

QMM Actively Managed Global High Yield Corporate Bond Fund

Class Q Hedged British Pound

BlackRock Solutions Funds ICAV

Unless otherwise stated, Performance, Portfolio Breakdowns and Net Asset information as at: 28-Feb-2025. All other data as at 10-Mar-2025.

This document is marketing material. For Investors in the UK. Investors should read the KIID/PRIIPs document and prospectus prior to investing, and should refer to the prospectus for the funds full list of risks.

FUND OVERVIEW

- The Fund aims to outperform the Bloomberg MSCI Global Corporate High Yield SRI Screened Select Index (Euro hedged) (Benchmark Index) over a rolling three year period.
- The Fund invests at least 80% of its assets in fixed income (FI) securities (such as bonds, notes, debentures) issued by corporate or government-related issuers (including governments, foreign agencies, supranational bodies and local authorities) which are high yield (i.e. below-investment grade or unrated) and instruments related thereto, including financial derivative instruments (FDI) (i.e. investments whose prices are based on one or more underlying assets). It may invest up to 25% of its assets in emerging markets and it may invest in investment grade FI securities (i.e. securities that meet a specified level of credit worthiness) and instruments related thereto, deposits and cash.
- The Fund will invest in sustainable investments and its total assets will be invested in accordance with its exclusionary policy. For further details regarding the exclusionary policy (and the applicable levels) please refer to the prospectus supplement. The Fund may obtain indirect exposure (e.g. through certain FDIs) to securities considered not to satisfy the exclusionary criteria.

RISK INDICATOR

Lower Risk

Potentially Lower Rewards

Higher Risk

Potentially Higher Rewards

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Changes to interest rates, credit risk and/or issuer defaults will have a significant impact on the performance of fixed income securities. Non-investment grade fixed income securities can be more sensitive to changes in these risks than higher rated fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
- Asset backed securities and mortgage backed securities are subject to the same risks described for fixed income securities. These instruments may be subject to 'Liquidity Risk', have high levels of borrowing and may not fully reflect the value of underlying assets.
- Derivatives may be highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains, resulting in greater fluctuations in the value of the Fund. The impact to the Fund can be greater where derivatives are used in an extensive or complex way.
- The Fund seeks to exclude companies engaging in certain activities inconsistent with ESG criteria. Such ESG screening may reduce the potential investment universe and this may adversely affect the value of the Fund's investments compared to a fund without such screening.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
- Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

KEY FACTS

Comparator[†]: BBG MSCI Global Corp HY SRI Screened Select EUR Hedge Index

Asset Class : Fixed Income

Fund Launch Date : 23-Apr-2024

GLOSSARY

SFDR Classification: Article 8: Products that promote environmental or social characteristics and promote good governance practices.

Article 9: Products that have sustainable investments as an objective and follow good governance practices. **Other:** Products that do not meet the criteria to be classified as Article 8 or 9.

Yield to Maturity: Yield to Maturity (YTM) is the discount rate that equates the present value of bond's cash flows with its market price (including accrued interest). The fund YTM is the weighted average of fund's individual bond holding YTM's based upon Net Asset Value ('NAV'). The measure does not include fees and expenses. For callable bonds, YTM is the Yield-to-Worst.

Effective Duration: Effective duration is a measure of a fund's interest-rate sensitivity. Put simply, the longer a fund's duration, the more sensitive the fund is to shifts in interest rates. So a fund with a duration of 10 years is twice as volatile as a fund with a five-year duration.

IMPORTANT INFORMATION:

In the UK and Non-European Economic Area (EEA) countries: this is issued by BlackRock Investment Management (UK) Limited, authorised and regulated by the Financial Conduct Authority. Registered office: 12 Throgmorton Avenue, London, EC2N 2DL. Tel: + 44 (0)20 7743 3000. Registered in England and Wales No. 02020394. For your protection telephone calls are usually recorded. Please refer to the Financial Conduct Authority website for a list of authorised activities conducted by BlackRock.

This document is marketing material, The fund is a sub fund of the BlackRock Solution Funds ICAV (the 'Fund').
