iSHARES III PLC

BACKGROUND

iShares III public limited company (the "Entity") is an open-ended investment company with variable capital. The Entity was incorporated in Ireland on 22 January 2008 with limited liability and segregated liability between its funds and is organised under the laws of Ireland and is regulated by the Central Bank of Ireland ("CBI") as a public limited company pursuant to the Companies Act 2014 (as amended) and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) (the "UCITS Regulations").

The Entity is structured as an umbrella fund and comprises of separate funds ("Fund") of the Entity. The shares of each Fund may be grouped into different classes of shares (each a "share class"). Each Fund will represent a separate portfolio of assets and may consist of one or more share classes. Each share class may apply different subscription and redemption provisions, charges, fees or brokerage arrangements. The creation of an additional class of shares will be notified to the CBI in advance. The portfolio of assets maintained for each Fund will be invested in accordance with the investment objectives and policies applicable to each Fund as set out in the prospectus.

While assets and liabilities that are specific to a share class within a Fund would be attributable to (and should be borne by) only that share class, there is no segregation of liabilities between share classes as a matter of Irish law. Due to the lack of segregation of liabilities as a matter of law, there is a risk that the creditors of a share class may bring a claim against the assets of the Fund notionally allocated to other share classes.

The term "Fund" or "Financial Product" shall be deemed to mean either a Fund or Funds of the Entity, or if the context so requires, the Manager or its delegate acting for the accounts of the relevant Fund. The term "BlackRock" and "Investment Manager" are used to represent BlackRock Advisors (UK) Limited as appropriate. All references to "redeemable shares" shall be deemed to mean redeemable participating shares when Fund shares are classified as financial liabilities. The term "Directors" means the directors of the Entity.

Further details, including the investment objectives and minimum subscription requirements, are set out in the Entity's prospectus.

Fund details

The Entity had 63 Funds in operation as at 31 December 2024.

The following Funds terminated operations in a prior year and are pending revocation by the CBI. Financial statements continue to be prepared for iShares Developed World ex-UK UCITS ETF as the Fund still holds financial assets balances at the balance sheet date. No unaudited financial statements have been prepared for the other terminated Funds as no financial assets are held by such Funds and final termination audited financial statements have been prepared in a prior year.

- iShares Developed World ex-UK UCITS ETF
- iShares EURO STOXX 50 UCITS ETF (Acc)

These Funds are Exchange Traded Funds ("ETFs"), which provide the flexibility of a share with the diversification of a Fund. They can be bought and sold like any other share listed on a stock exchange, but provide instant exposure to many companies or various financial instruments relevant to the Fund and its benchmark index.

Changes to the Entity during the financial period

On 21 August 2024, iShares J.P. Morgan € EM Bond UCITS ETF ceased operations.

On 30 August 2024, an updated prospectus was issued by the Entity to include new Funds.

On 30 September 2024, Peter Vivian resigned as a non-executive Director.

On 22 November 2024, Manuela Sperandeo was appointed as a non-executive Director.

iSHARES III PLC

INVESTMENT MANAGER'S REPORT (continued)

Investment management approach (continued)

Further information on the index investment strategies used is detailed below:

- For physically replicating funds, the investment management approach is to buy a portfolio of securities that as far as practicable consist of the securities that make up the benchmark index, in similar proportion to the weights represented in the benchmark index over a defined period of time.
- For non-replicating funds, the investment management approach aims to match the main risk characteristics of the benchmark index by investing in a portfolio that is primarily made up of securities that represent the benchmark index. The objective is to generate a return which is as close as practicable to the total return of the benchmark index net of transaction costs and gross of fees and other costs.

Performance summary and tracking error

The following table compares the realised Fund performance against the relevant benchmark index for the 6 month period ended 31 December 2024. It also discloses the anticipated tracking error of the Fund (disclosed in the prospectus on an ex-ante basis) against the actual realised tracking error of the Funds as at 31 December 2024.

