenues from activities (or related activities) such as alternative energy, energy efficiency and green building, sustainable water, pollution prevention and control and sustainable agriculture. The positive societal impacts considered as part of this assessment may have related to themes such as basic needs and empowerment and identify issuers that may have derived revenues from activities (or related activities) such as nutrition, major disease treatments, sanitation, affordable real estate, small and medium enterprise (SME) finance, education and connectivity.

iShares € Corp Bond 0-3yr ESG UCITS ETF (continued)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Sustainable Investments held by the Fund during the reference period met the do no significant harm ("DNSH") requirements, as defined by applicable law and regulation. At each index rebalance, all investments qualifying as Sustainable Investments were assessed against certain minimum environmental and social indicators. As part of the assessment, issuers were assessed on their involvement in activities deemed to have highly negative environmental and social impacts. Where an issuer was identified as being involved in activities with highly negative environmental and social impacts, it was not eligible as a Sustainable Investment.

For bonds qualifying as green bonds, the assessment was conducted at an issuance level based on the use of the proceeds of the bonds which must be formally and exclusively applied to promote climate or other environmental sustainability purposes. In addition, certain minimum safeguards and eligibility exclusions were incorporated in the selection of green bonds to avoid exposure to bonds associated with activities deemed to have highly negative environmental and societal impacts.

- How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory indicators for adverse impacts on sustainability factors (as set out in the Regulatory Technical Standards ("RTS") under the SFDR) were considered at each index rebalance through the assessment of the Fund's investments qualifying as Sustainable Investments.

Following this assessment, the following investments did not qualify as Sustainable Investments: (1) issuers deemed to be deriving at least 1% of their revenue from thermal coal which is significantly carbon intensive and a major contributor to greenhouse gas emissions (taking into account indicators relating to GHG emissions) (2) issuers that have been deemed to be involved in severe ESG related controversies (taking into account indicators relating to greenhouse gas emissions, biodiversity, water, waste and social and employee matters), and (3) issuers which were deemed to be lagging industry peers based on their high exposure and failure to manage significant ESG risks (taking into account indicators relating to greenhouse gas emissions, biodiversity, water, waste, unadjusted gender pay gap and board gender diversity).

In respect of green bonds, the indicators for adverse impacts on sustainability factors were taken into account at each index rebalance and were assessed by the index provider at the issuance level based on an assessment of the use of proceeds of the bonds which must be formally and exclusively applied to promote climate or other environmental sustainability purposes. In addition, minimum safeguards and eligibility exclusions were applied by the index provider in the selection of green bonds to ensure the proceeds of which were not applied to activities with highly negative environmental and social outcomes. This includes through the minimum safeguards and eligibility exclusions of bonds with the use of proceeds linked to thermal coal extraction and power generation, significant biodiversity loss and controversial weapons.

The benchmark index also excluded: (1) issuers with a "red" MSCI ESG controversy flag which included issuers determined to be in violation of international and/or national standards (taking into account indicators concerning violations of United Nations Global Compact principles and OECD Guidelines for Multinational Enterprises) and (2) issuers determined to have any tie to controversial weapons (taking into account indicators concerning ties to controversial weapons).

- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's benchmark index excluded issuers with a "red" ESG controversy flag which excludes issuers which have been determined by the index provider to be in violation of the UN Guiding Principles on Business and Human Rights and OECD Guidelines for Multinational Enterprises.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The following table provides information about the impact of the principal adverse sustainability indicators taken into consideration by this Fund. The Fund considered the impact of the principal adverse sustainability indicators through the promotion of environmental and social characteristics ("E&S criteria") set out above (see To what extent were the environmental and/or social characteristics promoted by this financial product met?). The Investment Manager has determined that these PAIs have been considered as part of the investment selection criteria of the benchmark index at each index rebalance. The Fund's specific sustainability indicator may not align with the full scope of the regulatory definition of the corresponding PAI outlined in Annex 1 supplementing Regulation (EU) 2019/2088 Regulatory Technical Standards ("RTS").

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The taxonomy alignment percentage in the above diagram represents the percentage of investments held by the Fund in EU Taxonomy-aligned activities through Sustainable Investments with an environmental objective. It does not include the taxonomy alignment achieved through the Fund's other investments. For the taxonomy alignment of the Fund's total investments, see the bar chart below.

The following table details the asset allocation of the Fund for the current and the previous reference period.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

For the reference period, the Fund's investment alignment with EU Taxonomy is shown in the graphs below.

For the reference period, 2.33% of the Fund's investments were classified as both Sustainable Investments with an environmental objective and aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

For the reference period, 0% of the Fund's total investments were held in sovereign exposures.

The investments held by the Fund during the reference period contributed to the following EU Taxonomy environmental objectives:

| Environmental objectives | % of Investments |
|---------------------------|------------------|
| Climate Change Mitigation | 3.12% |
| Climate Change Adaptation | 0.08% |

The data presented in the table above was not subject to an assurance provided by the Fund's auditor or a review by a third party. The assessment of EU Taxonomy alignment is based on data from a third-party vendor. The source of this data is a combination of equivalent and reported data. Equivalent data that matches the technical criteria under EU Taxonomy generates an eligibility or alignment result for those companies for which we do not have reported data.

What was the share of investments made in transitional and enabling activities?

For the reference period, the Fund's investments in transitional and enabling activities were as follows:

| | % of Investments |
|-------------------------|------------------|
| Transitional Activities | 0.22% |
| Enabling Activities | 1.47% |

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the previous reference period, 0% of the Fund's investments were aligned with EU Taxonomy.

 Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

For the reference period, 29.16% of the Fund's investments were classified as Sustainable Investments with an environmental objective not aligned with EU Taxonomy.

The Fund invested in Sustainable Investments that were not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment was unavailable; and/or (iii) underlying economic activities were not eligible under the EU Taxonomy's available technical screening criteria or did not comply with all requirements set out in such technical screening criteria.

What was the share of socially sustainable investments?

For the reference period, 2.68% of the Fund's investments were classified as socially sustainable investments.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

This section is not applicable for this Fund as it did not hold any investments under "#2 Other".

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund met the environmental and social characteristics by tracking the environment and social characteristics of the benchmark index. The benchmark index methodology incorporates the environmental and social characteristics outlined (see section "To what extent were the environmental and/or social characteristics of the Fund met?").

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

For the reference period, the Fund has designated the benchmark index as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund. The performance of the Fund compared to the benchmark index is outlined below.

How does the reference benchmark differ from a broad market index?

The benchmark index excluded issuers that did not meet its ESG selection criteria from its broad market index, the Bloomberg EUR Corporate 0-3 Year Total Return Index. The ESG selection criteria that is excluded is set out above (see To what extent were the environmental and/or social characteristics promoted by this financial product met?). Further details regarding the methodology of the benchmark index (including its constituents) are available on the index provider's website at <https://www.bloomberg.com/professional/product/indices/bloomberg-fixed-income-indices/#ucits>.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The Fund achieved the environmental and social characteristics it promotes through a portfolio that is primarily made up of securities that represent the Fund's benchmark index.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The above table provides information about the performance of the sustainability indicators for the previous reference period (see section "How did the sustainability indicators perform?").

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This section is not applicable for this Fund as it did not commit to holding Sustainable Investments during the reference period, however, certain Sustainable Investments may form part of the Fund's investment portfolio.

● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This section is not applicable for this Fund as it did not commit to holding Sustainable Investments during the reference period, however, certain Sustainable Investments may form part of the Fund's investment portfolio.

- How were the indicators for adverse impacts on sustainability factors taken into account?

This section is not applicable for this Fund as it did not commit to holding Sustainable Investments during the reference period, however, certain Sustainable Investments may form part of the Fund's investment portfolio. Please refer to the section below, "How did this financial product consider principal adverse impacts on sustainability factors?", which describes how the Fund considered PAIs on sustainability factors.

- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

This section is not applicable for this Fund as it did not commit to holding Sustainable Investments during the reference period, however, certain Sustainable Investments may form part of the Fund's investment portfolio.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Sustainable Investments held by the Fund during the reference period met the do no significant harm (“DNSH”) requirements, as defined by applicable law and regulation. At each index rebalance, all investments qualifying as Sustainable Investments were assessed against certain minimum environmental and social indicators. As part of the assessment, companies were assessed on their involvement in activities deemed to have highly negative environmental and social impacts. Where a issuer was identified as being involved in activities with highly negative environmental and social impacts, it was not eligible as a Sustainable Investment.

For bonds qualifying as green bonds, the assessment was conducted at an issuance level based on the use of the proceeds of the bonds which must be formally and exclusively applied to promote climate or other environmental sustainability purposes. In addition, certain minimum safeguards and eligibility exclusions were incorporated in the selection of green bonds to avoid exposure to bonds associated with activities deemed to have highly negative environmental and societal impacts.

- How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory indicators for adverse impacts on sustainability factors (as set out in the Regulatory Technical Standards (“RTS”) under the SFDR) were considered at each index rebalance through the assessment of the Fund’s investments qualifying as Sustainable Investments.

In respect of green bonds, the indicators for adverse impacts on sustainability factors were taken into account at each index rebalance and were assessed by the index provider at the issuance level based on an assessment of the use of proceeds of the bonds which must be formally and exclusively applied to promote climate or other environmental sustainability purposes. In addition, minimum safeguards and eligibility exclusions were applied by the index provider in the selection of green bonds to ensure the proceeds of which were not applied to activities with highly negative environmental and social outcomes. This includes through the minimum safeguards and eligibility exclusions of bonds with the use of proceeds linked to thermal coal extraction and power generation, significant biodiversity loss and controversial weapons.

The benchmark index also excluded issuers with a “red” MSCI ESG controversy flag which have been determined to be: (1) in violation of international and/or national standards (taking into account indicators relating to violations of United Nations Global Compact principles and OECD Guidelines for Multinational Enterprises), and (2) involved in very severe ESG related controversies taking into account indicators relating to greenhouse gas emissions, biodiversity, water, waste and social and employee matters.

- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund’s benchmark index excluded issuers with a “red” ESG controversy flag which excludes issuers which have been determined by the index provider to be in violation of the UN Guiding Principles on Business and Human Rights and OECD Guidelines for Multinational Enterprises.

How did this financial product consider principal adverse impacts on sustainability factors?

The following table provides information about the impact of the principal adverse sustainability indicators taken into consideration by this Fund. The Fund considered the impact of the principal adverse sustainability indicators through the promotion of environmental and social characteristics (“E&S criteria”) set out above (see To what extent were the environmental and/or social characteristics promoted by this financial product met?). The Investment Manager has determined that these PAIs have been considered as part of the investment selection criteria of the benchmark index at each index rebalance. The Fund’s specific sustainability indicator may not align with the full scope of the regulatory definition of the corresponding PAI outlined in Annex 1 supplementing Regulation (EU) 2019/2088 Regulatory Technical Standards (“RTS”).

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

For the reference period, the Fund's investment alignment with EU Taxonomy is shown in the graphs below.

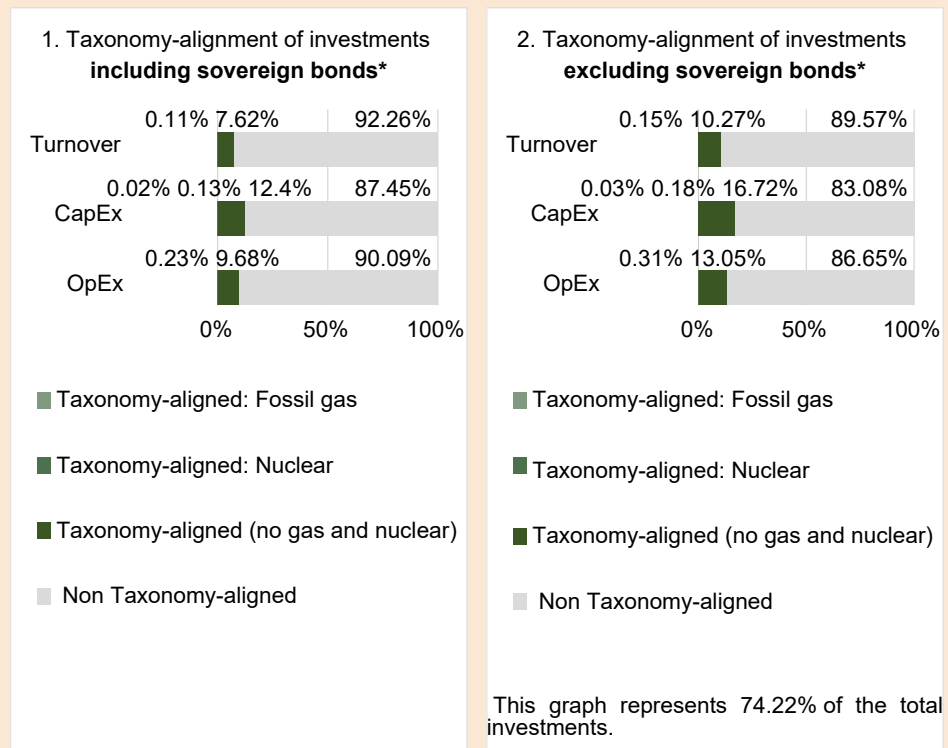

For the reference period, 14.71% of the Fund's investments were classified as both Sustainable Investments with an environmental objective and aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

For the reference period, 25.78% of the Fund's total investments were held in sovereign exposures. Taxonomy alignment of these exposures could not be determined due to limited data availability.

The investments held by the Fund during the reference period contributed to the following EU Taxonomy environmental objectives:

| Environmental objectives | % of Investments |
|---------------------------|------------------|
| Climate Change Mitigation | 8.08% |
| Climate Change Adaptation | 0.11% |

The data presented in the table above was not subject to an assurance provided by the Fund's auditor or a review by a third party. The assessment of EU Taxonomy alignment is based on data from a third-party vendor. The source of this data is a combination of equivalent and reported data. Equivalent data that matches the technical criteria under EU Taxonomy generates an eligibility or alignment result for those companies for which we do not have reported data.

What was the share of investments made in transitional and enabling activities?

For the reference period, the Fund's investments in transitional and enabling activities were as follows:

| | % of Investments |
|-------------------------|------------------|
| Transitional Activities | 0.46% |
| Enabling Activities | 3.60% |

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

For the previous reference period, 0% of the Fund's investments were aligned with EU Taxonomy.

*Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments* with an environmental objective that were not aligned with the EU Taxonomy?

For the reference period, 83.83% of the Fund's investments were classified as Sustainable Investments with an environmental objective not aligned with EU Taxonomy.

The Fund invested in Sustainable Investments that were not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment was unavailable; and/or (iii) underlying economic activities were not eligible under the EU Taxonomy's available technical screening criteria or did not comply with all requirements set out in such technical screening criteria.

What was the share of socially sustainable investments?

For the reference period, 0.64% of the Fund's investments were classified as socially sustainable investments.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "Not sustainable" included cash, money market funds and derivatives, however such holdings did not exceed 10%. Such investments were used only for the purposes of liquidity management and/or hedging.

No other investments held by the Fund were assessed against minimum environmental or social safeguards.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Fund met the environmental and social characteristics by tracking the environment and social characteristics of the benchmark index. The benchmark index methodology incorporates the environmental and social characteristics outlined (see section “To what extent was the sustainable investment objective of the Fund met?”).

How did this financial product perform compared to the reference sustainable benchmark?

For the reference period, the Fund has designated the benchmark index as a reference benchmark for the purpose of attaining the sustainable investment objective of the Fund. The performance of the Fund compared to the benchmark index is outlined below.

Reference benchmarks are indexes to measure whether the financial products attain the sustainable objective.

● How does the reference benchmark differ from a broad market index?

The benchmark index excludes issuers that do not meet its ESG selection criteria from its broad market index, the Bloomberg Euro Aggregate Bond Index. The ESG selection criteria that is excluded is set out above (see To what extent was the sustainable investment objective of this financial product met?). Further details regarding the methodology of the benchmark index (including its constituents) are available on the index provider’s website at <https://www.bloomberg.com/professional/product/indices/bloomberg-fixed-income-indices/#/ucits>.

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

The Fund achieved its sustainable investment objective in a portfolio that is primarily made up of securities that represent the Fund’s benchmark index.

● How did this financial product perform compared with the reference benchmark?

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

During the reference period, the Fund invested 51.42% of its holdings in Sustainable Investments in pursuit of its investment objective.

The Fund's investments qualifying as Sustainable Investments were either in:

- (1) issuers involved in activities deemed to contribute to positive environmental and/or social impacts, or
- (2) issuers which have committed to one or more active carbon emissions reduction target(s) approved by the Science Based Targets initiative (SBTi).
- (3) fixed income securities which have been classified as "green bonds".

To be classified as a green bond, a bond's proceeds must be exclusively and formally applied to fund projects that fall within one or more qualifying environmental categories including alternative energy, energy efficiency, pollution prevention and control, sustainable water, green building and climate adaptation.

The Fund's investments were assessed against their revenue exposure to positive sustainable impacts in line with the United Nations' Sustainable Development Goals, the EU Taxonomy and other sustainability-related frameworks. The positive environmental impacts considered as part of this assessment may have related to themes such as climate change and natural capital and identify issuers that may have derived revenues from activities (or related activities) such as alternative energy, energy efficiency and green building, sustainable water, pollution prevention and control and sustainable agriculture. The positive societal impacts considered as part of this assessment may have related to themes such as basic needs and empowerment and identify issuers that may have derived revenues from activities (or related activities) such as nutrition, major disease treatments, sanitation, affordable real estate, small and medium enterprise (SME) finance, education and connectivity.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Sustainable Investments held by the Fund during the reference period met the do no significant harm ("DNSH") requirements, as defined by applicable law and regulation. At each index rebalance, all investments qualifying as Sustainable Investments were assessed against certain minimum environmental and social indicators. As part of the assessment, issuers were assessed on their involvement in activities deemed to have highly negative environmental and social impacts. Where an issuer was identified as being involved in activities with highly negative environmental and social impacts, it was not eligible as a Sustainable Investment.

