BLACKROCK FIXED INCOME DUBLIN FUNDS PLC

BACKGROUND

BlackRock Fixed Income Dublin Funds plc (the “Entity”) is an open-ended investment company with variable capital. The Entity was incorporated in Ireland on 25 April 2005 with limited liability between its funds and is organised under the laws of Ireland and is regulated by the Central Bank of Ireland (“CBI”) as a public limited company pursuant to the Companies Act 2014 (as amended) and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) (the “UCITS Regulations”).

The Entity is structured as an umbrella fund and comprises of separate funds (“Fund”) of the Entity. The shares of each Fund may be grouped into different classes of shares (each a “share class”). Each Fund will represent a separate portfolio of assets and may consist of one or more share classes. Each share class may apply different subscription and redemption provisions, charges, fees or brokerage arrangements. The creation of an additional class of shares will be notified to the CBI in advance. The portfolio of assets maintained for each Fund will be invested in accordance with the investment objectives and policies applicable to each Fund as set out in the prospectus.

The term “Fund” shall be deemed to mean either a Fund or Funds of the Entity, or if the context so requires, the Manager or its delegate acting for the accounts of the relevant Fund. The term “BlackRock” and “Investment Manager” are used to represent BlackRock Advisors (UK) Limited as appropriate. All references to “redeemable shares” shall be deemed to mean redeemable participating shares when Fund shares are classified as financial liabilities. The term “Directors” means the directors of the Entity.

Further details, including the investment objectives and minimum subscription requirements, are set out in the Entity’s prospectus.

Fund details

The Entity had 20 Funds in operation as at 31 January 2024.

Changes to the Entity during the financial period

On 1 November 2023, an updated prospectus was issued for the Entity to incorporate the following changes:

¹The benchmark index included in the table above is for reference only. Please refer to the prospectus for more detail.

Further information on the index investment strategies used is detailed below:

- For physically replicating funds, the investment management approach is to buy a portfolio of securities that as far as practicable consist of the securities that make up the benchmark index, in similar proportion to the weights represented in the benchmark index over a defined period of time.
- For non-replicating funds, the investment management approach aims to match the main risk characteristics of the benchmark index by investing in a portfolio that is primarily made up of securities that represent the benchmark index. The objective is to generate a return which is as close as practicable to the total return of the benchmark index net of transaction costs and gross of fees and other cost.
- Enhanced index strategies differ from pure-index tracking strategies in that they invest in a similar universe of instruments but aim to take overweight and/or underweight positions relative to the benchmark in order to generate some out-performance.

Performance summary and tracking error

The following table compares the realised Fund performance against the performance of the relevant benchmark index during the financial period ended 31 January 2024. It also discloses the anticipated tracking error of the index tracking Funds (disclosed in the prospectus on an ex-ante basis) against the actual realised tracking error of the Funds as at 31 January 2024.

Further information on these performance measures and calculation methodologies used is detailed below:

- Fund returns disclosed are the performance returns for the primary share class for each Fund, net of fees, which has been selected as a representative share class. The primary share class represents the class of share invested in by the majority of investors in the Fund and also takes into account other relevant factors such as the Fund's base currency. The returns disclosed for the comparative are in the same currency as the primary share class, unless otherwise stated. Performance returns for any other share class can be made available on request.
- For Funds that commenced trading and/or fully redeemed during the financial period, returns are shown from the date the Fund commenced trading and/or to the date the Fund fully redeemed, and the total expense ratio ("TER") is the effective TER from the date the Fund commenced trading and/or to the date the Fund fully redeemed.
- Fund returns are based on the net asset value ("NAV") calculated in accordance with the prospectus for the financial period under review with any dividends reinvested. Due to Financial Reporting Standard 104 Interim Financial Reporting ("FRS 104") requirements which apply to the financial statements, there may be differences between the NAV per share as recorded in the financial statements and the NAV per share calculated in accordance with the prospectus.
- Anticipated tracking error is based on the expected volatility of differences between the returns of a fund and the returns of its benchmark index.
- Realised tracking error is the annualised standard deviation of the difference in monthly returns between a fund and its benchmark index. Tracking error shows the consistency of the returns relative to the benchmark index over a defined period of time. The realised tracking error is annualised and calculated using data from the preceding 36 month observation period. Where a Fund has not been trading for 36 months, the annualised tracking error since inception has been presented.

