PRODUCT SUITABILITY

<p>WHO IS THE PRODUCT SUITABLE FOR?</p> <ul style="list-style-type: none"> • The Fund is <u>only</u> suitable for investors who: <ul style="list-style-type: none"> ○ prefer capital growth rather than income; ○ seek an investment in an index tracking fund that includes key environmental, social and governance (“ESG”) factors in its investment strategy, with a focus on climate transition, by tracking the MSCI AC Asia ex Japan Climate Action Index (the “Index”); ○ seek an investment that tracks the performance of the Index, in US dollar terms; and ○ are comfortable with a passively managed index tracking fund which value will rise and fall in correlation with its underlying index. 	<p><u>Further Information</u> Refer to “Investment Objective” and “Investment Strategy” in the “Introduction” section and the “Description of the Index Funds – MSCI Asia Ex Japan ETF” section of the Prospectus for further information on product suitability.</p>
---	---

¹ The Prospectus is available for collection at the Manager’s office at Twenty Anson, #18-01, 20 Anson Road, Singapore 079912, during normal Singapore business hours or accessible at <https://www.blackrock.com/sg/en/ishares>.

² The units in the Fund qualify as an “Excluded Investment Product” (“EIP”) as defined in the Notice on the Sale of Investment Products (SFA 04-N12) issued by the MAS.

³ Annualised for the period from 12 September 2023 to 31 December 2023.

KEY PRODUCT FEATURES	
<p>WHAT ARE YOU INVESTING IN?</p> <ul style="list-style-type: none"> You are investing in an exchange traded fund constituted as a sub-fund of an umbrella unit trust in Singapore. The investment objective of the Fund is to track the performance of the Index in US dollar terms. The Index is designed to represent the performance of companies that have been assessed to lead their sector peers in terms of their positioning and actions relative to a climate transition. Issuers from the underlying MSCI AC Asia ex Japan Index (the “Parent Index”) are excluded based on MSCI’s exclusionary criteria (which involves screening on ESG controversies, ESG business involvement, emission intensity, and climate risk management). MSCI Climate Action Indexes use MSCI ESG Business Involvement Screening Research and MSCI Climate Change Metrics to identify companies that are involved in the following business activities such as controversial weapons, tobacco, thermal coal mining, oil sands and nuclear weapons. The remaining constituents of the Parent Index are then assessed relative to their sector peers based on their emissions intensity, emissions reduction commitments, climate risk management and revenue from greener businesses. The Index uses this assessment to select 50% of the companies from each GICS® sector in the Parent Index. Overall, the Index targets a coverage of 50% of the companies per sector from the Parent Index. The Parent Index weights of the remaining selected securities are renormalized to 100%. Sector weights are limited to +/- 5% the weight of that sector in the Parent Index, and individual issuer weights are capped at 5% of the Index. The Fund aims to invest at least 95 per cent of its assets in achieving the investment objective of tracking the performance of the Index in US dollar terms. The Manager intends to make annual distributions (to the extent that there is a distributable amount under the trust deed of the Fund). 	<p>Details on the values and construction methodology of the Index are available online at www.msci.com.</p> <p>Refer to “<i>Underlying Index</i>” in the “<i>Description of the Index Funds – MSCI Asia Ex Japan ETF</i>” section of the Prospectus for further information on the Index.</p>
Investment Strategy	
<ul style="list-style-type: none"> The Fund includes ESG factors as its key investment strategy, with a focus on climate transition, by tracking the Index. The Manager intends to pursue a Representative Sampling Strategy (i.e. an indexing strategy that involves investing in a representative sample of securities that collectively has an investment profile similar to the Index) to achieve the Fund’s investment objective by investing directly in companies that have been assessed to lead their sector peers in terms of their positioning and actions relative to a climate transition. The Manager may overweight the holdings of securities of the Fund relative to the respective weightings of the underlying securities in the Index e.g. where the Manager considers certain securities in the Index should be excluded in view of comparative illiquidity and possible settlement difficulties which may be experienced with certain stocks comprised in the Index. The Fund may invest in financial derivative instruments for hedging and/or efficient portfolio management purposes. 	<p>Refer to “<i>Investment Strategy</i>” in the “<i>Description of the Index Funds – MSCI Asia Ex Japan ETF</i>” section of the Prospectus setting out the description of the Fund’s investment strategy.</p>

