

# BSF Global Real Asset Securities Fund

## Class S3 Hedged Singapore Dollar

### BlackRock Strategic Funds

Unless otherwise stated, Performance, Portfolio Breakdowns and Net Asset information as at: 28-Feb-2025. All other data as at 10-Mar-2025.

This document is marketing material. For Investors in the UK. Investors should read the KIID/PRIIPs document and prospectus prior to investing, and should refer to the prospectus for the funds full list of risks.

#### FUND OVERVIEW

- The Fund aims to achieve a return on your investment through a combination of capital growth and income on the Fund's assets.
- The Fund will seek to achieve this by investing globally at least 70% of its total assets in the equity securities and equity-related securities of companies, whose main business is in the real estate and infrastructure sectors. The equity-related securities may include financial derivative instruments (FDIs) (i.e. contracts the value of which is based on one or more underlying assets).
- The Fund's total assets will be invested in accordance with its environmental, social and governance (ESG) Policy as disclosed in the prospectus. For further details please refer to the ESG Policy and Benchmark use section of the Fund as set out in the prospectus.

#### RISK INDICATOR

##### Lower Risk

Potentially Lower Rewards

##### Higher Risk

Potentially Higher Rewards

**CAPITAL AT RISK:** The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

#### KEY RISKS:

- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
- The value of equities and equity-related securities can be affected by daily stock market movements, political factors, economic news, company earnings and significant corporate events.
- Investments in property securities can be affected by the general performance of stock markets and the property sector. In particular, changing interest rates can affect the value of properties in which a property company invests.
- Derivatives may be highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains, resulting in greater fluctuations in the value of the Fund. The impact to the Fund can be greater where derivatives are used in an extensive or complex way.
- Investments in infrastructure securities are subject to environmental or sustainability concerns, taxes, government regulation, price, supply and competition.
- Risk to Capital Growth: The Fund may pursue investment strategies using derivatives in order to generate income which may have the effect of reducing capital and the potential for long-term capital growth as well as increasing any capital losses.
- The Fund seeks to exclude companies engaging in certain activities inconsistent with ESG criteria. Such ESG screening may reduce the potential investment universe and this may adversely affect the value of the Fund's investments compared to a fund without such screening.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
