Unless otherwise stated, Performance, Portfolio Breakdowns and Net Asset information as at: 31-Dec-2024. All other data as at 16-Jan-2025.

This document is marketing material. For Investors in the UK. Investors should read the KIID/PRIPs document and prospectus prior to investing, and should refer to the prospectus for the funds full list of risks.

FUND OVERVIEW

- The Fund aims to achieve a return on your investment, through a combination of capital growth and income on the Fund's assets, which reflects the return of the global emerging equity markets, excluding companies which do not meet certain environmental, social and governance ("ESG") related criteria.
- The Fund is passively managed and aims to invest, in equity securities (e.g. shares) of companies in global emerging markets that make up the MSCI Emerging Markets ex Select Controversies Index (the Index).
- The Index measures the performance of a subset of equity securities within the MSCI Emerging Markets Index (Parent Index). Further details regarding the Index (including the methodology and its constituents) are available on the index provider's website at <https://www.msci.com/index-methodology>

RISK INDICATOR

Lower Risk

Potentially Lower Rewards

Higher Risk

Potentially Higher Rewards

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfer of assets, failed/delayed delivery of securities or payments to the Fund and sustainability-related risks.
- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- The benchmark index only excludes companies engaging in certain activities inconsistent with ESG criteria if such activities exceed the thresholds determined by the index provider. Such ESG screening may reduce the potential investment universe and this may adversely affect the value of the Fund's investments compared to a fund without such screening.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.
