FUND OVERVIEW

- The Fund aims to achieve a return on your investment, through a combination of capital growth and income on the Fund's assets, which reflects the return of the J.P.Morgan Emerging Markets Bond Index Global Diversified, the Fund's benchmark index.
- The Fund is passively managed and aims to invest as far as possible and practicable in the fixed income (FI) securities (such as bonds) that make up the Index. Index and comply with its credit rating requirements. If the credit ratings of the FI securities are downgraded, the Fund may continue to hold them until they cease to form part of the Index and it is practicable to sell them.
- The benchmark index measures the performance of US Dollar denominated bonds issued by governments and government agencies that are 100% guaranteed or owned by the governments and government agencies of emerging markets countries.

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Changes to interest rates, credit risk and/or issuer defaults will have a significant impact on the performance of fixed income securities. Non-investment grade fixed income securities can be more sensitive to changes in these risks than higher rated fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
- Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfer of assets, failed/delayed delivery of securities or payments to the Fund and sustainability-related risks.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
- Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

GLOSSARY

SFDR Classification: Article 8: Products that promote environmental or social characteristics and promote good governance practices.

Article 9: Products that have sustainable investments as an objective and follow good governance practices. **Other:** Products that do not meet the criteria to be classified as Article 8 or 9.

Yield to Maturity: Yield to Maturity (YTM) is the discount rate that equates the present value of bond's cash flows with its market price (including accrued interest). The fund YTM is the weighted average of fund's individual bond holding YTM's based upon Net Asset Value ('NAV'). The measure does not include fees and expenses. For callable bonds, YTM is the Yield-to-Worst.

Effective Duration: Effective duration is a measure of a fund's interest-rate sensitivity. Put simply, the longer a fund's duration, the more sensitive the fund is to shifts in interest rates. So a fund with a duration of 10 years is twice as volatile as a fund with a five-year duration.

IMPORTANT INFORMATION:

'Negative weightings may result from specific circumstances (including timing differences between trade and settlement dates of securities purchased by the funds) and/or the use of certain financial instruments, including derivatives, which may be used to gain or reduce market exposure and/or risk management. Allocations are subject to change

The Morningstar Medalist Rating™ is the summary expression of Morningstar's forward-looking analysis of investment strategies using a rating scale of Gold, Silver, Bronze, Neutral, and Negative. The ratings indicate which investments Morningstar believes are likely to outperform a relevant index or peer group average on a risk-adjusted basis over time. Analysts assign three pillar ratings (People, Parent and Process) based on their qualitative assessment, subject to the oversight of the Analyst Rating Committee, and monitor and reevaluate them at least every 14 months. For more detailed information about these ratings and methodology, please go to global.morningstar.com/managerdisclosures. The ratings are not statements of fact, nor credit or risk ratings. The rating (i) should not be used as the sole basis in evaluating an investment product, (ii) involves unknown risks which may cause expectations not to occur or to differ from what was expected, (iii) are not guaranteed to be based on complete or accurate assumptions, (iv) involve the risk that the return target will not be met due to unforeseen changes in management, technology, economic development, interest rate development, operating and/or material costs, competitive pressure, supervisory law, exchange and tax rates, and/or changes in political and social conditions, and (v) should not be considered an offer or solicitation to buy or sell the investment product.

BlackRock Global Index Funds (BGIF): This document is marketing material. BlackRock Global Index Funds (BGIF) is an open ended variable capital investment company established under the laws of the Grand Duchy of Luxembourg which is available for sale in certain jurisdictions only. BGIF is not available for sale in the U.S. or to U.S. persons. Product information concerning BGIF should not be published in the U.S. BlackRock Investment Management (UK) Limited is the Principal Distributor of BGIF and may terminate marketing at any time. In the UK, subscriptions in BGIF are valid only if made on the basis of the current Prospectus, the most recent financial reports and the Key Investor Information Document, and in EEA and Switzerland subscriptions in BGIF are valid only if made on the basis of the current Prospectus, the most recent financial reports and the Packaged Retail and Insurance-based Investment Products Key Information Document (PRIIPs KID) which are available in registered jurisdictions and local language where they are registered, these can be found at www.blackrock.com on the relevant product pages. These may not be available to investors in certain jurisdictions where the Fund in question has not been authorised. Investors should understand all characteristics of the funds objective before investing. The BGIF range employs a swing-pricing methodology in order to protect existing investors from the dilution impact of trading costs caused by shareholder activity in the funds. The published Net Asset Value (NAV) may include a swing-price adjustment which, along with market movements between Fund valuation and market close, has the potential to distort apparent performance and tracking error. BlackRock may terminate marketing at any time.
