For your protection, telephone calls are usually recorded.

* Non-executive Director.

BlackRock Global Unconstrained Equity Fund (UK)

About the Fund

BlackRock Global Unconstrained Equity Fund (the "Fund") is a UCITS scheme under the COLL Sourcebook. The Fund was established on 20 December 2019. The Fund's FCA product reference number is 918656.

Assessment of value

The FCA requires UK fund managers to complete an annual assessment of whether their UK authorised funds provide value for investors. BlackRock's assessment considers fund and unit class-level performance, costs and charges, and service quality, concluding with an evaluation of whether investors receive value. BlackRock has fulfilled its obligations for the reporting requirement, including assessing relevant charges, and published the annual assessment of value statements on the BlackRock website on 29 October 2021 in a composite report for all funds managed by BlackRock Fund Managers Limited subject to these requirements.

Fund Managers

As at 28 February 2022, the Fund Managers of the Fund are Michael Constantis and Alister Hibbert.

Significant Events

Changes in the Directors of the Manager

B Harrison was appointed as a Director effective 29 April 2021.

Outbreak of COVID-19

The infectious respiratory illness caused by a novel coronavirus known as COVID-19 has had a profound impact on all aspects of society in recent years. The impact of this significant event on the Fund's financial risk exposure is disclosed in Note 2.

The Manager has assessed the impact of market conditions arising from the COVID-19 outbreak on the Fund's ability to meet its investment objectives. Based on the latest available information, the Fund continues to be managed in line with its investment objective, with no disruption to the operations of the Fund and the publication of net asset values.

Annual Service Charge

Effective 30 June 2021, the Annual Service Charge levied against the Fund in respect to the servicing of unitholders was reduced. The new rates are shown in the Prospectus dated 9 February 2022.

Credit Facility

The Fund entered into a credit facility with JPMorgan whereby JPMorgan, together with other syndicated lenders, made a portion of a USD 475 million credit facility available to the Fund. The portion of the USD 475 million credit facility will be allocated to the Fund based on the credit facility agreement dated 23 April 2021. This credit facility may be utilised by the Fund for temporary funding purposes, including, without limitation, the funding of investor redemptions. Any interest and commitment fees in relation to drawdowns from such credit facility are paid out of the assets of the Fund.

The credit facility was not used during the year.

Investment Report

for the year ended 28 February 2022

Investment Objective

The aim of the Fund is to provide a return on your investment (generated through an increase in the value of the assets held by the Fund) over the long-term (5 years or more) by investing in a global portfolio of equity securities (e.g. shares).

| Comparator benchmark | Investment management approach |
|----------------------|--------------------------------|
| MSCI World Index | Active |

Performance Summary

The following table compares the Fund's realised performance against the performance of the relevant comparator benchmark during the financial year ended 28 February 2022.

The returns disclosed, based on bid-to-bid dealing prices (the price at which units are sold) and calculated net of fees, are the performance returns for the primary unit class of the Fund which has been selected as a representative unit class. The primary unit class represents the class of unit which is the highest charging unit class, free of any commissions or rebates, and is freely available. Performance returns for any other unit class can be made available on request.

| | Fund return % | Comparator benchmark % |
|----------------------------|------------------|------------------------------|
| Class D Accumulation Units | 16.77 | 15.40 |

All financial investments involve an element of risk. Therefore, the value of your investment and the income from it will vary and the return of your initial investment amount cannot be guaranteed. Past performance is not a guide to future performance and should not be the sole factor of consideration when selecting a product.

Global Economic Overview

Global equities, as represented by the MSCI All Country World Index ("ACWI"), posted a return of 12.34% (in British pound sterling terms) for the twelve months ended 28 February 2022. A continued recovery in consumer spending and the implementation of COVID-19 vaccination programmes led to solid economic growth during the twelve-month period. However, the surge in spending on goods and imbalances between supply and demand drove significant global inflation (rate of increase in the prices of goods and services), and the spread of highly contagious variants of COVID-19, led to setbacks in the recovery. Late in the reporting period, Russia's invasion of Ukraine drove further uncertainty in financial markets. Sanctions imposed on Russia negatively impacted businesses with ties to the region and prompted concerns about further rises in commodity prices, including energy, where Russia is one of the world's notable exporters.

The US economy, powered by a surge in consumer spending and increased international trade, grew at a fast pace in 2021, posting its highest annual growth rate since 1984. However, Japanese growth was slow, as a semiconductor shortage hindered production in its electronics and automobile industries. The UK economy contracted early in 2021 before returning to growth for the remainder of 2021, amid an increase in COVID-19 vaccinations. The Eurozone briefly entered a mild recession in early 2021 but grew modestly throughout the period.

Emerging market economies were volatile, as higher commodity prices, continued COVID-19 outbreaks and differing central bank policies led to significant variation in growth. The Chinese economy slowed amid regulatory shifts, concerns about the heavily indebted property sector and restrictions on industrial power usage. India's economy contracted sharply in the second quarter of 2021, before rebounding strongly in the third quarter, as easing lockdown restrictions led to higher consumer spending. Both Mexico and Brazil's economies grew only modestly during 2021.

Investment Report continued

As the global economy improved, the world's largest central banks began to implement various measures aimed at monetary policy tightening, in the face of rising inflation. The US Federal Reserve ("the Fed") kept interest rates near zero and maintained bond buying programmes to stabilise US Treasury and government agency debt markets. However, the Fed began reducing asset purchases in late 2021, and indicated that a series of interest rate increases were likely in 2022.

The Bank of England raised interest rates twice, as inflation reached a thirty-year high. Inflation pressure also affected the Eurozone, and while the European Central Bank ("ECB") maintained record low interest rates, it also shifted its tone by acknowledging the persistence of high inflation.

Global equity performance was mixed during the reporting period, with significant variation by size and region. The implementation of COVID-19 vaccination programmes early in the period provided a strong boost to equities. However, continued inflation pressure, amid supply chain constraints and tighter monetary policy from many central banks pressured equities in the second half of the reporting period. Equities in the US generally posted higher returns than equities in Europe, where economic growth was slower. Rising interest rates and increased uncertainty meant that the equities of larger companies generally performed better than those of smaller, growth-oriented companies. Globally, bonds and equities that factor in companies' environmental, social, and governance ("ESG") characteristics continued to attract strong investor interest. Bond issuance for ESG-related projects grew to a record in 2021 amid rising investor demand and inflows into ESG equity funds also increased, particularly in US and Asian markets.

Global corporate bond returns were negative overall, as yields (which move inversely to prices) rose. As inflation concerns increased, investors' expectations for future interest rate increases, which reduce the value of existing bonds, ramped up. Corporate bond prices fell globally as yield spreads (the difference in yield between government and corporate bonds with similar maturities) widened and investors reassessed credit conditions amid heightened uncertainty.

Yields on the 10-year US Treasury, a benchmark lending rate for the global bond market, rose significantly during the reporting period amid higher inflation and investors' expectations for future Fed interest rate increases. Yields also rose on most other government bonds, particularly UK gilts and government bonds from Europe, while Japanese government bond yields rose more slowly.

Equities in emerging markets posted a substantial decline as the US dollar strengthened and interest rates rose. Central banks in several emerging markets, such as Brazil and Mexico, raised interest rates in response to heightened inflation. In China, an abrupt regulatory shift, targeting companies in the technology, education, and gaming industries, further impacted equities negatively. Late in the reporting period, Russian equities declined significantly and the Moscow Exchange halted trading in the wake of Russia's invasion of Ukraine. Emerging market bond prices declined sharply, partly as a result of Russia's invasion of Ukraine near the end of the reporting period.