Further information on these performance measures and calculation methodologies used is detailed below:

- Fund returns disclosed are the performance returns for the primary share class for each Fund, net of fees and expenses charged directly within the relevant share class, which has been selected as a representative share class. The primary share class represents the class of share invested in by the majority of investors in the Fund and also takes into account other relevant factors such as the Fund's base currency. The returns disclosed for the comparative are in the same currency as the primary share class, unless otherwise stated. The return of the primary share class disclosed may differ to the aggregate Fund performance for all share classes as reported in the financial statements primarily due to the impact of foreign currency translation and share class specific expenses. Performance returns for any other share class can be made available on request.
- For Funds that commenced trading and/or fully redeemed during the financial period, returns are shown from the date the Fund commenced trading and/or to the date the Fund fully redeemed, and the total expense ratio ("TER") is the effective TER from the date the Fund commenced trading and/or to the date the Fund fully redeemed.
- Fund returns are based on the NAV calculated in accordance with the prospectus for the financial period under review with any dividends reinvested. Returns less than 0.005% are rounded down to zero. Where, due to a public holiday or market closure, a date relevant to determination of the fund returns would not be a dealing day (such that a NAV would not otherwise be calculated on that day), a NAV may nevertheless be determined and calculated in accordance with the prospectus for the purposes of these disclosures. Additionally, due to Financial Reporting Standard 104 Interim Financial Reporting ("FRS 104") requirements which apply to the financial statements, there may be differences between the NAV per share as recorded in the financial statements and the NAV per share calculated in accordance with the prospectus.
- Each Fund's TER is accrued on a daily basis throughout the financial period, which can impact the measurement of a tracking difference in a positive or negative manner depending on the performance in the market and the TER rate applied. The extent and magnitude of this effect on performance measurement is subject to the timing of the market performance relative to the performance period of the Fund and can be greater than the headline TER in a positive market and lower than the TER in a negative market. The TER expresses the sum of all fees, operating costs and expenses, with the exception of direct trading costs, charged to each Fund's assets as a percentage of the average Fund assets based on a twelve-month period ended 31 December 2024.
- Anticipated tracking error is based on the expected volatility of differences between the returns of a fund and the returns of its benchmark index.
- Realised tracking error is the annualised standard deviation of the difference in monthly returns between a fund and its benchmark index. Tracking error shows the consistency of the returns relative to the benchmark index over a defined period of time. The realised tracking error is annualised and calculated using data from the preceding 36 month observation period. Where a Fund has not been trading for 36 months, the annualised tracking error since inception has been presented.

iSHARES III PLC

INVESTMENT MANAGER'S REPORT (continued)

Performance summary and tracking error (continued)

Net income difference and tax may also impact tracking error due to withholding tax suffered by the Fund on any income received from its investments. The level and quantum of tracking error arising due to withholding taxes depends on various factors such as any reclaims filed on behalf of the Fund with various tax authorities, any benefits obtained by the Fund under a tax treaty or any securities lending activities carried out by the Fund. Importantly, these impacts can be either positive or negative depending on the underlying circumstances.

^aThe realised tracking error was driven by the sampling techniques employed.

^bThe realised tracking error was also driven by interest rate movements, which positively affected cash securities held in the Fund.

^cThe realised tracking error was also driven by a different treatment of a credit event between the benchmark index and the Fund.

^dThe realised tracking error was also driven by pricing differences between the benchmark index and the Fund.

^eThe realised tracking error was also driven by a different holiday treatment between the Fund and the benchmark index.

^fThe realised tracking error was also driven by the removal of Russian securities from the benchmark index in March 2022. The removal of Russian securities at zero value from the benchmark index caused the Fund to outperform versus the benchmark index.

^gThe realised tracking error was also driven by pricing differences resulting from a mismatch in foreign exchange (FX) timing.

^hThe realised tracking error was also driven by the fair valuation of Russian assets.

ⁱThe realised tracking error was also driven by the difference in tax rate applied to dividends received in the Fund versus the tax rate assumed in the total return calculation of the benchmark index.

INVESTMENT MANAGER'S REPORT (continued)

Global economic overview

Global equities, as represented by the MSCI All Country World Index, returned 5.56% (in US Dollar terms) during the six months ended 31 December 2024. Equities gained amid milder inflation (the rate of increase in the prices of goods and services) and looser monetary policy from the world's largest central banks. However, geopolitical tensions, including the war in the Middle East and the potential for protectionist policies in the US, raised the prospect of disruption to the global economy.

Having slowed somewhat at the start of 2024, economic growth in the US remained strong in the third quarter as a result of resilient consumer spending. In Japan, gross domestic product ("GDP") continued its recovery from a period of contraction: the measure expanded by an annual rate of 0.9% in the third quarter following a 3.1% growth in the second quarter. Although the UK economy grew by 0.5% in the second quarter, the pace of expansion stalled between July and September 2024. The Eurozone returned to growth, helped by the strong performance of several of the smaller member nations, including Ireland, Spain and Portugal.

