### BlackRock Authorised Contractual Scheme I

Unless otherwise stated, Performance, Portfolio Breakdowns and Net Asset information as at: 30-Nov-2024. All other data as at 09-Dec-2024.

This document is marketing material. For Investors in the UK. Investors should read the KIID/PRIPs document and prospectus prior to investing, and should refer to the prospectus for the funds full list of risks.

#### FUND OVERVIEW

- The Fund is a sub-fund of BlackRock Authorised Contractual Scheme I taking the form of a Co-ownership Scheme. As a consequence of this, the Fund may be treated as tax transparent for the purpose of income and/or capital gains by relevant taxing jurisdictions. Each investor should take appropriate professional advice as to the tax treatment of their investment in the Fund. Investors in the Fund must be Eligible Investors as defined in the Fund’s prospectus and must have completed all relevant documentation prior to the purchase of units in the Fund.
- The Fund aims to provide a return on your investment (generated through an increase to the value of the assets held by the Fund and/or income received from those assets) by tracking closely the performance of the MSCI World Select Multiple Factor ESG Low Carbon Target Index, the Fund’s benchmark index (the “Benchmark Index”). The Fund invests in equity securities (e.g. shares) of companies that make up the Benchmark Index. Derivatives may also be used for investment and efficient portfolio management purposes (i.e. the price of an investment is based on one or more underlying asset). The use of derivatives is expected to be limited.
- The Benchmark Index is constructed using individual equity security exposures to the target factors along with specific environmental, social and governance (“ESG”) score and carbon exposure criteria. The Benchmark Index aims to maximise exposure to the target “style” factors (as described in the paragraph below) while improving the ESG profile and reducing the carbon exposure (carbon emissions relative to sales and potential carbon emissions per dollar of market capitalisation) relative to that of the MSCI World Index (the “Parent Index”). The Fund may obtain indirect exposure (through including but not limited to, derivatives and units in collective investment schemes) to securities considered not to satisfy the ESG criteria.

#### RISK INDICATOR

##### Lower Risk

Potentially Lower Rewards

##### Higher Risk

Potentially Higher Rewards

**CAPITAL AT RISK:** The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

#### KEY RISKS:

- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Index Methodology Risk: Although the Index was created to select securities within the Parent Index which have a relatively higher exposure to four investment style factors, there is no guarantee this objective will be achieved.
- The benchmark index only excludes companies engaging in certain activities inconsistent with ESG criteria if such activities exceed the thresholds determined by the index provider. Investors should therefore make a personal ethical assessment of the benchmark index’s ESG screening prior to investing in the Fund. Such ESG screening may adversely affect the value of the Fund’s investments compared to a fund without such screening.
- Multi-Factor Focus Risk: Indices with a multi-factor focus are less diversified than their parent index because they focus on four investment style factors rather than a broader market exposure. Therefore they will be more exposed to factor related market movements. Investors should consider this Fund as part of a broader investment strategy.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Tax treatment of Fund: The tax treatment of this fund structure is so far untested which could lead to adverse tax consequences for the investor. Changes to the tax status of the Fund could lead to taxation being due.