In the commodities market, supply and demand shifts induced by the COVID-19 pandemic and subsequent recovery led to a notable rise in many commodity prices. Energy commodities, which had fallen sharply in value at the beginning of the COVID-19 pandemic, rebounded due to higher demand amid a rise in industrial output, and Brent crude oil, natural gas and coal prices all rose. Sanctions on Russia further exacerbated concerns surrounding supply constraints in oil and gas commodity markets late in the reporting period. The prices of other commodities associated with Russia and Ukraine, including wheat and nickel, also rose notably. Gold prices rose as investors sought a store of value amid high inflation and geopolitical instability.

Investment Report continued

On the foreign exchanges, the US dollar rose against most other global currencies, as investors anticipated monetary tightening by the Fed early in 2022. The relatively accommodative stances of the Bank of Japan and the ECB meant that the Japanese yen and the euro both declined notably compared to the US dollar, while the British pound sterling declined less. The Chinese yuan was one of the few currencies that gained against the US dollar, supported by increasing exports and capital inflows.

Fund Performance Review and Activity

Over the financial year to 28 February 2022, the Fund's performance return was 16.77% and the active return was 1.38%, outperforming its comparator benchmark which returned 15.40% (active return is the difference between the Fund's return and the comparator benchmark return).

At the start of the financial year, COVID-19 vaccination deployment enabled a reopening of economies and a sharp rebound in global activity. As we moved into 2022 the market began to respond to inflationary pressures as interest rate expectations in the US moved up causing a dramatic shift in market leadership from 'growth' to perceived 'value' stocks. At the end of the financial year, Russia's invasion of Ukraine negatively impacted market sentiment.

Our long-term approach focuses solely on the fundamental outlook of the businesses we invest in, rather than macro narratives. Over the financial year, outperformance was the strongest within communication services and consumer staples, while underweight to financials and having no exposure to energy detracted from relative performance.

During the financial year the following were the largest contributors to and detractors from the Fund's return relative to the comparator benchmark:

| Largest Contributors | | Largest Detractors | |
|-----------------------------------|-----------------------|-------------------------|-----------------------|
| Stock | Effect on Fund return | Stock | Effect on Fund return |
| Costco [#] | 1.22% | Masimo [#] | (1.85%) |
| ASML [#] | 1.11% | Apple [^] | (1.15%) |
| Novo Nordisk [#] | 0.91% | Ansys [#] | (0.71%) |
| Edwards Lifesciences [#] | 0.82% | Mastercard [#] | (0.64%) |
| Alphabet [#] | 0.66% | Nvidia [^] | (0.48%) |

[#] Overweight position - holds more exposure than the benchmark.

[^] Underweight position - holds less exposure than the benchmark.

Costco continues to grow its membership numbers with better than expected renewal rates. ASML also performed strongly, in its capital markets day in September 2021 the company updated the 2025 guidance, having effectively beaten the original guide four years early.

Masimo detracted after investors negatively reacted to the announcement of a deal to acquire Sound United. The company had expressed an ambition to expand into the consumer segment previously, but size and scope of the deal surprised some investors.

Investment Report continued

The following table details the significant active positions, where the Fund was overweight (held more exposure than the benchmark) and underweight (held less exposure than the benchmark), at 28 February 2022 and 28 February 2021:

| Top overweight positions | | | |
|----------------------------------|------------------|----------------------------------|------------------|
| 28 February 2022 | | 28 February 2021 | |
| Stock | Active Weighting | Stock | Active Weighting |
| Mastercard | 8.50% | ASML | 9.30% |
| LVMH Moet Hennessy Louis Vuitton | 8.26% | Mastercard | 8.60% |
| ASML | 7.64% | LVMH Moet Hennessy Louis Vuitton | 8.30% |

| Top underweight positions | | | |
|---------------------------|------------------|------------------|------------------|
| 28 February 2022 | | 28 February 2021 | |
| Stock | Active Weighting | Stock | Active Weighting |
| Apple | (4.72)% | Apple | (4.00)% |
| Amazon | (2.44)% | Amazon | (2.50)% |
| Tesla | (1.29)% | Facebook | (1.20)% |

Where the Fund is underweight to a stock, the return from such stock will have an opposite effect on the Fund's active return. This may result in a stock being listed as a contributor/detractor but not listed on the Fund's Portfolio Statement.

Portfolio changes are driven by stock-specific investment decisions. Typically, trades are made where the structural investment case changes or when competition for capital forces action. Over the financial year, we completed three full transactions.

We sold a position in Fair Isaac as the company appears to be facing increased competition, partly as a result of changes within the US mortgage market. We used the proceeds from this sale to fund a new position in Floor & Decor, a US flooring business with a proven ability to take market share in a reasonably fragmented market.

We also sold a position in Nestle. While Nestle continues to execute well in what is a tough environment for staples, we believed there were better opportunities for the capital in other existing holdings.

Report on Remuneration

The below disclosures are made in respect of the remuneration policies of the BlackRock group ("BlackRock"), as they apply to BlackRock Fund Managers Limited (the "Manager"). The disclosures are made in accordance with the provisions in the UK implementation of Directive 2009/65/EC on the coordination of laws, regulations and administrative provisions relating to undertakings for collective investment in transferable securities ("UCITS"), as amended, including in particular by Directive 2014/91/EU of the European Parliament and of the council of 23 July 2014, (the "Directive"), the "Guidelines on sound remuneration policies under the UCITS Directive and AIFMD" issued by the European Securities and Markets Authority, the Financial Conduct Authority Handbook SYSC 19E: The UCITS Remuneration Code (the "UCITS Remuneration Code"), and COLL 4.5.7 R(7).

BlackRock's UCITS Remuneration Policy (the "UCITS Remuneration Policy") will apply to the EEA entities within the BlackRock group authorised as a manager of UCITS funds in accordance with the Directive, and will ensure compliance with the requirements of Article 14b of the Directive, and to UK entities within the BlackRock group authorised as a manager of a UK UCITS fund in accordance with the UCITS as implemented, retained and onshored in the UK.

The Manager has adopted the UCITS Remuneration Policy, a summary of which is set out below.

Remuneration Governance

BlackRock's remuneration governance in EMEA operates as a tiered structure which includes: (a) the Management Development and Compensation Committee ("MDCC") (which is the global, independent remuneration committee for BlackRock, Inc. and (b) the Manager's board of directors (the "Manager's Board"). These bodies are responsible for the determination of BlackRock's remuneration policies.

(a) MDCC

The MDCC's purposes include:

- providing oversight of:
 - BlackRock's executive compensation programmes;
 - BlackRock's employee benefit plans; and
 - such other compensation plans as may be established by BlackRock from time to time for which the MDCC is deemed as administrator;
- reviewing and discussing the compensation discussion and analysis included in the BlackRock, Inc. annual proxy statement with management and approving the MDCC's report for inclusion in the proxy statement;
- reviewing, assessing and making reports and recommendations to the BlackRock, Inc. Board of Directors (the "BlackRock, Inc. Board") as appropriate on BlackRock's talent development and succession planning, with the emphasis on performance and succession at the highest management levels; and
- supporting the boards of the Company's EMEA regulated entities in meeting their remuneration-related obligations by overseeing the design and implementation of EMEA remuneration policy in accordance with applicable regulations.

The MDCC directly retains its own independent compensation consultant, Semler Brossy Consulting Group LLC, who has no relationship with BlackRock, Inc. or the BlackRock, Inc. Board that would interfere with its ability to provide independent advice to the MDCC on compensation matters.

Report on Remuneration continued

The BlackRock, Inc. Board has determined that all of the members of the MDCC are “independent” within the meaning of the listing standards of the New York Stock Exchange (NYSE), which requires each meet a “non-employee director” standard.

The MDCC held 8 meetings during 2021. The MDCC charter is available on BlackRock, Inc.’s website (www.blackrock.com).

Through its regular reviews, the MDCC continues to be satisfied with the principles of BlackRock’s compensation policy and approach.

(b) The Manager’s Board

The Manager’s Board has the task of supervising and providing oversight of the UCITS Remuneration Policy as it applies to the Manager and its Identified Staff.