Most emerging markets continued to expand, although geopolitical tensions and high interest rates presented significant economic challenges. The Chinese GDP grew slower than expected amid concerns about the country's real estate sector and weak factory output. However, the announcement of a new round of stimulus measures in September 2024 was received positively by investors. India's economy remained strong, although growth between July and September 2024 came in below analysts' expectations.

Central banks in the west started to loosen monetary policy. The US Federal Reserve ("the Fed") reduced interest rates for the first time in over four years in September 2024, while continuing to reduce some of the accumulated bond holdings on its balance sheet. The Fed made a further cut in November 2024. The Bank of England ("BoE") began cutting interest rates in August 2024 after inflation in the UK had fallen to the BoE's 2.0% target. Following an initial cut in June 2024, the European Central Bank ("ECB") reduced interest rates on three further occasions in the second half of 2024. Having raised interest rates in March 2024, the Bank of Japan ("BoJ") did so again in July 2024.

Global equity performance was positive overall as a result of looser monetary policy. US stocks posted robust gains as the US economy performed better than most developed countries, with major technology stocks continuing to advance on hopes that developments in artificial intelligence would drive growth. Investors initially reacted positively to Donald Trump's victory in the US presidential election in November 2024, but there were concerns at the end of the year that the new administration's economic policies could lead to higher inflation and, therefore, fewer interest-rate cuts than expected. Stocks in Asia also gained, with particularly sharp rises in September 2024, following the announcement of a new stimulus package in China. Emerging market stocks posted solid returns, helped by the prospect of monetary policy loosening in developed economies. However, performance among European stocks was mixed due to political uncertainty and a deteriorating economic outlook.

Globally, bonds and equities that factor companies' environmental, social and governance ("ESG") characteristics faced regulatory concerns and shifting investor sentiment. Despite this, ESG funds experienced positive inflows overall. European investment remained strong, while the pace of outflows in the US slowed.

Global government bond yields (which move inversely to bond prices) declined in August and September 2024 in anticipation of interest-rate cuts in the US. However, yields on US Treasuries rose sharply over the final quarter of 2024 due to uncertainty surrounding the outcome of the US presidential election and the potentially inflationary impact of the Donald Trump administration's economic policies.

Yields on UK gilts followed a similar trajectory to the US treasuries, partly as a result of plans to increase borrowing announced in the government's October Budget. Meanwhile, European government bond yields declined overall on expectations of further ECB rate cuts in 2025. Japanese government bond yields fell back in August 2024 due to the strengthening yen before rising in October and November 2024 on expectations of further BoJ interest-rate increases. Global corporate bond performance was broadly positive; increasing bond yields attracted investors, and continued resilience in the global economy alleviated credit concerns, particularly for high-yield bonds.

INVESTMENT MANAGER'S REPORT (continued)

Global economic overview (continued)

In the commodities markets, Brent crude oil prices rose in July 2024 as continued instability in the Middle East perturbed investors but fell back again following global production increases and news of a ceasefire between Israel and Hezbollah in Lebanon. Gold prices increased significantly amid rising geopolitical tensions, the likelihood of Fed interest-rate reductions and demand from investors in Asia. Having peaked earlier in May 2024, copper prices declined due to concerns about falling industrial output in China and the potential impact of US tariffs in 2025.

In foreign exchange markets, the US Dollar's performance relative to other major global currencies was mainly positive. The US Dollar rose against Sterling, the Euro and the Chinese Yuan, but fell against the Japanese Yen.

Fund performance review and activity

iShares Asia ex Japan Equity Enhanced Active UCITS ETF

Since inception up to 31 December 2024, the Fund's performance return was 2.14% and the active return was (0.01%), in line with its performance measure which returned 2.15% (active return is the difference between the Fund's return and the performance measure).

The Fund managed to deliver this resilient performance while navigating Asia ex Japan equity market volatility caused by the repercussions of several global events in second half of 2024 (for example, the Japanese equity market volatility of August, the Chinese equity market volatility following the government stimulus package in September, and the US Presidential election in November).

During the financial period ended 31 December 2024, the following were the largest contributors to and detractors from the Fund's return:

[#]Overweight position - held more exposure than the performance measure.

[Ⓞ]Underweight position - held less exposure than the performance measure.

Underweight to Reliance Industries was the Fund's top contributor in second half of 2024, as the shares underperformed. The firm is an Indian multinational conglomerate with businesses including energy, entertainment, telecommunications, and textiles.