Global economic overview

Global equities, as represented by the MSCI All Country World Index, returned 4.08% (in USD terms) during the six months ended 31 January 2024. Equities gained amid lower inflation (the rate of increase in the prices of goods and services) and investor optimism about a shift in monetary policy from the world's largest central banks. However, rising geopolitical tensions during the latter half of the six-month period, including the war in the Middle East and attacks on Red Sea shipping lanes raised the prospect of disruptions to the global economy.

Economic growth was strong in the US, growing robustly in the second half of 2023 amid rising exports and investment. The labour market also remained tight as the unemployment rate stayed under 4% and wages rose throughout the six-month period. In Japan, the economy contracted in the second half of 2023, entering recession amid declining private consumption, although exports remained robust and accelerated near the end of the six-month period. The UK economy also entered a recession after consecutive economic contractions in the third and fourth quarters of 2023, as output and exports declined. In the Eurozone, the economy declined slightly in the third quarter and was flat in the fourth quarter, pressured by high interest rates. While consumer retail spending rebounded in October and November 2023, it contracted notably in December as higher prices weighed on demand.

Most emerging market economies continued to expand, although geopolitical conflict and higher interest rates presented significant economic challenges. The Chinese economy grew amid significant government stimulus, although falling consumer prices raised concerns about deflation (declining prices of goods and services). India's economy showed strength in the third quarter, however growth in industrial production decelerated in November and December 2023.

The world's largest central banks continued to adjust their monetary stance, slowing or halting the pace of monetary tightening in the face of decelerating inflation. The US Federal Reserve ("the Fed") kept interest rates steady, representing a significant change of policy compared with the sharp tightening seen during the second half of 2022 and first half of 2023. The Fed also continued to reduce some of the accumulated bond holdings on its balance sheet, and indicated the possibility of interest rate reductions later in 2024.

The Bank of England ("BoE") raised interest rates once, then held rates steady at its final three meetings during the period. Similarly, the European Central Bank ("ECB") paused its tightening, declining to raise interest rates at its final three meetings following one increase earlier during the period. Furthermore, the ECB continued to reduce the size of its balance sheet by allowing some of its outstanding bonds to mature without reinvestment.

Global equity performance was positive overall, as resilient economic growth, subsiding inflation and the slower pace of central bank interest rate increases drove hopes that the current cycle of monetary policy tightening was at an end. US stocks posted a solid advance as the US economy performed significantly better than most of the developed world, and innovations in the technology sector drove significant gains. European stocks also grew, albeit at a slower pace amid pressure from higher borrowing costs. Stocks in Asia were pressured by concerns about China's economy and regulatory environment. Similarly, sharp declines in Chinese equities weighed on the performance of emerging market stocks.

Global bond prices (which move inversely to yields) rose overall as the changing stance of major central banks drove investor hopes for lower interest rates. US treasury prices rose, as lower inflation led investors to readjust their expectations for the trajectory of the Fed's monetary policy. UK gilts also gained notably, driven by the BoE's shift to a more accommodative monetary stance. Similarly, European government bonds posted solid gains overall, while Japanese government bond prices were volatile, driven by changes to its yield curve control policy and periodic purchases from the Bank of Japan. Global corporate bond performance was positive, as investors reassessed credit in light of decelerating inflation. Higher bond yields attracted investors, and continued resilience in the global economy alleviated credit concerns, particularly for high-yield bonds.

In the commodities markets, Brent crude oil prices declined slightly amid increasing production in the US and Canada. However, gold prices gained as central banks reduced the pace of interest rate increases and rising geopolitical tensions drove demand.

In the foreign exchange markets, the US dollar strengthened slightly relative to most other global currencies. The US dollar rose modestly against the Japanese yen, the euro, and sterling, while remaining nearly flat against the Chinese yuan.

Fund performance review and activity

BlackRock Euro Credit Enhanced Index Fund

Over the six month period to 31 January 2024, the Fund's performance return was 4.62% and the active return was 0.06%, outperforming its benchmark index which returned 4.56% (active return is the difference between the Fund's return and the benchmark index).