(c) Decision-making process

Remuneration decisions for employees are made once annually in January following the end of the performance year. This timing allows full-year financial results to be considered along with other non-financial goals and objectives. Although the framework for remuneration decision-making is tied to financial performance, significant discretion is used to determine individual variable remuneration based on achievement of strategic and operating results and other considerations such as management and leadership capabilities.

No set formulas are established and no fixed benchmarks are used in determining annual incentive awards. In determining specific individual remuneration amounts, a number of factors are considered including non-financial goals and objectives and overall financial and investment performance. These results are viewed in the aggregate without any specific weighting, and there is no direct correlation between any particular performance measure and the resulting annual incentive award. The variable remuneration awarded to any individual(s) for a particular performance year may also be zero.

Annual incentive awards are paid from a bonus pool.

The size of the projected bonus pool, including cash and equity awards, is reviewed throughout the year by the MDCC and the final total bonus pool is approved after year-end. As part of this review, the MDCC receives actual and projected financial information over the course of the year as well as final year-end information. The financial information that the MDCC receives and considers includes the current year projected income statement and other financial measures compared with prior year results and the current year budget. The MDCC additionally reviews other metrics of BlackRock’s financial performance (e.g., net inflows of AJM and investment performance) as well as information regarding market conditions and competitive compensation levels.

The MDCC regularly considers management’s recommendation as to the percentage of pre-incentive operating income that will be accrued and reflected as a compensation expense throughout the year for the cash portion of the total annual bonus pool (the “accrual rate”). The accrual rate of the cash portion of the total annual bonus pool may be modified by the MDCC during the year based on its review of the financial information described above. The MDCC does not apply any particular weighting or formula to the information it considers when determining the size of the total bonus pool or the accruals made for the cash portion of the total bonus pool.

Following the end of the performance year, the MDCC approves the final bonus pool amount.

As part of the year-end review process the Enterprise Risk and Regulatory Compliance departments report to the MDCC on any activities, incidents or events that warrant consideration in making compensation decisions.

Report on Remuneration continued

Individuals are not involved in setting their own remuneration.

Control functions

Each of the control functions (Enterprise Risk, Legal & Compliance, and Internal Audit) has its own organisational structure which is independent of the business units. The head of each control function is either a member of the Global Executive Committee ("GEC"), the global management committee, or has a reporting obligation to the board of directors of BlackRock Group Limited, the parent company of all of BlackRock's EMEA regulated entities, including the Manager.

Functional bonus pools are determined with reference to the performance of each individual function. The remuneration of the senior members of control functions is directly overseen by the MDCC.

Link between pay and performance

There is a clear and well defined pay-for-performance philosophy and compensation programmes which are designed to meet the following key objectives as detailed below:

- appropriately balance BlackRock's financial results between shareholders and employees;
- attract, retain and motivate employees capable of making significant contributions to the long-term success of the business;
- align the interests of senior employees with those of shareholders by awarding BlackRock Inc.'s stock as a significant part of both annual and long-term incentive awards;
- control fixed costs by ensuring that compensation expense varies with profitability;
- link a significant portion of an employee's total compensation to the financial and operational performance of the business;
- promote sound and effective risk management across all risk categories, including sustainability risk;
- discourage excessive risk-taking (sustainability related or otherwise); and
- ensure that client interests are not negatively impacted by remuneration awarded on a short-term, mid-term and/or long-term basis.

Driving a high-performance culture is dependent on the ability to measure performance against objectives, values and behaviours in a clear and consistent way. Managers use a 5-point rating scale to provide an overall assessment of an employee's performance, and employees also provide a self-evaluation. The overall, final rating is reconciled during each employee's performance appraisal. Employees are assessed on the manner in which performance is attained as well as the absolute performance itself.

In keeping with the pay-for-performance philosophy, ratings are used to differentiate and reward individual performance – but don't pre-determine compensation outcomes. Compensation decisions remain discretionary and are made as part of the year-end compensation process.

When setting remuneration levels other factors are considered, as well as individual performance, which may include:

- the performance of the Manager, the funds managed by the Manager and/or the relevant functional department;
- factors relevant to an employee individually; relationships with clients and colleagues; teamwork; skills; any conduct issues; and, subject to any applicable policy, the impact that any relevant leave of absence may have on contribution to the business);

Report on Remuneration continued

- the management of risk within the risk profiles appropriate for BlackRock's clients;
- strategic business needs, including intentions regarding retention;
- market intelligence; and
- criticality to business.

A primary product tool is risk management and, while employees are compensated for strong performance in their management of client assets, they are required to manage risk within the risk profiles appropriate for their clients. Therefore, employees are not rewarded for engaging in high-risk transactions outside of established parameters. Remuneration practices do not provide undue incentives for short-term planning or short-term financial rewards, do not reward unreasonable risk and provide a reasonable balance between the many and substantial risks inherent within the business of investment management, risk management and advisory services.

BlackRock operates a total compensation model for remuneration which includes a base salary, which is contractual, and a discretionary bonus scheme.

BlackRock operates an annual discretionary bonus scheme. Although all employees are eligible to be considered for a discretionary bonus, there is no contractual obligation to make any award to an employee under its discretionary bonus scheme. In exercising discretion to award a discretionary bonus, the factors listed above (under the heading "Link between pay and performance") may be taken into account in addition to any other matters which become relevant to the exercise of discretion in the course of the performance year.

Discretionary bonus awards for all employees, including executive officers, are subject to a guideline that determines the portion paid in cash and the portion paid in BlackRock, Inc. stock and subject to additional vesting/clawback conditions. Stock awards are subject to further performance adjustment through variation in BlackRock, Inc.'s share price over the vesting period. As total annual compensation increases, a greater portion is deferred into stock. The MDCC adopted this approach in 2006 to substantially increase the retention value and shareholder alignment of the compensation package for eligible employees, including the executive officers. The portion deferred into stock vests into three equal instalments over the three years following grant.

Supplementary to the annual discretionary bonus as described above, equity awards may be made to select individuals to provide greater linkage with future business results. These long-term incentive awards have been established individually to provide meaningful incentive for continued performance over a multi-year period recognising the scope of the individual's role, business expertise and leadership skills.

Selected senior leaders are eligible to receive performance-adjusted equity-based awards from the "BlackRock Performance Incentive Plan" ("BPIP"). Awards made from the BPIP have a three-year performance period based on a measurement of As Adjusted Operating Margin¹ and Organic Revenue Growth². Determination of pay-out will be made based on the firm's achievement relative to target financial results at the conclusion of the performance period. The maximum number of shares that can be earned is 165% of the award in those situations where both metrics achieve pre-determined financial targets. No shares will be earned where the firm's financial performance in both of the above metrics is below a pre-determined performance threshold. These metrics have been selected as key measures of shareholder value which endure across market cycles.

¹ As Adjusted Operating Margin: As reported in BlackRock's external filings, reflects adjusted Operating Income divided by Total Revenue net of distribution and servicing expenses and amortisation of deferred sales commissions.

² Organic Revenue Growth: Equal to net new base fees plus net new Aladdin revenue generated in the year (in dollars).

Report on Remuneration continued

A limited number of investment professionals have a portion of their annual discretionary bonus (as described above) awarded as deferred cash that notionally tracks investment in selected products managed by the employee. The intention of these awards is to align investment professionals with the investment returns of the products they manage through the deferral of compensation into those products. Clients and external evaluators have increasingly viewed more favourably those products where key investors have “skin in the game” through significant personal investments.

Identified Staff

The UCITS Remuneration Policy sets out the process that will be applied to identify staff as Identified Staff, being categories of staff of the Manager, including senior management, risk takers, control functions and any employee receiving total remuneration that takes them into the same remuneration bracket as senior management and risk takers, whose professional activities have a material impact on the risk profiles of the Manager or of the funds it manages.

The list of Identified Staff will be subject to regular review, being formally reviewed in the event of, but not limited to:

- organisational changes;
- new business initiatives;
- changes in significant influence function lists;
- changes in role responsibilities; and
- revised regulatory direction.

