INVESTMENT OBJECTIVE

The Sustainable Global Dynamic Equity Fund seeks to maximise total return in a manner consistent with the principles of environmental, social and governance ("ESG") investing. The Fund invests globally, with no prescribed country or regional limits, at least 70% of its total assets in equity securities. The Fund will generally seek to invest in securities that are, in the opinion of the Investment Adviser, undervalued. The Fund may also invest in the equity securities of small and emerging growth companies. Currency exposure is flexibly managed.

SUSTAINABILITY CHARACTERISTICS

Sustainability Characteristics can help investors integrate non-financial, sustainability considerations into their investment process. These metrics enable investors to evaluate funds based on their environmental, social, and governance (ESG) risks and opportunities. This analysis can provide insight into the effective management and long-term financial prospects of a fund.

The metrics below have been provided for transparency and informational purposes only. The existence of an ESG rating is not indicative of how or whether ESG factors will be integrated into a fund. The metrics are based on MSCI ESG Fund Ratings and, unless otherwise stated in fund documentation and included within a fund's investment objective, do not change a fund's investment objective or constrain the fund's investable universe, and there is no indication that an ESG or Impact focused investment strategy or exclusionary screens will be adopted by a fund. For more information regarding a fund's investment strategy, please see the fund's prospectus.

MSCI ESG Fund Rating (AAA-CCC)	A	MSCI ESG % Coverage	96.23%
MSCI ESG Quality Score (0-10)	6.98	MSCI ESG Quality Score - Peer Percentile	45.62%
Fund Lipper Global Classification	Equity Global	Funds in Peer Group	5,574
MSCI Weighted Average Carbon Intensity (Tons CO2E/\$M SALES)	111.33	MSCI Weighted Average Carbon Intensity % Coverage	87.99%

All data is from MSCI ESG Fund Ratings as of **19-May-2024**, based on holdings as of **31-Dec-2023**. As such, the fund's sustainable characteristics may differ from MSCI ESG Fund Ratings from time to time.

To be included in MSCI ESG Fund Ratings, 65% (or 50% for bond funds and money market funds) of the fund's gross weight must come from securities with ESG coverage by MSCI ESG Research (certain cash positions and other asset types deemed not relevant for ESG analysis by MSCI are removed prior to calculating a fund's gross weight; the absolute values of short positions are included but treated as uncovered), the fund's holdings date must be less than one year old, and the fund must have at least ten securities.

MSCI ESG % Coverage: Percentage of the fund's holdings for which the MSCI ESG ratings data is available. The MSCI ESG Fund Rating, MSCI ESG Quality Score, and MSCI ESG Quality Score - Peer Percentile metrics are displayed for funds with at least 65% coverage.

Fund Lipper Global Classification: The fund peer group as defined by the Lipper Global Classification.

MSCI ESG Quality Score (0-10): The MSCI ESG Quality Score (0 - 10) for funds is calculated using the weighted average of the ESG scores of fund holdings. The Score also considers ESG Rating trend of holdings and the fund exposure to holdings in the laggard category. MSCI rates underlying holdings according to their exposure to industry specific ESG risks and their ability to manage those risks relative to peers.

MSCI Weighted Average Carbon Intensity (Tons CO2E/\$M SALES): Measures a fund's exposure to carbon intensive companies. This figure represents the estimated greenhouse gas emissions per \$1 million in sales across the fund's holdings. This allows for comparisons between funds of different sizes.

Funds in Peer Group: The number of funds from the relevant Lipper Global Classification peer group that are also in ESG coverage.

MSCI ESG Fund Rating (AAA-CCC): The MSCI ESG Rating is calculated as a direct mapping of ESG Quality Scores to letter rating categories (e.g. AAA = 8.6-10). The ESG Ratings range from leader (AAA, AA), average (A, BBB, BB) to laggard (B, CCC).

MSCI ESG Quality Score - Peer Percentile: The fund's ESG Percentile compared to its Lipper peer group.

MSCI Weighted Average Carbon Intensity % Coverage: Percentage of the fund's holdings for which MSCI Carbon Intensity data is available. The MSCI Weighted Average Carbon Intensity metric is displayed for funds with any coverage. Funds with low coverage may not fully represent the fund's carbon characteristics given the lack of coverage.

IMPORTANT INFORMATION:

¹ The Reference Benchmark is an unmanaged weighted index comprised as follows: 60% of the S&P 500 Index and 40% of the FTSE World (ex US) Index.

² % of Net Assets represents the Fund's exposure based on the economic value of securities; adjusted for futures, options and swaps (except with respect to fixed income securities), and convertible bonds. On a market value basis the Fund is comprised of 96% equities, 0% fixed income, 4% cash equivalents. The Funds will not use borrowing to purchase additional investments but may be expected, via derivative positions, to obtain market exposure in excess of net asset value. Allocations are subject to change. Numbers may not sum to 100% due to rounding.

Risk statistics are based on monthly fund returns for the 3-year period. Benchmark risk measures are calculated in relation to the FTSE World Index. Standard Deviation measures the volatility of the fund's returns. Higher deviation represents higher volatility. Sharpe Ratio uses a fund's standard deviation and its excess return (difference between the fund's return and the risk-free return of 90-day Treasury Bills) to determine reward per unit of risk.