INVESTMENT MANAGER'S REPORT (continued)

Fund performance review and activity (continued)

BlackRock Euro Credit Enhanced Index Fund (continued)

The Fed raised key interest rates during in July, before opting to pause rate increases at the September meeting. Likewise, the ECB indicated a halt in its rate hikes at its meeting in September. While the Bank of Japan maintained its ultra-loose interest rate it relaxed its yield curve control policy in a surprise move in July. However, global bond market sentiment continued to be negative during the year despite continued evidence of softer inflation and amid the developed market central banks pausing. The year ended on a highly positive note, after favourable data releases and as major central banks were seen to have reached the end of their tightening cycle, prompting bond yields to fall in developed markets. The market narrative shifted to keeping rates higher for longer until inflation targets are achieved. Despite this, some market participants began to price in possible early rate cuts for 2024, arguing that the Fed will be forced to cut as early as quarter one 2024. Sentiment in global bond markets was slightly negative in January. Despite a challenging start to the year for risk assets, economic data released in developed markets and communication from central bankers broadly did not challenge 2024 rate cut expectations.

The Fund maintained an overweight to corporate credit versus government related and securitized credit over the review period. Positioning within corporate credit was additive, while positioning within government related and securitized credit offset some of the gains.

During the six month period to 31 January 2024 the following were the largest contributors to and detractors from the Fund's return relative to the benchmark index:

Largest contributors		Largest detractors	
Sector	Effect on Fund return	Sector	Effect on Fund return
Financial other [#]	0.04%	Covered ^o	(0.04%)
Technology [#]	0.04%	Local authority ^o	(0.03%)
Consumer non-cyclical ^o	0.03%	Consumer cyclical ^o	(0.03%)
Communications [#]	0.03%	Agency ^o	(0.02%)
Capital goods [#]	0.03%	Insurance	(0.02%)

[#]Overweight position - holds more exposure than the benchmark index.

^oUnderweight position - holds more exposure than the benchmark index.

Within industrials, overweight positioning in selected consumer non-cyclical sub-sectors, namely pharmaceuticals and tobacco, as well as in selected media & entertainment communication names generated alpha. Overweighting selected tech companies as well as selected diversified manufacturing issuers within capital goods was also additive. However, underweighting selected automotive names within consumer cyclicals as well as selected wirelines communication issuers offset some of the gains. Overweights to selected healthcare names within consumer non-cyclicals also detracted.

Within financial institutions, overweight allocations to selected property related financial issuers and to selected brokerage/asset managers/exchanges names outperformed, however underweight allocations to selected life insurers offset some of the gains.

Within utilities, underweights to selected water providers marginally detracted.

The following table details the significant active positions, where the Fund was overweight (held more exposure than the benchmark index and underweight (held less exposure than the benchmark index as at 31 January 2024 and 31 July 2023):

Largest overweight position			
31 January 2024		31 July 2023

Utilities	0.51%	Supranational	0.20%

BlackRock Euro Government Enhanced Index Fund

Over the six month period to 31 January 2024, the Fund's performance return was 4.30% and the active return was 0.13%, outperforming its benchmark index which returned 4.17% (active return is the difference between the Fund's return and the benchmark index).

INVESTMENT MANAGER'S REPORT (continued)

Fund performance review and activity (continued)

BlackRock Euro Government Enhanced Index Fund (continued)

The absence of an ECB meeting in August ensured markets absorbed new economic data by adjusting pricing for a further interest rate hike in September. The ECB raised interest rates by 25 basis points in September to an all-time high, however suggested that interest rates had reached a level which maintained for a long period of time would bring inflation back to the 2% target; a narrative of a pause following a similar path to other central banks. The year ended on a highly positive note, after favourable data releases and as major central banks were seen to have reached the end of their tightening cycle, prompting bond yields to fall in developed markets. The market narrative shifted to keeping rates higher for longer until inflation targets are achieved. Despite this, some market participants began to price in possible early rate cuts for 2024. Sentiment in global bond markets was slightly negative in January. Despite a challenging start to the year for risk assets, economic data released in developed markets and communication from central bankers broadly did not challenge 2024 rate cut expectations.

The rates strategies detracted from performance, while the security selection strategies benefitted the Fund.