Quantitative Remuneration Disclosure

The Manager is required under the Directive to make quantitative disclosures of remuneration. These disclosures are made in line with BlackRock’s interpretation of currently available regulatory guidance on quantitative remuneration disclosures. As market or regulatory practice develops BlackRock may consider it appropriate to make changes to the way in which quantitative remuneration disclosures are calculated. Where such changes are made, this may result in disclosures in relation to a fund not being comparable to the disclosures made in the prior year, or in relation to other BlackRock fund disclosures in that same year.

Disclosures are provided in relation to (a) the staff of the Manager; (b) staff who are senior management; and (c) staff who have the ability to materially affect the risk profile of the Fund, including individuals who, although not directly employed by the Manager, are assigned by their employer to carry out services directly for the Manager.

All individuals included in the aggregated figures disclosed are rewarded in line with BlackRock’s remuneration policy for their responsibilities across the relevant BlackRock business area. As all individuals have a number of areas of responsibilities, only the portion of remuneration for those individuals’ services attributable to the Fund is included in the aggregate figures disclosed.

Members of staff and senior management of the Manager typically provide both UCITS and non-UCITS related services in respect of multiple funds, clients and functions of the Manager and across the broader BlackRock group. Therefore, the figures disclosed are a sum of each individual’s portion of remuneration attributable to the Manager according to an objective apportionment methodology which acknowledges the multiple-service nature of the Manager. Accordingly the figures are not representative of any individual’s actual remuneration or their remuneration structure.

Report on Remuneration continued

The amount of the total remuneration awarded by the Manager to its staff which has been attributed to the Manager's UCITS-related business in respect of the Manager's financial year ending 31 December 2021 is GBP 26.0 million. This figure is comprised of fixed remuneration of GBP 2.1 million and variable remuneration of GBP 23.9 million. There were a total of 87 beneficiaries of the remuneration described above.

The amount of the aggregate remuneration awarded by the Manager, which has been attributed to the Manager's UCITS-related business in respect of the Manager's financial year ending 31 December 2021, to its senior management was GBP 0.1 million, and to other members of its staff whose actions have a material impact on the risk profile of the Fund was GBP 25.9 million.

G D Bamping (Director)

M T Zemek (Director)

BlackRock Fund Managers Limited

16 May 2022

Notes to Financial Statements

for the year ended 28 February 2022

1. Accounting and Distribution Policies

Accounting Policies

- (a) The financial statements have been prepared in accordance with United Kingdom Generally Accepted Accounting Practice (UK GAAP) and the Statement of Recommended Practice for Authorised Funds (the "SORP") issued by the Investment Management Association (now known as the Investment Association) in May 2014 and amended in June 2017.

The financial statements have been prepared on a going concern basis in accordance with UK GAAP and the SORP. The Fund is able to meet all of its liabilities from its assets. The performance, marketability and risks of the Fund are reviewed on a regular basis throughout the financial period. Therefore, the Directors of the Manager believe that the Fund will continue in operational existence for a period of at least one year from the date of approval of the financial statements and is financially sound. The Directors of the Manager are satisfied that, at the time of approving the financial statements, and following consideration of COVID-19, it is appropriate to continue to adopt the going concern basis in preparing the financial statements of the Fund.

- (b) Bank interest is recognised on an accruals basis.

Dividends on quoted ordinary shares and preference shares are recognised when the securities are quoted ex-dividend. Where such securities are not quoted, dividends are recognised when the right to receive payment is established.

Any reported revenue from an offshore fund with reporting status from HMRC, in excess of any distribution received in the reporting period, is recognised as revenue no later than the date on which the reporting fund makes this information available. The equalisation element is treated as capital.

All revenue is recognised as a gross amount that takes account of any withholding taxes but excludes any other taxes such as attributable tax credits.

Revenue from securities lending is accounted for net of associated costs and is recognised on an accruals basis.

- (c) Ordinary stock dividends are recognised wholly as revenue and are based on the market value of the shares on the date they are quoted ex-dividend. Where an enhancement is offered, the amount by which the market value of the shares (on the date they are quoted ex-dividend) exceeds the cash dividend is taken to capital.
- (d) The underlying circumstances behind both special dividends and share buy backs are reviewed on a case by case basis in determining whether the amount is revenue or capital in nature. Any tax treatment will follow the accounting treatment of the principal amount.
- (e) Underwriting commission is wholly recognised as revenue when the issue takes place, except where the Fund is required to take up some or all of the shares underwritten, in which case an appropriate proportion of the commission received is deducted from the cost of those shares.
- (f) All expenses, except those relating to the purchase and sale of investments are charged against revenue. All expenses are recognised on an accruals basis.
- (g) Provision for corporation tax is made at the current rate on the excess of taxable revenue over allowable expenses. Provision is made on all material timing differences arising from the different treatment of items for accounting and tax purposes. A deferred tax asset is recognised only to the extent that it is considered more likely than not that there will be taxable profits in the future against which the asset can be offset.
- (h) Where the end of the accounting year on the Balance Sheet date is a business day, the valuation point is 12 noon, and where the end of the accounting year on the Balance Sheet date is a non-business day, the

valuation point is end of day. All investments are valued at their fair value as at the end of the accounting period. In the case of an investment which is not quoted, listed or dealt in on a recognised market, or in respect of which a listed, traded or dealt price or quotation is not available at the time of valuation, the fair value of such investment shall be estimated with care and in good faith by a competent professional person, body, firm or corporation including the Manager's pricing committee and such fair value shall be determined on the basis of the probable realisation value of the investment. The Manager shall be entitled to adopt an alternative method of valuing any particular asset if it considers that the methods of valuation set out above do not provide a fair valuation of a particular asset or liability.

Investments in dual priced Collective Investment Schemes have been valued at bid price market values, defined as fair value, which is 12 noon where this is a business day or end of day where this is a non-business day at the end of the accounting period, in accordance with the valuation point of the underlying fund. Investments in single priced Collective Investment Schemes have been valued at market values, defined as fair value, which is 12 noon where this is a business day or end of day where this is a non-business day at the end of the accounting period, in accordance with the valuation point of the underlying fund.

- (i) Any transactions in foreign currencies are translated into Sterling at the rates of exchange ruling on the date of any such transaction. Assets and liabilities in foreign currencies are translated into Sterling at the exchange rates ruling at the end of the accounting period. Revenue items in foreign currencies are translated into Sterling at the exchange rate when the revenue is received.
- (j) Cash and bank balances consist of deposits held on call with banks and cash held with clearing brokers and counterparties.

Distribution Policies

- (k) Returns from bond futures recognised as revenue from long positions form part of the distribution. Amounts recognised as revenue from short positions reduce the amounts available for distribution.
- (l) The units in the Fund are all accumulation units. All of the net revenue available for distribution at the final accounting period end will be accumulated by the Fund with a transfer from revenue to capital. In order to conduct a controlled dividend flow to unitholders, interim distributions may be made at the Manager's discretion, up to a maximum of the distributable revenue available for the period. Should expenses and taxation together exceed revenue, there will be no distribution and the shortfall will be met from capital.
- (m) The Fund has satisfied the qualifying investments tests as specified in S468L ICTA 1988 at all times throughout their distribution period. As such, any revenue available for distribution will be paid as an interest distribution.
- (n) The ordinary element of stock dividends is treated as revenue and forms part of the distribution.
- (o) Special dividends and share buy backs recognised as revenue form part of the distribution.
- (p) The Fund has satisfied the qualifying investments tests as specified in S468L ICTA 1988 at all times throughout the distribution period. As such, any revenue available for distribution will be paid as an interest distribution.

2. Financial Instruments and Risks

The Fund's investment activities expose it to the various types of risk which are associated with the financial instruments and markets in which it invests. The following information is not intended to be a comprehensive summary of all risks and investors should refer to the Prospectus for a more detailed discussion of the risks inherent in investing in the Fund.

