#### FUND OVERVIEW

The Share Class is a share class of a Fund which aims to achieve a return on your investment, through a combination of capital growth and income on the Fund's assets, which reflects the return of the MSCI World Mid-Cap Equal Weighted Index, the Fund's benchmark index. The Share Class, via the Fund, invests in equity securities (e.g. shares) that, so far as possible and practicable, make up the benchmark index. The benchmark index aims to reflect the performance characteristics of mid capitalisation equity securities (e.g. shares) within the MSCI World Index ("Parent Index"), with each security being equally weighted within the benchmark index. Market capitalisation is the share price of a company multiplied by the number of shares issued. The Benchmark Index includes the mid capitalisation constituents of the Parent Index but, at each rebalance date, all index constituents are weighted equally, effectively removing the influence of each constituent's current share price (high or low). This means that, at each index rebalance, the Benchmark Index will have a larger weighting in the smaller mid capitalisation equity securities compared to its Parent Index.

#### KEY BENEFITS

1. Exposure to smaller capitalisation companies within the MSCI World investment universe
2. Direct investment in global, smaller capitalisation companies
3. Global exposure with a focus on smaller companies

#### RISK INDICATOR

##### Lower Risk

Potentially Lower Rewards

##### Higher Risk

Potentially Higher Rewards

**CAPITAL AT RISK:** The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

#### KEY RISKS:

- Shares in smaller companies typically trade in less volume and experience greater price variations than larger companies.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Factor Focus Risk: Indices with a factor focus are less diversified than their parent index because they have predominant exposure to a single factor rather than the multiple factor exposure of most indices. Therefore they will be more exposed to factor related market movements. Investors should consider this Fund as part of a broader investment strategy.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Share Class to financial loss.
- Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

iShares plc, iShares II plc, iShares III plc, iShares IV plc, iShares V plc, iShares VI plc and iShares VII plc (together 'the Companies') are open-ended investment companies with variable capital having segregated liability between their funds organised under the laws of Ireland and authorised by the Central Bank of Ireland.

Further information about the Fund and the Share Class, such as details of the key underlying investments of the Share Class and share prices, is available on the iShares website at [www.ishares.com](http://www.ishares.com) or by calling +44 (0)845 357 7000 or from your broker or financial adviser. The indicative intra-day net asset value of the Share Class is available at <http://deutsche-boerse.com> and/or <http://www.reuters.com>. A UCITS ETF's units / shares that have been acquired on the secondary market cannot usually be sold directly back to the UCITS ETF itself. Investors who are not Authorised Participants must buy and sell shares on a secondary market with the assistance of an intermediary (e.g. a stockbroker) and may incur fees and additional taxes in doing so. In addition, as the market price at which the Shares are traded on the secondary market may differ from the Net Asset Value per Share, investors may pay more than the then current Net Asset Value per Share when buying shares and may receive less than the current Net Asset Value per Share when selling them.
