For your protection, telephone calls are usually recorded.

* Non-executive Director.

About the Fund

BlackRock Cash Fund (the “Fund”) is a UCITS scheme under the COLL Sourcebook. The Fund was established on 8 March 1990. The Fund was previously known as Mercury Cash Trust. On 30 September 2000 the Fund’s name was changed to Merrill Lynch Cash Fund. The Fund adopted its present name with effect 28 April 2008. The Fund’s FCA product reference number is 145362.

Assessment of value

The FCA requires UK fund managers to complete an annual assessment of whether their UK authorised funds provide value for investors. Our assessment considers fund and unit class level performance, costs and charges, and service quality, concluding with an evaluation of whether investors receive value. BlackRock has fulfilled its obligations for the reporting requirement, including assessing relevant charges, and published the annual assessment of value statements on the BlackRock website on 30 October 2023 in a composite report for all funds managed by BlackRock Fund Managers Limited subject to these requirements. The next annual assessment is due for publication by the end of October 2024.

Task Force on Climate-Related Financial Disclosures

The Manager has produced a supplemental detailed Climate Report which can be found on BlackRock’s website www.blackrock.com/uk/literature/public-disclosure/tcf-d-product-level-disclosure-report-bibf.pdf which is a response to, and is consistent with, all the recommendations and relevant recommended disclosures of the Task Force on Climate-related Financial Disclosures (TCFD). These disclosures describe how the Manager incorporates climate-related risks and opportunities into governance, strategy, risk management, metrics and targets and how the Manager is responding to the expectations of our stakeholders.

Fund Manager

As at 31 August 2024, the Fund Manager was Matt Clay.

Significant Events

Changes in the Directors of the Manager

T S Hale was appointed as a Director effective 16 April 2024.

H N Mepham resigned as a Director effective 30 June 2024.

Investment Manager's Report

for the six months ended 31 August 2024

Investment Objective

The aim of the Fund is to provide a rate of interest (i.e. a return) (gross of fees) for unitholders, consistent with preservation of principal (capital) and liquidity.

Comparator benchmark	Investment management approach
Sterling Overnight Index Average Rate (SONIA)	Active

Performance Summary

The following table compares the Fund's realised performance against the performance of the comparator benchmark during the financial period ended 31 August 2024.

	Fund return %	Comparator benchmark %
Class D Accumulation Units	2.58	2.63

Further information on the performance measures and calculation methodologies used is detailed below:

- Fund returns shown, calculated net of fees, are the performance returns for the primary unit class of the Fund which has been selected as a representative unit class. The primary unit class represents the class of unit which is the highest charging unit class, free of any commissions or rebates, and is freely available. Performance returns for any other unit class can be made available on request.
- Fund returns are based on the NAV per unit as at close of business for reporting purposes only, for the purpose of fair comparison and presentation with the comparator benchmark close of business valuation point.
- Due to the Financial Reporting Standard 102 ("FRS 102") and the Statement of Recommended Practice for Authorised Funds ("SORP") requirements, including the accounting policy for the valuation point at 12 noon, there may be differences between the NAV per unit as recorded in the financial statements and the NAV per unit calculated in accordance with the Prospectus.

All financial investments involve an element of risk. Therefore, the value of your investment and the income from it will vary and the return of your initial investment amount cannot be guaranteed. Past performance is not a guide to future performance and should not be the sole factor of consideration when selecting a product.

Global Economic Overview

Global equities, as represented by the MSCI All Country World Index, returned 6.40% (in GBP terms) during the six months ended 31 August 2024. Equities gained amid milder inflation (the rate of increase in the prices of goods and services) and investor expectations of a shift in monetary policy from the world's largest central banks. However, heightened geopolitical tensions, including the war in the Middle East and attacks on Red Sea shipping lanes, raised the prospect of disruption to the global economy.

Economic growth in the US slowed somewhat in the first quarter of 2024 but outperformed analysts' expectations in the second quarter. Demand from companies for workers remained high for most of the six-month period, but there were signs of weakness in the US jobs market in August 2024. In Japan, gross domestic product ("GDP") contracted in the first quarter of 2024, but recovered strongly in the second quarter due to rising private consumption. The UK economy rebounded from a mild recession with positive growth in the first and second quarters as services and production output accelerated. The Eurozone also returned to growth, helped by the strong performance of several of the bloc's smaller nations, including Ireland, Spain and Portugal. Eurozone inflation remained moderate, as consumer spending was tepid and consumer confidence remained below pre-pandemic levels.

Investment Manager's Report continued

Most emerging market economies continued to expand, although geopolitical tensions and higher interest rates presented significant economic challenges. China's GDP grew more slowly than expected despite significant government stimulus, and investors remained concerned about the country's real estate sector and weak retail sales. India's economy continued to post strong growth and industrial production grew on an annual basis throughout the period.

Central banks in the West started to loosen monetary policy, or prepared to do so. The US Federal Reserve ("the Fed") kept interest rates steady but suggested that an initial rate cut was likely in September 2024. The Fed continued to reduce some of the accumulated bond holdings on its balance sheet. Both the Bank of England ("BoE") and the European Central Bank ("ECB") cut interest rates later in the six month period. Furthermore, the ECB continued to reduce the size of its balance sheet by allowing some of its outstanding bonds to mature without reinvestment. In a notable shift, the Bank of Japan ("BoJ") raised interest rates in March 2024 – its first hike since 2007 – and then again in July.