Risk management framework

The Manager has delegated the day-to-day administration of the investment programme to the Investment Manager. The Investment Manager is also responsible for ensuring that the Fund is managed within the terms of its investment guidelines and limits set out in the Prospectus. The Manager reserves to itself the investment performance, product risk monitoring and oversight and the responsibility for the monitoring and oversight of regulatory and operational risk for the Fund.

The Manager has appointed a risk manager who has responsibility for the daily risk management process with assistance from key risk management personnel of the Investment Manager, including members of the BlackRock Risk and Quantitative Analysis Group ("RQA Group") which is a centralised group which performs an independent risk management function. The RQA Group independently identifies, measures and monitors investment risk. The RQA Group tracks the actual risk management practices being deployed across the different funds. By breaking down the components of the process, the RQA Group has the ability to determine if the appropriate risk management processes are in place for the Fund. This captures the risk management tools employed, how the levels of risk are controlled, ensuring risk/return is considered in portfolio construction and reviewing outcomes.

The principal risk exposure of the Fund is set out as follows:

(a) Market risk

Market risk arises mainly from uncertainty about future values of financial instruments influenced by other price, currency and interest rate movements. It represents the potential loss the Fund may suffer through holding market positions in the face of market movements. The Fund is exposed to market risk by virtue of its investments in equities.

A key metric the RQA Group uses to measure market risk is Value-at-Risk ("VaR") which encompasses price, currency and interest rate risk. VaR is a statistical risk measure that estimates the potential portfolio loss from adverse market moves in an ordinary market environment. VaR analysis reflects the interdependencies between risk variables, unlike a traditional sensitivity analysis.

The VaR calculations are based on an adjusted historical simulation model with a confidence level of 99%, a holding period of one day and a historical observation period of not less than one year (250 days). A VaR number is defined at a specified probability and a specified time horizon. A 99% one day VaR means that the expectation is that 99% of the time over a one day period the Fund will lose less than this number in percentage terms. Therefore, higher VaR numbers indicate higher risk.

It is noted that the use of the VaR methodology has limitations, namely that the use of historical market data as a basis for estimating future events does not encompass all possible scenarios, particularly those that are of an extreme nature and that the use of a specified confidence level (e.g. 99%) does not take into account

losses that occur beyond this level. There is some probability that the loss could be greater than the VaR amounts. These limitations and the nature of the VaR measure mean that the Fund can neither guarantee that losses will not exceed the VaR amounts indicated, nor that losses in excess of the VaR amounts will not occur more frequently.

The one day VaR as at 28 February 2022 and 28 February 2021 based on a 99% confidence level was 4.15% and 3.69% respectively.

i) Market risk arising from foreign currency risk

Exposure to foreign currency risk

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

Management of foreign currency risk

The net assets of the Fund are denominated mainly in Sterling, therefore the Balance Sheet and Statement of Total Return are unlikely to be directly affected by currency movements.

ii) Market risk arising from other price risk

Exposure to other price risk

Other price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting similar financial instruments traded in the market. Local, regional or global events such as war, acts of terrorism, the spread of infectious illness or other public health issue, recessions, or other events could have a significant impact on the Fund and market prices of its investments.

The coronavirus outbreak has had a profound impact on all aspects of society in recent years. While there is a growing consensus in developed economies that the worst of the impact is now over, there is an expectation that travel restrictions, enhanced health screenings at ports of entry and elsewhere, disruption of and delays in healthcare service preparation and delivery, cancellations, supply chain disruptions, and lower consumer demand will create ongoing challenges. While widescale vaccination programmes are now in place in many countries and are having a positive effect, the impact of COVID-19 continues to adversely affect the economies of many nations across the globe and this impact may be greater where vaccination rates are lower, such as in certain emerging markets. Although it is difficult to make timing predictions, it is expected that the economic effects of COVID-19 will continue to be felt for a period after the virus itself has moved from being pandemic to endemic in nature, and this in turn may continue to impact investments held by the Fund.

The Fund is exposed to other price risk arising from its investments. The exposure of the Fund to other price risk is the market value of the investments held as shown in the Portfolio Statement of the Fund.

Management of other price risk

The Investment Manager manages the Fund's other price risk on a daily basis in accordance with the Fund's investment objective.

Notes to Financial Statements continued

By diversifying the portfolio, where this is appropriate and consistent with the Fund's objectives, the risk that a price change of a particular investment will have a material impact on the Net Asset Value ("NAV") of the Fund is minimised. The investment concentrations within the portfolio are disclosed in the portfolio statement by investment type.

iii) **Market risk arising from interest rate risk**

Exposure to interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

The Fund is exposed to interest rate risk on its cash and bank balances held at The Bank of New York Mellon (International) Limited and its cash equivalent holdings. Cash held on deposit at The Bank of New York Mellon (International) Limited receives/incurs interest at the prevailing daily rate which may be negative depending on the currency in which the cash is held.

Management of interest rate risk

Interest rate risk exposure is managed by constantly monitoring the position for deviations outside a pre-determined tolerance level and, when necessary, rebalancing back to the original desired parameters.

(b) **Counterparty credit risk**

Exposure to counterparty credit risk

Counterparty credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation.

The Fund is exposed to counterparty credit risk from the parties with which they trade and will bear the risk of settlement default.

Management of counterparty credit risk

Counterparty risk is monitored and managed by BlackRock's RQA Counterparty & Concentration Risk Team. The team is headed by BlackRock's Chief Counterparty Credit Officer who reports directly to the Global Head of RQA. Credit authority resides with the Chief Counterparty Credit Officer and selected team members to whom specific credit authority has been delegated. As such, counterparty approvals may be granted by the Chief Counterparty Credit Officer or by identified RQA Credit Risk Officers who have been formally delegated authority by the Chief Counterparty Credit Officer as deemed appropriate.

BlackRock's RQA Counterparty & Concentration Risk Team completes a formal review of each new counterparty, monitors and reviews all approved counterparties on an ongoing basis and maintains an active oversight of counterparty exposures.

The Manager maintains a list of approved counterparties. This list is regularly monitored and revised for changes based on the counterparty's creditworthiness, market reputation and expectations of future financial performance. Transactions will only be opened with financial intermediaries on the approved counterparties list.

i) **Trustee and Custodian**

The Fund's Trustee and Custodian is The Bank of New York Mellon (International) Limited (the "Trustee" and "Custodian").

Substantially all of the investments other than FDIs of the Fund are held by the Custodian at year end. Investments are segregated from the assets of the Custodian, with ownership rights remaining with the Fund. Bankruptcy or insolvency of the Custodian may cause the Fund's rights with respect to its investments held by the Custodian to be delayed or limited. The maximum exposure to this risk is the total amount of equity and bond investments disclosed in the portfolio statement.

The Fund will be exposed to the credit risk of the Custodian, or any depository used by the Trustee regarding cash balances held in accounts with same. In the event of insolvency or bankruptcy of the Custodian or any depository used by the Trustee, the Fund will be treated as a general creditor of the Trustee.

Management of counterparty credit risk related to the Trustee and Custodian

To mitigate the Fund's credit risk with respect to the Trustee, the Investment Manager of the Fund employs specific procedures to ensure that the Trustee employed is a reputable institution and that the associated credit risk is acceptable to the Fund. The Fund only transacts with counterparties that are regulated entities subject to prudential supervision, or with high credit-ratings assigned by international credit-rating agencies.

The long term credit rating of the parent company of the Trustee and Custodian, The Bank of New York Mellon Corporation, as at 28 February 2022 was A (28 February 2021: AA-) (Standard & Poor's rating).

ii) Counterparties

All transactions in listed securities are settled/paid for upon delivery using approved brokers. The risk of default is considered minimal, as delivery of securities sold is only made once the broker has received payment. Payment is made on a purchase once the securities have been received by the broker. The trade will fail if either party fails to meet its obligation.

