

BGF Multi-Theme Equity Fund

Class A2 Euro

BlackRock Global Funds

Unless otherwise stated, Performance, Portfolio Breakdowns and Net Asset information as at: 31-Dec-2024. All other data as at 10-Jan-2025.

This document is marketing material. For Investors in the UK. Investors should read the KIID/PRIIPs document and prospectus prior to investing, and should refer to the prospectus for the funds full list of risks.

FUND OVERVIEW

- The Fund seeks to achieve capital growth over the long term (at least five consecutive years) in a manner consistent with the principles of environmental, social and governance (ESG) investing.
- The Fund will seek to achieve its investment objective by, in respect of at least 80% of its assets, obtaining exposure to equity securities (e.g. shares) indirectly, via its investment in other funds, including iShares Exchange Traded Funds and other funds managed by the BlackRock Group, including other funds within BlackRock Global Funds, on the terms set out in the prospectus, and by investing directly in equity securities and financial derivative instruments (FDIs) i.e. investments the prices of which are based on one or more underlying assets. The Fund may also invest in cash and money market instruments (MMIs).
- The Fund's total assets will be invested in accordance with its ESG Policy as disclosed in the prospectus. The Investment Adviser (IA) also intends the Fund to deliver exposure to sustainable investments that is higher than the MSCI All Countries World Index (Index).

RISK INDICATOR

Lower Risk

Potentially Lower Rewards

Higher Risk

Potentially Higher Rewards

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Investments in the technology securities are subject to absence or loss of intellectual property protections, rapid changes in technology, government regulation and competition.
- Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfer of assets, failed/delayed delivery of securities or payments to the Fund and sustainability-related risks.
- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Investments in the new energy securities are subject to environmental or sustainability concerns, taxes, government regulation, price and supply fluctuations.
- The Fund may seek to exclude Funds which are not subject to ESG-related requirements. Investors should therefore make a personal ethical assessment of the Fund's ESG screening prior to investing in the Fund. Such ESG screening may adversely affect the value of the Fund's investments compared to a fund without such screening.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.
