FUND OVERVIEW

- The Fund aims to achieve a return on your investment, through a combination of capital growth and income on the Fund's assets, which reflects the return of the MSCI Pacific ex Japan Index, the Fund's benchmark index.
- The Fund is passively managed and aims to invest as far as possible and practicable in the equity securities (e.g. shares) that make up the Index.
- The benchmark index measures the performance of equity securities issued by large and mid capitalisation companies across developed markets in the Pacific region (excluding Japan) and is a free float-adjusted market capitalisation weighted index. Free float-adjusted means that only shares readily available in the market rather than all of a company's issued shares are used in calculating the benchmark index. Market capitalisation is the share price of the company multiplied by the number of shares issued.

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

GLOSSARY

SFDR Classification: Article 8: Products that promote environmental or social characteristics and promote good governance practices.

Article 9: Products that have sustainable investments as an objective and follow good governance practices. **Other:** Products that do not meet the criteria to be classified as Article 8 or 9.

Price to Earnings: A valuation ratio of a company's current share price compared to its per-share earnings in the current forecast year, calculated as current share price divided by current earnings per share.

Price to Book Ratio: represents the ratio of the current closing price of the share to the latest quarter's book value per share.

IMPORTANT INFORMATION:

¹Negative weightings may result from specific circumstances (including timing differences between trade and settlement dates of securities purchased by the funds) and/or the use of certain financial instruments, including derivatives, which may be used to gain or reduce market exposure and/or risk management. Allocations are subject to change

The Morningstar Medalist RatingTM is the summary expression of Morningstar's forward-looking analysis of investment strategies using a rating scale of Gold, Silver, Bronze, Neutral, and Negative. The ratings indicate which investments Morningstar believes are likely to outperform a relevant index or peer group average on a risk-adjusted basis over time. Analysts assign three pillar ratings (People, Parent and Process) based on their qualitative assessment, subject to the oversight of the Analyst Rating Committee, and monitor and reevaluate them at least every 14 months. For more detailed information about these ratings and methodology, please go to global.morningstar.com/managerdisclosures. The ratings are not statements of fact, nor credit or risk ratings. The rating (i) should not be used as the sole basis in evaluating an investment product, (ii) involves unknown risks which may cause expectations not to occur or to differ from what was expected, (iii) are not guaranteed to be based on complete or accurate assumptions, (iv) involve the risk that the return target will not be met due to unforeseen changes in management, technology, economic development, interest rate development, operating and/or material costs, competitive pressure, supervisory law, exchange and tax rates, and/or changes in political and social conditions, and (v) should not be considered an offer or solicitation to buy or sell the investment product.

BlackRock Global Index Funds (BGIF): This document is marketing material. BlackRock Global Index Funds (BGIF) is an open ended variable capital investment company established under the laws of the Grand Duchy of Luxembourg which is available for sale in certain jurisdictions only. BGIF is not available for sale in the U.S. or to U.S. persons. Product information concerning BGIF should not be published in the U.S. BlackRock Investment Management (UK) Limited is the Principal Distributor of BGIF and may terminate marketing at any time. In the UK, subscriptions in BGIF are valid only if made on the basis of the current Prospectus, the most recent financial reports and the Key Investor Information Document, and in EEA and Switzerland subscriptions in BGIF are valid only if made on the basis of the current Prospectus, the most recent financial reports and the Packaged Retail and Insurance-based Investment Products Key Information Document (PRIIPs KID) which are available in registered jurisdictions and local language where they are registered, these can be found at www.blackrock.com on the relevant product pages. These may not be available to investors in certain jurisdictions where the Fund in question has not been authorised. Investors should understand all characteristics of the funds objective before investing. The BGIF range employs a swing-pricing methodology in order to protect existing investors from the dilution impact of trading costs caused by shareholder activity in the funds. The published Net Asset Value (NAV) may include a swing-price adjustment which, along with market movements between Fund valuation and market close, has the potential to distort apparent performance and tracking error. BlackRock may terminate marketing at any time.