During the six month period the following were the largest contributors to and detractors from the Fund's return relative to the benchmark index:

Largest contributors		Largest detractors	
Strategy	Effect on Fund return	Strategy	Effect on Fund return
Security selection strategies	0.11%	Rates strategies	0.02%

The European sovereign spread strategy detracted as the Fund had short positions in France and Italy versus long positions in Germany. The short position in Italy and the long position in Germany outperformed, while the short position in France offset some of the gains as the French 10-year yield finished 37 basis points lower over the period.

The European government bond selection strategy held short positions primarily in France, Italy and Germany versus long positions in Belgium, Austria, the Netherlands and Spain. The short position in France as well as the long position in Spain were the main detractors, while other positions offset most of the losses driven by the global bond rally in the last 2 months of 2023.

The Fund maintained its long credit bias through an allocation to supranational credit, which marginally added value over the six-month period.

The following table details the significant active positions, where the Fund was overweight (held more exposure than the benchmark index) and underweight (held less exposure than the benchmark index), as at 31 January 2024 and 31 July 2023:

Largest overweight position			
31 January 2024		31 July 2023	
Country	Weighting	Country	Weighting
Belgium	3.15%	Germany	1.86%
Austria	1.94%	Austria	1.81%
Germany	1.12%	Finland	0.68%

Largest underweight position			
31 January 2024		31 July 2023	
Country	Weighting	Country	Weighting
France	(3.81%)	France	(3.28%)
Spain	(1.65%)	Italy	(2.18%)
Italy	(0.85%)	Belgium	(1.35%)

Where the Fund was underweight to a country, the return from such country will have an opposite effect on the Fund's active return. This may result in a country being listed as a contributor/detractor but not listed on the Fund's schedules of investments.

BLACKROCK FIXED INCOME DUBLIN FUNDS PLC

NOTES TO THE FINANCIAL STATEMENTS

1. General information

The Entity is an open-ended investment company domiciled and incorporated under the laws of Ireland as a public limited company. The Entity is authorised by the CBI and is governed by the provisions of the UCITS Regulations with its registered office at 200 Capital Dock, 79 Sir John Rogerson's Quay, Dublin 2, D02 RK57, Ireland.

2. Significant accounting policies

2.1 Basis of preparation

The financial statements of the Entity are prepared in accordance with Financial Reporting Standard 104 Interim Financial Reporting ("FRS 104") applicable in the United Kingdom and Republic of Ireland. The principal accounting policies and estimation techniques are consistent with those applied to the previous annual financial statements.

All amounts have been rounded to the nearest thousand, unless otherwise indicated.

3. Financial risks

Each Fund's investment activities expose it to the various types of risk which are associated with the financial instruments and markets in which it invests. The risks are substantially consistent with those disclosed in the previous annual financial statements with the exception of those outlined below.

3.1 Market risk arising from price risk

Price risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting similar financial instruments traded in the market. Local, regional or global events such as war, acts of terrorism, the spread of infectious illness or other public health issue, recessions, or other events could have a significant impact on each Fund and the market price of its investments.

The iShares China CNY Bond Index Fund (IE) invests a significant portion of its assets in securities of issuers located in China or with significant exposure to Chinese issuers or countries. Investments in Chinese securities involves risks specific to China. China may be subject to considerable degrees of economic, political and social instability and demonstrates significantly higher volatility from time to time in comparison to developed markets. Chinese markets generally continue to experience inefficiency, volatility and pricing anomalies resulting from governmental influence, a lack of publicly available information and/or political and social instability. Internal social unrest or confrontations with other neighboring countries may disrupt economic development in China and result in a greater risk of currency fluctuations, currency non-convertibility, interest rate fluctuations and higher rates of inflation. Incidents involving China's or the region's security may cause uncertainty in Chinese markets and may adversely affect the Chinese economy and the Fund's investments. Reduction in spending on Chinese products and services, institution of tariffs or other trade barriers, or a downturn in any of the economies of China's key trading partners may have an adverse impact on the Chinese economy. In addition, measures may be taken to limit the flow of capital and/or sanctions may be imposed, which could prohibit or restrict the ability to own or transfer fund assets and may also include retaliatory actions, such as seizure of fund assets.

4. Fair value hierarchy

Each Fund classifies financial instruments measured at fair value using a fair value hierarchy. The fair value hierarchy has the following categories:

Level 1: The unadjusted quoted price in an active market for identical assets or liabilities that the entity can access at the measurement date.