Counterparty credit risk arising on transactions with brokers relates to transactions awaiting settlement. Risk relating to unsettled transactions is considered small due to the short settlement period involved and the high credit quality of the brokers used.

Management of counterparty credit risk related to Counterparties

The Manager monitors the credit rating and financial position of the brokers used to further mitigate this risk.

iii) Securities lending

The Fund engages in security lending activities which expose the Fund to counterparty credit risk. The maximum exposure to the Fund is equal to the value of the securities loaned.

There were no securities on loan or related collateral outstanding at the Balance Sheet date.

Notes to Financial Statements continued

| Counterparty | Counterparty's country of establishment | 28 February 2022 | | 28 February 2021 | |
|-------------------------------------|---|--------------------|---------------------|--------------------|---------------------|
| | | Securities on loan | Collateral received | Securities on loan | Collateral received |
| | | £000's | £000's | £000's | £000's |
| Barclays Capital Securities Limited | UK | – | – | 1,679 | 1,925 |
| HSBC Bank Plc | UK | – | – | 17,830 | 19,666 |
| Total | | – | – | 19,509 | 21,591 |

At 28 February 2022 there were no securities on loan or related collateral outstanding (28 February 2021: 18.03% in debt securities and 81.97% in equity securities).

Collateral accepted is non-cash in the form of sovereign debt rated AA or better from approved governments only, supranational debt obligations rated AAA or better and equity securities listed on a recognised exchange.

Management of counterparty credit risk related to securities lending

To mitigate this risk, the Fund receives either cash or securities as collateral equal to a certain percentage in excess of the fair value of the securities loaned. The Investment Manager monitors the fair value of the securities loaned and additional collateral is obtained, if necessary. As at 28 February 2022 and 28 February 2021, all non-cash collateral received consists of securities admitted to or dealt on a recognised exchange.

The Fund also benefits from a borrower default indemnity provided by BlackRock Inc. The indemnity allows for full replacement of securities lent. BlackRock Inc. bears the cost of indemnification against borrower default.

(c) Liquidity risk

Exposure to liquidity risk

Liquidity risk is the risk that the Fund will encounter difficulties in meeting its obligations associated with financial liabilities.

Liquidity risk to the Fund arises from the redemption requests of unitholders and the liquidity of the underlying investments the Fund is invested in. The Fund's unitholders may redeem their units on the close of any daily dealing deadline for cash equal to a proportionate share of the Fund's NAV. The Fund is therefore potentially exposed to the liquidity risk of meeting the unitholders' redemptions and may need to sell assets at prevailing market prices to meet liquidity demands.

All non-derivative financial liabilities including distributions payable held by the Fund as at 28 February 2022 and 28 February 2021, based on contractual maturities, fall due within one to three months.

Management of liquidity risk

Liquidity risk is minimised by holding sufficient liquid investments which can be readily realised to meet liquidity demands.

At times of excessive redemptions the Manager may decide to defer redemptions at any valuation point to the next valuation point where the requested aggregate redemptions exceed 10 per cent of the Fund's NAV. This will therefore allow the Manager to protect the interests of continuing unitholders by allowing the Manager to match the sale of scheme property to the level of redemptions. This should reduce the impact

of dilution on the Fund. All unitholders who have sought to redeem units at any valuation point at which redemptions are deferred will be treated consistently and any redemption requests received in the meantime will not be processed until the redemption requests that have been deferred to the subsequent valuation points have been processed.

The Fund's liquidity risk is managed on a daily basis by the Investment Manager in accordance with established policies and procedures in place. The portfolio managers review daily forward looking cash reports which project cash obligations. These reports allow them to manage the Fund's cash obligations.

(d) Valuation of financial instruments

The Fund classifies financial instruments measured at fair value using a fair value hierarchy. The fair value hierarchy has the following categories:

Level 1 – Unadjusted quoted prices for identical instruments in active markets

A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available and those prices represent actual and regularly occurring market transactions on an arm's length basis. The Fund does not adjust the quoted price for these instruments.

Level 2 – Valuation techniques using observable inputs other than quoted prices in level 1

This category includes instruments valued using quoted prices in active markets for similar instruments; quoted prices for similar instruments in markets that are considered less than active; or other valuation techniques where all significant inputs are directly or indirectly observable from market data.

Valuation techniques used for non-standardised financial instruments such as OTC derivatives, include the use of comparable recent arm's length transactions, reference to other instruments that are substantially the same, discounted cash flow analysis, option pricing models and other valuation techniques commonly used by market participants making the maximum use of market inputs and relying as little as possible on entity determined inputs.

Level 3 – Valuation techniques using significant unobservable inputs

This category includes all instruments where the valuation techniques used include inputs not based on market data and these inputs could have a significant impact on the instrument's valuation.

This category also includes instruments that are valued based on quoted prices for similar instruments where significant entity determined adjustments or assumptions are required to reflect differences between the instruments and instruments for which there is no active market.

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a level 3 measurement.

Notes to Financial Statements continued

Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability. The determination of what constitutes 'observable' inputs requires significant judgement by the Investment Manager. The Investment Manager considers observable inputs to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

The table below is an analysis of the Fund's investment assets and investment liabilities measured at fair value at the Balance Sheet date.

| | Level 1 £000's | Level 2 £000's | Level 3 £000's | Total £000's |
|-------------------------|-------------------|-------------------|-------------------|-----------------|
| 28 February 2022 | | | | |
| Investment assets | 363,336 | 575 | – | 363,911 |
| Investment liabilities | – | – | – | – |
| 28 February 2021 | | | | |
| Investment assets | 235,541 | – | – | 235,541 |
| Investment liabilities | – | – | – | – |

(e) Global exposure

The Manager is required by the COLL Sourcebook to employ a risk management process in respect of the Fund which enables it to accurately monitor and manage the global exposure from Financial Derivative Instruments ("FDIs").

The Fund did not hold any FDIs at 28 February 2022 and 28 February 2021.

3. Net Capital Gains

| | For the year to 28.2.2022 £000's | For the period from 21.1.2020 to 28.2.2021 £000's |
|---|--|---|
| The net capital gains comprise: | | |
| Gains on non-derivative securities | 34,255 | 20,143 |
| (Losses)/gains on derivative securities | (91) | 341 |
| Currency losses | (31) | (77) |
| Custodian transaction costs | (6) | (19) |
| Net capital gains | 34,127 | 20,388 |

Notes to Financial Statements continued

4. Revenue

| | For the year to 28.2.2022 £000's | For the period from 21.1.2020 to 28.2.2021 £000's |
|--|--|---|
| Interest from UK bank deposits | – | 2 |
| Overseas dividends | 1,713 | 1,043 |
| Revenue from short-term money market funds | 1 | – |
| Securities lending revenue | 3 | 5 |
| UK dividends | 146 | 85 |
| Total revenue | 1,863 | 1,135 |

5. Expenses

| | For the year to 28.2.2022 £000's | For the period from 21.1.2020 to 28.2.2021 £000's |
|--|--|---|
| Payable to the Manager or associates of the Manager: | | |
| – Annual service charge | 296 | 111 |
| – Manager's charge | 1,277 | 479 |
| | 1,573 | 590 |
| Other expenses: | | |
| – Audit fee | 8 | 9 |
| – Legal and other professional fees | – | 1 |
| – Safe custody fees | 8 | 6 |
| – Trustee's fees | 38 | 24 |
| | 54 | 40 |
| Total expenses | 1,627 | 630 |

6. Taxation

(a) Analysis of tax charge

| | For the year to 28.2.2022 £000's | For the period from 21.1.2020 to 28.2.2021 £000's |
|---|--|---|
| Overseas tax | 239 | 156 |
| Total tax charge [see note 6(b)] | 239 | 156 |

Notes to Financial Statements continued

6. Taxation continued

(b) Factors affecting the tax charge

The tax assessed for the year is higher than the standard rate of corporation tax in the UK for an authorised unit trust. The differences are explained below:

| | For the year to 28.2.2022 £000's | For the period from 21.1.2020 to 28.2.2021 £000's |
|---|--|---|
| Net revenue before taxation | 236 | 505 |
| Corporation tax at 20% (28 February 2021: 20%) | 47 | 101 |
| Effects of: | | |
| Movement in unrecognised excess management expenses | 201 | 124 |
| Overseas tax | 239 | 156 |
| Prior year adjustment to excess management expenses | 124 | – |
| Revenue not subject to tax | (372) | (225) |
| Total tax charge [see note 6(a)] | 239 | 156 |

At 28 February 2022, the Fund had surplus management expenses of £1,623,000 (28 February 2021: £619,000). It is unlikely that the Fund will generate sufficient taxable profits in the future to utilise these expenses and, therefore, a deferred tax asset of £325,000 (28 February 2021: £124,000) has not been recognised.