Global equity performance was strong overall: declining inflation drove hopes that monetary policy would begin to loosen, although signs of slowing economic growth caused concern among investors in August. US stocks posted robust gains as the US economy performed better than most developed countries, with major technology stocks advancing on hopes that developments in artificial intelligence would drive growth. European stocks rose as declining inflation drove hopes for lower interest rates. Stocks in Asia also gained, despite continued concerns about China's economy and regulatory environment. Emerging markets stocks posted solid returns, helped by the prospect of monetary policy loosening in developed economies. Globally, bonds and equities that factor companies' environmental, social and governance ("ESG") characteristics faced regulatory concerns and shifting investor sentiment. ESG funds experienced positive inflows overall. Although European investment held up, there were outflows in the US following politicians' attempts to impose restrictions on investing in ESG-focused funds. In both the US and Europe, regulators proposed new rules to ensure investment companies were able to substantiate claims related to sustainability. The US Securities and Exchange Commission ("SEC") is expected to introduce regulations governing investment companies' climate disclosures by the end of 2024. Meanwhile, the European Securities and Markets Authority ("ESMA") published guidelines relating to the how investment companies use ESG-related terms. These are due to come into effect later in 2024. In the UK, the Financial Conduct Authority ("FCA") introduced a package of measures to improve the trust and transparency of sustainable investment products. The anti-greenwashing rule came into effect on 31 May 2024 and UK-based fund managers were able to start using the new investment labels from 31 July 2024.

Global government bond yields (which move inversely to prices) rose early in the six month period as inflation remained stubbornly above central bank targets. However, US Treasury yields fell sharply in August 2024 as expectations of an interest rate cut by the Fed increased. Yields on UK gilts and European government bonds followed a similar trajectory, although yields on French government bonds rose particularly sharply after the surprise announcement of national elections in June 2024. Japanese government bond yields rose following changes to the BoJ's yield curve control policy and increases in interest rates but fell back late in the six month period due to the strengthening Japanese yen. Global corporate bond performance was broadly positive; increasing bond yields attracted investors, and continued resilience in the global economy alleviated credit concerns, particularly for high-yield bonds.

Investment Manager's Report continued

In the commodities markets, Brent crude oil prices rose in April as continued instability in the Middle East caused concern among investors but fell back following global production increases and concerns about global growth. Gold prices increased significantly amid rising geopolitical tensions, the possibility of Fed interest rate reductions and rising demand from investors in Asia. Copper prices also rose due to supply constraints and demand from decarbonisation and electrification efforts.

In the foreign exchange markets, the US dollar was down relative to other major global currencies. The US dollar fell against sterling, the euro, the Japanese yen and the Chinese yuan.

Fund Performance Review and Activity

Over the six month period to 31 August 2024, the Fund's performance return was 2.58% and the active return was (0.05%), underperforming its comparator benchmark which returned 2.63% (active return is the difference between the Fund's return and the comparator benchmark return).

The combined effects of the BoE's rate cut, modest GDP growth, and evolving inflation alongside the political transition, marked a period of significant economic and political change in the UK. Given this backdrop, the Fund's strategy was centred on maintaining liquidity while targeting a weighted average maturity of around 50 days. The Investment Manager has been selective in adding duration (sensitivity to long term interest rate movements) to the Fund, identifying opportunities in high-quality names across various fixed maturities, predominantly within the 3 to 9-month range. The strategy slightly moved toward higher duration as the August Monetary Policy Committee ("MPC") meeting was approaching, focussing in the 6 to 9-month part of the curve, increasing the weighted average maturity to around 55 days at times to seize opportunities in these volatile markets, especially since there was a good chance the MPC would cut rates in August.

The following table details the significant portfolio weightings at 31 August 2024 and 29 February 2024:

31 August 2024		29 February 2024	
Asset Class	Gross Exposure	Asset Class	Gross Exposure

Notes to Financial Statements (unaudited)

for the six months ended 31 August 2024

Accounting Policies

The financial statements have been prepared in accordance with United Kingdom Generally Accepted Accounting Practice ("UK GAAP") and the Statement of Recommended Practice for Authorised Funds (the "SORP") issued by the Investment Management Association (now known as the Investment Association) in May 2014 and amended in June 2017.

The accounting policies applied are consistent with those of the financial statements for the year ended 29 February 2024 and are described in those annual financial statements.

About us

BlackRock is a premier provider of asset management, risk management, and advisory services to institutional, intermediary, and individual clients worldwide. As of 30 September 2024, the firm manages £8.73 trillion across asset classes in separate accounts, mutual funds, other pooled investment vehicles, and the industry-leading iShares® exchange-traded funds.

Through BlackRock Solutions®, the firm offers risk management and advisory services that combine capital markets expertise with proprietary-developed analytics, systems, and technology.

BlackRock serves clients in North and South America, Europe, Asia, Australia, Africa, and the Middle East. Headquartered in New York, the firm maintains offices in over 38 countries around the world.