Level 2: Inputs other than quoted prices included within Level 1 that are observable (i.e. developed using market data) for the asset or liability, either directly or indirectly. This category includes instruments valued using: quoted market prices in active markets for similar instruments; quoted prices for identical or similar instruments in markets that are considered less than active; or other valuation techniques where all significant inputs are directly or indirectly observable from market data.

Level 3: Inputs are unobservable (i.e. for which market data is unavailable) for the asset or liability. This category includes all instruments where the valuation techniques used include inputs not based on market data and these inputs could have a significant impact on the instrument's valuation. This category also includes instruments that are valued based on quoted prices for similar instruments where significant entity determined adjustments or assumptions are required to reflect differences between the instruments and instruments for which there is no active market.

BLACKROCK FIXED INCOME DUBLIN FUNDS PLC

NOTES TO THE FINANCIAL STATEMENTS (continued)

4. Fair value hierarchy (continued)

Specific valuation techniques used to value financial instruments classified as level 2 and/or level 3 include:

- (i) for debt and equity instruments, the use of quoted market prices or dealer quotes for similar instruments;
- (ii) for investments which are a share of participation in an investee collective investment scheme ("CIS") are valued at the unaudited NAV, and where available the independently audited NAV, on the valuation date of such unit of participation as calculated by the administrator of the investee CIS and in accordance with the requirements of the scheme of which the relevant investment is a share of participation. The unaudited NAV of the underlying investee CIS is reflected gross of any redemption costs which may potentially arise upon redemption from the underlying CIS. The unaudited NAV of the underlying investee CIS may be subject to adjustments upon issuance of their respective independently audited financial statements and such adjustments may be material to the Fund's financial statements;
- (iii) for foreign equities, using independent fair value adjustment factors to reflect the difference between the last market close and the valuation point of each Fund;
- (iv) for defaulted debt instruments, the use of recent transactions and defaulted equity instruments for which market data is unavailable;
- (v) for interest rate swaps, the present value of the estimated future cash flows based on observable yield curves;
- (vi) for total return swaps, the value of the estimated cash flows based on the market value of the underlying reference asset or index at the condensed balance sheet date;
- (vii) for foreign currency forwards, present value of future cash flows based on the forward exchange rates at the condensed balance sheet date;
- (viii) for SPAC PIPE commitments, the use of underlying quoted market prices and application of discounts for lack of marketability, volatility and deal probabilities;
- (ix) for foreign currency options, option pricing models; and
- (x) for other financial instruments, discounted cash flow analysis.

All of the resulting fair value estimates are included in level 2 except for unlisted equity securities, a contingent consideration receivable and certain derivative contracts, where the fair values have been determined based on present values and the discount rates used were adjusted for counterparty or own credit risk, or certain CISs which have gates or redemption restrictions imposed or that can't be redeemed within 90 days, are included in level 3.

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

The determination of what constitutes 'observable' inputs requires significant judgement. The Directors consider observable inputs to be market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

The following tables provide an analysis of each Fund's financial assets and financial liabilities measured at fair value as at 31 January 2024 and 31 July 2023:

NOTES TO THE FINANCIAL STATEMENTS (continued)

6. Taxation (continued)

Irish tax

Under current law and practice, the Entity qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. On that basis it is not chargeable to Irish tax on its income or gains. However, Irish tax may arise on the occurrence of a 'chargeable event'. A chargeable event includes any distribution payments to shareholders or any encashment, redemption, cancellation or transfer of shares and the holding of shares at the end of each eight year period beginning with the acquisition of such shares.

No Irish tax will arise on the Entity in respect of chargeable events in respect of:

- A shareholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997, as amended, are held by the Entity; or the Entity has been authorised by the Irish Revenue to make gross payments in the absence of appropriate declarations; and
- Certain exempted Irish tax resident shareholders who have provided the Entity with the necessary signed annual declarations.

Overseas tax

Dividends, interest and capital gains (if any) received on investments made by the Entity may be subject to withholding taxes imposed by the country from which the investment income/gains are received, and such taxes may not be recoverable by the Entity or its shareholders.

For financial reporting purposes, and in accordance with FRS 104, the Entity must recognise a provision for deferred tax payable arising from material timing differences between the taxation of unrealised gains in the financial statements and actual realisable taxable profits.

