This document is marketing material. For Investors in the UK. Investors should read the KIID/PRIPs document and prospectus prior to investing, and should refer to the prospectus for the funds full list of risks.

### FUND OVERVIEW

- The Fund aims to achieve a total return on your investment, through a combination of capital growth and income on the Fund's assets, in a manner consistent with the principles of sustainable investing.
- The Fund seeks to gain investment exposure to equity securities (e.g. shares) of companies in global developed markets. This is achieved by investing in equities and equity-related securities, fixed income (FI) securities (such as bonds), money market instruments (MMIs) (debt securities with short-term maturities), deposits and cash. The FI securities and MMIs may be issued by governments, government agencies, companies and supranationals (e.g. the International Bank for Reconstruction and Development) and will be investment grade (i.e. meet a specified level of credit worthiness) at the time of purchase.
- The Fund uses quantitative (i.e. mathematical or statistical) models in order to achieve a rule based approach to stock selection.

#### Higher Risk

Potentially Higher Rewards

**CAPITAL AT RISK:** The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

### KEY RISKS:

- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Factor Focus Risk: Indices with a factor focus are less diversified than their parent index because they have predominant exposure to a single factor rather than the multiple factor exposure of most indices. Therefore they will be more exposed to factor related market movements. Investors should consider this Fund as part of a broader investment strategy.
- The Fund seeks to exclude companies engaging in certain activities inconsistent with ESG criteria. Investors should therefore make a personal ethical assessment of the Fund's ESG screening prior to investing in the Fund. Such ESG screening may adversely affect the value of the Fund's investments compared to a fund without such screening.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