For bonds qualifying as green bonds, the assessment was conducted at an issuance level based on the use of the proceeds of the bonds which must be formally and exclusively applied to promote climate or other environmental sustainability purposes. In addition, certain minimum safeguards and eligibility exclusions were incorporated in the selection of green bonds to avoid exposure to bonds associated with activities deemed to have highly negative environmental and societal impacts.

- How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory indicators for adverse impacts on sustainability factors (as set out in the Regulatory Technical Standards ("RTS") under the SFDR) were considered at each index rebalance through the assessment of the Fund's investments qualifying as Sustainable Investments.

Following this assessment, the following investments did not qualify as Sustainable Investments: (1) issuers deemed to be deriving at least 1% of their revenue from thermal coal which is significantly carbon intensive and a major contributor to greenhouse gas emissions (taking into account indicators relating to GHG emissions) (2) issuers that have been deemed to be involved in severe ESG related controversies (taking into account indicators relating to greenhouse gas emissions, biodiversity, water, waste and social and employee matters), and (3) issuers which were deemed to be lagging industry peers based on their high exposure and failure to manage significant ESG risks (taking into account indicators relating to greenhouse gas emissions, biodiversity, water, waste, unadjusted gender pay gap and board gender diversity).

In respect of green bonds, the indicators for adverse impacts on sustainability factors were taken into account at each index rebalance and were assessed by the index provider at the issuance level based on an assessment of the use of proceeds of the bonds which must be formally and exclusively applied to promote climate or other environmental sustainability purposes. In addition, minimum safeguards and eligibility exclusions were applied by the index provider in the selection of green bonds to ensure the proceeds of which were not applied to activities with highly negative environmental and social outcomes. This includes through the minimum safeguards and eligibility exclusions of bonds with the use of proceeds linked to thermal coal extraction and power generation, significant biodiversity loss and controversial weapons.

The benchmark index also excluded: (1) issuers with a "red" MSCI ESG controversy flag which included issuers determined to be in violation of international and/or national standards (taking into account indicators concerning violations of United Nations Global Compact principles and OECD Guidelines for Multinational Enterprises) and (2) issuers determined to have any tie to controversial weapons (taking into account indicators concerning ties to controversial weapons).

- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's benchmark index excluded issuers with a "red" ESG controversy flag which excludes issuers which have been determined by the index provider to be in violation of the UN Guiding Principles on Business and Human Rights and OECD Guidelines for Multinational Enterprises.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The following table provides information about the impact of the principal adverse sustainability indicators taken into consideration by this Fund. The Fund considered the impact of the principal adverse sustainability indicators through the promotion of environmental and social characteristics ("E&S criteria") set out above (see To what extent were the environmental and/or social characteristics promoted by this financial product met?). The Investment Manager has determined that these PAIs have been considered as part of the investment selection criteria of the benchmark index at each index rebalance. The Fund's specific sustainability indicator may not align with the full scope of the regulatory definition of the corresponding PAI outlined in Annex 1 supplementing Regulation (EU) 2019/2088 Regulatory Technical Standards ("RTS").

| Adverse Sustainability Indicator | Sustainability Indicators |
|--|--|
| Exposure to companies active in the fossil fuel sector | Exclusion of issuers based on certain environmental screens (listed above) |
| Activities negatively affecting biodiversity-sensitive areas | Exclusion of issuers based on an MSCI ESG controversy flag |
| Emissions to water | Exclusion of issuers based on an MSCI ESG controversy flag |
| Hazardous waste and radioactive waste ratio | Exclusion of issuers based on an MSCI ESG controversy flag |
| Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises | Exclusion of issuers based on an MSCI ESG controversy flag |

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The taxonomy alignment percentage in the above diagram represents the percentage of investments held by the Fund in EU Taxonomy-aligned activities through Sustainable Investments with an environmental objective. It does not include the taxonomy alignment achieved through the Fund's other investments. For the taxonomy alignment of the Fund's total investments, see the bar chart below.

The following table details the asset allocation of the Fund for the current and the previous reference period.

| Asset allocation | % Investments | | |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

For the reference period, the Fund's investment alignment with EU Taxonomy is shown in the graphs below.

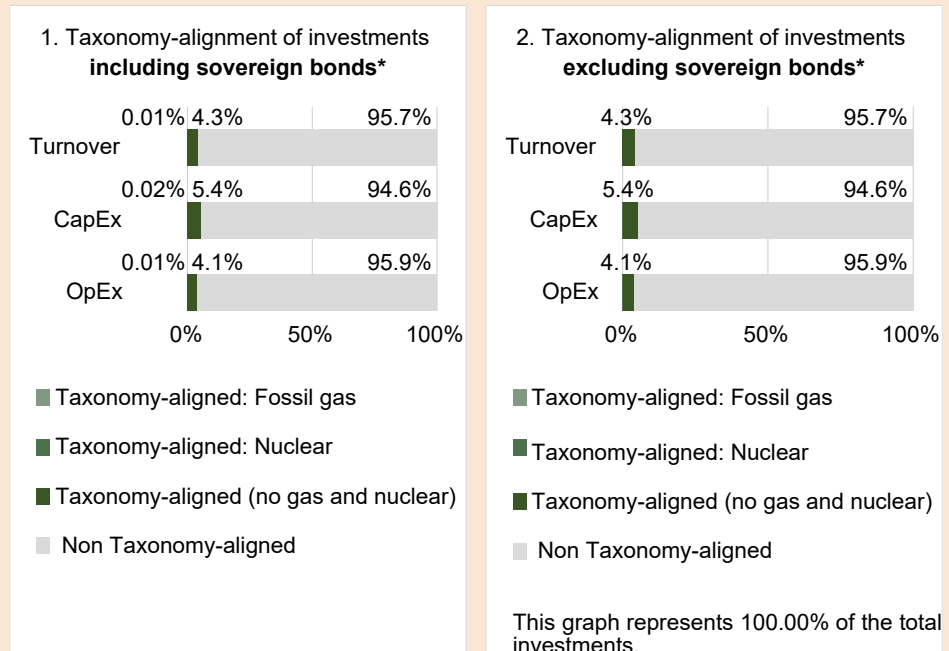

For the reference period, 3.95% of the Fund's investments were classified as both Sustainable Investments with an environmental objective and aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

For the reference period, 0% of the Fund's total investments were held in sovereign exposures.

The investments held by the Fund during the reference period contributed to the following EU Taxonomy environmental objectives:

| Environmental objectives | % of Investments |
|---------------------------|------------------|
| Climate Change Mitigation | 4.20% |
| Climate Change Adaptation | 0.03% |

The data presented in the table above was not subject to an assurance provided by the Fund's auditor or a review by a third party. The assessment of EU Taxonomy alignment is based on data from a third-party vendor. The source of this data is a combination of equivalent and reported data. Equivalent data that matches the technical criteria under EU Taxonomy generates an eligibility or alignment result for those companies for which we do not have reported data.

What was the share of investments made in transitional and enabling activities?

For the reference period, the Fund's investments in transitional and enabling activities were as follows:

| | % of Investments |
|-------------------------|------------------|
| Transitional Activities | 0.17% |
| Enabling Activities | 2.56% |

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the previous reference period, 0% of the Fund's investments were aligned with EU Taxonomy.

 Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

For the reference period, 42.98% of the Fund's investments were classified as Sustainable Investments with an environmental objective not aligned with EU Taxonomy.

The Fund invested in Sustainable Investments that were not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment was unavailable; and/or (iii) underlying economic activities were not eligible under the EU Taxonomy's available technical screening criteria or did not comply with all requirements set out in such technical screening criteria.

What was the share of socially sustainable investments?

For the reference period, 4.49% of the Fund's investments were classified as socially sustainable investments.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "#2 Other" included cash, money market funds and derivatives, however such holdings did not exceed 20%. Such investments were used for the purpose of efficient portfolio management, except for derivatives used for currency hedging for any currency hedged share class. Any ESG rating or analyses applied by the index provider applied only to the derivatives relating to individual issuers used by the Fund. Derivatives based on financial indices, interest rates, or foreign exchange instruments were not considered against minimum environment or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund met the environmental and social characteristics by tracking the environment and social characteristics of the benchmark index. The benchmark index methodology incorporates the environmental and social characteristics outlined (see section "To what extent were the environmental and/or social characteristics of the Fund met?").

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

For the reference period, the Fund has designated the benchmark index as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund. The performance of the Fund compared to the benchmark index is outlined below.

How does the reference benchmark differ from a broad market index?

The benchmark index excluded issuers that did not meet its ESG selection criteria from its broad market index, the Bloomberg Pan-European High Yield Index. The ESG selection criteria that is excluded is set out above (see To what extent were the environmental and/or social characteristics promoted by this financial product met?). Further details regarding the methodology of the benchmark index (including its constituents) are available on the index provider's website at <https://www.bloomberg.com/professional/product/indices/bloomberg-fixed-income-indices/#ucits>.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The Fund achieved the environmental and social characteristics it promotes through a portfolio that is primarily made up of securities that represent the Fund's benchmark index.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

During the reference period, the Fund invested 36.20% of its holdings in Sustainable Investments in pursuit of its investment objective.

The Fund's investments qualifying as Sustainable Investments were either in:

- (1) issuers involved in activities deemed to contribute to positive environmental and/or social impacts, or
- (2) issuers which have committed to one or more active carbon emissions reduction target(s) approved by the Science Based Targets initiative (SBTi).
- (3) fixed income securities which have been classified as "green bonds".

To be classified as a green bond, a bond's proceeds must be exclusively and formally applied to fund projects that fall within one or more qualifying environmental categories including alternative energy, energy efficiency, pollution prevention and control, sustainable water, green building and climate adaptation.

The Fund's investments were assessed against their revenue exposure to positive sustainable impacts in line with the United Nations' Sustainable Development Goals, the EU Taxonomy and other sustainability-related frameworks. The positive environmental impacts considered as part of this assessment may have related to themes such as climate change and natural capital and identify issuers that may have derived revenues from activities (or related activities) such as alternative energy, energy efficiency and green building, sustainable water, pollution prevention and control and sustainable agriculture. The positive societal impacts considered as part of this assessment may have related to themes such as basic needs and empowerment and identify issuers that may have derived revenues from activities (or related activities) such as nutrition, major disease treatments, sanitation, affordable real estate, small and medium enterprise (SME) finance, education and connectivity.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Sustainable Investments held by the Fund during the reference period met the do no significant harm ("DNSH") requirements, as defined by applicable law and regulation. At each index rebalance, all investments qualifying as Sustainable Investments were assessed against certain minimum environmental and social indicators. As part of the assessment, issuers were assessed on their involvement in activities deemed to have highly negative environmental and social impacts. Where an issuer was identified as being involved in activities with highly negative environmental and social impacts, it was not eligible as a Sustainable Investment.

For bonds qualifying as green bonds, the assessment was conducted at an issuance level based on the use of the proceeds of the bonds which must be formally and exclusively applied to promote climate or other environmental sustainability purposes. In addition, certain minimum safeguards and eligibility exclusions were incorporated in the selection of green bonds to avoid exposure to bonds associated with activities deemed to have highly negative environmental and societal impacts.

- How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory indicators for adverse impacts on sustainability factors (as set out in the Regulatory Technical Standards ("RTS") under the SFDR) were considered at each index rebalance through the assessment of the Fund's investments qualifying as Sustainable Investments.

Following this assessment, the following investments did not qualify as Sustainable Investments: (1) issuers deemed to be deriving at least 1% of their revenue from thermal coal which is significantly carbon intensive and a major contributor to greenhouse gas emissions (taking into account indicators relating to GHG emissions) (2) issuers that have been deemed to be involved in severe ESG related controversies (taking into account indicators relating to greenhouse gas emissions, biodiversity, water, waste and social and employee matters), and (3) issuers which were deemed to be lagging industry peers based on their high exposure and failure to manage significant ESG risks (taking into account indicators relating to greenhouse gas emissions, biodiversity, water, waste, unadjusted gender pay gap and board gender diversity).

In respect of green bonds, the indicators for adverse impacts on sustainability factors were taken into account at each index rebalance and were assessed by the index provider at the issuance level based on an assessment of the use of proceeds of the bonds which must be formally and exclusively applied to promote climate or other environmental sustainability purposes. In addition, minimum safeguards and eligibility exclusions were applied by the index provider in the selection of green bonds to ensure the proceeds of which were not applied to activities with highly negative environmental and social outcomes. This includes through the minimum safeguards and eligibility exclusions of bonds with the use of proceeds linked to thermal coal extraction and power generation, significant biodiversity loss and controversial weapons.

The benchmark index also excluded: (1) issuers with a "red" MSCI ESG controversy flag which included issuers determined to be in violation of international and/or national standards (taking into account indicators concerning violations of United Nations Global Compact principles and OECD Guidelines for Multinational Enterprises) and (2) issuers determined to have any tie to controversial weapons (taking into account indicators concerning ties to controversial weapons).

- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's benchmark index excluded issuers with a "red" ESG controversy flag which excludes issuers which have been determined by the index provider to be in violation of the UN Guiding Principles on Business and Human Rights and OECD Guidelines for Multinational Enterprises.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The following table provides information about the impact of the principal adverse sustainability indicators taken into consideration by this Fund. The Fund considered the impact of the principal adverse sustainability indicators through the promotion of environmental and social characteristics ("E&S criteria") set out above (see To what extent were the environmental and/or social characteristics promoted by this financial product met?). The Investment Manager has determined that these PAIs have been considered as part of the investment selection criteria of the benchmark index at each index rebalance. The Fund's specific sustainability indicator may not align with the full scope of the regulatory definition of the corresponding PAI outlined in Annex 1 supplementing Regulation (EU) 2019/2088 Regulatory Technical Standards ("RTS").

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The taxonomy alignment percentage in the above diagram represents the percentage of investments held by the Fund in EU Taxonomy-aligned activities through Sustainable Investments with an environmental objective. It does not include the taxonomy alignment achieved through the Fund's other investments. For the taxonomy alignment of the Fund's total investments, see the bar chart below.

The following table details the asset allocation of the Fund for the current and the previous reference period.

| Asset allocation | % Investments | | |
|-------------------------------------|---------------|--------|------------------|
| | 2024 | 2023 | 2022 |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

For the reference period, the Fund's investment alignment with EU Taxonomy is shown in the graphs below.

For the reference period, 2.96% of the Fund's investments were classified as both Sustainable Investments with an environmental objective and aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

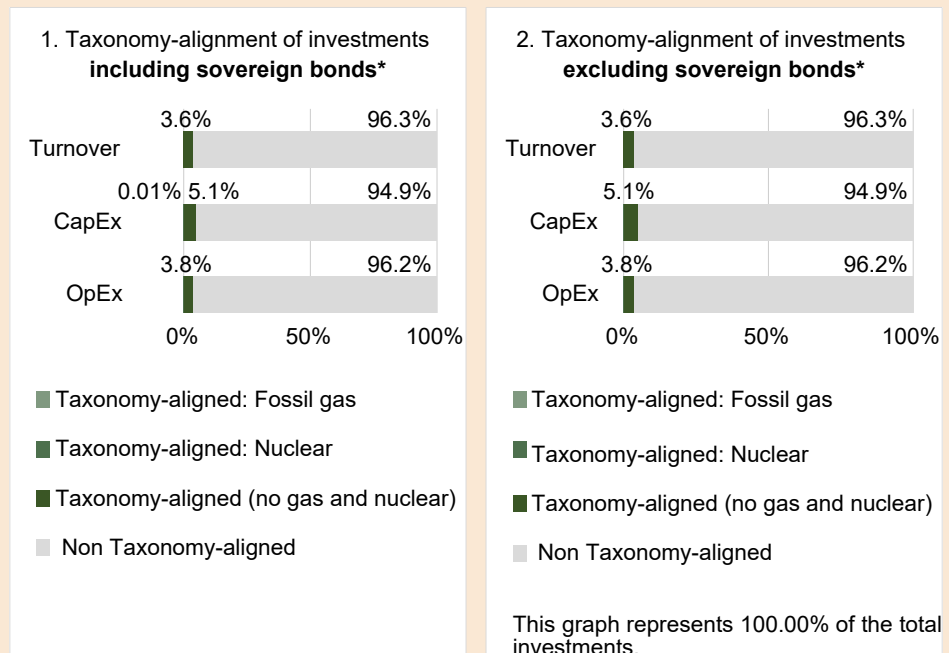

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

For the reference period, 0% of the Fund's total investments were held in sovereign exposures.

The investments held by the Fund during the reference period contributed to the following EU Taxonomy environmental objectives:

| Environmental objectives | % of Investments |
|---------------------------|------------------|
| Climate Change Mitigation | 3.77% |
| Climate Change Adaptation | 0.08% |

The data presented in the table above was not subject to an assurance provided by the Fund's auditor or a review by a third party. The assessment of EU Taxonomy alignment is based on data from a third-party vendor. The source of this data is a combination of equivalent and reported data. Equivalent data that matches the technical criteria under EU Taxonomy generates an eligibility or alignment result for those companies for which we do not have reported data.

What was the share of investments made in transitional and enabling activities?

For the reference period, the Fund's investments in transitional and enabling activities were as follows:

| | % of Investments |
|-------------------------|------------------|
| Transitional Activities | 0.21% |
| Enabling Activities | 1.80% |

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the previous reference period, 0% of the Fund's investments were aligned with EU Taxonomy.

Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

For the reference period, 32.78% of the Fund's investments were classified as Sustainable Investments with an environmental objective not aligned with EU Taxonomy.

The Fund invested in Sustainable Investments that were not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment was unavailable; and/or (iii) underlying economic activities were not eligible under the EU Taxonomy's available technical screening criteria or did not comply with all requirements set out in such technical screening criteria.

What was the share of socially sustainable investments?

