Class Z2 U.S. Dollar
BlackRock Strategic Funds

Unless otherwise stated, Performance, Portfolio Breakdowns and Net Asset information as at: 31-Jul-2024. All other data as at 12-Aug-2024.

This document is marketing material. For Investors in the UK. Investors should read the KIID/PRIIPs document and prospectus prior to investing, and should refer to the prospectus for the funds full list of risks.

FUND OVERVIEW

- The Fund aims to achieve positive absolute returns through a combination of capital growth and income on your investment regardless of market conditions.
- The Fund seeks to gain at least 70% of any investment exposure to equity securities (e.g. shares) of companies domiciled in, or the main business of which is in, the Asia Pacific region, including Australia and Japan. This is achieved by investing at least 70% of its assets in equity securities and other equity-related securities. The Fund may also, when determined appropriate, invest in fixed income (FI) securities, money market instruments (MMIs) (i.e. debt securities with short-term maturities), deposits and cash
- The equity-related securities include financial derivative instruments (FDIs) (i.e. investments whose prices are based on one or more underlying assets).

RISK INDICATOR

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfer of assets, failed/delayed delivery of securities or payments to the Fund and sustainability-related risks.
- Currency Risk: The Fund invests in other currencies. Changes in exchange rates will therefore affect the value of the investment.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Due to its investment strategy an 'Absolute Return' fund may not move in line with market trends or fully benefit from a positive market environment.
- Derivatives may be highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains, resulting in greater fluctuations in the value of the Fund. The impact to the Fund can be greater where derivatives are used in an extensive or complex way.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

KEY FACTS

Comparator[†]: 3 Month SOFR Compounded in Arrears plus 26.1 basis point spread

Asset Class : Equity

Fund Launch Date : 31-Aug-2016
