FUND OVERVIEW

- The Fund aims to achieve a total return on your investment, through a combination of capital growth and income, which reflects the return of the Bloomberg Global Aggregate Securitized ex ABS ex CMBS Index, the Fund's Benchmark index.
- The Fund invests predominantly in fixed income securities (such as bonds issued by covered securitised fixed-rate bonds and mortgaged backed securities ("MBS")) that make up the Fund's Benchmark index.
- The Fund's benchmark index measures the performance of a sub-set of multi-currency denominated, investment grade, securitized, fixed income securities, which the index provider has determined form part of the Bloomberg Global Aggregate Index (the parent index) including, covered bonds and MBS Pass-Through securities. The securitised sector is designed to capture fixed income instruments whose payments are backed or directly derived from a pool of assets. Underlying collateral for securitised bonds includes residential mortgages, public sector loans, commercial real estate or other assets.

Potentially Higher Rewards

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
- Mortgage backed securities are subject to the same risks described for fixed income securities. These instruments may be subject to 'Liquidity Risk', have high levels of borrowing and may not fully reflect the value of underlying assets.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
- Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

GLOSSARY

SFDR Classification: Article 8: Products that promote environmental or social characteristics and promote good governance practices.

Article 9: Products that have sustainable investments as an objective and follow good governance practices. **Other:** Products that do not meet the criteria to be classified as Article 8 or 9.

Yield to Maturity: Yield to Maturity (YTM) is the discount rate that equates the present value of bond's cash flows with its market price (including accrued interest). The fund YTM is the weighted average of fund's individual bond holding YTM's based upon Net Asset Value ('NAV'). The measure does not include fees and expenses. For callable bonds, YTM is the Yield-to-Worst.

Effective Duration: Effective duration is a measure of a fund's interest-rate sensitivity. Put simply, the longer a fund's duration, the more sensitive the fund is to shifts in interest rates. So a fund with a duration of 10 years is twice as volatile as a fund with a five-year duration.