For the reference period, 0.46% of the Fund's investments were classified as socially sustainable investments.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "#2 Other" included cash, money market funds and derivatives, however such holdings did not exceed 20%. Such investments were used for the purpose of efficient portfolio management, except for derivatives used for currency hedging for any currency hedged share class. Any ESG rating or analyses applied by the index provider applied only to the derivatives relating to individual issuers used by the Fund. Derivatives based on financial indices, interest rates, or foreign exchange instruments were not considered against minimum environment or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund met the environmental and social characteristics by tracking the environment and social characteristics of the benchmark index. The benchmark index methodology incorporates the environmental and social characteristics outlined (see section "To what extent were the environmental and/or social characteristics of the Fund met?").

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

For the reference period, the Fund has designated the benchmark index as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund. The performance of the Fund compared to the benchmark index is outlined below.

● How does the reference benchmark differ from a broad market index?

The benchmark index excluded issuers that did not meet its ESG selection criteria from its broad market index, the Bloomberg Euro Corporate Bond Index. The ESG selection criteria that is excluded is set out above (see To what extent were the environmental and/or social characteristics promoted by this financial product met?). Further details regarding the methodology of the benchmark index (including its constituents) are available on the index provider's website at <https://www.bloomberg.com/professional/product/indices/bloomberg-fixed-income-indices/#/ucits>.

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The Fund achieved the environmental and social characteristics it promotes through a portfolio that is primarily made up of securities that represent the Fund's benchmark index.

● How did this financial product perform compared with the reference benchmark?

| Sustainability Indicator | Metric | Fund | Reference benchmark |

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes **No**

It made **sustainable investments with an environmental objective**: ___%

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: ___%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 67.83% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following table lists the environmental and social characteristics which were promoted by the Fund throughout the reference period. Further information on these environmental and social characteristics is outlined in the Fund's prospectus. Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

Environmental and social characteristics promoted by the Fund

Exposure to investments qualifying as Sustainable Investments

Exposure to companies with a higher clean energy exposure score

Exclusion of issuers involved in certain activities deemed to have negative environmental and/or social outcomes such as controversial weapons, small arms, military contracting, tobacco, thermal coal, oil sands, shale energy, arctic oil and gas exploration

Exclusion of issuers deemed to have violated commonly accepted international norms and standards

The Sustainable Investments held by the Fund during the reference period contributed to the following EU Taxonomy environmental objectives:

| Exposure to investments qualifying as Sustainable Investments | % market value exposure to Sustainable Investments | 67.83% | 71.91% | 91.73% |

● ...and compared to previous periods?

The above table provides information about the performance of the sustainability indicators for the previous reference period (see section "How did the sustainability indicators perform?").

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the reference period, the Fund invested 67.83% of its holdings in Sustainable Investments in pursuit of its investment objective.

The Fund's investments qualifying as Sustainable Investments were either in:
 (1) companies involved in activities deemed to contribute to positive environmental and/or social impacts, or
 (2) companies which have committed to one or more active carbon emissions reduction target(s) approved by the Science Based Targets initiative (SBTi).

The Fund's investments were assessed against their revenue exposure to positive sustainable impacts in line with the United Nations' Sustainable Development Goals, the EU Taxonomy and other sustainability-related frameworks. The positive environmental impacts considered as part of this assessment may have related to themes such as climate change and natural capital and identify companies that may have derived revenues from activities (or related activities) such as alternative energy, energy efficiency and green building, sustainable water, pollution prevention and control and sustainable agriculture. The positive societal impacts considered as part of this assessment may have related to themes such as basic needs and empowerment and identify companies that may have derived revenues from activities (or related activities) such as nutrition, major disease treatments, sanitation, affordable real estate, small and medium enterprise (SME) finance, education and connectivity.

iShares Global Clean Energy UCITS ETF (continued)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Sustainable Investments held by the Fund during the reference period met the do no significant harm ("DNSH") requirements, as defined by applicable law and regulation. At each index rebalance, all investments qualifying as Sustainable Investments were assessed against certain minimum environmental and social indicators. As part of the assessment, companies were assessed on their involvement in activities deemed to have highly negative environmental and social impacts. Where a company was identified as being involved in activities with highly negative environmental and social impacts, it was not eligible as a Sustainable Investment.

- How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory indicators for adverse impacts on sustainability factors (as set out in the Regulatory Technical Standards ("RTS") under the SFDR) were considered at each index rebalance through assessment of the Fund's investments qualifying as Sustainable Investments.

Following this assessment, the following investments did not qualify as Sustainable Investments: (1) companies deemed to be deriving at least 1% of their revenue from thermal coal which is significantly carbon intensive and a major contributor to greenhouse gas emissions (taking into account indicators relating to GHG emissions) (2) companies that have been deemed to be involved in severe ESG related controversies (taking into account indicators relating to greenhouse gas emissions, biodiversity, water, waste and social and employee matters), and (3) companies which were deemed to be lagging industry peers based on their high exposure and failure to manage significant ESG risks (taking into account indicators relating to greenhouse gas emissions, biodiversity, water, waste, unadjusted gender pay gap and board gender diversity).

The benchmark index also excluded: (1) companies which were classified as violating or are at risk of violating commonly accepted international norms and standards, enshrined in the United Nations Global Compact (UNGC) Principles, the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights (UNGPs) and their underlying conventions and (2) companies determined to have any tie to controversial weapons (taking into account indicators concerning ties to controversial weapons).

- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's benchmark index excluded companies which were classified as violating or were at risk of violating commonly accepted international norms and standards, enshrined in the United Nations Global Compact (UNGC) Principles, the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights (UNGPs) and their underlying conventions. The benchmark index applied the above exclusionary criteria at each index rebalance.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The following table provides information about the impact of the principal adverse sustainability indicators taken into consideration by this Fund. The Fund considered the impact of the principal adverse sustainability indicators through the promotion of environmental and social characteristics ("E&S criteria") set out above (see To what extent were the environmental and/or social characteristics promoted by this financial product met?). The Investment Manager has determined that these PAIs have been considered as part of the investment selection criteria of the benchmark index at each index rebalance. The Fund's specific sustainability indicator may not align with the full scope of the regulatory definition of the corresponding PAI outlined in Annex 1 supplementing Regulation (EU) 2019/2088 Regulatory Technical Standards ("RTS").

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The taxonomy alignment percentage in the above diagram represents the percentage of investments held by the Fund in EU Taxonomy-aligned activities through Sustainable Investments with an environmental objective. It does not include the taxonomy alignment achieved through the Fund's other investments. For the taxonomy alignment of the Fund's total investments, see the bar chart below.

The following table details the asset allocation of the Fund for the current and the previous reference period.

| Asset allocation | % Investments | | |
|-------------------------------------|---------------|--------|------------------|
| | 2024 | 2023 | 2022 |
| #1 Aligned with E/S characteristics | 99.95% | 98.83% | 99.97% |
| #2 Other | 0.05% | 1.17% | 0.03% |
| #1A Sustainable | 67.83% | 71.91% | 91.73% |
| #1B Other E/S characteristics | 32.12% | 26.92% | 8.24% |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

For the reference period, the Fund's investment alignment with EU Taxonomy is shown in the graphs below.

For the reference period, 46.71% of the Fund's investments were classified as both Sustainable Investments with an environmental objective and aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

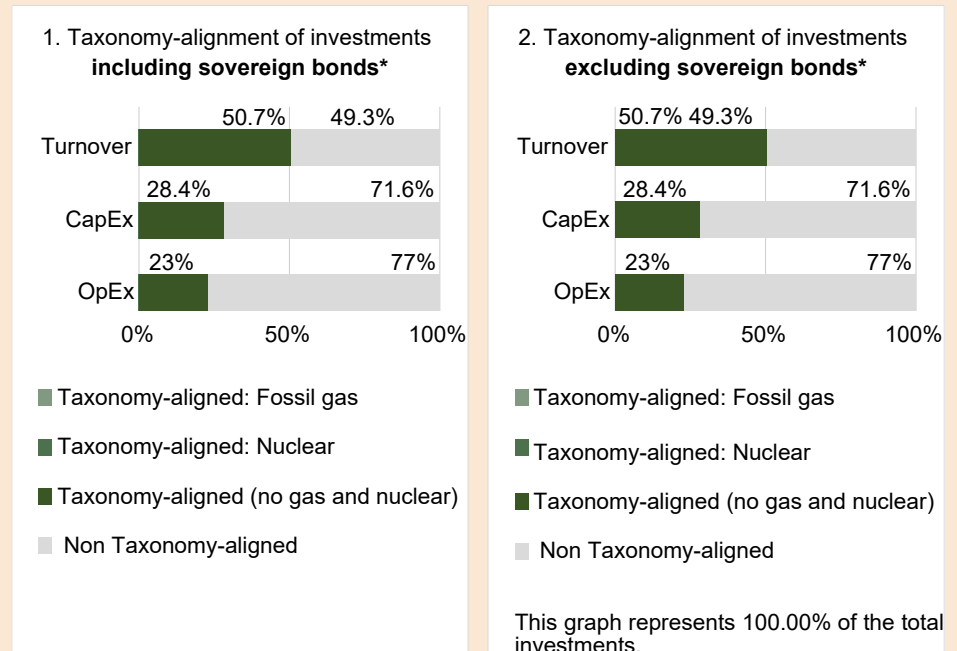

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

For the reference period, 0% of the Fund's total investments were held in sovereign exposures.

The investments held by the Fund during the reference period contributed to the following EU Taxonomy environmental objectives:

| Environmental objectives | % of Investments |
|---------------------------|------------------|
| Climate Change Mitigation | 50.68% |
| Climate Change Adaptation | 0.00% |

The data presented in the table above was not subject to an assurance provided by the Fund's auditor or a review by a third party. The assessment of EU Taxonomy alignment is based on data from a third-party vendor. The source of this data is a combination of equivalent and reported data. Equivalent data that matches the technical criteria under EU Taxonomy generates an eligibility or alignment result for those companies for which we do not have reported data.

What was the share of investments made in transitional and enabling activities?

For the reference period, the Fund's investments in transitional and enabling activities were as follows:

| | % of Investments |
|-------------------------|------------------|
| Transitional Activities | 0.00% |
| Enabling Activities | 25.29% |

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the previous reference period, 0% of the Fund's investments were aligned with EU Taxonomy.

 Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

For the reference period, 21.21% of the Fund's investments were classified as Sustainable Investments with an environmental objective not aligned with EU Taxonomy.

The Fund invested in Sustainable Investments that were not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment was unavailable; and/or (iii) underlying economic activities were not eligible under the EU Taxonomy's available technical screening criteria or did not comply with all requirements set out in such technical screening criteria.

What was the share of socially sustainable investments?

For the reference period, 0.00% of the Fund's investments were classified as socially sustainable investments.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "#2 Other" included cash, money market funds and derivatives, however such holdings did not exceed 20%. Such investments were used for the purpose of efficient portfolio management, except for derivatives used for currency hedging for any currency hedged share class. Any ESG rating or analyses applied by the index provider applied only to the derivatives relating to individual issuers used by the Fund. Derivatives based on financial indices, interest rates, or foreign exchange instruments were not considered against minimum environment or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund met the environmental and social characteristics by tracking the environment and social characteristics of the benchmark index. The benchmark index methodology incorporates the environmental and social characteristics outlined (see section “To what extent were the environmental and/or social characteristics of the Fund met?”).

The Investment Manager is also subject to the shareholder engagement requirements of the Shareholders Rights Directive II (SRD) requirements. The SRD aims to strengthen the position of shareholders, enhance transparency and reduce excessive risk within companies traded on regulated EU marketplaces. Further details regarding the Investment Manager’s activities under the SRD are available on BlackRock’s website.

How did this financial product perform compared to the reference benchmark?

For the reference period, the Fund has designated the benchmark index as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund. The performance of the Fund compared to the benchmark index is outlined below.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The benchmark index excluded issuers that did not meet its ESG selection criteria from its broad market index, the S&P Global BMI Energy Index. The ESG selection criteria that is excluded is set out above (see To what extent were the environmental and/or social characteristics promoted by this financial product met?). Further details regarding the methodology of the benchmark index (including its constituents) are available on the index provider’s website at <https://www.spglobal.com/spdji/en/indices/esg/sp-global-clean-energy-index/#overview>.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The Fund achieved the environmental and social characteristics it promotes through a portfolio that is primarily made up of securities that represent the Fund’s benchmark index.

How did this financial product perform compared with the reference benchmark?

| Sustainability Indicator | Metric | Fund | Reference benchmark |
|---|---|---------|---------------------|

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Did this financial product have a sustainable investment objective?

Yes **No**

It made **sustainable investments with an environmental objective**: ___%

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: ___%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 79.03% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following table lists the environmental and social characteristics which were promoted by the Fund throughout the reference period. Further information on these environmental and social characteristics is outlined in the Fund's prospectus. Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

Environmental and social characteristics promoted by the Fund

¹The Fund's commitment to a minimum proportion of investments qualifying as Sustainable Investments became effective on 1 January 2023, and as a result was not reported on as part of the 2022 periodic report.

● ...and compared to previous periods?

The above table provides information about the performance of the sustainability indicators for the previous reference period (see section "How did the sustainability indicators perform?").

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the reference period, the Fund invested 79.03% of its holdings in Sustainable Investments in pursuit of its investment objective.

The Fund's investments qualifying as Sustainable Investments were either in:
 (1) companies involved in activities deemed to contribute to positive environmental and/or social impacts, or
 (2) companies which have committed to one or more active carbon emissions reduction target(s) approved by the Science Based Targets initiative (SBTi).

The Fund's investments were assessed against their revenue exposure to positive sustainable impacts in line with the United Nations' Sustainable Development Goals, the EU Taxonomy and other sustainability-related frameworks. The positive environmental impacts considered as part of this assessment may have related to themes such as climate change and natural capital and identify companies that may have derived revenues from activities (or related activities) such as alternative energy, energy efficiency and green building, sustainable water, pollution prevention and control and sustainable agriculture. The positive societal impacts considered as part of this assessment may have related to themes such as basic needs and empowerment and identify companies that may have derived revenues from activities (or related activities) such as nutrition, major disease treatments, sanitation, affordable real estate, small and medium enterprise (SME) finance, education and connectivity.

iShares Global Timber & Forestry UCITS ETF (continued)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Sustainable Investments held by the Fund during the reference period met the do no significant harm ("DNSH") requirements, as defined by applicable law and regulation. At each index rebalance, all investments qualifying as Sustainable Investments were assessed against certain minimum environmental and social indicators. As part of the assessment, companies were assessed on their involvement in activities deemed to have highly negative environmental and social impacts. Where a company was identified as being involved in activities with highly negative environmental and social impacts, it was not eligible as a Sustainable Investment.

- How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory indicators for adverse impacts on sustainability factors (as set out in the Regulatory Technical Standards ("RTS") under the SFDR) were considered at each index rebalance through assessment of the Fund's investments qualifying as Sustainable Investments.

Following this assessment, the following investments did not qualify as Sustainable Investments: (1) companies deemed to be deriving at least 1% of their revenue from thermal coal which is significantly carbon intensive and a major contributor to greenhouse gas emissions (taking into account indicators relating to GHG emissions) (2) companies that have been deemed to be involved in severe ESG related controversies (taking into account indicators relating to greenhouse gas emissions, biodiversity, water, waste and social and employee matters), and (3) companies which were deemed to be lagging industry peers based on their high exposure and failure to manage significant ESG risks (taking into account indicators relating to greenhouse gas emissions, biodiversity, water, waste, unadjusted gender pay gap and board gender diversity).

The benchmark index also excluded: (1) companies which were classified as violating or are at risk of violating commonly accepted international norms and standards, enshrined in the United Nations Global Compact (UNGC) Principles, the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights (UNGPs) and their underlying conventions and (2) companies determined to have any tie to controversial weapons (taking into account indicators concerning ties to controversial weapons).

- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's benchmark index excluded companies which were classified as violating or were at risk of violating commonly accepted international norms and standards, enshrined in the United Nations Global Compact (UNGC) Principles, the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights (UNGPs) and their underlying conventions. The benchmark index applied the above exclusionary criteria at each index rebalance.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The following table provides information about the impact of the principal adverse sustainability indicators taken into consideration by this Fund. The Fund considered the impact of the principal adverse sustainability indicators through the promotion of environmental and social characteristics ("E&S criteria") set out above (see To what extent were the environmental and/or social characteristics promoted by this financial product met?). The Investment Manager has determined that these PAIs have been considered as part of the investment selection criteria of the benchmark index at each index rebalance. The Fund's specific sustainability indicator may not align with the full scope of the regulatory definition of the corresponding PAI outlined in Annex 1 supplementing Regulation (EU) 2019/2088 Regulatory Technical Standards ("RTS").

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The taxonomy alignment percentage in the above diagram represents the percentage of investments held by the Fund in EU Taxonomy-aligned activities through Sustainable Investments with an environmental objective. It does not include the taxonomy alignment achieved through the Fund's other investments. For the taxonomy alignment of the Fund's total investments, see the bar chart below.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

For the reference period, the Fund's investment alignment with EU Taxonomy is shown in the graphs below.

For the reference period, 2.29% of the Fund's investments were classified as both Sustainable Investments with an environmental objective and aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

For the reference period, 0% of the Fund's total investments were held in sovereign exposures.

The investments held by the Fund during the reference period contributed to the following EU Taxonomy environmental objectives:

| Environmental objectives | % of Investments |
|---------------------------|------------------|
| Climate Change Mitigation | 2.57% |

The data presented in the table above was not subject to an assurance provided by the Fund's auditor or a review by a third party. The assessment of EU Taxonomy alignment is based on data from a third-party vendor. The source of this data is a combination of equivalent and reported data. Equivalent data that matches the technical criteria under EU Taxonomy generates an eligibility or alignment result for those companies for which we do not have reported data.

What was the share of investments made in transitional and enabling activities?

For the reference period, the Fund's investments in transitional and enabling activities were as follows:

| | % of Investments |
|-------------------------|------------------|
| Transitional Activities | 0.03% |
| Enabling Activities | 0.23% |

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the previous reference period, 0% of the Fund's investments were aligned with EU Taxonomy.

 Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

For the reference period, 70.06% of the Fund's investments were classified as Sustainable Investments with an environmental objective not aligned with EU Taxonomy.

The Fund invested in Sustainable Investments that were not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment was unavailable; and/or (iii) underlying economic activities were not eligible under the EU Taxonomy's available technical screening criteria or did not comply with all requirements set out in such technical screening criteria.

What was the share of socially sustainable investments?

For the reference period, 6.68% of the Fund's investments were classified as socially sustainable investments.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "#2 Other" included cash, money market funds and derivatives, however such holdings did not exceed 20%. Such investments were used for the purpose of efficient portfolio management, except for derivatives used for currency hedging for any currency hedged share class. Any ESG rating or analyses applied by the index provider applied only to the derivatives relating to individual issuers used by the Fund. Derivatives based on financial indices, interest rates, or foreign exchange instruments were not considered against minimum environment or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund met the environmental and social characteristics by tracking the environment and social characteristics of the benchmark index. The benchmark index methodology incorporates the environmental and social characteristics outlined (see section “To what extent were the environmental and/or social characteristics of the Fund met?”).

The Investment Manager is also subject to the shareholder engagement requirements of the Shareholders Rights Directive II (SRD) requirements. The SRD aims to strengthen the position of shareholders, enhance transparency and reduce excessive risk within companies traded on regulated EU marketplaces. Further details regarding the Investment Manager’s activities under the SRD are available on BlackRock’s website.

How did this financial product perform compared to the reference benchmark?

For the reference period, the Fund has designated the benchmark index as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund. The performance of the Fund compared to the benchmark index is outlined below.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The benchmark index excluded issuers that did not meet its ESG selection criteria from its broad market index, the S&P Global BMI. The ESG selection criteria that is excluded is set out above (see To what extent were the environmental and/or social characteristics promoted by this financial product met?). Further details regarding the methodology of the benchmark index (including its constituents) are available on the index provider’s website at <https://www.spglobal.com/spdji/en/indices/equity/sp-global-timber-and-forestry-index/#overview>.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The Fund achieved the environmental and social characteristics it promotes through a portfolio that is primarily made up of securities that represent the Fund’s benchmark index.

iShares Global Water UCITS ETF

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Did this financial product have a sustainable investment objective?

Yes **No**

It made **sustainable investments with an environmental objective**: ___%

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: ___%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 47.07% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following table lists the environmental and social characteristics which were promoted by the Fund throughout the reference period. Further information on these environmental and social characteristics is outlined in the Fund's prospectus. Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

¹The Fund's commitment to a minimum proportion of investments qualifying as Sustainable Investments became effective on 1 January 2023, and as a result was not reported on as part of the 2022 periodic report.

● ...and compared to previous periods?

The above table provides information about the performance of the sustainability indicators for the previous reference period (see section "How did the sustainability indicators perform?").

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the reference period, the Fund invested 47.07% of its holdings in Sustainable Investments in pursuit of its investment objective.

The Fund's investments qualifying as Sustainable Investments were either in:
 (1) companies involved in activities deemed to contribute to positive environmental and/or social impacts, or
 (2) companies which have committed to one or more active carbon emissions reduction target(s) approved by the Science Based Targets initiative (SBTi).

The Fund's investments were assessed against their revenue exposure to positive sustainable impacts in line with the United Nations' Sustainable Development Goals, the EU Taxonomy and other sustainability-related frameworks. The positive environmental impacts considered as part of this assessment may have related to themes such as climate change and natural capital and identify companies that may have derived revenues from activities (or related activities) such as alternative energy, energy efficiency and green building, sustainable water, pollution prevention and control and sustainable agriculture. The positive societal impacts considered as part of this assessment may have related to themes such as basic needs and empowerment and identify companies that may have derived revenues from activities (or related activities) such as nutrition, major disease treatments, sanitation, affordable real estate, small and medium enterprise (SME) finance, education and connectivity.

iShares Global Water UCITS ETF (continued)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Sustainable Investments held by the Fund during the reference period met the do no significant harm ("DNSH") requirements, as defined by applicable law and regulation. At each index rebalance, all investments qualifying as Sustainable Investments were assessed against certain minimum environmental and social indicators. As part of the assessment, companies were assessed on their involvement in activities deemed to have highly negative environmental and social impacts. Where a company was identified as being involved in activities with highly negative environmental and social impacts, it was not eligible as a Sustainable Investment.

- How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory indicators for adverse impacts on sustainability factors (as set out in the Regulatory Technical Standards ("RTS") under the SFDR) were considered at each index rebalance through assessment of the Fund's investments qualifying as Sustainable Investments.

Following this assessment, the following investments did not qualify as Sustainable Investments: (1) companies deemed to be deriving at least 1% of their revenue from thermal coal which is significantly carbon intensive and a major contributor to greenhouse gas emissions (taking into account indicators relating to GHG emissions) (2) companies that have been deemed to be involved in severe ESG related controversies (taking into account indicators relating to greenhouse gas emissions, biodiversity, water, waste and social and employee matters), and (3) companies which were deemed to be lagging industry peers based on their high exposure and failure to manage significant ESG risks (taking into account indicators relating to greenhouse gas emissions, biodiversity, water, waste, unadjusted gender pay gap and board gender diversity).

The benchmark index also excluded: (1) companies which were classified as violating or are at risk of violating commonly accepted international norms and standards, enshrined in the United Nations Global Compact (UNGC) Principles, the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights (UNGPs) and their underlying conventions and (2) companies determined to have any tie to controversial weapons (taking into account indicators concerning ties to controversial weapons).

- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's benchmark index excluded companies which were classified as violating or were at risk of violating commonly accepted international norms and standards, enshrined in the United Nations Global Compact (UNGC) Principles, the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights (UNGPs) and their underlying conventions. The benchmark index applied the above exclusionary criteria at each index rebalance.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The following table provides information about the impact of the principal adverse sustainability indicators taken into consideration by this Fund. The Fund considered the impact of the principal adverse sustainability indicators through the promotion of environmental and social characteristics ("E&S criteria") set out above (see To what extent were the environmental and/or social characteristics promoted by this financial product met?). The Investment Manager has determined that these PAIs have been considered as part of the investment selection criteria of the benchmark index at each index rebalance. The Fund's specific sustainability indicator may not align with the full scope of the regulatory definition of the corresponding PAI outlined in Annex 1 supplementing Regulation (EU) 2019/2088 Regulatory Technical Standards ("RTS").

| Adverse Sustainability Indicator | Sustainability Indicators |
|--|--|
| Exposure to companies active in the fossil fuel sector | Exclusion of issuers based on certain environmental screens (listed above) |
| Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises | Exclusion of issuers violating or are at risk of violating commonly accepted international norms and standards |

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The taxonomy alignment percentage in the above diagram represents the percentage of investments held by the Fund in EU Taxonomy-aligned activities through Sustainable Investments with an environmental objective. It does not include the taxonomy alignment achieved through the Fund's other investments. For the taxonomy alignment of the Fund's total investments, see the bar chart below.

The following table details the asset allocation of the Fund for the current and the previous reference period.

The benchmark index methodology incorporates the environmental and social characteristics outlined (see section “To what extent were the environmental and/or social characteristics of the Fund met?”).

The Investment Manager is also subject to the shareholder engagement requirements of the Shareholders Rights Directive II (SRD) requirements. The SRD aims to strengthen the position of shareholders, enhance transparency and reduce excessive risk within companies traded on regulated EU marketplaces. Further details regarding the Investment Manager’s activities under the SRD are available on BlackRock’s website.

How did this financial product perform compared to the reference benchmark?

For the reference period, the Fund has designated the benchmark index as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund. The performance of the Fund compared to the benchmark index is outlined below.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The benchmark index excluded issuers that did not meet its ESG selection criteria from its broad market index, the S&P Global BMI. The ESG selection criteria that is excluded is set out above (see To what extent were the environmental and/or social characteristics promoted by this financial product met?). Further details regarding the methodology of the benchmark index (including its constituents) are available on the index provider’s website at <https://www.spglobal.com/spdji/en/indices/esg/sp-global-water-index/#overview>.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The Fund achieved the environmental and social characteristics it promotes through replicating the constituents of the Fund’s benchmark index.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

This section is not applicable for this Fund as it did not commit to holding Sustainable Investments during the reference period, however, certain Sustainable Investments may form part of the Fund's investment portfolio. Please refer to the section below, "How did this financial product consider principal adverse impacts on sustainability factors?", which describes how the Fund considered PAIs on sustainability factors.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

This section is not applicable for this Fund as it did not commit to holding Sustainable Investments during the reference period, however, certain Sustainable Investments may form part of the Fund's investment portfolio.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

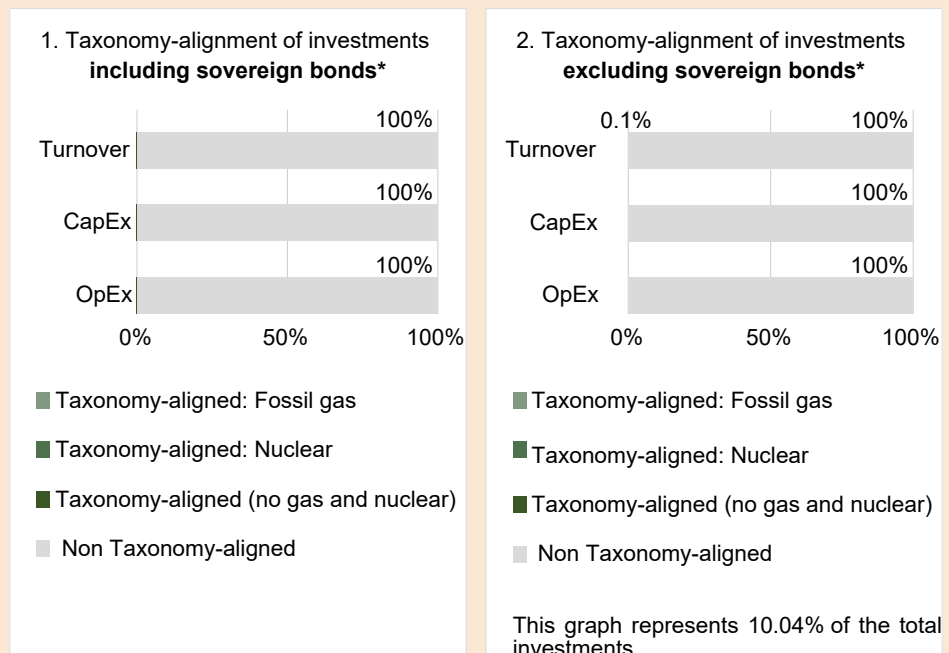

For the reference period, the Fund's investment alignment with EU Taxonomy is shown in the graphs below.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas
 - In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

For the reference period, 89.96% of the Fund's total investments were held in sovereign exposures. Taxonomy alignment of these exposures could not be determined due to limited data availability.

The investments held by the Fund during the reference period contributed to the following EU Taxonomy environmental objectives:

| Environmental objectives | % of Investments |
|---------------------------|------------------|
| Climate Change Mitigation | 0.01% |
| Climate Change Adaptation | 0.00% |

The data presented in the table above was not subject to an assurance provided by the Fund's auditor or a review by a third party. The assessment of EU Taxonomy alignment is based on data from a third-party vendor. The source of this data is a combination of equivalent and reported data. Equivalent data that matches the technical criteria under EU Taxonomy generates an eligibility or alignment result for those companies for which we do not have reported data.

What was the share of investments made in transitional and enabling activities?

For the reference period, the Fund's investments in transitional and enabling activities were as follows:

| | % of Investments |
|-------------------------|------------------|
| Transitional Activities | 0.00% |
| Enabling Activities | 0.00% |

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the previous reference period, 0% of the Fund's investments were aligned with EU Taxonomy.

Sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

This section is not applicable for this Fund as it did not commit to holding Sustainable Investments during the reference period, however, certain Sustainable Investments may form part of the Fund's investment portfolio.

What was the share of socially sustainable investments?

This section is not applicable for this Fund as it did not commit to holding Sustainable Investments during the reference period, however, certain Sustainable Investments may form part of the Fund's investment portfolio.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "#2 Other" included cash, money market funds and derivatives, however such holdings did not exceed 20%. Such investments were used for the purpose of efficient portfolio management, except for derivatives used for currency hedging for any currency hedged share class. Any ESG rating or analyses applied by the index provider applied only to the derivatives relating to individual issuers used by the Fund. Derivatives based on financial indices, interest rates, or foreign exchange instruments were not considered against minimum environment or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund met the environmental and social characteristics by tracking the environment and social characteristics of the benchmark index. The benchmark index methodology incorporates the environmental and social characteristics outlined (see section "To what extent were the environmental and/or social characteristics of the Fund met?").

How did this financial product perform compared to the reference benchmark?

For the reference period, the Fund has designated the benchmark index as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund. The performance of the Fund compared to the benchmark index is outlined below.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The benchmark index excluded issuers that did not meet its ESG selection criteria from its broad market index, the J.P. Morgan ESG EMBI Global Diversified Index. The ESG selection criteria that is excluded is set out above (see To what extent were the environmental and/or social characteristics promoted by this financial product met?). Further details regarding the methodology of the benchmark index (including its constituents) are available on the index provider's website at <https://www.jpmorgan.com/content/dam/jpm/cib/complex/content/markets/composition-docs/pdf-30.pdf>.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

¹The Fund's commitment to a minimum proportion of investments qualifying as sustainable investments became effective on 1 January 2023, and as a result was not reported on as part of the 2022 periodic report.

²The aggregate portfolio values for each sustainability indicator are calculated as the average of the realised values on or around each applicable index rebalance during the reference period. In some instances, due to market movements between the index review and effective rebalance date/reporting date or differences in the weightings of the portfolio holdings compared to the index, the realised values diverged from the targets achieved by the index construction process.

● ...and compared to previous periods?

The above table provides information about the performance of the sustainability indicators for the previous reference period (see section "How did the sustainability indicators perform?").

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the reference period, the Fund invested 58.45% of its holdings in Sustainable Investments in pursuit of its investment objective.

The Fund's investments qualifying as Sustainable Investments were either in:

- (1) companies involved in activities deemed to contribute to positive environmental and/or social impacts, or
- (2) companies which have committed to one or more active carbon emissions reduction target(s) approved by the Science Based Targets initiative (SBTi).

The Fund's investments were assessed against their revenue exposure to positive sustainable impacts in line with the United Nations' Sustainable Development Goals, the EU Taxonomy and other sustainability-related frameworks. The positive environmental impacts considered as part of this assessment may have related to themes such as climate change and natural capital and identify companies that may have derived revenues from activities (or related activities) such as alternative energy, energy efficiency and green building, sustainable water, pollution prevention and control and sustainable agriculture. The positive societal impacts considered as part of this assessment may have related to themes such as basic needs and empowerment and identify companies that may have derived revenues from activities (or related activities) such as nutrition, major disease treatments, sanitation, affordable real estate, small and medium enterprise (SME) finance, education and connectivity.

iShares MSCI Europe Paris-Aligned Climate UCITS ETF (continued)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Sustainable Investments held by the Fund during the reference period met the do no significant harm ("DNSH") requirements, as defined by applicable law and regulation. At each index rebalance, all investments qualifying as Sustainable Investments were assessed against certain minimum environmental and social indicators. As part of the assessment, companies were assessed on their involvement in activities deemed to have highly negative environmental and social impacts. Where a company was identified as being involved in activities with highly negative environmental and social impacts, it was not eligible as a Sustainable Investment.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The mandatory indicators for adverse impacts on sustainability factors (as set out in the Regulatory Technical Standards ("RTS") under the SFDR) were considered at each index rebalance through the screening criteria applied by the index provider in the selection of index constituents qualifying as Sustainable Investments.

As a result of the screening criteria applied by the index provider, the following investments within the benchmark index did not qualify as Sustainable Investments: (1) companies deriving a minimum % revenue from thermal coal (as determined by the index provider) which was significantly carbon intensive and a major contributor to greenhouse gas emissions (taking into account indicators relating to GHG emissions), (2) companies with an MSCI ESG controversy score of 1 or below that have been deemed to be involved in severe or very severe ESG related controversies (including in relation to indicators concerning greenhouse gas emissions, biodiversity, water, waste and social and employee matters), and (3) companies with an MSCI ESG rating of B or below, which were deemed to be lagging industry peers based on their high exposure and failure to manage significant ESG risks (including in relation to indicators concerning greenhouse gas emissions, biodiversity, water, waste, unadjusted gender pay gap and board gender diversity).

The benchmark index also excluded: (1) companies with a "red" MSCI ESG controversy flag which included companies determined to be in violation of international and/or national standards (taking into account indicators concerning violations of United Nations Global Compact principles and OECD Guidelines for Multinational Enterprises) and (2) companies determined to have any tie to controversial weapons (taking into account indicators concerning ties to controversial weapons).

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Fund's benchmark index excluded companies with a "red" ESG controversy flag which excludes issuers which have been determined by the index provider to be in violation of the UN Guiding Principles on Business and Human Rights and OECD Guidelines for Multinational Enterprises.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The following table provides information about the impact of the principal adverse sustainability indicators taken into consideration by this Fund. The Fund considered the impact of the principal adverse sustainability indicators through the promotion of environmental and social characteristics ("E&S criteria") set out above (see To what extent were the environmental and/or social characteristics promoted by this financial product met?). The Investment Manager has determined that these PAIs have been considered as part of the investment selection criteria of the benchmark index at each index rebalance. The Fund's specific sustainability indicator may not align with the full scope of the regulatory definition of the corresponding PAI outlined in Annex 1 supplementing Regulation (EU) 2019/2088 Regulatory Technical Standards ("RTS").