PARTIES INVOLVED	
<p>WHO ARE YOU INVESTING WITH?</p> <ul style="list-style-type: none"> • The Manager is BlackRock (Singapore) Limited. • The Sub-Manager is BlackRock Asset Management North Asia Limited. • The Trustee and Registrar is HSBC Institutional Trust Services (Singapore) Limited. • The Custodian is The Hongkong and Shanghai Banking Corporation Limited. 	<p>Refer to “<i>Management of the Trust</i>” section, “<i>Counterparty Risk of the Custodian</i>” in “<i>Risk Factors</i>” section, and “<i>Termination</i>” in the “<i>Statutory and General Information</i>” section of the Prospectus for further information on their roles and responsibilities and what happens if the Manager, Trustee or Custodian is insolvent.</p>
KEY RISKS	
<p>WHAT ARE THE KEY RISKS OF THIS INVESTMENT? The value of the Fund and its distributions if any, may rise or fall. These risk factors may cause you to lose some or all of your investment:</p>	<p>Refer to “<i>Specific Risks</i>” in the “<i>Description of the Index Funds – MSCI Asia Ex Japan ETF</i>” section and the “<i>Risk Factors</i>” section of the Prospectus for further information on the risks of investing in the Fund.</p>
Market and Credit Risks	
<ul style="list-style-type: none"> • The Net Asset Value of the Fund will change with changes in the market value of the securities it holds. Investors of the Fund are exposed to the same risks that investors who invest directly in the underlying securities would face. These risks include, for example, interest rate risks (risks of falling portfolio values in a rising interest rate market); income risks (risks of falling incomes from a portfolio in a falling interest rate market); and credit risk (risk of a default by the underlying issuer of a security that forms part of the Index). 	
Liquidity Risks	
<ul style="list-style-type: none"> • The secondary market may be illiquid. You can sell your Units on the SGX. However you may not be able to find a buyer on the SGX-ST when you wish to sell your Units. While the Fund intends to appoint at least 1 market maker to assist in creating liquidity for investors, liquidity is not guaranteed and trading of Units on the SGX-ST may be suspended in various situations. 	
Product-Specific Risks	
<ul style="list-style-type: none"> • There is no guarantee that the Fund will achieve a high degree of correlation to the Index and therefore achieve its investment objective. Market disruptions and regulatory restrictions could 	

<p>have an adverse effect on the Fund’s ability to adjust its exposure to the required levels in order to track the Index.</p> <ul style="list-style-type: none"> • As the Manager does not intend to hedge the foreign currency exposure of the Fund, the Fund is exposed to foreign exchange risk between the US Dollar and the various currencies that the underlying securities are denominated in. • The Fund may invest in financial derivatives, which compared to securities can be more sensitive to changes in interest rates or sudden fluctuations in market prices due to both the low margin deposits required and the higher degree of leverage. Thus, if the Fund invests in financial derivatives, there is a risk that its losses may be greater than if it had invested only in securities. • The Fund may invest in an issuer that could face potentially reduced revenues or increased expenditures from physical climate risk (e.g. decreased production capacity due to supply chain perturbations, lower sales due to demand shocks or higher operating or capital costs) or transition risk (e.g. decreased demand for carbon-intensive products and services or increased production costs due to changing input prices). • The lack of common or harmonised definitions and labels regarding ESG and sustainability criteria would mean that the Fund may not invest in the same set of securities as another investment manager deploying an ESG-integrated investment approach in respect of another investment product. Consequently, the performance profile of the Fund may differ more substantially than might otherwise be expected as compared to other investment products with similar objectives. This also means that the approach which has been selected by the Fund may potentially differ from positions adopted at a later stage by the relevant regulatory authorities, which might entail a reputational risk or be considered as involuntary greenwashing. • Whether or not distributions will be made by the Fund is at the discretion of the Manager taking into account various factors, including factors beyond the control of the Manager. There can be no assurance that the distribution yield of the Fund is the same as that of the Index.