7. Distributions

| | For the year to 28.2.2022 £000's | For the period from 21.1.2020 to 28.2.2021 £000's |
|--|--|---|
| First distribution | 356 | 20 |
| Second distribution | – | 202 |
| Final distribution | 124 | 134 |
| | 480 | – |
| Less: Amounts deducted on cancellation of units | (34) | (4) |
| Add/(Less): Amounts received on issue of units | 323 | (3) |
| Distributions | 769 | 349 |
| The distributable amount has been calculated as follows: | | |
| Net expense/(revenue) after taxation | (3) | 349 |
| Add: Shortfall transferred to capital | 772 | – |
| Distributions | 769 | 349 |

Notes to Financial Statements continued

8. Debtors

| | 28.2.2022 £000's | 28.2.2021 £000's |
|---------------------------------------|---------------------|---------------------|
| Accrued revenue | 71 | 63 |
| Amounts receivable for issue of units | 19,130 | 5,444 |
| Overseas tax recoverable | 40 | 17 |
| Total debtors | 19,241 | 5,524 |

9. Other Creditors

| | 28.2.2022 £000's | 28.2.2021 £000's |
|---|---------------------|---------------------|
| Accrued Annual service charge | 72 | 56 |
| Accrued Audit fee | 17 | 9 |
| Accrued Manager's charge | 693 | 229 |
| Accrued Safe custody fees | 1 | 2 |
| Accrued Trustee's fee | 20 | 10 |
| Amounts payable for cancellation of units | 421 | 123 |
| Currency purchases awaiting settlement | 15 | – |
| Custodian transaction costs | 1 | 7 |
| Purchases awaiting settlement | 17,499 | 5,493 |
| Total other creditors | 18,739 | 5,929 |

10. Contingent Assets and Liabilities

There were no contingent assets or liabilities at the Balance Sheet date (28 February 2021: £Nil).

11. Related Parties

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial or operational decisions.

The following entities were related parties of the Fund during the year ended 28 February 2022:

| | |
|----------------------|--|
| Manager/Registrar: | BlackRock Fund Managers Limited |
| Investment Manager: | BlackRock Investment Management (UK) Limited |
| Stock Lending Agent: | BlackRock Advisors (UK) Limited |

The Manager acts as either principal or agent for the Trustee in respect of all transactions of units of the Fund. The aggregate monies received through issue and paid through cancellation of units are disclosed in the Statement of Change in Net Assets Attributable to Unitholders and note 7.

The Fund may invest in other Collective Investment Schemes ("CIS"), which may or may not be operated and/or managed by an affiliate of the Manager. As an investor in such other CIS, in addition to the fees, costs and expenses payable by a unitholder in the Fund, each unitholder may also indirectly bear a portion of the fees, costs and expenses of the underlying CIS, including management, investment management and

Notes to Financial Statements continued

11. Related Parties continued

administration and other expenses. However, in respect of investments made in any other investment fund whose manager is an affiliate of the Manager, the Fund will invest, where possible, in classes of the underlying funds which are not subject to any management charges. Alternatively, where this is not possible, the Manager will rebate management charges to the Fund. The Fund will not be subject to any preliminary/initial sales fee in respect of investments made in any other investment fund whose manager is an affiliate of the Manager, although it may be subject to duties and charges in respect of subscriptions and redemptions in such investment funds.

As at 28 February 2022 and 28 February 2021, none of the unitholders:

- (i) are funds managed by the BlackRock Group or are affiliates of BlackRock Inc. or
- (ii) are investors, other than those included in (i) above, who held 51% or more of the voting units in issue in the Fund and are as a result, considered to be a related party to the Fund.

12. Portfolio Transaction Costs

For the year ended 28 February 2022

| Purchases (excluding derivatives) | Direct Transaction Costs | | | | |
|--|-----------------------------|-----------------------|------|-----------------|------|
| | Transaction Value £000's | Commissions £000's | % | Taxes £000's | % |
| Equity instruments | 190,426 | 19 | 0.01 | 85 | 0.04 |
| Total purchases | 190,426 | 19 | | 85 | |
| Total purchases including transaction costs | 190,530 | | | | |

| Sales (excluding derivatives) | Direct Transaction Costs | | | | |
|---|-----------------------------|-----------------------|------|-----------------|---|
| | Transaction Value £000's | Commissions £000's | % | Taxes £000's | % |
| Equity instruments | 97,000 | 10 | 0.01 | – | – |
| Total sales | 97,000 | 10 | | – | |
| Total sales net of transaction costs | 96,990 | | | | |
| Total transaction costs | | 29 | | 85 | |
| Total transaction costs as a % of average net assets | | 0.01% | | 0.03% | |

Notes to Financial Statements continued

12. Portfolio Transaction Costs continued

For the period from 21 January 2020 to 28 February 2021

| Purchases (excluding derivatives) | Direct Transaction Costs | | | | |
|--|-----------------------------|-----------------------|------|-----------------|------|
| | Transaction Value £000's | Commissions £000's | % | Taxes £000's | % |
| Equity instruments | 192,208 | 17 | 0.01 | 100 | 0.05 |
| Total purchases | 192,208 | 17 | | 100 | |
| Total purchases including transaction costs | 192,325 | | | | |

| Sales (excluding derivatives) | Direct Transaction Costs | | | | |
|---|-----------------------------|-----------------------|------|-----------------|---|
| | Transaction Value £000's | Commissions £000's | % | Taxes £000's | % |
| Equity instruments | 11,911 | 2 | 0.02 | - | - |
| Total sales | 11,911 | 2 | | - | |
| Total sales net of transaction costs | 11,909 | | | | |
| Total transaction costs | | 19 | | 100 | |
| Total transaction costs as a % of average net assets | | 0.01% | | 0.07% | |

The above analysis covers direct transaction costs incurred by the Fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instruments types.

Transactions in many market investments to manage the Fund's daily liquidity position are excluded from the analysis.

Separately identifiable direct transaction costs (such as commissions and taxes) are attributable to the Fund's purchase and sale of equity instruments. Additionally, for equity shares there is a dealing spread cost (the difference between the buying and selling prices) which will be incurred on purchase and sale transactions.

At the Balance Sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.07% (28 February 2021: 0.06%).

Notes to Financial Statements continued

13. Units in Issue

The movement in units in issue for the year ended 28 February 2022 is as follows:

| | X Accumulation Units | D Accumulation Units | Z Accumulation Units |
|---------------------------------------|---------------------------------|---------------------------------|---------------------------------|
| Balance at the beginning of the year | 87,541,677 | 22,479,583 | 93,297,185 |
| Issued during the year | 3,957,468 | 78,266,623 | 73,591,896 |
| Cancelled during the year | (51,423,651) | (24,726,087) | (14,036,153) |
| Converted during the year | – | (1,682,162) | 1,677,860 |
| Balance at the end of the year | 40,075,494 | 74,337,957 | 154,530,788 |

Revenue is allocated each day pro rata to the capital value of assets attributable to each class and taxation is computed by reference to the net revenue after expenses attributable to each class. The distribution per unit class is given in the distribution table. All unit classes have the same rights on winding up.

