This document is marketing material. For Investors in the UK. Investors should read the KIID/PRIIPs document and prospectus prior to investing, and should refer to the prospectus for the funds full list of risks.

FUND OVERVIEW

- The Fund aims to provide a return on your investment, with a cautious level of risk, through a combination of capital growth and income on the Fund's assets in a manner consistent with the principles of environmental, social and governance "ESG" focused investing.
- The Fund invests globally at least 80% of its total assets in units of funds qualifying as Article 8 or 9 of the SFDR Regulation which pursue a positive ESG objective or outcome, and do not adopt ESG exclusionary screens solely as their ESG policy, or, in the case of government bond exposures, track benchmark indices incorporating ESG requirements or comprised of bonds issued by governments that have an ESG sovereign rating of at least BB (see prospectus for further details)
- Whilst the Fund's exposures may vary over time, it is intended that its direct and indirect exposure to equities will be targeted at 20% of NAV, and its direct and indirect exposure to fixed income (FI) securities will be targeted at 80% of NAV.

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
- The value of equities and equity-related securities can be affected by daily stock market movements, political factors, economic news, company earnings and significant corporate events.
- The Fund may seek to exclude Funds which are not subject to ESG-related requirements. Such ESG screening may reduce the potential investment universe and this may adversely affect the value of the Fund's investments compared to a fund without such screening.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
- Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

GLOSSARY

SFDR Classification: Article 8: Products that promote environmental or social characteristics and promote good governance practices.

Article 9: Products that have sustainable investments as an objective and follow good governance practices. **Other:** Products that do not meet the criteria to be classified as Article 8 or 9.

Modified Duration: A measure of price sensitivity of a bond to changes in interest rates. The Modified Duration of the fund is calculated as the average of the underlying bonds' modified duration values, adjusted to take account of their relative weight (size) within the fund.

Price to Earnings: A valuation ratio of a company's current share price compared to its per-share earnings in the current forecast year, calculated as current share price divided by current earnings per share.

Average Market Cap: The average market capitalization of a fund's equity portfolio gives you a measure of the size of the companies in which the fund invests. Market capitalization is calculated by multiplying the number of a company's shares outstanding by its price per share.

Price to Book Ratio: represents the ratio of the current closing price of the share to the latest quarter's book value per share.