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The taxonomy alignment percentage in the above diagram represents the percentage of investments held by the Fund in EU Taxonomy-aligned activities through Sustainable Investments with an environmental objective. It does not include the taxonomy alignment achieved through the Fund's other investments. For the taxonomy alignment of the Fund's total investments, see the bar chart below.

The following table details the asset allocation of the Fund for the current and the previous reference period.

| Asset allocation | % Investments | | |
|-------------------------------------|---------------|--------|------------------|
| | 2024 | 2023 | 2022 |
| #1 Aligned with E/S characteristics | 99.20% | 98.88% | 99.92% |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

For the reference period, the Fund's investment alignment with EU Taxonomy is shown in the graphs below.

For the reference period, 7.05% of the Fund's investments were classified as both Sustainable Investments with an environmental objective and aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

For the reference period, 0.04% of the Fund's total investments were held in sovereign exposures. Taxonomy alignment of these exposures could not be determined due to limited data availability.

The investments held by the Fund during the reference period contributed to the following EU Taxonomy environmental objectives:

| Environmental objectives | % of Investments |
|---------------------------|------------------|
| Climate Change Mitigation | 7.49% |
| Climate Change Adaptation | 0.02% |

The data presented in the table above was not subject to an assurance provided by the Fund's auditor or a review by a third party. The assessment of EU Taxonomy alignment is based on data from a third-party vendor. The source of this data is a combination of equivalent and reported data. Equivalent data that matches the technical criteria under EU Taxonomy generates an eligibility or alignment result for those companies for which we do not have reported data.

What was the share of investments made in transitional and enabling activities?

For the reference period, the Fund's investments in transitional and enabling activities were as follows:

| | % of Investments |
|-------------------------|------------------|
| Transitional Activities | 0.04% |
| Enabling Activities | 4.76% |

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the previous reference period, 0% of the Fund's investments were aligned with EU Taxonomy.

Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

For the reference period, 39.77% of the Fund's investments were classified as Sustainable Investments with an environmental objective not aligned with EU Taxonomy.

The Fund invested in Sustainable Investments that were not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment was unavailable; and/or (iii) underlying economic activities were not eligible under the EU Taxonomy's available technical screening criteria or did not comply with all requirements set out in such technical screening criteria.

What was the share of socially sustainable investments?

For the reference period, 11.63% of the Fund's investments were classified as socially sustainable investments.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "#2 Other" included cash, money market funds and derivatives, however such holdings did not exceed 20%. Such investments were used for the purpose of efficient portfolio management, except for derivatives used for currency hedging for any currency hedged share class. Any ESG rating or analyses applied by the index provider applied only to the derivatives relating to individual issuers used by the Fund. Derivatives based on financial indices, interest rates, or foreign exchange instruments were not considered against minimum environment or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund met the environmental and social characteristics by tracking the environment and social characteristics of the benchmark index. The benchmark index methodology incorporates the environmental and social characteristics outlined (see section “To what extent were the environmental and/or social characteristics of the Fund met?”).

The Investment Manager is also subject to the shareholder engagement requirements of the Shareholders Rights Directive II (SRD) requirements. The SRD aims to strengthen the position of shareholders, enhance transparency and reduce excessive risk within companies traded on regulated EU marketplaces. Further details regarding the Investment Manager’s activities under the SRD are available on BlackRock’s website.

How did this financial product perform compared to the reference benchmark?

For the reference period, the Fund has designated the benchmark index as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund. The performance of the Fund compared to the benchmark index is outlined below.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● How does the reference benchmark differ from a broad market index?

The benchmark index excluded issuers that did not meet its ESG selection criteria from its broad market index, the MSCI Europe Index. The ESG selection criteria that is excluded is set out above (see To what extent were the environmental and/or social characteristics promoted by this financial product met?). Further details regarding the methodology of the benchmark index (including its constituents) are available on the index provider’s website at <https://www.msci.com/indexes/index/737361>.

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The Fund achieved the environmental and social characteristics it promotes through replicating the constituents of the Fund’s benchmark index.

iShares MSCI Europe Quality Dividend ESG UCITS ETF

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following table lists the environmental and social characteristics which were promoted by the Fund throughout the reference period. Further information on these environmental and social characteristics is outlined in the Fund's prospectus. Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

Environmental and social characteristics promoted by the Fund

- Exposure to investments qualifying as Sustainable Investments
- Reduction (30%) in carbon emission intensity relative to the Parent Index
- Exclusion of issuers with a zero MSCI controversy score or no MSCI controversy score
- Exclusion of issuers involved in certain activities deemed to have negative environmental and/or social outcomes such as controversial weapons, nuclear weapons, conventional weapons, civilian firearms, tobacco, oil sands, thermal coal
- Exclusion of companies classified as violating United Nations Global Compact principles
- Improvement of weighted average ESG score versus the Parent Index
- Reduction (30%) in potential carbon emissions relative to the Parent Index

The Sustainable Investments held by the Fund during the reference period contributed to the following EU Taxonomy environmental objectives:

EU Taxonomy environmental objectives contributed to by the Fund

- Climate Change Mitigation
- Climate Change Adaptation

¹MSCI collects fossil fuel reserves data, where relevant, for companies which have reserves, typically in the oil & gas, coal mining and electric utilities industries and only fossil fuel reserves used for energy are taken into account. For newly added companies where data is not yet available, MSCI uses zero fossil fuel reserves. The size of a company's reserves is normalised by MSCI for size by dividing the potential carbon emissions of the company by its market capitalisation. Whilst the reduction in potential emissions shown in the table above is significantly higher than the target, this is primarily due to a relatively small number of companies for which data is available.

²The Fund's commitment to a minimum proportion of investments qualifying as Sustainable Investments became effective on 1 January 2023, and as a result was not reported on as part of the 2022 periodic report.

● ...and compared to previous periods?

The above table provides information about the performance of the sustainability indicators for the previous reference period (see section "How did the sustainability indicators perform?").

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the reference period, the Fund invested 61.93% of its holdings in Sustainable Investments in pursuit of its investment objective.

The Fund's investments qualifying as Sustainable Investments were either in:

- (1) companies involved in activities deemed to contribute to positive environmental and/or social impacts, or
- (2) companies which have committed to one or more active carbon emissions reduction target(s) approved by the Science Based Targets initiative (SBTi).

The Fund's investments were assessed against their revenue exposure to positive sustainable impacts in line with the United Nations' Sustainable Development Goals, the EU Taxonomy and other sustainability-related frameworks. The positive environmental impacts considered as part of this assessment may have related to themes such as climate change and natural capital and identify companies that may have derived revenues from activities (or related activities) such as alternative energy, energy efficiency and green building, sustainable water, pollution prevention and control and sustainable agriculture. The positive societal impacts considered as part of this assessment may have related to themes such as basic needs and empowerment and identify companies that may have derived revenues from activities (or related activities) such as nutrition, major disease treatments, sanitation, affordable real estate, small and medium enterprise (SME) finance, education and connectivity.

iShares MSCI Europe Quality Dividend ESG UCITS ETF (continued)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Sustainable Investments held by the Fund during the reference period met the do no significant harm ("DNSH") requirements, as defined by applicable law and regulation. At each index rebalance, all investments qualifying as Sustainable Investments were assessed against certain minimum environmental and social indicators. As part of the assessment, companies were assessed on their involvement in activities deemed to have highly negative environmental and social impacts. Where a company was identified as being involved in activities with highly negative environmental and social impacts, it was not eligible as a Sustainable Investment.

- How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory indicators for adverse impacts on sustainability factors (as set out in the Regulatory Technical Standards ("RTS") under the SFDR) were considered at each index rebalance through the screening criteria applied by the index provider in the selection of index constituents qualifying as Sustainable Investments.

As a result of the screening criteria applied by the index provider, the following investments within the benchmark index did not qualify as Sustainable Investments: (1) companies deriving a minimum % revenue from thermal coal (as determined by the index provider) which was significantly carbon intensive and a major contributor to greenhouse gas emissions (taking into account indicators relating to GHG emissions), (2) companies with an MSCI ESG controversy score of 1 or below that have been deemed to be involved in severe or very severe ESG related controversies (including in relation to indicators concerning greenhouse gas emissions, biodiversity, water, waste and social and employee matters), and (3) companies with an MSCI ESG rating of B or below, which were deemed to be lagging industry peers based on their high exposure and failure to manage significant ESG risks (including in relation to indicators concerning greenhouse gas emissions, biodiversity, water, waste, unadjusted gender pay gap and board gender diversity).

The benchmark index also excluded: (1) companies with a "red" MSCI ESG controversy flag which included companies determined to be in violation of international and/or national standards (taking into account indicators concerning violations of United Nations Global Compact principles and OECD Guidelines for Multinational Enterprises) and (2) companies determined to have any tie to controversial weapons (taking into account indicators concerning ties to controversial weapons).

- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's benchmark index excluded companies with a "red" ESG controversy flag which excludes issuers which have been determined by the index provider to be in violation of the UN Guiding Principles on Business and Human Rights and OECD Guidelines for Multinational Enterprises.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The following table provides information about the impact of the principal adverse sustainability indicators taken into consideration by this Fund. The Fund considered the impact of the principal adverse sustainability indicators through the promotion of environmental and social characteristics ("E&S criteria") set out above (see To what extent were the environmental and/or social characteristics promoted by this financial product met?). The Investment Manager has determined that these PAIs have been considered as part of the investment selection criteria of the benchmark index at each index rebalance. The Fund's specific sustainability indicator may not align with the full scope of the regulatory definition of the corresponding PAI outlined in Annex 1 supplementing Regulation (EU) 2019/2088 Regulatory Technical Standards ("RTS").

| Adverse Sustainability Indicator | Sustainability Indicators |
|--|--|
| Greenhouse gas (GHG) emissions | Minimum % reduction of carbon mission intensity and potential carbon emissions targets |
| GHG intensity of investee companies | Minimum % reduction of carbon mission intensity and potential carbon emissions targets |

| Activities negatively affecting biodiversity-sensitive areas | Exclusion of issuers based on an MSCI ESG Controversy Score |
| Emissions to water | Exclusion of issuers based on an MSCI ESG Controversy Score |
| Hazardous waste and radioactive waste ratio | Exclusion of issuers based on an MSCI ESG Controversy Score |
| Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises | Exclusion of issuers based on an MSCI ESG Controversy Score |
| Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises | Exclusion of issuers classified as violating United Nations Global Compact principles |

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The taxonomy alignment percentage in the above diagram represents the percentage of investments held by the Fund in EU Taxonomy-aligned activities through Sustainable Investments with an environmental objective. It does not include the taxonomy alignment achieved through the Fund's other investments. For the taxonomy alignment of the Fund's total investments, see the bar chart below.

The following table details the asset allocation of the Fund for the current and the previous reference period.

| Asset allocation | % Investments | | |
|-------------------------------------|---------------|--------|------------------|
| | 2024 | 2023 | 2022 |
| #1 Aligned with E/S characteristics | 99.39% | 98.89% | 99.90% |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

For the reference period, the Fund's investment alignment with EU Taxonomy is shown in the graphs below.

For the reference period, 4.30% of the Fund's investments were classified as both Sustainable Investments with an environmental objective and aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

For the reference period, 0.02% of the Fund's total investments were held in sovereign exposures. Taxonomy alignment of these exposures could not be determined due to limited data availability.

The investments held by the Fund during the reference period contributed to the following EU Taxonomy environmental objectives:

| Environmental objectives | % of Investments |
|---------------------------|------------------|
| Climate Change Mitigation | 4.92% |
| Climate Change Adaptation | 0.05% |

The data presented in the table above was not subject to an assurance provided by the Fund's auditor or a review by a third party. The assessment of EU Taxonomy alignment is based on data from a third-party vendor. The source of this data is a combination of equivalent and reported data. Equivalent data that matches the technical criteria under EU Taxonomy generates an eligibility or alignment result for those companies for which we do not have reported data.

What was the share of investments made in transitional and enabling activities?

For the reference period, the Fund's investments in transitional and enabling activities were as follows:

| | % of Investments |
|-------------------------|------------------|
| Transitional Activities | 0.15% |
| Enabling Activities | 3.20% |

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the previous reference period, 0% of the Fund's investments were aligned with EU Taxonomy.

Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

For the reference period, 50.32% of the Fund's investments were classified as Sustainable Investments with an environmental objective not aligned with EU Taxonomy.

The Fund invested in Sustainable Investments that were not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment was unavailable; and/or (iii) underlying economic activities were not eligible under the EU Taxonomy's available technical screening criteria or did not comply with all requirements set out in such technical screening criteria.

What was the share of socially sustainable investments?

For the reference period, 7.30% of the Fund's investments were classified as socially sustainable investments.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "#2 Other" included cash, money market funds and derivatives, however such holdings did not exceed 20%. Such investments were used for the purpose of efficient portfolio management, except for derivatives used for currency hedging for any currency hedged share class. Any ESG rating or analyses applied by the index provider applied only to the derivatives relating to individual issuers used by the Fund. Derivatives based on financial indices, interest rates, or foreign exchange instruments were not considered against minimum environment or social safeguards.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

For the reference period, the Fund has designated the benchmark index as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund. The performance of the Fund compared to the benchmark index is outlined below.

How does the reference benchmark differ from a broad market index?

The benchmark index excluded issuers that did not meet its ESG selection criteria from its broad market index, the MSCI Europe High Dividend Yield Index. The ESG selection criteria that is excluded is set out above (see To what extent were the environmental and/or social characteristics promoted by this financial product met?). Further details regarding the methodology of the benchmark index (including its constituents) are available on the index provider's website at <https://www.msci.com/index/methodology/latest/HDYESGRedCarTar>.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The Fund achieved the environmental and social characteristics it promotes through a portfolio that is primarily made up of securities that represent the Fund's benchmark index.

How did this financial product perform compared with the reference benchmark?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following table lists the environmental and social characteristics which were promoted by the Fund throughout the reference period. Further information on these environmental and social characteristics is outlined in the Fund's prospectus. Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

Environmental and social characteristics promoted by the Fund

Exposure to investments qualifying as Sustainable Investments

Exclusion of issuers with a zero MSCI controversy score or no MSCI controversy score

Exclusion of issuers with an MSCI ESG rating below BB

Exclusion of issuers involved in certain activities deemed to have negative environmental and/or social outcomes such as controversial weapons, nuclear weapons, conventional weapons, civilian firearms, alcohol, gambling, tobacco, adult entertainment, genetically modified organisms, nuclear power, thermal coal, oil sands, unconventional oil and gas extraction, conventional oil and gas extraction (where the proportion of revenue from renewable energy and alternative fuels is below a set threshold), oil and gas based power generation, fossil fuel reserves ownership

The Sustainable Investments held by the Fund during the reference period contributed to the following EU Taxonomy environmental objectives:

EU Taxonomy environmental objectives contributed to by the Fund

Climate Change Mitigation

Climate Change Adaptation

How did the sustainability indicators perform?

The following table provides information about the performance of the sustainability indicators used to measure the attainment of each of the environmental and social characteristics promoted by the Fund, as further detailed in the Fund's prospectus.

| Sustainability Indicator | Metric | 2024 | 2023 | 2022 |
|---|--|--------|--------|------------------|
| Exposure to investments qualifying as Sustainable Investments | % market value exposure to Sustainable Investments | 61.73% | 54.86% | N/A ¹ |
| Exclusion of issuers with a zero MSCI controversy score or no MSCI controversy score | % market value exposure to issuers with a zero MSCI controversy score | 0.00% | 0.00% | 0.00% |
| Exclusion of issuers with an MSCI ESG rating below BB | % market value exposure to issuers with an MSCI ESG rating below BB | 0.00% | 0.00% | 0.00% |
| Exclusion of issuers involved in certain activities deemed to have negative environmental and/or social outcomes (listed above) | % market value exposure to issuers involved in certain activities deemed to have negative environmental and/or social outcomes | 0.00% | 0.00% | 0.00% |

¹The Fund's commitment to a minimum proportion of investments qualifying as Sustainable Investments became effective on 1 January 2023, and as a result was not reported on as part of the 2022 periodic report.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

During the reference period, the Fund invested 61.73% of its holdings in Sustainable Investments in pursuit of its investment objective.

The Fund's investments qualifying as Sustainable Investments were either in:

- (1) companies involved in activities deemed to contribute to positive environmental and/or social impacts, or
- (2) companies which have committed to one or more active carbon emissions reduction target(s) approved by the Science Based Targets initiative (SBTi).

The Fund's investments were assessed against their revenue exposure to positive sustainable impacts in line with the United Nations' Sustainable Development Goals, the EU Taxonomy and other sustainability-related frameworks. The positive environmental impacts considered as part of this assessment may have related to themes such as climate change and natural capital and identify companies that may have derived revenues from activities (or related activities) such as alternative energy, energy efficiency and green building, sustainable water, pollution prevention and control and sustainable agriculture. The positive societal impacts considered as part of this assessment may have related to themes such as basic needs and empowerment and identify companies that may have derived revenues from activities (or related activities) such as nutrition, major disease treatments, sanitation, affordable real estate, small and medium enterprise (SME) finance, education and connectivity.

iShares MSCI Europe SRI UCITS ETF (continued)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Sustainable Investments held by the Fund during the reference period met the do no significant harm ("DNSH") requirements, as defined by applicable law and regulation. At each index rebalance, all investments qualifying as Sustainable Investments were assessed against certain minimum environmental and social indicators. As part of the assessment, companies were assessed on their involvement in activities deemed to have highly negative environmental and social impacts. Where a company was identified as being involved in activities with highly negative environmental and social impacts, it was not eligible as a Sustainable Investment.

- How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory indicators for adverse impacts on sustainability factors (as set out in the Regulatory Technical Standards ("RTS") under the SFDR) were considered at each index rebalance through the screening criteria applied by the index provider in the selection of index constituents qualifying as Sustainable Investments.

