# People & Money The trends shaping investing in the Netherlands

Q4 2024

Building on our 2022 survey which explored the next wave of ETF investors in Europe, we teamed up with YouGov once more to better understand the trends shaping the present and future of investing across

cryptocurrency.

the region. This year, we spoke to 36,730 people across 14 European markets (3,040 in the Netherlands) and compared this data to our previous study to identify trends shaping investing in Europe. **Source:** BlackRock People & Money/YouGov Plc. All figures, unless stated otherwise, are from YouGov Plc. Sample size: 36,730 adults across Austria, Belgium, Denmark, Finland, France, Germany, Italy, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, and UK (any references to Europe in this

report refer to these 14 markets). Fieldwork was undertaken between 15th March - 10th May 2024. The survey was carried out online. Figures given an even weighting to produce an 'average' value. All calculations conducted by BlackRock. 2022 data refers to the previous 'Next wave of ETF investors' survey conducted by YouGov Plc between 12 August 2022 and 8 February 2023. Population figures are based on United Nations 2024 and 2022 Revisions of World Population Prospects report (18+ adults). The content and assumptions in this report are based on data derived directly from these surveys. **Definition of an investor within this report:** A respondent who currently has any of the following investment products: stocks and shares, investment/mutual fund (e.g. single strategy fund or multi-asset fund, etc.), bonds (e.g. Government or corporate bonds), exchange traded funds (ETFs), managed

#### **Risk Warnings**

Past performance is not a reliable indicator of current or future results and should not be the sole factor of consideration when selecting a product or strategy.

Changes in the rates of exchange between currencies may cause the value of investments to diminish or increase. Fluctuation may be particularly marked in the case of a higher volatility fund and the value of an investment may fall suddenly and substantially. Levels and basis of taxation may change from time to time and depend on personal individual circumstances.
