**This document is marketing material.** For Investors in the UK. Investors should read the KIID/PRIIPs document and prospectus prior to investing, and should refer to the prospectus for the funds full list of risks.

#### FUND OVERVIEW

The Fund aims to achieve a return on your investment (generated through an increase in the value of the assets held by the Fund and/or income received from those assets) for investors planning to retire between 2022 and 2024 by investing primarily in other funds and changing its asset mix over time, whilst incorporating certain environmental, social and governance (ESG) commitments (as described below). The Fund intends to gain indirect exposure globally to equity securities (e.g. shares), fixed income (FI) securities (such as bonds) and alternative assets (such as property and commodities) by investing at least 70% of its total assets in other funds. The Fund may also invest directly in equity securities, FI securities, MMLs (i.e. debt securities with short-term maturities), deposits and cash. The Fund's investment manager (IM) may use derivatives (i.e. investments the prices of which are based on one or more underlying assets) to help achieve the Fund's investment objective or for efficient portfolio management purposes (EPM) (i.e. to reduce risk or costs within the Fund's portfolio or generate additional income. The Fund may engage in short-term secured lending of its investments to certain eligible third parties to generate additional income and off-set costs.

#### RISK INDICATOR

##### Lower Risk

Potentially Lower Rewards

##### Higher Risk

Potentially Higher Rewards

**CAPITAL AT RISK:** The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

**KEY RISKS:** Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk. The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.

Derivatives may be highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains, resulting in greater fluctuations in the value of the Fund. The impact to the Fund can be greater where derivatives are used in an extensive or complex way.

The Fund may seek to exclude Funds which are not subject to ESG-related requirements. Investors should therefore make a personal ethical assessment of the Fund's ESG screening prior to investing in the Fund. Such ESG screening may adversely affect the value of the Fund's investments compared to a fund without such screening.

#### GLOSSARY

**Average Market Cap:** The average market capitalization of a fund's equity portfolio gives you a measure of the size of the companies in which the fund invests. Market capitalization is calculated by multiplying the number of a company's shares outstanding by its price per share.

**Price to Book Ratio:** represents the ratio of the current closing price of the share to the latest quarter's book value per share.

**Modified Duration:** A measure of price sensitivity of a bond to changes in interest rates. The Modified Duration of the fund is calculated as the average of the underlying bonds' modified duration values, adjusted to take account of their relative weight (size) within the fund.

**Price to Earnings:** A valuation ratio of a company's current share price compared to its per-share earnings in the current forecast year, calculated as current share price divided by current earnings per share.

#### IMPORTANT INFORMATION:

\*\*The Morningstar Medalist Rating™ is the summary expression of Morningstar's forward-looking analysis of investment strategies using a rating scale of Gold, Silver, Bronze, Neutral, and Negative. The ratings indicate which investments Morningstar believes are likely to outperform a relevant index or peer group average on a risk-adjusted basis over time. Analysts assign three pillar ratings (People, Parent and Process) based on their qualitative assessment, subject to the oversight of the Analyst Rating Committee, and monitor and reevaluate them at least every 14 months. For more detailed information about these ratings and methodology, please go to [global.morningstar.com/managerdisclosures](http://global.morningstar.com/managerdisclosures). The ratings are not statements of fact, nor credit or risk ratings. The rating (i) should not be used as the sole basis in evaluating an investment product, (ii) involves unknown risks which may cause expectations not to occur or to differ from what was expected, (iii) are not guaranteed to be based on complete or accurate assumptions, (iv) involve the risk that the return target will not be met due to unforeseen changes in management, technology, economic development, interest rate development, operating and/or material costs, competitive pressure, supervisory law, exchange and tax rates, and/or changes in political and social conditions, and (v) should not be considered an offer or solicitation to buy or sell the investment product.
