FUND OVERVIEW

- The Fund aims to provide a return on your investment (net of fees), generated through an increase in the value of the assets held by the Fund and/or income received from those assets by tracking closely the performance of the FTSE All Share Index ("Index").
- The Fund aims to invest directly in the equity (e.g. shares) of companies in the Index and at times invest indirectly via equity-related securities (i.e. other investments whose value is related to equities) that, as far as possible and practicable, make up the Index and, when determined appropriate directly in other funds, money market instruments (i.e. debt securities with short-term maturities) and cash and near cash.
- The investment manager (IM) may use derivatives (i.e. investments the prices of which are based on one or more underlying assets) for investment purposes in order to seek to achieve the Fund's investment objective and for efficient portfolio management purposes in order to reduce risk within the Fund, reduce investment costs, or to generate additional income for the Fund. Further investments may be used (including derivatives) to protect the value of the Fund, in whole or in part, from changes in currency exchange rates against its base currency.

- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Analysts assign three pillar ratings (People, Parent and Process) based on their qualitative assessment, subject to the oversight of the Analyst Rating Committee, and monitor and reevaluate them at least every 14 months. For more detailed information about these ratings and methodology, please go to global.morningstar.com/managerdisclosures. The ratings are not statements of fact, nor credit or risk ratings. The rating (i) should not be used as the sole basis in evaluating an investment product, (ii) involves unknown risks which may cause expectations not to occur or to differ from what was expected, (iii) are not guaranteed to be based on complete or accurate assumptions, (iv) involve the risk that the return target will not be met due to unforeseen changes in management, technology, economic development, interest rate development, operating and/or material costs, competitive pressure, supervisory law, exchange and tax rates, and/or changes in political and social conditions, and (v) should not be considered an offer or solicitation to buy or sell the investment product.