Overweights in technology (TSM and Tencent) were top contributors. Geely Automobile, a Chinese producer of both traditional and new energy autos, was a beneficiary of the Chinese stimulus package announcement in September. Our research relating to the business' new energy exposure contributed to the overweights in Geely Automobile.

Over the six month period to 31 December 2024, the Fund's return were 2.81%, 6.62% and 4.70% for iShares Conservative Portfolio UCITS ETF, iShares Growth Portfolio UCITS ETF and iShares Moderate Portfolio UCITS ETF, respectively.

In second half of 2024, inflation eased further from the first half of the year. Central banks, including the Federal Reserve, began rate cuts as inflation moderated. The Federal Reserve made three consecutive rate cuts in 2024, with the final one in December lowering the federal funds rate to a range of 4.25% to 4.50%. Similarly, the European Central Bank ("ECB") reduced its key interest rates by 25 basis points in December, reflecting its commitment to achieving a 2.00% medium-term inflation target. US equities were the top-performing assets, driven by strong gains in large-cap stocks and the technology sector. Artificial Intelligence ("AI") continued to revolutionize various sectors, with generative AI adoption accelerating and providing significant business value. Major events such as the US presidential election and China's economic trajectory significantly influenced market dynamics. The investment landscape remained resilient but complex at the same time, with ongoing adjustments to monetary policies and geo-political developments.

During the reporting period, US equities continued to outperform their peers. As such, US equities contributed the most to performance, boosted by strong earnings and positive traction from technology and AI developments. On the other hand, the recently introduced global real estate slightly detracted along with health care and materials sector equities. On the fixed income side, short and mid-dated US Treasuries contributed on the expectation of lower rates in the second half of 2024. European bonds lagged overall, due to a mix of policy uncertainty, geo-political tensions still high, and a relative underperformance compared to US peers.

In the December rebalance, we decided to increase risk, remaining true to our risk-on stance and hence preferring equities over bonds. Our highest conviction remains in US equities. With the uncertainty around the US elections behind us, we think US equities will outperform their peers, prolonging the period of US exceptionalism. Within equities, we added 1.00% to the portfolio. More specifically, we increased our exposure to US equities allocations. To fund this addition, we trimmed from Japanese equities, being less constructive on developed market ex-US equities. In sectors, we favour materials, information technology and financials over communication services, energy and industrials. For the fixed income sleeve, we prefer to lean into UK Gilts, on the back of relatively attractive yields. For credit, we slightly add to US investment grade and keep the rest of the sleeve untouched by heading into 2025. Similarly, we keep the emerging markets debt allocation unchanged. Lastly, we replace cash-like short duration EUR bonds with the EUR cash active ETF, on the back of lower volatility in the latter.

Over the financial period, key economic data indicated growing concerns about economic growth in the Euro area, particularly as the EU Purchasing Managers' Index dropped from 50.00 in October 2024 to 49.60 in December 2024, with France and Germany contributing heavily to this weakness. This data raised fears of slower growth, supporting market expectations that the European Central Bank ("ECB") might continue to ease policy further.

Inflation data for the Eurozone came in slightly higher, at 2.40%, compare to 2.00% at the end of October 2024 but was largely in line with forecasts and attributed to energy-related base effects.

As a result, markets priced in nearly 95 basis points of rate cuts for the upcoming ECB meetings, including a 28 basis points expectation for December 2024's meeting. However, while the ECB's most recent policy action in December 2024, a 25 basis points rate cut was in line with expectations, President Lagarde's cautious comments suggested that the ECB was nearing the end of its aggressive easing cycle. Overall, at the end of December 2024, market pricing anticipated a total of 116 basis points in cuts by the end of 2025.

For the Fund, the strategy remained cautious throughout the financial period due to the uncertainty surrounding further rate cuts and the overall market environment. While the ECB's expected rate cuts could provide opportunities, we did not believe that the significant easing priced in was fully justified, making it difficult to extend our duration meaningfully. Instead, our focus was on maintaining liquidity, especially with the year-end, and on investing in shorter-term sovereign supra-agencies, particularly in the 2-4 month maturity range. We increased our overnight capacity and continued to make tactical trades, such as purchasing supra-agencies for 1-2 month maturities and financial instruments for 4-5 month periods. This strategy was designed to navigate the current market conditions while restoring liquidity and positioning the portfolio for reinvestment over the year-end.

