FUND OVERVIEW

- The Fund aims to achieve a return on your investment, through a combination of capital growth and income on the Fund's assets, which reflects the return of the MSCI Emerging Markets Index, the Fund's benchmark index. The Fund is passively managed and will invest in a portfolio of equity securities that as far as possible and practicable consist of the component securities of the Fund's benchmark index in similar proportions to their weightings in the Fund's benchmark Index
- The Fund aims to replicate the composition of the Fund's benchmark index; however it may not always be possible or practicable to replicate every security in their exact weighting as in the Fund's benchmark index.
- The benchmark index measures the performance of equity securities issued by large and mid capitalisation companies in emerging market countries globally and is a free float-adjusted market capitalisation weighted index. Free float-adjusted means that only shares readily available in the market rather than all of a company's issued shares are used in calculating the benchmark index. Market capitalisation is the share price of the company multiplied by the number of shares issued.

The ratings indicate which investments Morningstar believes are likely to outperform a relevant index or peer group average on a risk-adjusted basis over time. Analysts assign three pillar ratings (People, Parent and Process) based on their qualitative assessment, subject to the oversight of the Analyst Rating Committee, and monitor and reevaluate them at least every 14 months. For more detailed information about these ratings and methodology, please go to global.morningstar.com/managerdisclosures. The ratings are not statements of fact, nor credit or risk ratings.
