

BlackRock Developed Markets Sustainable Equity Fund (UK)

Class D British Pound

UK Retail Funds

Unless otherwise stated, Performance, Portfolio Breakdowns and Net Asset information as at: 31-Dec-2024. All other data as at 10-Jan-2025.

This document is marketing material. For Investors in the UK. Investors should read the Key Investor Information Document and Prospectus prior to investing.

FUND OVERVIEW

- The Fund aims to provide a return on your investment (generated through an increase in the value of the assets held by the Fund and/or income received from those assets) over the medium to long term (3 to 5 or more consecutive years beginning at the point of investment) in a manner consistent with the principles of sustainable investing.
- The Fund invests globally at least 70% of its total assets in the equity securities (i.e. shares) of companies domiciled in, or whose main business is in, global developed markets. The Fund may also invest in emerging market companies.
- The Investment Manager (IM) seeks to invest in a portfolio of companies that it considers sustainable, which are identified for this purpose as being companies with strong environmental, social and governance (ESG) credentials, companies developing stronger ESG credentials and/or companies that produce, or otherwise enable, products and services that the Investment Manager considers are sustainability-focused. The ESG credentials looked for include (but are not limited to): companies with low absolute and relative resource intensity, improving resource efficiency, helping others to reduce their use of resources, commitment to high health and safety standards, commitment to human capital management, fostering sustainable relationships with suppliers and customers, strong risk mitigation, capital allocation and remuneration supportive of long-term strategy and/or thoughtful board composition as it relates to diversity and the focus of its members.

RISK INDICATOR

Lower Risk

Potentially Lower Rewards

Higher Risk

Potentially Higher Rewards

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Shares in smaller companies typically trade in less volume and experience greater price variations than larger companies.
- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- The Fund seeks to exclude companies engaging in certain activities inconsistent with ESG criteria. Investors should therefore make a personal ethical assessment of the Fund's ESG screening prior to investing in the Fund. Such ESG screening may adversely affect the value of the Fund's investments compared to a fund without such screening.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

KEY FACTS

Constraint[†]: MSCI World Index

Asset Class: Equity

Fund Launch Date: 31-Jan-2000

Share Class Launch Date: 10-Jun-2011