In sectors, we favour materials, information technology and financials over communication services, energy and industrials. For the fixed income sleeve, we prefer to lean into UK Gilts, on the back of relatively attractive yields. We took some profits from our high yield credit allocations and favoured the EUR credit versus their USD peers, while slightly adding to the emerging markets debt allocation. Lastly, we replace cash-like short duration EUR bonds with the EUR cash active ETF, on the back of lower volatility in the latter.

iShares Moderate Portfolio UCITS ETF

During the six month period, the following were the largest contributors to and detractors from the Fund's return:

Top contributors		Bottom detractors	
Sector	Effect on Fund return	Sector	Effect on Fund return
US ESG enhanced equities	1.51%	World health care equities	(0.07%)
US ESG screened equities	1.11%	European ESG enhanced equities	(0.06%)
US ESG emerging markets debt	0.43%	Global real estate	(0.05%)
World communication services equities	0.38%	World materials equities	(0.04%)
US treasuries 7-10 year	0.31%	Pacific ex-Japan ESG enhanced equities	(0.02%)

During the reporting period, US equities continued to outperform their peers. As such, US equities contributed the most to performance, boosted by strong earnings and positive traction from tech and AI developments. The hard currency emerging markets debt was also additive, mainly as of third quarter. On the other hand, health care and materials sector equities, together with the recently introduced global real estate slightly detracted. On the fixed income side, mid-dated US treasuries contributed on the expectations of lower rates in the second half of 2024. European bonds lagged overall, due to a mix of policy uncertainty, geo-political tensions still high, and a relative underperformance compared to US peers.

The following table details the significant portfolio weightings at 31 December 2024 and 30 June 2024:

31 December 2024		30 June 2024

In the December rebalance, we decided to increase risk across the range, remaining true to our risk-on stance and hence preferring equities over bonds. Our highest conviction remains in US equities. With the uncertainty around the US elections behind us, we think US equities will outperform their peers, prolonging the period of US exceptionalism. Within equities, we added 1.50% to the portfolio. More specifically, we increased our exposure to US equities allocations. To fund this addition, we trimmed from Japanese equities, being less constructive on developed market ex-US equities. In sectors, we favour materials, information technology and financials over communication services, energy and industrials. For the fixed income sleeve, we prefer to lean into UK Gilts, on the back of relatively attractive yields. We took some profits from our credit allocations (both investment grade and high yield), favouring the EUR credit versus their USD peers, while slightly reducing the emerging markets debt allocation. Lastly, we replace cash-like short duration EUR bonds with the EUR cash active ETF, on the back of lower volatility in the latter.

iShares U.S. Equity High Income UCITS ETF

Over the six month period to 31 December 2024, the Fund's performance return was 7.00% and the active return was (1.22%), underperforming its performance measure which returned 8.22% (active return is the difference between the Fund's return and the performance measure).

Despite the Fund's more defensive nature (with a target beta of 0.90) and high-income focus (with a target yield of 7.00% per annum), the Fund total returns trailed the performance measure by a modest 122 basis points (net of fees) in the second half of 2024. The Fund managed to deliver this resilient performance despite a US equity market driven by a concentrated number of higher beta and lower yielding technology stocks. The defensive nature of the Fund also navigated the U.S. equity market volatility caused by the repercussions from several global events in second half of 2024 (for example the Japanese equity market volatility of August and the U.S. presidential election in November).

During the six month period, the following were the largest contributors to and detractors from the Fund's return:

Top contributors		Bottom detractors	
Stock	Effect on Fund return	Stock	Effect on Fund return
Walmart [#]	0.32%	Tesla [Ⓞ]	(0.55%)
Gilead Sciences [#]	0.30%	Broadcom [Ⓞ]	(0.44%)
Fortinet [#]	0.30%	LAM Research [#]	(0.27%)
Kellanova [#]	0.29%	Merck & Co [#]	(0.19%)
Mastercard [#]	0.18%	Palantir Technologies [Ⓞ]	(0.17%)

[#]Overweight position - held more exposure than the performance measure.

[Ⓞ]Underweight position - held less exposure than the performance measure.

An underweight to Tesla detracted in the second half of 2024. The stock gained during third quarter after announcing stronger than expected second quarter deliveries in July, and continued to perform well in fourth quarter as the company was perceived as a beneficiary of U.S. presidential election outcome in November. Due to the higher beta and levels of volatility, Tesla is not aligned with the more defensive investment philosophy of the Fund.