14. Post Balance Sheet Events

There have been no significant events subsequent to the year end, which, in the opinion of the Manager, may have had an impact on the Financial Statements for the year ended 28 February 2022.

Statement of Manager's Responsibilities

The Manager is required by the rules of the COLL Sourcebook to prepare the financial statements for each financial year. These financial statements must be prepared in accordance with generally accepted accounting standards in the United Kingdom to give a true and fair view of the state of affairs of the Fund at the year end and of the net revenue and net gains for the year. In preparing these financial statements the Manager is required to prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Fund will continue in operation.

The financial statements should comply with the disclosure requirements of the Statement of Recommended Practice (the "SORP") for Authorised Funds issued by the Investment Management Association (subsequently The Investment Association) and must comply with any relevant provisions of the Trust Deed.

The Manager is responsible for keeping such accounting records as are necessary to enable it to ensure that the financial statements comply with the COLL Sourcebook, the SORP and the Trust Deed.

Statement of the Trustee's Responsibilities in Respect of the Fund and Report of the Trustee to the Unitholders of the Fund for the Year Ended 28 February 2022

The Depository in its capacity as Trustee of the Fund must ensure that the Fund is managed in accordance with the Financial Conduct Authority's Collective Investment Schemes Sourcebook, the Financial Services and Markets Act 2000, as amended, (together "the Regulations"), the Trust Deed and Prospectus (together "the Scheme documents") as detailed below.

The Trustee must in the context of its role act honestly, fairly, professionally, independently and in the interests of the Fund and its investors.

The Trustee is responsible for the safekeeping of all the custodial assets and maintaining a record of all other assets of the Fund in accordance with the Regulations.

The Trustee must ensure that:

- the Fund's cash flows are properly monitored and that cash of the Fund is booked in cash accounts in accordance with the Regulations;
- the sale, issue, repurchase, redemption and cancellation of units are carried out in accordance with the Regulations;
- the value of units of the Fund are calculated in accordance with the Regulations;
- any consideration relating to transactions in the Fund's assets is remitted to the Fund within the usual time limits
- the Fund's income is applied in accordance with the Regulations; and
- the instructions of the Authorised Fund Manager ("the AFM"), which is the UCITS Management Company, are carried out (unless they conflict with the Regulations).

The Trustee also has a duty to take reasonable care to ensure that the Fund is managed in accordance with the Regulations and the Scheme documents of the Fund in relation to the investment and borrowing powers applicable to the Fund.

Having carried out such procedures as we considered necessary to discharge our responsibilities as Trustee of the Fund, it is our opinion, based on the information available to us and the explanations provided, that, in all material respects the Fund, acting through the AFM:

- (a) has carried out the issue, sale, redemption and cancellation, and calculation of the price of the Fund's units and the application of the Fund's income in accordance with the Regulations and the Scheme documents of the Fund; and
- (b) has observed the investment and borrowing powers and restrictions applicable to the Fund in accordance with the Regulations and the Scheme documents of the Fund.

The Bank of New York Mellon

Independent Auditor's Report to the Unitholders of BlackRock Global Unconstrained Equity Fund (UK)

Opinion

We have audited the financial statements of BlackRock Global Unconstrained Equity Fund (UK) ("the Fund") for the year ended 28 February 2022, which comprise the Statement of Total Return, the Statement of Change in Net Assets Attributable to Unitholders, the Balance Sheet, the related notes and the Distribution Tables, the Financial Instruments and Risks Disclosures and the accounting policies of the Fund, which include a summary of significant accounting policies. The financial reporting framework that has been applied in their preparation is applicable law and United Kingdom Accounting Standards, FRS102 'The Financial Reporting Standard applicable to the UK and Republic of Ireland' (United Kingdom Generally Accepted Accounting Practice).

In our opinion, the financial statements:

- give a true and fair view of the financial position of the Fund as at 28 February 2022 and of the net expense and the net capital gains on the scheme property of the Fund for the year then ended; and
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report below. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the Financial Reporting Council's (the "FRC") Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

In auditing the financial statements of the Fund, we have concluded that the Manager's use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Fund's ability to continue as a going concern for a period assessed by the Manager, which is at least twelve months from when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the Manager with respect to going concern are described in the relevant sections of this report. However, because not all future events or conditions can be predicted, this statement is not a guarantee as to the Fund's ability to continue as a going concern.

Other information

The other information comprises the information included in the Annual Report other than the financial statements and our audit report thereon. The Manager is responsible for the other information contained in the Annual Report.

Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our audit report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether this gives rise to a material misstatement in the financial statements themselves. If, based on the work we have performed, we conclude that there is a material misstatement of the other information, we are required to report that fact.

We have nothing to report in this regard.

Opinions on other matters prescribed by the rules of the Collective Investment Schemes Sourcebook of the Financial Conduct Authority (the "FCA")

In our opinion:

- the financial statements have been properly prepared in accordance with the Statement of Recommended Practice relating to Authorised Funds, the rules of the Collective Investment Schemes Sourcebook of the FCA and the Trust Deed; and
- there is nothing to indicate that adequate accounting records have not been kept or that the financial statements are not in agreement with those records; and
- the information given in the Manager's report for the financial year for which the financial statements are prepared is consistent with the financial statements.

Matters on which we are required to report by exception

We have nothing to report in respect of the following matter in relation to which the Collective Investment Schemes Sourcebook of the FCA requires us to report to you if, in our opinion:

- we have not received all the information and explanations which, to the best of our knowledge and belief, are necessary for the purposes of our audit.

Responsibilities of the Manager

As explained more fully in the Manager's responsibilities statement set out on page 36, the Manager is responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the Manager determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Manager is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Manager either intends to wind up or terminate the Fund or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Explanation as to what extent the audit was considered capable of detecting irregularities, including fraud

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect irregularities, including fraud. The risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery or intentional misrepresentations, or through collusion. The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below. However, the primary responsibility for the prevention and detection of fraud rests with both those charged with governance of the entity and management.

Our approach was as follows:

- We obtained an understanding of the legal and regulatory frameworks that are applicable to the Fund and determined that the most significant are United Kingdom Generally Accepted Accounting Practice (UK GAAP), Investment Management Association's Statement of Recommended Practice (IMA SORP), the FCA Collective Investment Schemes Sourcebook, the Trust Deed and the Prospectus.
- We understood how the Fund is complying with those frameworks through discussions with the Manager and the Fund's administrators and a review of the Fund's documented policies and procedures.
- We assessed the susceptibility of the Fund's financial statements to material misstatement, including how fraud might occur by considering the risk of management override, specifically management's propensity to influence revenue and amounts available for distribution. We identified a fraud risk with respect to the incomplete or inaccurate income recognition through incorrect classification of special dividends and the resulting impact to amounts available for distribution. We tested appropriateness of management's classification of material special dividends as either a capital or revenue return and incorporated unpredictability into the nature, timing and extent of our testing.
- Based on this understanding we designed our audit procedures to identify non-compliance with such laws and regulations. Our procedures involved review of the reporting to the Manager with respect to the application of the documented policies and procedures and review of the financial statements to test compliance with the reporting requirements of the Fund.
- Due to the regulated nature of the Fund, the Statutory Auditor considered the experience and expertise of the engagement team to ensure that the team had the appropriate competence and capabilities including specialists where necessary to identify non-compliance with the applicable laws and regulations.

A further description of our responsibilities for the audit of the financial statements is located on the Financial Reporting Council's website at <https://www.frc.org.uk/auditorsresponsibilities>. This description forms part of our auditor's report.

Use of our report

This report is made solely to the Fund's Unitholders, as a body, pursuant to Paragraph 4.5.12 of the rules of the Collective Investment Schemes Sourcebook of the FCA. Our audit work has been undertaken so that we might state to the Fund's Unitholders those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Fund and the Fund's Unitholders as a body, for our audit work, for this report, or for the opinions we have formed.
