

# BGF Impact Bond Fund

## Class I2 Euro

### BlackRock Global Funds

Unless otherwise stated, Performance, Portfolio Breakdowns and Net Asset information as at: 28-Feb-2025. All other data as at 10-Mar-2025.

This document is marketing material. For Investors in the UK. Investors should read the KIID/PRIIPs document and prospectus prior to investing, and should refer to the prospectus for the funds full list of risks.

#### FUND OVERVIEW

- The Fund aims to provide a return on your investment through a combination of capital growth and income on the Fund's assets over the long term (at least five consecutive years) by investing in a global portfolio of fixed income instruments which have a positive social and/or environmental impact.
- The Fund invests globally at least 80% of its total assets in "impact" investments which are those made with the intention to generate positive, measurable social and/or environmental impact alongside a financial return. More than 90% of the issuers of securities the Fund invests in are environmental, social and governance (ESG) rated or have been analysed for ESG. The Fund may invest in the full spectrum of available fixed income securities, including non-investment grade. Currency exposure is flexibly managed.
- The IA will also employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the IA.

#### RISK INDICATOR

##### Lower Risk

Potentially Lower Rewards

##### Higher Risk

Potentially Higher Rewards

**CAPITAL AT RISK:** The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

#### KEY RISKS:

- Changes to interest rates, credit risk and/or issuer defaults will have a significant impact on the performance of fixed income securities. Non-investment grade fixed income securities can be more sensitive to changes in these risks than higher rated fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
- Derivatives may be highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains, resulting in greater fluctuations in the value of the Fund. The impact to the Fund can be greater where derivatives are used in an extensive or complex way.
- The Fund seeks to exclude companies engaging in certain activities inconsistent with ESG criteria. Such ESG screening may reduce the potential investment universe and this may adversely affect the value of the Fund's investments compared to a fund without such screening.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
- Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

#### KEY FACTS

**Constraint<sup>††</sup>:** ICE Green, Social & Sustainable Bond Index, EUR Hedged Index (EUR)

**Asset Class :** Fixed Income

**GLOSSARY**

**SFDR Classification: Article 8:** Products that promote environmental or social characteristics and promote good governance practices.

**Article 9:** Products that have sustainable investments as an objective and follow good governance practices. **Other:** Products that do not meet the criteria to be classified as Article 8 or 9.

**Yield to Maturity:** Yield to Maturity (YTM) is the discount rate that equates the present value of bond's cash flows with its market price (including accrued interest). The fund YTM is the weighted average of fund's individual bond holding YTM's based upon Net Asset Value ('NAV'). The measure does not include fees and expenses. For callable bonds, YTM is the Yield-to-Worst.

**Effective Duration:** Effective duration is a measure of a fund's interest-rate sensitivity. Put simply, the longer a fund's duration, the more sensitive the fund is to shifts in interest rates. So a fund with a duration of 10 years is twice as volatile as a fund with a five-year duration.

**IMPORTANT INFORMATION:**

**In the UK and Non-European Economic Area (EEA) countries:** this is issued by BlackRock Investment Management (UK) Limited, authorised and regulated by the Financial Conduct Authority. Registered office: 12 Throgmorton Avenue, London, EC2N 2DL. Tel: + 44 (0)20 7743 3000. Registered in England and Wales No. 02020394. For your protection telephone calls are usually recorded.