The Fund's defensive structure was aligned to an overweight position in Walmart, which was the top contributor to the return. The stock continued to gain in the second half of 2024 after reporting strong revenue growth in the second quarter. Our research monitoring alternative data, such as brand surveys, and strong fundamentals were the main drivers for the overweight position.

Where the Fund was underweight to a stock, (i) the return from such stock will have an opposite effect on the Fund's active return and (ii) it may result in a stock being listed as a contributor/detractor but not listed on the Fund's schedule of investments.

iShares US Equity Enhanced Active UCITS ETF

Since inception up to 31 December 2024, the Fund's performance return was 7.04% and the active return was (0.31%), underperforming its performance measure which returned 7.35% (active return is the difference between the Fund's return and the performance measure).

The Fund managed to deliver this resilient performance despite a US equity market driven by a concentrated number of higher beta technology stocks. The Fund also navigated the US equity market volatility caused by the repercussions from several global events in the second half of 2024 (for example the Japanese equity market volatility of August and the US presidential election in November).

[#]Overweight position - held more exposure than the performance measure.

^ØUnderweight position - held less exposure than the performance measure.

Underweights to software and semiconductor firms Salesforce, Palantir Technologies, and Broadcom were among the Fund's top detractors. The Broadcom stock rallied in December following the company announcement of a surge in demand for its artificial intelligence chips. Several of our research insights had led to a negative view on the company.

Fortinet is an American cybersecurity company, which develops and sells security solutions like firewalls, endpoint security and intrusion detection systems. This name benefitted from the gains made in the US technology sector, and therefore the overweight worked well over the period. The Fund's overweight position in Walmart contributed positively over the second half of 2024. The stock continued to gain in the second half of 2024 after reporting strong revenue growth in second quarter. Our research monitoring alternative data, such as brand surveys, and strong fundamentals were the main drivers for the overweight position.

NOTES TO THE FINANCIAL STATEMENTS

1. General information

The Entity is an open-ended investment company domiciled and incorporated under the laws of Ireland as a public limited company. The Entity is authorised by the CBI and is governed by the provisions of the UCITS Regulations with its registered office at J.P Morgan, 200 Capital Dock, 79 Sir John Rogerson's Quay, Dublin 2, D02 RK57, Ireland.

2. Significant accounting policies

2.1 Basis of preparation

The financial statements of the Entity are prepared in accordance with Financial Reporting Standard 104 Interim Financial Reporting ("FRS 104") applicable in the United Kingdom and Republic of Ireland. The principal accounting policies and estimation techniques are consistent with those applied to the previous annual financial statements with the exception of those outlined below.

All amounts have been rounded to the nearest thousand, unless otherwise indicated.

2.2 Financial instruments

2.2.1 Classification

The Entity classifies its investments in debt instruments, equity instruments, reverse repurchase agreements and derivatives as financial assets or financial liabilities at fair value through profit or loss. These financial assets and financial liabilities are classified as held for trading or designated by the Directors at fair value through profit or loss at inception. All the derivatives investments are held for trading purposes. All other financial assets and financial liabilities including cash, cash equivalents, receivables and payables are classified at amortised cost using the effective interest method.

2.2.2 Fair value estimation

Fair value is the amount for which an asset could be exchanged, a liability settled or an equity instrument granted could be exchanged, between knowledgeable, willing parties in an arm's length transaction. The estimation of fair value, after initial recognition, is determined as follows:

- Investments in debt and equity instruments, exchange traded derivatives and To-Be-Announced ("TBA") contracts which are quoted, listed, traded or dealt on a market or exchange are valued based on quoted market prices which, for the purposes of the financial statements is in line with the valuation methodology prescribed in the Entity's prospectus. Depending on the nature of the underlying investment, the value taken could be either at the closing price, closing mid-market price or bid price on the relevant market.
- Investments in ETFs which are quoted, listed, traded or dealt on a market or exchange are valued based on quoted market prices, except where the Fund typically trades the units held at the latest NAV for that ETF. In such cases, the investment in the ETF is valued based on the latest NAV of the respective ETF.
- Investments in centrally cleared and over-the-counter ("OTC") derivatives and investee collective investment schemes ("CIS") are valued using valuation techniques.
- Investments in reverse repurchase agreements are valued at amortised cost, this method is deemed equivalent to the fair value, given the short-term nature of such investments.