The Organisation for Economic Co-operation and Development ("OECD") recently issued model rules for a new global minimum tax framework ("Pillar Two") which is effective for accounting periods beginning on or after 31 December 2023. As a result determining whether the Entity is in the scope of Pillar Two as well as the potential exposure, if any, to Pillar Two income taxes is currently not known or reasonably estimable.

7. Share capital

Authorised

The authorised share capital of the Entity is 7 subscriber shares of a par value of £1.00 each and 500,000,000,000 participating shares of no par value.

Subscriber shares

7 subscriber shares are currently in issue and are held by the Manager and nominees of the Manager at 31 January 2024 and 31 July 2023. They do not form part of the NAV of the Entity. They are thus disclosed in the financial statements by way of this note only. In the opinion of the Directors this disclosure reflects the nature of the Entity's investment business.

Voting rights

The holders of the subscriber shares and redeemable shares shall, on a poll, be entitled to one vote per share.

10. Related party transactions (continued)

The Directors as at 31 January 2024 are presented in the table below:

Directors	Employee of the BlackRock Group	Director of BlackRock affiliates and/or other funds managed by BlackRock
Barry O'Dwyer	No	Yes
Francis Drought	Yes	Yes
Nicola Grenham	No	Yes
Tom McGrath	Yes	Yes

Directors fees are disclosed in the statutory information note to the financial statements. The aggregate emolument of the Directors relate to services provided as directors. The Directors who are also employees of the BlackRock Group are not entitled to receive Directors' fees.

Holdings in other funds managed by BlackRock

Investments in funds managed by BlackRock, Inc. and investments that are BlackRock affiliates are listed below and marked on the relevant Funds' schedules of investments. For underlying funds which are subject to investment management or performance fees, these have been rebated back to the Fund.

The Entity invested in the following funds which are also managed by the Manager. Further information on the fees charged from investing in these underlying funds is presented in the table below. These disclosed fees are the maximum charges capped as per the prospectus of the underlying funds and actual fees charged may be lower:

Investments	Fee paid by Fund
Investment Company - UCITS authorised in Ireland by CBI	
BlackRock ICS Euro Liquid Environmentally Aware Fund - Agency (Acc T0) Shares	Annual expense capped at 0.03% of NAV ¹
BlackRock ICS Sterling Liquid Environmentally Aware Fund - Agency (Dis) Shares	Annual expense capped at 0.03% of NAV ¹

NOTES TO THE FINANCIAL STATEMENTS (continued)

11. Credit facility

The Fund entered into a credit facility with JPMorgan whereby JPMorgan, together with other syndicated lenders, made a portion of a USD 450,000,000 credit facility available to the Fund. The portion of the USD 450,000,000 credit facility will be allocated to the Fund based on the credit facility agreement dated 21 April 2023. This credit facility will be utilised by the Funds for temporary funding purposes, including, without limitation, the funding of investor redemptions. Any interest and commitment fees in relation to drawdowns from such credit facility are paid out of the assets of the Fund. Any new Fund will not automatically be subject to a credit line and will therefore be required to be added by way of a joinder process. This process includes, inter alia, any necessary due diligence being carried out by the lenders in order to approve the addition of the new Fund. During this period, such Funds will not be subject to, or able to draw down on, any credit line. Furthermore, there is no guarantee that the addition of any new Fund will be approved by the lenders, or that credit will be available to a Fund since the credit line is subject to availability (on an equitable allocation basis) between the Fund and other BlackRock Funds participating in the credit agreement. As such, certain Funds may not be subject to the credit line and will not incur any fees with respect to same.

A loan commitment fee is charged on a daily basis in relation to this credit facility which is included in the income statement under caption "Credit administration fee". The loan commitment fee is charged at 0.10% on the outstanding balance.

The credit facility was not used during the financial period.

12. Commitments and contingent liabilities

There were no significant commitments or contingent liabilities as at 31 January 2024 and 31 July 2023.

13. Subsequent events

On 15 March 2024, an updated prospectus was issued for the Entity to incorporate the following changes:

- Change in benchmark repositioning, investment objective and policy change for iShares ESG Screened Euro Corporate Bond Index Fund.
- Updates to Risk Factors.
- Updates to Directors', Management and Administration information.
- Updates to Sustainable Finance Disclosure Regulation ("SFDR") and environmental, social and governance ("ESG") information.

