¹ The Prospectus is available for collection at the Manager's office at Twenty Anson, #18-01, 20 Anson Road, Singapore 079912, during normal Singapore business hours or accessible at <u>https://www.blackrock.com/sg/en/ishares</u>.

³ Annualised for the period from 12 September 2023 to 31 December 2023.

² The units in the Fund qualify as an "Excluded Investment Product" ("**EIP**") as defined in the Notice on the Sale of Investment Products (SFA 04-N12) issued by the MAS.

KEY PRODUCT FEATURES	
 WHAT ARE YOU INVESTING IN? You are investing in an exchange traded fund constituted as a subfund of an umbrella unit trust in Singapore. The investment objective of the Fund is to track the performance of the Index in US dollar terms. The Index is designed to represent the performance of companies that have been assessed to lead their sector peers in terms of their positioning and actions relative to a climate transition. Issuers from the underlying MSCI AC Asia ex Japan Index (the "Parent Index") are excluded based on MSCI's exclusionary criteria (which involves screening on ESG controversies, ESG business involvement, emission intensity, and climate risk management). MSCI Climate Action Indexes use MSCI ESG Business Involvement Screening Research and MSCI Climate Change Metrics to identify companies that are involved in the following business activities such as controversial weapons, tobacco, thermal coal mining, oil sands and nuclear weapons. The remaining constituents of the Parent Index are then assessed relative to their sector peers based on their emissions intensity, emissions reduction commitments, climate risk management and revenue from greener businesses. The Index uses this assessment to select 50% of the companies from each GICS® sector in the Parent Index. Overall, the Index targets a coverage of 50% of the companies per sector from the Parent Index. The Parent Index weights of the remaining selected securities are renormalized to 100%. Sector weights are limited to +/- 5% the weight of that sector in the Parent Index. The Fund aims to invest at least 95 per cent of its assets in achieving the investment objective of tracking the performance of the Index in US dollar terms. The Manager currently does not intend to make any distributions of the income of the Fund to unitholders. 	Details on the values and construction methodology of the Index are available online at www.msci.com. Refer to "Underlying Index" in the "Description of the Index Funds – MSCI Asia Ex Japan ETF" section of the Prospectus for further information on the Index.
Investment Strategy	
 The Fund includes ESG factors as its key investment strategy, with a focus on climate transition, by tracking the Index. The Manager intends to pursue a Representative Sampling Strategy (i.e. an indexing strategy that involves investing in a representative sample of securities that collectively has an investment profile similar to the Index) to achieve the Fund's investment objective by investing directly in companies that have been assessed to lead their sector peers in terms of their positioning and actions relative to a climate transition. The Manager may overweight the holdings of securities of the Fund relative to the respective weightings of the underlying securities in the Index e.g. where the Manager considers certain securities in the Index should be excluded in view of comparative illiquidity and possible settlement difficulties which may be experienced with certain stocks comprised in the Index. The Fund may invest in financial derivative instruments for hedging and/or efficient portfolio management purposes. 	Refer to "Investment Strategy" in the "Description of the Index Funds – MSCI Asia Ex Japan ETF" section of the Prospectus setting out the description of the Fund's investment strategy.

Market and Credit Risks	the Fund.
 The Net Asset Value of the Fund will change with changes in the market value of the securities it holds. Investors of the Fund 	
are exposed to the same risks that investors who invest directly in	
the underlying securities would face. These risks include, for	
example, interest rate risks (risks of falling portfolio values in a	
rising interest rate market); income risks (risks of falling incomes	
from a portfolio in a falling interest rate market); and credit risk (risk	
of a default by the underlying issuer of a security that forms part of	
the Index).