In the case of an investment which is not quoted, listed or dealt on a recognised market, or in respect of which a listed, traded or dealt price or quotation is not available at the time of valuation, the fair value of such investment shall be estimated with care and in good faith by a competent professional person, body, firm or corporation (appointed for such purpose by the Directors in consultation with the Investment Manager and approved for the purpose by the Depositary), and such fair value shall be determined using valuation techniques. The Entity uses a variety of methods and makes assumptions that are based on market conditions existing at each reporting date.

Valuation techniques used for non-standardised financial instruments such as OTC derivatives include those detailed in the fair value hierarchy note, and those used by market participants making the maximum use of market inputs and relying as little as possible on entity-specific inputs.

iSHARES III PLC

NOTES TO THE FINANCIAL STATEMENTS (continued)

2. Significant accounting policies (continued)

2.2 Financial instruments (continued)

2.2.3 Financial derivative and other specific instruments

2.2.3.1 Reverse repurchase agreements and repurchase agreements

When the Fund purchases a financial asset and simultaneously enters into an agreement to resell the same or a substantially similar asset at a fixed price on a future date (reverse repurchase agreements), the arrangement is recognised in the condensed balance sheet as an investment in a reverse repurchase agreement, and a disclosure of the underlying asset received as collateral is made in the notes to the financial statements.

When the Fund sells a financial asset and simultaneously enters into an agreement to repurchase the same or a similar asset at a fixed price on a future date (repurchase agreements), the arrangement is recognised in the condensed balance sheet as a short investment in a repurchase agreement, and the underlying asset is reclassified in the condensed balance sheet as a pledged investment.

3. Financial risks

Each Fund's investment activities expose it to the various types of risk which are associated with the financial instruments and markets in which it invests. The risks are substantially consistent with those disclosed in the previous annual financial statements.

3.1 Market risk arising from price risk

Price risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting similar financial instruments traded in the market. Local, regional or global events such as war, acts of terrorism, the spread of infectious illness or other public health issue, recessions, or other events could have a significant impact on each Fund and the market price of its investments.

3.2 Counterparty credit risk

3.2.1 Issuer credit risk relating to reverse repurchase agreements

Issuer and/or counterparty credit risks in each Fund also arise from its investments in reverse repurchase agreements.

All reverse repurchase agreements are entered into by each Fund with a counterparty under a Global Master Repurchase Agreement ("GMRA") or a Master Repurchase Agreement ("MRA"). All collateral received/posted by each Fund under the GMRA or the MRA is transferred under a title transfer arrangement and is delivered to and held in an account with a tri-party collateral manager in the name of the Depositary on behalf of each Fund. Collateral received is segregated from the assets belonging to each Fund's Depositary.

The following table details the value of the reverse repurchase transaction and associated collateral received.

Fund name	Currency	Value of reverse repurchase agreements	Value of collateral received	Value of reverse repurchase agreements	Value of collateral received

iShares EUR Cash UCITS ETF ¹	EUR	68,000	68,000	-	-

¹The Fund launched during the financial period, hence no comparative data is available.

As at 31 December 2024 (31 December 2023: Nil), all collateral consists largely of debt instruments.

iSHARES III PLC

NOTES TO THE FINANCIAL STATEMENTS (continued)

4. Fair value hierarchy

Each Fund classifies financial instruments measured at fair value using a fair value hierarchy. The fair value hierarchy has the following categories:

Level 1: The unadjusted quoted price in an active market for identical assets or liabilities that the entity can access at the measurement date.

Level 2: Inputs other than quoted prices included within level 1 that are observable (i.e. developed using market data) for the asset or liability, either directly or indirectly. This category includes instruments valued using: quoted prices in active markets for similar instruments; quoted prices for identical or similar instruments in markets that are considered less than active; or other valuation techniques where all significant inputs are directly or indirectly observable from market data.

Level 3: Inputs are unobservable (i.e. for which market data is unavailable) for the asset or liability. This category includes all instruments where the valuation techniques used include inputs not based on market data and these inputs could have a significant impact on the instrument's valuation. This category also includes instruments that are valued based on quoted prices for similar instruments where significant Entity determined adjustments or assumptions are required to reflect differences between the instruments and instruments for which there is no active market.