As a result of the screening criteria applied by the index provider, the following investments within the benchmark index did not qualify as Sustainable Investments: (1) companies deriving a minimum % revenue from thermal coal (as determined by the index provider) which was significantly carbon intensive and a major contributor to greenhouse gas emissions (taking into account indicators relating to GHG emissions), (2) companies with an MSCI ESG controversy score of 1 or below that have been deemed to be involved in severe or very severe ESG related controversies (including in relation to indicators concerning greenhouse gas emissions, biodiversity, water, waste and social and employee matters), and (3) companies with an MSCI ESG rating of B or below, which were deemed to be lagging industry peers based on their high exposure and failure to manage significant ESG risks (including in relation to indicators concerning greenhouse gas emissions, biodiversity, water, waste, unadjusted gender pay gap and board gender diversity).

The benchmark index also excluded: (1) companies with a "red" MSCI ESG controversy flag which included companies determined to be in violation of international and/or national standards (taking into account indicators concerning violations of United Nations Global Compact principles and OECD Guidelines for Multinational Enterprises) and (2) companies determined to have any tie to controversial weapons (taking into account indicators concerning ties to controversial weapons).

- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's benchmark index excluded companies with a "red" ESG controversy flag which excludes issuers which have been determined by the index provider to be in violation of the UN Guiding Principles on Business and Human Rights and OECD Guidelines for Multinational Enterprises.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The following table provides information about the impact of the principal adverse sustainability indicators taken into consideration by this Fund. The Fund considered the impact of the principal adverse sustainability indicators through the promotion of environmental and social characteristics ("E&S criteria") set out above (see To what extent were the environmental and/or social characteristics promoted by this financial product met?). The Investment Manager has determined that these PAIs have been considered as part of the investment selection criteria of the benchmark index at each index rebalance. The Fund's specific sustainability indicator may not align with the full scope of the regulatory definition of the corresponding PAI outlined in Annex 1 supplementing Regulation (EU) 2019/2088 Regulatory Technical Standards ("RTS").

| Adverse Sustainability Indicator | Sustainability Indicators |
|--|--|
| Exposure to companies active in the fossil fuel sector | Exclusion of issuers based on certain environmental screens (listed above) |
| Activities negatively affecting biodiversity-sensitive areas | Exclusion of issuers based on an MSCI ESG controversy flag |
| Emissions to water | Exclusion of issuers based on an MSCI ESG controversy flag |
| Hazardous waste and radioactive waste ratio | Exclusion of issuers based on an MSCI ESG controversy flag |
| Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises | Exclusion of issuers based on an MSCI ESG controversy flag |

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The taxonomy alignment percentage in the above diagram represents the percentage of investments held by the Fund in EU Taxonomy-aligned activities through Sustainable Investments with an environmental objective. It does not include the taxonomy alignment achieved through the Fund's other investments. For the taxonomy alignment of the Fund's total investments, see the bar chart below.

The following table details the asset allocation of the Fund for the current and the previous reference period.

| Asset allocation | % Investments | | |
|-------------------------------------|---------------|--------|------------------|
| | 2024 | 2023 | 2022 |
| #1 Aligned with E/S characteristics | 99.31% | 99.49% | 99.95% |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

For the reference period, the Fund's investment alignment with EU Taxonomy is shown in the graphs below.

For the reference period, 5.08% of the Fund's investments were classified as both Sustainable Investments with an environmental objective and aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

For the reference period, 0.02% of the Fund's total investments were held in sovereign exposures. Taxonomy alignment of these exposures could not be determined due to limited data availability.

The investments held by the Fund during the reference period contributed to the following EU Taxonomy environmental objectives:

| Environmental objectives | % of Investments |
|---------------------------|------------------|
| Climate Change Mitigation | 5.14% |
| Climate Change Adaptation | 0.10% |

The data presented in the table above was not subject to an assurance provided by the Fund's auditor or a review by a third party. The assessment of EU Taxonomy alignment is based on data from a third-party vendor. The source of this data is a combination of equivalent and reported data. Equivalent data that matches the technical criteria under EU Taxonomy generates an eligibility or alignment result for those companies for which we do not have reported data.

What was the share of investments made in transitional and enabling activities?

For the reference period, the Fund's investments in transitional and enabling activities were as follows:

| | % of Investments |
|-------------------------|------------------|
| Transitional Activities | 0.12% |
| Enabling Activities | 3.43% |

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the previous reference period, 0% of the Fund's investments were aligned with EU Taxonomy.

Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

For the reference period, 46.41% of the Fund's investments were classified as Sustainable Investments with an environmental objective not aligned with EU Taxonomy.

The Fund invested in Sustainable Investments that were not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment was unavailable; and/or (iii) underlying economic activities were not eligible under the EU Taxonomy's available technical screening criteria or did not comply with all requirements set out in such technical screening criteria.

What was the share of socially sustainable investments?

For the reference period, 10.24% of the Fund's investments were classified as socially sustainable investments.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "#2 Other" included cash, money market funds and derivatives, however such holdings did not exceed 20%. Such investments were used for the purpose of efficient portfolio management, except for derivatives used for currency hedging for any currency hedged share class. Any ESG rating or analyses applied by the index provider applied only to the derivatives relating to individual issuers used by the Fund. Derivatives based on financial indices, interest rates, or foreign exchange instruments were not considered against minimum environment or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund met the environmental and social characteristics by tracking the environment and social characteristics of the benchmark index. The benchmark index methodology incorporates the environmental and social characteristics outlined (see section “To what extent were the environmental and/or social characteristics of the Fund met?”).

The Investment Manager is also subject to the shareholder engagement requirements of the Shareholders Rights Directive II (SRD) requirements. The SRD aims to strengthen the position of shareholders, enhance transparency and reduce excessive risk within companies traded on regulated EU marketplaces. Further details regarding the Investment Manager’s activities under the SRD are available on BlackRock’s website.

How did this financial product perform compared to the reference benchmark?

For the reference period, the Fund has designated the benchmark index as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund. The performance of the Fund compared to the benchmark index is outlined below.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The benchmark index excluded issuers that did not meet its ESG selection criteria from its broad market index, the MSCI Europe Index. The ESG selection criteria that is excluded is set out above (see To what extent were the environmental and/or social characteristics promoted by this financial product met?). Further details regarding the methodology of the benchmark index (including its constituents) are available on the index provider’s website at <https://www.msci.com/index/methodology/latest/SRIReducedFossilFuel>.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The Fund achieved the environmental and social characteristics it promotes through a portfolio that is primarily made up of securities that represent the Fund’s benchmark index.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following table lists the environmental and social characteristics which were promoted by the Fund throughout the reference period. Further information on these environmental and social characteristics is outlined in the Fund's prospectus. Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

Environmental and social characteristics promoted by the Fund

- Exposure to investments qualifying as Sustainable Investments
- Reduction (30%) in carbon emission intensity relative to the Parent Index
- Exclusion of issuers with a zero MSCI controversy score or no MSCI controversy score
- Exclusion of issuers involved in certain activities deemed to have negative environmental and/or social outcomes such as: controversial weapons, nuclear weapons, conventional weapons, civilian firearms, tobacco, oil sands, thermal coal
- Exclusion of companies classified as violating United Nations Global Compact principles
- Improvement of weighted average ESG score versus the Parent Index
- Reduction (30%) in potential carbon emissions relative to the Parent Index

The Sustainable Investments held by the Fund during the reference period contributed to the following EU Taxonomy environmental objectives:

EU Taxonomy environmental objectives contributed to by the Fund

- Climate Change Mitigation

How did the sustainability indicators perform?

The following table provides information about the performance of the sustainability indicators used to measure the attainment of each of the environmental and social characteristics promoted by the Fund, as further detailed in the Fund's prospectus.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

During the reference period, the Fund invested 33.61% of its holdings in Sustainable Investments in pursuit of its investment objective.

The Fund’s investments qualifying as Sustainable Investments were either in:

(1) companies involved in activities deemed to contribute to positive environmental and/or social impacts, or

(2) companies which have committed to one or more active carbon emissions reduction target(s) approved by the Science Based Targets initiative (SBTi).

The Fund’s investments were assessed against their revenue exposure to positive sustainable impacts in line with the United Nations’ Sustainable Development Goals, the EU Taxonomy and other sustainability-related frameworks. The positive environmental impacts considered as part of this assessment may have related to themes such as climate change and natural capital and identify companies that may have derived revenues from activities (or related activities) such as alternative energy, energy efficiency and green building, sustainable water, pollution prevention and control and sustainable agriculture. The positive societal impacts considered as part of this assessment may have related to themes such as basic needs and empowerment and identify companies that may have derived revenues from activities (or related activities) such as nutrition, major disease treatments, sanitation, affordable real estate, small and medium enterprise (SME) finance, education and connectivity.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

iShares MSCI USA Quality Dividend ESG UCITS ETF (continued)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Sustainable Investments held by the Fund during the reference period met the do no significant harm ("DNSH") requirements, as defined by applicable law and regulation. At each index rebalance, all investments qualifying as Sustainable Investments were assessed against certain minimum environmental and social indicators. As part of the assessment, companies were assessed on their involvement in activities deemed to have highly negative environmental and social impacts. Where a company was identified as being involved in activities with highly negative environmental and social impacts, it was not eligible as a Sustainable Investment.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The mandatory indicators for adverse impacts on sustainability factors (as set out in the Regulatory Technical Standards ("RTS") under the SFDR) were considered at each index rebalance through the screening criteria applied by the index provider in the selection of index constituents qualifying as Sustainable Investments.

As a result of the screening criteria applied by the index provider, the following investments within the benchmark index did not qualify as Sustainable Investments: (1) companies deriving a minimum % revenue from thermal coal (as determined by the index provider) which was significantly carbon intensive and a major contributor to greenhouse gas emissions (taking into account indicators relating to GHG emissions), (2) companies with an MSCI ESG controversy score of 1 or below that have been deemed to be involved in severe or very severe ESG related controversies (including in relation to indicators concerning greenhouse gas emissions, biodiversity, water, waste and social and employee matters), and (3) companies with an MSCI ESG rating of B or below, which were deemed to be lagging industry peers based on their high exposure and failure to manage significant ESG risks (including in relation to indicators concerning greenhouse gas emissions, biodiversity, water, waste, unadjusted gender pay gap and board gender diversity).

The benchmark index also excluded: (1) companies with a "red" MSCI ESG controversy flag which included companies determined to be in violation of international and/or national standards (taking into account indicators concerning violations of United Nations Global Compact principles and OECD Guidelines for Multinational Enterprises) and (2) companies determined to have any tie to controversial weapons (taking into account indicators concerning ties to controversial weapons).

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Fund's benchmark index excluded companies with a "red" ESG controversy flag which excludes issuers which have been determined by the index provider to be in violation of the UN Guiding Principles on Business and Human Rights and OECD Guidelines for Multinational Enterprises.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The following table provides information about the impact of the principal adverse sustainability indicators taken into consideration by this Fund. The Fund considered the impact of the principal adverse sustainability indicators through the promotion of environmental and social characteristics ("E&S criteria") set out above (see To what extent were the environmental and/or social characteristics promoted by this financial product met?). The Investment Manager has determined that these PAIs have been considered as part of the investment selection criteria of the benchmark index at each index rebalance. The Fund's specific sustainability indicator may not align with the full scope of the regulatory definition of the corresponding PAI outlined in Annex 1 supplementing Regulation (EU) 2019/2088 Regulatory Technical Standards ("RTS").

| Adverse Sustainability Indicator | Sustainability Indicators |

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The taxonomy alignment percentage in the above diagram represents the percentage of investments held by the Fund in EU Taxonomy-aligned activities through Sustainable Investments with an environmental objective. It does not include the taxonomy alignment achieved through the Fund's other investments. For the taxonomy alignment of the Fund's total investments, see the bar chart below.

The following table details the asset allocation of the Fund for the current and the previous reference period.

| Asset allocation | % Investments | | |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

For the reference period, the Fund's investment alignment with EU Taxonomy is shown in the graphs below.

For the reference period, 0.00% of the Fund's investments were classified as both Sustainable Investments with an environmental objective and aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

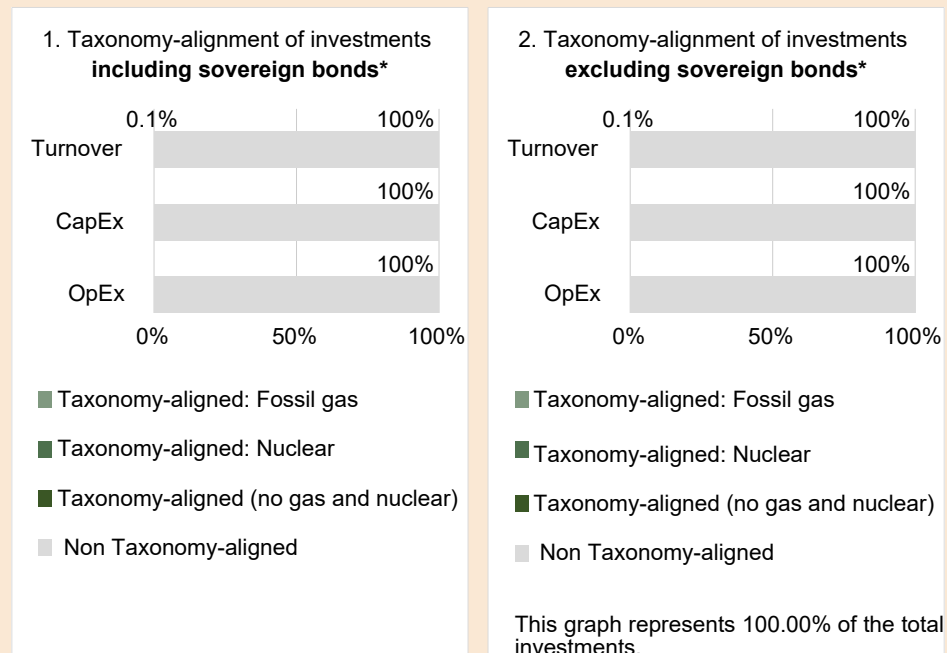

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

For the reference period, 0% of the Fund's total investments were held in sovereign exposures.

The investments held by the Fund during the reference period contributed to the following EU Taxonomy environmental objectives:

| Environmental objectives | % of Investments |
|---------------------------|------------------|
| Climate Change Mitigation | 0.05% |

The data presented in the table above was not subject to an assurance provided by the Fund's auditor or a review by a third party. The assessment of EU Taxonomy alignment is based on data from a third-party vendor. The source of this data is a combination of equivalent and reported data. Equivalent data that matches the technical criteria under EU Taxonomy generates an eligibility or alignment result for those companies for which we do not have reported data.

What was the share of investments made in transitional and enabling activities?

For the reference period, the Fund's investments in transitional and enabling activities were as follows:

| | % of Investments |
|-------------------------|------------------|
| Transitional Activities | 0.00% |
| Enabling Activities | 0.00% |

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the previous reference period, 0% of the Fund's investments were aligned with EU Taxonomy.

 Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

For the reference period, 28.58% of the Fund's investments were classified as Sustainable Investments with an environmental objective not aligned with EU Taxonomy.

The Fund invested in Sustainable Investments that were not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment was unavailable; and/or (iii) underlying economic activities were not eligible under the EU Taxonomy's available technical screening criteria or did not comply with all requirements set out in such technical screening criteria.

What was the share of socially sustainable investments?

For the reference period, 5.03% of the Fund's investments were classified as socially sustainable investments

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "#2 Other" included cash, money market funds and derivatives, however such holdings did not exceed 20%. Such investments were used for the purpose of efficient portfolio management, except for derivatives used for currency hedging for any currency hedged share class. Any ESG rating or analyses applied by the index provider applied only to the derivatives relating to individual issuers used by the Fund. Derivatives based on financial indices, interest rates, or foreign exchange instruments were not considered against minimum environment or social safeguards.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

For the reference period, the Fund has designated the benchmark index as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund. The performance of the Fund compared to the benchmark index is outlined below.

How does the reference benchmark differ from a broad market index?

The benchmark index excluded issuers that did not meet its ESG selection criteria from its broad market index, the MSCI USA High Dividend Yield Index. The ESG selection criteria that is excluded is set out above (see To what extent were the environmental and/or social characteristics promoted by this financial product met?). Further details regarding the methodology of the benchmark index (including its constituents) are available on the index provider's website at <https://www.msci.com/index/methodology/latest/HDYESGRedCarTar>.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The Fund achieved the environmental and social characteristics it promotes through replicating the constituents of the Fund's benchmark index.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following table lists the environmental and social characteristics which were promoted by the Fund throughout the reference period. Further information on these environmental and social characteristics is outlined in the Fund's prospectus. Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

Environmental and social characteristics promoted by the Fund

- Exposure to investments qualifying as Sustainable Investments
- Reduction (30%) in carbon emission intensity relative to the Parent Index
- Exclusion of issuers with a zero MSCI controversy score or no MSCI controversy score
- Exclusion of issuers involved in certain activities deemed to have negative environmental and/or social outcomes such as: controversial weapons, nuclear weapons, conventional weapons, civilian firearms, tobacco, oil sands, thermal coal
- Exclusion of companies classified as violating United Nations Global Compact principles
- Improvement of weighted average ESG score versus the Parent Index
- Reduction (30%) in potential carbon emissions relative to the Parent Index

The Sustainable Investments held by the Fund during the reference period contributed to the following EU Taxonomy environmental objectives:

EU Taxonomy environmental objectives contributed to by the Fund

- Climate Change Mitigation

¹MSCI collects fossil fuel reserves data, where relevant, for companies which have reserves, typically in the oil & gas, coal mining and electric utilities industries and only fossil fuel reserves used for energy are taken into account. For newly added companies where data is not yet available, MSCI uses zero fossil fuel reserves. The size of a company's reserves is normalised by MSCI for size by dividing the potential carbon emissions of the company by its market capitalisation. Whilst the reduction in potential emissions shown in the table above is significantly higher than the target, this is primarily due to a relatively small number of companies for which data is available.

²The Fund's commitment to a minimum proportion of investments qualifying as Sustainable Investments became effective on 1 January 2023, and as a result was not reported on as part of the 2022 periodic report.

