CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- The value of equities and equity-related securities can be affected by daily stock market movements, political factors, economic news, company earnings and significant corporate events.
- Derivatives may be highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains, resulting in greater fluctuations in the value of the Fund. The impact to the Fund can be greater where derivatives are used in an extensive or complex way.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Share Class to financial loss.
- The Fund's ability to track the benchmark's performance is reliant on the counterparties to continuously deliver the performance of the benchmark in line with the swap agreements (i.e. counterparty risk) and would also be affected by any spread between the pricing of the swaps and the pricing of the benchmark. If any swap counterparty fails to provide sufficient assets as security for amounts owed to the Fund, there might be an increased counterparty risk exposure at a given time.
