

BGF Sustainable Global Dynamic Equity Fund**Class A2 Euro****BlackRock Global Funds**

Unless otherwise stated, Performance, Portfolio Breakdowns and Net Asset information as at: 31-Dec-2024. All other data as at 15-Jan-2025.

This document is marketing material. For Investors in the UK. Investors should read the KIID/PRIIPs document and prospectus prior to investing, and should refer to the prospectus for the funds full list of risks.

FUND OVERVIEW

- The Fund aims to maximise the return on your investment through a combination of capital growth and income on the Fund's assets and invest in a manner consistent with the principles of environmental, social and governance (ESG) investing.
- The Fund invests globally at least 70% of its total assets in the equity securities (e.g. shares) of companies.
- The Fund will generally aim to invest in securities of companies that are undervalued, where in the investment adviser's (IA) opinion, their market price does not reflect their underlying worth.

RISK INDICATOR**Lower Risk**

Potentially Lower Rewards

Higher Risk

Potentially Higher Rewards

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfer of assets, failed/delayed delivery of securities or payments to the Fund and sustainability-related risks.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Derivatives may be highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains, resulting in greater fluctuations in the value of the Fund. The impact to the Fund can be greater where derivatives are used in an extensive or complex way.
- The Fund seeks to exclude companies engaging in certain activities inconsistent with ESG criteria. Such ESG screening may reduce the potential investment universe and this may adversely affect the value of the Fund's investments compared to a fund without such screening.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

KEY FACTS

Constraint¹: MSCI All Country World Net TR Index - in EUR

Comparator²: FTSE World Index

Asset Class: Equity

Fund Launch Date: 31-Jul-2006

GLOSSARY

SFDR Classification: Article 8: Products that promote environmental or social characteristics and promote good governance practices.

Article 9: Products that have sustainable investments as an objective and follow good governance practices. **Other:** Products that do not meet the criteria to be classified as Article 8 or 9.

IMPORTANT INFORMATION:

¹The Reference Benchmark is an unmanaged weighted index comprised as follows: 60% of the S&P 500 Index and 40% FTSE World (ex US) Index. ²% of Net Assets represents the Fund's exposure based on the economic value of securities; adjusted for futures, options and swaps (except with respect to fixed income securities), and convertible bonds. On a market value basis the Fund is comprised of 96% equities, 0% fixed income, 1% Commodities, 3% cash equivalents. The Funds will not use borrowing to purchase additional investments but may be expected, via derivative positions, to obtain market exposure in excess of net asset value. Allocations subject to change. Numbers may not sum to 100% due to rounding. Risk statistics are based on monthly fund returns for the 3-year period. Benchmark risk measures are calculated in relation to the FTSE World Index. Standard Deviation measures the volatility of the fund's returns. Higher deviation represents higher volatility. Sharpe Ratio uses a fund's standard deviation and its excess return (difference between the fund's return and the risk-free return of 90-day Treasury Bills) to determine reward per unit of risk.

In the UK and Non-European Economic Area (EEA) countries: this is issued by BlackRock Investment Management (UK) Limited, authorised and regulated by the Financial Conduct Authority. Registered office: 12 Throgmorton Avenue, London, EC2N 2DL. Tel: + 44 (0)20 7743 3000. Registered in England and Wales No. 02020394. For your protection telephone calls are usually recorded. Please refer to the Financial Conduct Authority website for a list of authorised activities conducted by BlackRock.