● ...and compared to previous periods?

The above table provides information about the performance of the sustainability indicators for the previous reference period (see section "How did the sustainability indicators perform?").

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the reference period, the Fund invested 46.43% of its holdings in Sustainable Investments in pursuit of its investment objective.

The Fund's investments qualifying as Sustainable Investments were either in:

- (1) companies involved in activities deemed to contribute to positive environmental and/or social impacts, or
- (2) companies which have committed to one or more active carbon emissions reduction target(s) approved by the Science Based Targets initiative (SBTi).

The Fund's investments were assessed against their revenue exposure to positive sustainable impacts in line with the United Nations' Sustainable Development Goals, the EU Taxonomy and other sustainability-related frameworks. The positive environmental impacts considered as part of this assessment may have related to themes such as climate change and natural capital and identify companies that may have derived revenues from activities (or related activities) such as alternative energy, energy efficiency and green building, sustainable water, pollution prevention and control and sustainable agriculture. The positive societal impacts considered as part of this assessment may have related to themes such as basic needs and empowerment and identify companies that may have derived revenues from activities (or related activities) such as nutrition, major disease treatments, sanitation, affordable real estate, small and medium enterprise (SME) finance, education and connectivity.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

iShares MSCI World Quality Dividend UCITS ETF (continued)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Sustainable Investments held by the Fund during the reference period met the do no significant harm ("DNSH") requirements, as defined by applicable law and regulation. At each index rebalance, all investments qualifying as Sustainable Investments were assessed against certain minimum environmental and social indicators. As part of the assessment, companies were assessed on their involvement in activities deemed to have highly negative environmental and social impacts. Where a company was identified as being involved in activities with highly negative environmental and social impacts, it was not eligible as a Sustainable Investment.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The mandatory indicators for adverse impacts on sustainability factors (as set out in the Regulatory Technical Standards ("RTS") under the SFDR) were considered at each index rebalance through the screening criteria applied by the index provider in the selection of index constituents qualifying as Sustainable Investments.

As a result of the screening criteria applied by the index provider, the following investments within the benchmark index did not qualify as Sustainable Investments: (1) companies deriving a minimum % revenue from thermal coal (as determined by the index provider) which was significantly carbon intensive and a major contributor to greenhouse gas emissions (taking into account indicators relating to GHG emissions), (2) companies with an MSCI ESG controversy score of 1 or below that have been deemed to be involved in severe or very severe ESG related controversies (including in relation to indicators concerning greenhouse gas emissions, biodiversity, water, waste and social and employee matters), and (3) companies with an MSCI ESG rating of B or below, which were deemed to be lagging industry peers based on their high exposure and failure to manage significant ESG risks (including in relation to indicators concerning greenhouse gas emissions, biodiversity, water, waste, unadjusted gender pay gap and board gender diversity).

The benchmark index also excluded: (1) companies with a "red" MSCI ESG controversy flag which included companies determined to be in violation of international and/or national standards (taking into account indicators concerning violations of United Nations Global Compact principles and OECD Guidelines for Multinational Enterprises) and (2) companies determined to have any tie to controversial weapons (taking into account indicators concerning ties to controversial weapons).

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Fund's benchmark index excluded companies with a "red" ESG controversy flag which excludes issuers which have been determined by the index provider to be in violation of the UN Guiding Principles on Business and Human Rights and OECD Guidelines for Multinational Enterprises.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The following table provides information about the impact of the principal adverse sustainability indicators taken into consideration by this Fund. The Fund considered the impact of the principal adverse sustainability indicators through the promotion of environmental and social characteristics ("E&S criteria") set out above (see To what extent were the environmental and/or social characteristics promoted by this financial product met?). The Investment Manager has determined that these PAIs have been considered as part of the investment selection criteria of the benchmark index at each index rebalance. The Fund's specific sustainability indicator may not align with the full scope of the regulatory definition of the corresponding PAI outlined in Annex 1 supplementing Regulation (EU) 2019/2088 Regulatory Technical Standards ("RTS").

| Adverse Sustainability Indicator | Sustainability Indicators |
|--|--|
| Greenhouse gas (GHG) emissions | Minimum % reduction of carbon mission intensity and potential carbon emissions targets |
| GHG intensity of investee companies | Minimum % reduction of carbon mission intensity and potential carbon emissions targets |
| Exposure to companies active in the fossil fuel sector | Exclusion of issuers based on certain environmental screens (listed above) |
| Activities negatively affecting biodiversity-sensitive areas | Exclusion of issuers based on an MSCI ESG Controversy Score |
| Emissions to water | Exclusion of issuers based on an MSCI ESG Controversy Score |
| Hazardous waste and radioactive waste ratio | Exclusion of issuers based on an MSCI ESG Controversy Score |

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The taxonomy alignment percentage in the above diagram represents the percentage of investments held by the Fund in EU Taxonomy-aligned activities through Sustainable Investments with an environmental objective. It does not include the taxonomy alignment achieved through the Fund's other investments. For the taxonomy alignment of the Fund's total investments, see the bar chart below.

The following table details the asset allocation of the Fund for the current and the previous reference period.

| Asset allocation | % Investments | | |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

For the reference period, the Fund's investment alignment with EU Taxonomy is shown in the graphs below.

For the reference period, 1.30% of the Fund's investments were classified as both Sustainable Investments with an environmental objective and aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

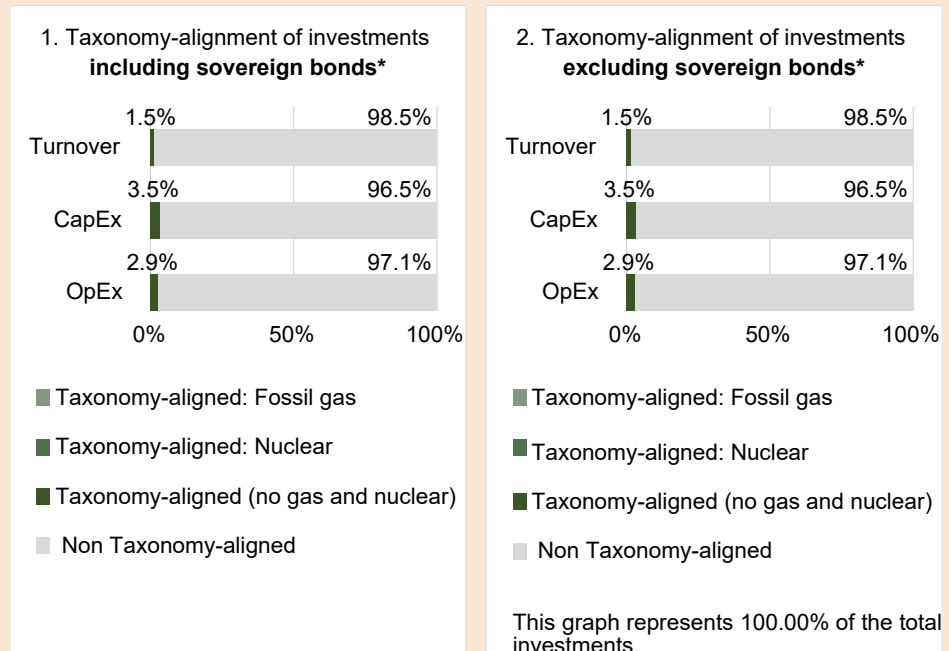

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

For the reference period, 0% of the Fund's total investments were held in sovereign exposures.

The investments held by the Fund during the reference period contributed to the following EU Taxonomy environmental objectives:

| Environmental objectives | % of Investments |
|---------------------------|------------------|
| Climate Change Mitigation | 1.52% |
| Climate Change Adaptation | 0.01% |

The data presented in the table above was not subject to an assurance provided by the Fund's auditor or a review by a third party. The assessment of EU Taxonomy alignment is based on data from a third-party vendor. The source of this data is a combination of equivalent and reported data. Equivalent data that matches the technical criteria under EU Taxonomy generates an eligibility or alignment result for those companies for which we do not have reported data.

What was the share of investments made in transitional and enabling activities?

For the reference period, the Fund's investments in transitional and enabling activities were as follows:

| | % of Investments |
|-------------------------|------------------|
| Transitional Activities | 0.06% |
| Enabling Activities | 1.09% |

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the previous reference period, 0% of the Fund's investments were aligned with EU Taxonomy.

Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

For the reference period, 38.30% of the Fund's investments were classified as Sustainable Investments with an environmental objective not aligned with EU Taxonomy.

The Fund invested in Sustainable Investments that were not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment was unavailable; and/or (iii) underlying economic activities were not eligible under the EU Taxonomy's available technical screening criteria or did not comply with all requirements set out in such technical screening criteria.

What was the share of socially sustainable investments?

For the reference period, 6.83% of the Fund's investments were classified as socially sustainable investments.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "#2 Other" included cash, money market funds and derivatives, however such holdings did not exceed 20%. Such investments were used for the purpose of efficient portfolio management, except for derivatives used for currency hedging for any currency hedged share class. Any ESG rating or analyses applied by the index provider applied only to the derivatives relating to individual issuers used by the Fund. Derivatives based on financial indices, interest rates, or foreign exchange instruments were not considered against minimum environment or social safeguards.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

For the reference period, the Fund has designated the benchmark index as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund. The performance of the Fund compared to the benchmark index is outlined below.

How does the reference benchmark differ from a broad market index?

The benchmark index excluded issuers that did not meet its ESG selection criteria from its broad market index, the MSCI World High Dividend Yield Index. The ESG selection criteria that is excluded is set out above (see To what extent were the environmental and/or social characteristics promoted by this financial product met?). Further details regarding the methodology of the benchmark index (including its constituents) are available on the index provider's website at <https://www.msci.com/index/methodology/latest/HDYESGRedCarTar>.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The Fund achieved the environmental and social characteristics it promotes through replicating the constituents of the Fund's benchmark index.

How did this financial product perform compared with the reference benchmark?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What was the proportion of sustainability-related investments?

● What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

The Fund did not commit to holding Sustainable Investments and therefore the Fund's exposure to Sustainable Investments has not been assessed, however, during the reference period, a percentage of the Fund's investments were aligned with the EU Taxonomy (see the section "To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?" below).

The following table details the asset allocation of the Fund for the current and the previous reference period.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

For the reference period, the Fund's investment alignment with EU Taxonomy is shown in the graphs below.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

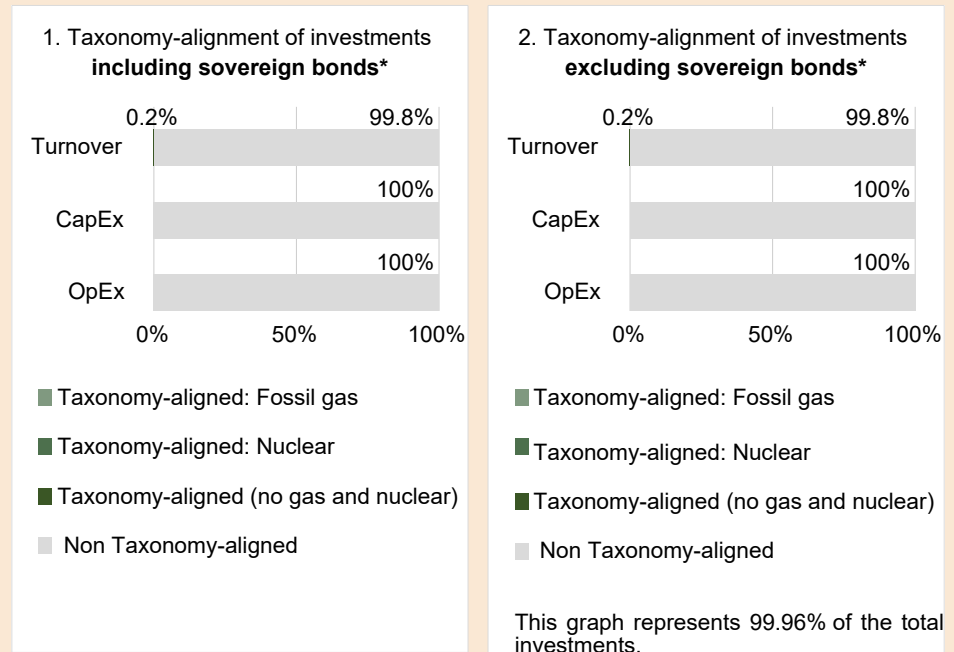

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

For the reference period, 0.04% of the Fund's total investments were held in sovereign exposures. Taxonomy alignment of these exposures could not be determined due to limited data availability.

The investments held by the Fund during the reference period contributed to the following EU Taxonomy environmental objectives:

| Environmental objectives | % of Investments |
|---------------------------|------------------|
| Climate Change Mitigation | 0.16% |
| Climate Change Adaptation | 0.00% |

The data presented in the table above was not subject to an assurance provided by the Fund's auditor or a review by a third party. The assessment of EU Taxonomy alignment is based on data from a third-party vendor. The source of this data is a combination of equivalent and reported data. Equivalent data that matches the technical criteria under EU Taxonomy generates an eligibility or alignment result for those companies for which we do not have reported data.

What was the share of investments made in transitional and enabling activities?

For the reference period, the Fund's investments in transitional and enabling activities were as follows:

| | % of Investments |
|-------------------------|------------------|
| Transitional Activities | 0.01% |
| Enabling Activities | 0.03% |

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the previous reference period, 0% of the Fund's investments were aligned with EU Taxonomy.

Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

This section is not applicable for this Fund as it did not commit to holding Sustainable Investments during the reference period, however, certain Sustainable Investments may form part of the Fund's investment portfolio.

What was the share of socially sustainable investments?

This section is not applicable for this Fund as it did not commit to holding Sustainable Investments during the reference period, however, certain Sustainable Investments may form part of the Fund's investment portfolio.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "#2 Other" included cash, money market funds and derivatives, however such holdings did not exceed 20%. Such investments were used for the purpose of efficient portfolio management, except for derivatives used for currency hedging for any currency hedged share class. Any ESG rating or analyses applied by the index provider applied only to the derivatives relating to individual issuers used by the Fund. Derivatives based on financial indices, interest rates, or foreign exchange instruments were not considered against minimum environment or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund met the environmental and social characteristics by tracking the environment and social characteristics of the benchmark index. The benchmark index methodology incorporates the environmental and social characteristics outlined (see section "To what extent were the environmental and/or social characteristics of the Fund met?").

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

For the reference period, the Fund has designated the benchmark index as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund. The performance of the Fund compared to the benchmark index is outlined below.

How does the reference benchmark differ from a broad market index?

The benchmark index excluded issuers that did not meet its ESG selection criteria from its broad market index, the Bloomberg US Corporate 0-3 Year Total Return Index. The ESG selection criteria that is excluded is set out above (see To what extent were the environmental and/or social characteristics promoted by this financial product met?). Further details regarding the methodology of the benchmark index (including its constituents) are available on the index provider's website at <https://www.bloomberg.com/professional/product/indices/bloomberg-fixed-income-indices/#ucits>.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The Fund achieved the environmental and social characteristics it promotes through a portfolio that is primarily made up of securities that represent the Fund's benchmark index.

How did this financial product perform compared with the reference benchmark?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

During the reference period, the Fund invested 23.62% of its holdings in Sustainable Investments in pursuit of its investment objective.

The Fund's investments qualifying as Sustainable Investments were either in:

- (1) issuers involved in activities deemed to contribute to positive environmental and/or social impacts, or
- (2) issuers which have committed to one or more active carbon emissions reduction target(s) approved by the Science Based Targets initiative (SBTi).
- (3) fixed income securities which have been classified as "green bonds".

To be classified as a green bond, a bond's proceeds must be exclusively and formally applied to fund projects that fall within one or more qualifying environmental categories including alternative energy, energy efficiency, pollution prevention and control, sustainable water, green building and climate adaptation.

The Fund's investments were assessed against their revenue exposure to positive sustainable impacts in line with the United Nations' Sustainable Development Goals, the EU Taxonomy and other sustainability-related frameworks. The positive environmental impacts considered as part of this assessment may have related to themes such as climate change and natural capital and identify issuers that may have derived revenues from activities (or related activities) such as alternative energy, energy efficiency and green building, sustainable water, pollution prevention and control and sustainable agriculture. The positive societal impacts considered as part of this assessment may have related to themes such as basic needs and empowerment and identify issuers that may have derived revenues from activities (or related activities) such as nutrition, major disease treatments, sanitation, affordable real estate, small and medium enterprise (SME) finance, education and connectivity.

iShares \$ Corp Bond ESG UCITS ETF (continued)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Sustainable Investments held by the Fund during the reference period met the do no significant harm ("DNSH") requirements, as defined by applicable law and regulation. At each index rebalance, all investments qualifying as Sustainable Investments were assessed against certain minimum environmental and social indicators. As part of the assessment, issuers were assessed on their involvement in activities deemed to have highly negative environmental and social impacts. Where an issuer was identified as being involved in activities with highly negative environmental and social impacts, it was not eligible as a Sustainable Investment.

For bonds qualifying as green bonds, the assessment was conducted at an issuance level based on the use of the proceeds of the bonds which must be formally and exclusively applied to promote climate or other environmental sustainability purposes. In addition, certain minimum safeguards and eligibility exclusions were incorporated in the selection of green bonds to avoid exposure to bonds associated with activities deemed to have highly negative environmental and societal impacts.

- How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory indicators for adverse impacts on sustainability factors (as set out in the Regulatory Technical Standards ("RTS") under the SFDR) were considered at each index rebalance through the assessment of the Fund's investments qualifying as Sustainable Investments.

Following this assessment, the following investments did not qualify as Sustainable Investments: (1) issuers deemed to be deriving at least 1% of their revenue from thermal coal which is significantly carbon intensive and a major contributor to greenhouse gas emissions (taking into account indicators relating to GHG emissions) (2) issuers that have been deemed to be involved in severe ESG related controversies (taking into account indicators relating to greenhouse gas emissions, biodiversity, water, waste and social and employee matters), and (3) issuers which were deemed to be lagging industry peers based on their high exposure and failure to manage significant ESG risks (taking into account indicators relating to greenhouse gas emissions, biodiversity, water, waste, unadjusted gender pay gap and board gender diversity).