Other than the above, there have been no events subsequent to the financial period end, which, in the opinion of the Directors, may have had an impact on the financial statements for the financial period ended 31 January 2024.

14. Approval date

The financial statements were approved by the Directors on 28 March 2024.

The CBI requires a schedule of material changes in the composition of the portfolio during the financial period. These are defined as aggregate purchases of a security exceeding one per cent of the total value of purchases for the financial period and aggregate disposals greater than one per cent of the total value of sales. At a minimum the largest 20 purchases and 20 sales must be given or all purchases and sales if less than 20. A full listing of the portfolio changes for the financial period is available, upon request, at no cost from the Administrator.

The CBI requires a schedule of material changes in the composition of the portfolio during the financial period. These are defined as aggregate purchases of a security exceeding one per cent of the total value of purchases for the financial period and aggregate disposals greater than one per cent of the total value of sales. At a minimum the largest 20 purchases and 20 sales must be given or all purchases and sales if less than 20. A full listing of the portfolio changes for the financial period is available, upon request, at no cost from the Administrator.

The CBI requires a schedule of material changes in the composition of the portfolio during the financial period. These are defined as aggregate purchases of a security exceeding one per cent of the total value of purchases for the financial period and aggregate disposals greater than one per cent of the total value of sales. At a minimum the largest 20 purchases and 20 sales must be given or all purchases and sales if less than 20. A full listing of the portfolio changes for the financial period is available, upon request, at no cost from the Administrator.

TRANSACTIONS WITH CONNECTED PERSONS

In accordance with the requirements of the CBI, the Manager shall ensure that any transactions carried out between each Fund and the Manager or Depositary to a Fund, the delegates or sub-delegates of the Manager or Depositary (excluding any non-group company sub-custodians appointed by a Depositary) and any associated or group company of the Manager, Depositary, delegate or sub-delegate ("Connected Persons") must be conducted at arm's length and in the best interests of the shareholders.

The Directors are satisfied that there are arrangements in place, as evidenced by written procedures, to ensure that the obligations set out above are applied to all transactions with Connected Persons and that transactions with Connected Persons entered into during the financial period complied with this obligation.

SOFT COMMISSIONS

There were no soft commission arrangements entered into by the Investment Manager on behalf of each Fund during the financial period ended 31 January 2024.

CROSS INVESTMENTS

As at 31 January 2024, there were no cross umbrella investments held by any Fund within the Entity.

BLACKROCK FIXED INCOME DUBLIN FUNDS PLC

EFFICIENT PORTFOLIO MANAGEMENT AND SECURITIES FINANCING TRANSACTIONS

Efficient portfolio management techniques

The Directors may, on behalf of each Fund and subject to the conditions and within the limits laid down by the CBI and the prospectus, employ techniques and instruments relating to transferable securities, including investments in OTC FDIs provided that such techniques and instruments are used for efficient portfolio management purposes or to provide protection against exchange risk or for direct investment purposes, where applicable.

The underlying exposure obtained through FDI and the identity of the counterparties to these FDIs at the financial period end are disclosed on the relevant Fund's schedule of investments.

Securities lending

All securities lending transactions entered into by each Fund are subject to a written legal agreement between each Fund and the securities lending agent, BlackRock Advisors (UK) Limited, a related party to the Entity, and separately between the securities lending agent and the approved borrowing counterparty. Collateral received in exchange for securities lent is transferred under a title transfer arrangement and is delivered to and held in an account with a tri-party collateral manager in the name of the Depository on behalf of each Fund. Collateral received is segregated from the assets belonging to each Fund's Depository or the securities lending agent.

The following table details the value of securities on loan as a proportion of each Fund's total lendable assets and as a proportion of the Fund's NAV, as at 31 January 2024. Total lendable assets represent the aggregate value of assets forming part of a Fund's securities lending programme. This excludes any assets held by each Fund that are not considered lendable due to any market, regulatory, investment or other restriction.

Income earned during the period by the Funds from securities lending transactions is disclosed in the Fund's notes to the financial statements.

The total income earned from securities lending transactions is split between the relevant Fund and the Securities Lending Agent. Each Fund receives at least 62.5% while securities lending agent receives up to 37.5% of such income with all operational costs borne out of the securities lending agent's share.

The following table details the value of securities on loan (individually identified in the relevant Fund's schedule of investments), analysed by counterparty as at 31 January 2024.

