

# BSF BlackRock Systematic Asia Pacific Equity Absolute Return Fund Class A2 Hedged Singapore Dollar BlackRock Strategic Funds

Unless otherwise stated, Performance, Portfolio Breakdowns and Net Asset information as at: 30-Nov-2024. All other data as at 10-Dec-2024.

This document is marketing material. For Investors in the UK. Investors should read the KIID/PRIPs document and prospectus prior to investing, and should refer to the prospectus for the funds full list of risks.

## FUND OVERVIEW

- The Fund aims to achieve a positive absolute return through a combination of capital growth and income on your investment regardless of market conditions in a manner consistent with the principles of environmental, social and governance (ESG) investing.
- The Fund seeks to gain at least 70% of any investment exposure to equity securities (e.g. shares) of companies incorporated or listed in the Asia Pacific region. This is achieved by investing at least 70% of its assets in equity securities, equity-related securities and, when determined appropriate fixed income (FI) securities (such as bonds), money market instruments (MMIs) (i.e. debt securities with short-term maturities), deposits and cash.
- The Fund will take into account ESG criteria when selecting investments as disclosed in the prospectus. For further details please refer to the ESG Policy section of the Fund as set out in the prospectus and at the BlackRock website at [www.blackrock.com/baselinescreens](http://www.blackrock.com/baselinescreens)

## RISK INDICATOR

### Lower Risk

Potentially Lower Rewards

### Higher Risk

Potentially Higher Rewards

**CAPITAL AT RISK:** The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

## KEY RISKS:

- Shares in smaller companies typically trade in less volume and experience greater price variations than larger companies.
- Equities and equity-related securities can be affected by daily stock market movements. Fixed Income securities can be affected by changes to interest rates, credit risk and potential or actual credit rating downgrades. FDIs are highly sensitive to changes in the value of the asset they are based on. The impact is greater where FDIs are used in an extensive or complex way.
- 'Absolute Return' funds may not move in line with market trends or fully benefit from a positive market environment. Emerging markets are generally more sensitive to economic and political conditions than developed markets.
- The Fund seeks to exclude companies engaging in certain activities inconsistent with ESG criteria. Such ESG screening may reduce the potential investment universe and this may adversely affect the value of the Fund's investments compared to a fund without such screening
- The Fund uses quantitative models in order to make investment decisions. As market dynamics shift over time, a quantitative model may become less efficient or may even present deficiencies under certain market conditions.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
- Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

## KEY FACTS

**Comparator<sup>†</sup>:** 3 Month SOFR Compounded in Arrears plus 26.1 basis point spread

**Asset Class :** Equity

**Fund Launch Date :** 22-Feb-2017