In respect of green bonds, the indicators for adverse impacts on sustainability factors were taken into account at each index rebalance and were assessed by the index provider at the issuance level based on an assessment of the use of proceeds of the bonds which must be formally and exclusively applied to promote climate or other environmental sustainability purposes. In addition, minimum safeguards and eligibility exclusions were applied by the index provider in the selection of green bonds to ensure the proceeds of which were not applied to activities with highly negative environmental and social outcomes. This includes through the minimum safeguards and eligibility exclusions of bonds with the use of proceeds linked to thermal coal extraction and power generation, significant biodiversity loss and controversial weapons.

The benchmark index also excluded: (1) issuers with a "red" MSCI ESG controversy flag which included issuers determined to be in violation of international and/or national standards (taking into account indicators concerning violations of United Nations Global Compact principles and OECD Guidelines for Multinational Enterprises) and (2) issuers determined to have any tie to controversial weapons (taking into account indicators concerning ties to controversial weapons).

- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's benchmark index excluded issuers with a "red" ESG controversy flag which excludes issuers which have been determined by the index provider to be in violation of the UN Guiding Principles on Business and Human Rights and OECD Guidelines for Multinational Enterprises.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The following table provides information about the impact of the principal adverse sustainability indicators taken into consideration by this Fund. The Fund considered the impact of the principal adverse sustainability indicators through the promotion of environmental and social characteristics ("E&S criteria") set out above (see To what extent were the environmental and/or social characteristics promoted by this financial product met?). The Investment Manager has determined that these PAIs have been considered as part of the investment selection criteria of the benchmark index at each index rebalance. The Fund's specific sustainability indicator may not align with the full scope of the regulatory definition of the corresponding PAI outlined in Annex 1 supplementing Regulation (EU) 2019/2088 Regulatory Technical Standards ("RTS").

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The taxonomy alignment percentage in the above diagram represents the percentage of investments held by the Fund in EU Taxonomy-aligned activities through Sustainable Investments with an environmental objective. It does not include the taxonomy alignment achieved through the Fund's other investments. For the taxonomy alignment of the Fund's total investments, see the bar chart below.

The following table details the asset allocation of the Fund for the current and the previous reference period.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

For the reference period, the Fund's investment alignment with EU Taxonomy is shown in the graphs below.

For the reference period, 0.17% of the Fund's investments were classified as both Sustainable Investments with an environmental objective and aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

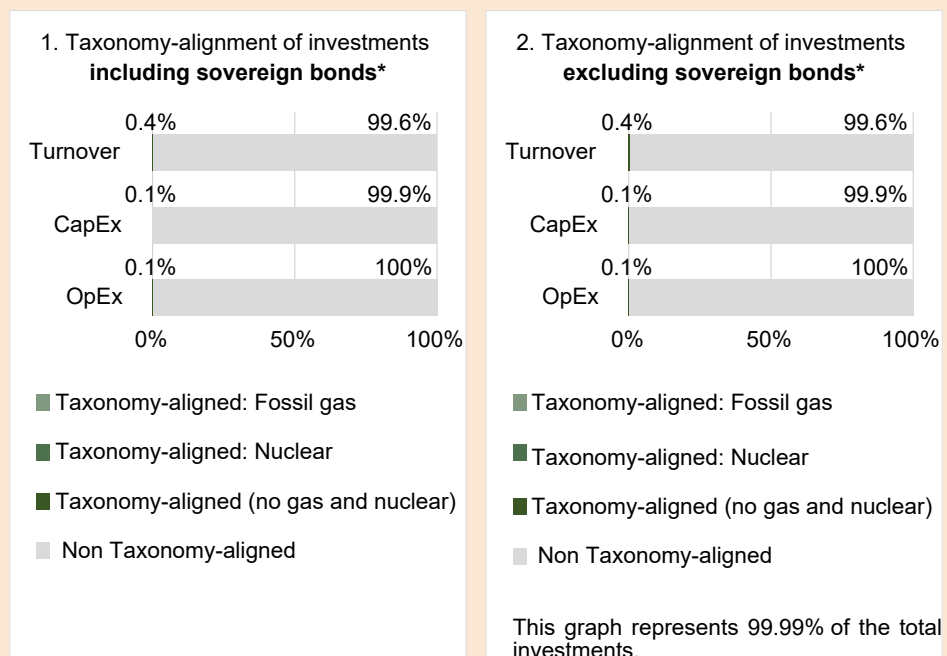

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

For the reference period, 0.01% of the Fund's total investments were held in sovereign exposures. Taxonomy alignment of these exposures could not be determined due to limited data availability.

The investments held by the Fund during the reference period contributed to the following EU Taxonomy environmental objectives:

| Environmental objectives | % of Investments |
|---------------------------|------------------|
| Climate Change Mitigation | 0.32% |
| Climate Change Adaptation | 0.00% |

The data presented in the table above was not subject to an assurance provided by the Fund's auditor or a review by a third party. The assessment of EU Taxonomy alignment is based on data from a third-party vendor. The source of this data is a combination of equivalent and reported data. Equivalent data that matches the technical criteria under EU Taxonomy generates an eligibility or alignment result for those companies for which we do not have reported data.

What was the share of investments made in transitional and enabling activities?

For the reference period, the Fund's investments in transitional and enabling activities were as follows:

| | % of Investments |
|-------------------------|------------------|
| Transitional Activities | 0.02% |
| Enabling Activities | 0.09% |

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the previous reference period, 0% of the Fund's investments were aligned with EU Taxonomy.

Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

For the reference period, 20.41% of the Fund's investments were classified as Sustainable Investments with an environmental objective not aligned with EU Taxonomy.

The Fund invested in Sustainable Investments that were not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment was unavailable; and/or (iii) underlying economic activities were not eligible under the EU Taxonomy's available technical screening criteria or did not comply with all requirements set out in such technical screening criteria.

What was the share of socially sustainable investments?

For the reference period, 3.04% of the Fund's investments were classified as socially sustainable investments.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "#2 Other" included cash, money market funds and derivatives, however such holdings did not exceed 20%. Such investments were used for the purpose of efficient portfolio management, except for derivatives used for currency hedging for any currency hedged share class. Any ESG rating or analyses applied by the index provider applied only to the derivatives relating to individual issuers used by the Fund. Derivatives based on financial indices, interest rates, or foreign exchange instruments were not considered against minimum environment or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund met the environmental and social characteristics by tracking the environment and social characteristics of the benchmark index. The benchmark index methodology incorporates the environmental and social characteristics outlined (see section "To what extent were the environmental and/or social characteristics of the Fund met?").

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

For the reference period, the Fund has designated the benchmark index as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund. The performance of the Fund compared to the benchmark index is outlined below.

● How does the reference benchmark differ from a broad market index?

The benchmark index excluded issuers that did not meet its ESG selection criteria from its broad market index, the Bloomberg US Aggregate Corporate Index. The ESG selection criteria that is excluded is set out above (see To what extent were the environmental and/or social characteristics promoted by this financial product met?). Further details regarding the methodology of the benchmark index (including its constituents) are available on the index provider's website at <https://www.bloomberg.com/professional/product/indices/bloomberg-fixed-income-indices/#ucits>.

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The Fund achieved the environmental and social characteristics it promotes through a portfolio that is primarily made up of securities that represent the Fund's benchmark index.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

During the reference period, the Fund invested 24.14% of its holdings in Sustainable Investments in pursuit of its investment objective.

The Fund's investments qualifying as Sustainable Investments were either in:

- (1) issuers involved in activities deemed to contribute to positive environmental and/or social impacts, or
- (2) issuers which have committed to one or more active carbon emissions reduction target(s) approved by the Science Based Targets initiative (SBTi).
- (3) fixed income securities which have been classified as "green bonds".

To be classified as a green bond, a bond's proceeds must be exclusively and formally applied to fund projects that fall within one or more qualifying environmental categories including alternative energy, energy efficiency, pollution prevention and control, sustainable water, green building and climate adaptation.

The Fund's investments were assessed against their revenue exposure to positive sustainable impacts in line with the United Nations' Sustainable Development Goals, the EU Taxonomy and other sustainability-related frameworks. The positive environmental impacts considered as part of this assessment may have related to themes such as climate change and natural capital and identify issuers that may have derived revenues from activities (or related activities) such as alternative energy, energy efficiency and green building, sustainable water, pollution prevention and control and sustainable agriculture. The positive societal impacts considered as part of this assessment may have related to themes such as basic needs and empowerment and identify issuers that may have derived revenues from activities (or related activities) such as nutrition, major disease treatments, sanitation, affordable real estate, small and medium enterprise (SME) finance, education and connectivity.

iShares \$ High Yield Corp Bond ESG UCITS ETF (continued)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Sustainable Investments held by the Fund during the reference period met the do no significant harm ("DNSH") requirements, as defined by applicable law and regulation. At each index rebalance, all investments qualifying as Sustainable Investments were assessed against certain minimum environmental and social indicators. As part of the assessment, issuers were assessed on their involvement in activities deemed to have highly negative environmental and social impacts. Where an issuer was identified as being involved in activities with highly negative environmental and social impacts, it was not eligible as a Sustainable Investment.

For bonds qualifying as green bonds, the assessment was conducted at an issuance level based on the use of the proceeds of the bonds which must be formally and exclusively applied to promote climate or other environmental sustainability purposes. In addition, certain minimum safeguards and eligibility exclusions were incorporated in the selection of green bonds to avoid exposure to bonds associated with activities deemed to have highly negative environmental and societal impacts.

- How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory indicators for adverse impacts on sustainability factors (as set out in the Regulatory Technical Standards ("RTS") under the SFDR) were considered at each index rebalance through the assessment of the Fund's investments qualifying as Sustainable Investments.

Following this assessment, the following investments did not qualify as Sustainable Investments: (1) issuers deemed to be deriving at least 1% of their revenue from thermal coal which is significantly carbon intensive and a major contributor to greenhouse gas emissions (taking into account indicators relating to GHG emissions) (2) issuers that have been deemed to be involved in severe ESG related controversies (taking into account indicators relating to greenhouse gas emissions, biodiversity, water, waste and social and employee matters), and (3) issuers which were deemed to be lagging industry peers based on their high exposure and failure to manage significant ESG risks (taking into account indicators relating to greenhouse gas emissions, biodiversity, water, waste, unadjusted gender pay gap and board gender diversity).

In respect of green bonds, the indicators for adverse impacts on sustainability factors were taken into account at each index rebalance and were assessed by the index provider at the issuance level based on an assessment of the use of proceeds of the bonds which must be formally and exclusively applied to promote climate or other environmental sustainability purposes. In addition, minimum safeguards and eligibility exclusions were applied by the index provider in the selection of green bonds to ensure the proceeds of which were not applied to activities with highly negative environmental and social outcomes. This includes through the minimum safeguards and eligibility exclusions of bonds with the use of proceeds linked to thermal coal extraction and power generation, significant biodiversity loss and controversial weapons.

The benchmark index also excluded: (1) issuers with a "red" MSCI ESG controversy flag which included issuers determined to be in violation of international and/or national standards (taking into account indicators concerning violations of United Nations Global Compact principles and OECD Guidelines for Multinational Enterprises) and (2) issuers determined to have any tie to controversial weapons (taking into account indicators concerning ties to controversial weapons).

- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's benchmark index excluded issuers with a "red" ESG controversy flag which excludes issuers which have been determined by the index provider to be in violation of the UN Guiding Principles on Business and Human Rights and OECD Guidelines for Multinational Enterprises.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The following table provides information about the impact of the principal adverse sustainability indicators taken into consideration by this Fund. The Fund considered the impact of the principal adverse sustainability indicators through the promotion of environmental and social characteristics ("E&S criteria") set out above (see To what extent were the environmental and/or social characteristics promoted by this financial product met?). The Investment Manager has determined that these PAIs have been considered as part of the investment selection criteria of the benchmark index at each index rebalance. The Fund's specific sustainability indicator may not align with the full scope of the regulatory definition of the corresponding PAI outlined in Annex 1 supplementing Regulation (EU) 2019/2088 Regulatory Technical Standards ("RTS").

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The taxonomy alignment percentage in the above diagram represents the percentage of investments held by the Fund in EU Taxonomy-aligned activities through Sustainable Investments with an environmental objective. It does not include the taxonomy alignment achieved through the Fund's other investments. For the taxonomy alignment of the Fund's total investments, see the bar chart below.

SUSTAINABILITY-RELATED DISCLOSURES (UNAUDITED) (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

iShares \$ High Yield Corp Bond ESG UCITS ETF (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

For the reference period, the Fund's investment alignment with EU Taxonomy is shown in the graphs below.

For the reference period, 0.02% of the Fund's investments were classified as both Sustainable Investments with an environmental objective and aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

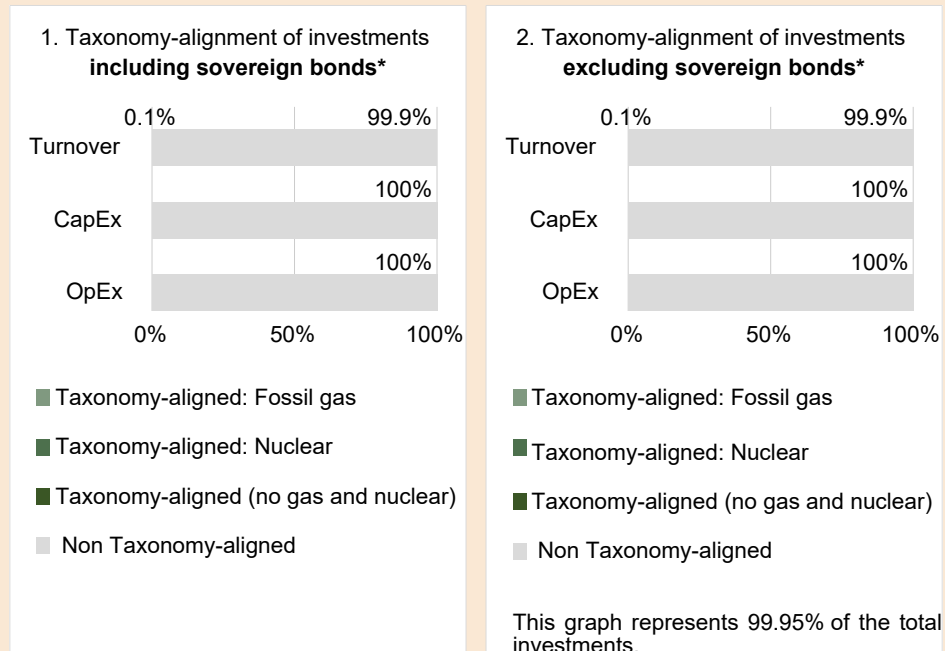

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

For the reference period, 0.05% of the Fund's total investments were held in sovereign exposures. Taxonomy alignment of these exposures could not be determined due to limited data availability.

The investments held by the Fund during the reference period contributed to the following EU Taxonomy environmental objectives:

| Environmental objectives | % of Investments |
|---------------------------|------------------|
| Climate Change Mitigation | 0.12% |
| Climate Change Adaptation | 0.00% |

The data presented in the table above was not subject to an assurance provided by the Fund's auditor or a review by a third party. The assessment of EU Taxonomy alignment is based on data from a third-party vendor. The source of this data is a combination of equivalent and reported data. Equivalent data that matches the technical criteria under EU Taxonomy generates an eligibility or alignment result for those companies for which we do not have reported data.

What was the share of investments made in transitional and enabling activities?

For the reference period, the Fund's investments in transitional and enabling activities were as follows:

| | % of Investments |
|-------------------------|------------------|
| Transitional Activities | 0.01% |
| Enabling Activities | 0.08% |

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the previous reference period, 0% of the Fund's investments were aligned with EU Taxonomy.

Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

For the reference period, 19.54% of the Fund's investments were classified as Sustainable Investments with an environmental objective not aligned with EU Taxonomy.

The Fund invested in Sustainable Investments that were not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment was unavailable; and/or (iii) underlying economic activities were not eligible under the EU Taxonomy's available technical screening criteria or did not comply with all requirements set out in such technical screening criteria.

What was the share of socially sustainable investments?

For the reference period, 4.58% of the Fund's investments were classified as socially sustainable investments.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "#2 Other" included cash, money market funds and derivatives, however such holdings did not exceed 20%. Such investments were used for the purpose of efficient portfolio management, except for derivatives used for currency hedging for any currency hedged share class. Any ESG rating or analyses applied by the index provider applied only to the derivatives relating to individual issuers used by the Fund. Derivatives based on financial indices, interest rates, or foreign exchange instruments were not considered against minimum environment or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund met the environmental and social characteristics by tracking the environment and social characteristics of the benchmark index. The benchmark index methodology incorporates the environmental and social characteristics outlined (see section "To what extent were the environmental and/or social characteristics of the Fund met?").

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

For the reference period, the Fund has designated the benchmark index as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund. The performance of the Fund compared to the benchmark index is outlined below.

How does the reference benchmark differ from a broad market index?

The benchmark index excluded issuers that did not meet its ESG selection criteria from its broad market index, the Bloomberg US Corporate High Yield Total Return Index. The ESG selection criteria that is excluded is set out above (see To what extent were the environmental and/or social characteristics promoted by this financial product met?). Further details regarding the methodology of the benchmark index (including its constituents) are available on the index provider's website at <https://www.bloomberg.com/professional/product/indices/bloomberg-fixed-income-indices/#/ucits>.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The Fund achieved the environmental and social characteristics it promotes through a portfolio that is primarily made up of securities that represent the Fund's benchmark index.

How did this financial product perform compared with the reference benchmark?

| Sustainability Indicator | Metric | Fund | Reference benchmark |
|---|---|--------|---------------------|