Investment grade securities are those issued by an entity with a minimum investment grade credit rating from at least one globally recognised credit rating agency; Standard & Poor's, Moody's or Fitch.

A recognised equity index contains at least 20 equities where no single equity represents more than 20% of the total index and no five equities combined represent more than 60% of the total index.

The maturity tenor analysis for fixed income securities received or posted as collateral is based on the respective contractual maturity date, while for equity securities and ETFs received or posted as collateral are presented as open transactions as they are not subject to a contractual maturity date.

All cash received or posted as collateral has an open maturity tenor as it is not subject to a contractual maturity date.

Reuse of collateral received

Non-cash collateral received by way of title transfer collateral arrangement in relation to securities lending transactions cannot be sold, re-invested or pledged.

This Fund is not in any way sponsored, endorsed, sold or promoted by FTSE International Limited ("FTSE") or by the London Stock Exchange (the "Exchange") or by The Financial Times ("FT") and neither FTSE nor Exchange nor FT makes any warranty or representation whatsoever, expressly or impliedly, either as to the results to be obtained from the use of the FTSE Government All Stocks Gilt Index (the "Index") and/or the figure at which the said Index stands at any particular time on any particular day or otherwise. The Index is compiled and calculated solely by FTSE, all rights in the Index and Index data vest in FTSE and use of the Index is subject to license. However, neither FTSE nor Exchange nor FT shall be liable (whether in negligence or otherwise) to any person for any error in the Index and neither FTSE or Exchange or FT shall be under any obligation to advise any person of any error therein.

"FT-SE™" is a trade mark of the London Stock Exchange Limited and the Financial Times Limited and is used by FTSE International Limited under license.

iShares Green Bond Index Fund (IE)

This Fund is not sponsored, endorsed, sold or promoted by MSCI Inc. ("MSCI"), any of its affiliates, any of its information providers or any other third party involved in, or related to, compiling, computing or creating any MSCI index (collectively, the "MSCI parties"). The MSCI indexes are the exclusive property of MSCI. MSCI and the MSCI index names are service mark(s) of MSCI or its affiliates and have been licensed for use for certain purposes by BlackRock, Inc. None of the MSCI parties makes any representation or warranty, express or implied, to the issuer or owners of this Fund or any other person or entity regarding the advisability of investing in Funds generally or in this Fund particularly or the ability of any MSCI index to track corresponding stock market performance. MSCI or its affiliates are the licensors of certain trademarks, service marks and trade names and of the MSCI indexes which are determined, composed and calculated by MSCI without regard to this Fund or the issuer or owners of this Fund or any other person or entity. None of the MSCI parties has any obligation to take the needs of the issuer or owners of this Fund or any other person or entity into consideration in determining, composing or calculating the MSCI indexes. None of the MSCI parties is responsible for or has participated in the determination of the timing of, prices at, or quantities of this Fund to be issued or in the determination or calculation of the equation by or the consideration into which this Fund is redeemable. Further, none of the MSCI parties has any obligation or liability to the issuer or owners of this Fund or any other person or entity in connection with the administration, marketing or offering of this Fund.

Although MSCI shall obtain information for inclusion in or for use in the calculation of the MSCI indexes from sources that MSCI considers reliable, none of the MSCI parties warrants or guarantees the originality, accuracy and/or the completeness of any MSCI index or any data included therein. None of the MSCI parties makes any warranty, express or implied, as to results to be obtained by the issuer of the Fund, owners of the Fund, or any other person or entity, from the use of any MSCI index or any data included therein. None of the MSCI parties shall have any liability for any errors, omissions or interruptions of or in connection with any MSCI index or any data included therein. Further, none of the MSCI parties makes any express or implied warranties of any kind, and the MSCI parties hereby expressly disclaim all warranties of merchantability and fitness for a particular purpose, with respect to each MSCI index and any data included therein. Without limiting any of the foregoing, in no event shall any of the MSCI parties have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

No purchaser, seller or holder of this security, product or Fund, or any other person or entity, should use or refer to any MSCI or Bloomberg trade name, trademark or service mark to sponsor, endorse, market or promote this security without first contacting MSCI to determine whether permission is required. Under no circumstances may any person or entity claim any affiliation with MSCI or Bloomberg without prior written permission.