Specific valuation techniques used to value financial instruments classified as level 2 and/or level 3 include:

- (i) for debt and equity instruments, the use of quoted market prices or dealer quotes for similar instruments;
- (ii) for investments which are a share of participation in an investee collective investment scheme ("CIS") and investments in ETFs where the Fund typically trades the units held at the latest NAV for that ETF, are valued at the unaudited NAV, and where available the independently audited NAV, on the valuation date of such unit of participation as calculated by the administrator of the investee CIS and ETF and in accordance with the requirements of the scheme of which the relevant investment is a share of participation. The unaudited NAV of the underlying investee CIS and ETF is reflected gross of any redemption costs which may potentially arise upon redemption from the underlying CIS and ETF. The unaudited NAV of the underlying investee CIS and ETF may be subject to adjustments upon issuance of their respective independently audited financial statements and such adjustments may be material to the Fund's financial statements;
- (iii) for foreign equities, using independent fair value adjustment factors to reflect the difference between the last market close and the valuation point of each Fund;
- (iv) for defaulted debt instruments, the use of recent transactions and defaulted equity instruments for which market data is unavailable;
- (v) for total return swaps, the value of the estimated cash flows based on the market value of the underlying reference assets or index at the condensed balance sheet date; and
- (vi) for foreign currency forwards, present value of future cash flows based on the forward exchange rates at the condensed balance sheet date.

All of the resulting fair value estimates are included in level 2 except for unlisted equity securities, a contingent consideration receivable and certain derivative contracts, where the fair values have been determined based on present values and the discount rates used were either not market observable or adjusted for counterparty or own credit risk, or certain CISs which have gates or redemption restrictions imposed or that can't be redeemed within 90 days, are included in level 3.

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

iSHARES III PLC

NOTES TO THE FINANCIAL STATEMENTS (continued)

4. Fair value hierarchy (continued)

The determination of what constitutes 'observable' inputs requires significant judgement. The Directors consider observable inputs to be market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

The following tables provide an analysis of each Fund's financial assets and financial liabilities measured at fair value as at 31 December 2024 and 30 June 2024:

NOTES TO THE FINANCIAL STATEMENTS (continued)

5. Operating expenses

The Entity employs an "all in one" fee structure for its Funds, with each Fund paying all of its fees, operating costs and expenses (and its due proportion of any costs and expenses allocated to it) as a single flat fee (the TER). Where a Fund has multiple share classes, any fees, operating costs and expenses which are attributable to a particular share class (rather than the entire Fund) will be deducted from the assets notionally allocated by each Fund to that share class. The TER is calculated in accordance with the CESR/10-674 Committee of European Securities Regulators ("CESR") (European Securities and Markets Authority's ("ESMA") precursor) guidelines on the methodology for calculation of the ongoing charges figure in the KIID or the product page of the website at <https://www.ishares.com>.

The Manager is responsible for discharging all operational expenses, including but not limited to fees and expenses of the Directors, Investment Manager, Depositary, Administrator, Transfer Agent and Registrar from the amounts received by the Manager from the TER. Such operational expenses include regulatory and audit fees but exclude transaction costs and extraordinary legal costs. In the event a Fund's costs and expenses in connection with the operation of the Fund exceed the stated TER, the Manager will discharge an excess amount out of its own assets.

Management fees (inclusive of investment management fees):

The Manager is entitled to an annual fee at rates not exceeding those set out on the following table. These rates are the maximum fee rates as at 31 December 2024:

¹Where a Fund has multiple share classes, any fees, operating costs and expenses which are attributable to a particular share class (rather than the entire Fund) will be deducted from the assets notionally allocated by the Fund to that share class.

²This charge can be up to 1.00%. Any increase in this charge will be subject to prior shareholder approval.

³As this Fund/share class launched during the financial period, the fees, operating costs and expenses used to calculate the TER have been annualised.

Whilst it is anticipated that the TER borne by a Fund or share class shall not exceed the amounts set out above during the life of each Fund or share class (respectively) such amounts may need to be increased. Any such increase will be subject to the prior shareholder approval of the relevant Fund or share class evidenced either by a majority vote at a meeting of shareholders or by a written resolution of all of the shareholders.

As disclosed, no commissions, discounts, brokerages or other special terms have been granted or are payable by the Entity in connection with the issue or sale of any capital of the Entity.

NOTES TO THE FINANCIAL STATEMENTS (continued)

6. Distributions to redeemable shareholders

The Entity may declare and pay dividends on any distributing class of shares in the Entity. In accordance with the prospectus, any dividend which has remained unclaimed for twelve years from the date of its declaration shall be forfeited and cease to remain owing by the Entity to investors and become the property of the relevant Fund.

NOTES TO THE FINANCIAL STATEMENTS (continued)

7. Taxation (continued)

Irish tax

Under current law and practice, the Entity qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. On that basis it is not chargeable to Irish tax on its income or gains. However, Irish tax may arise on the occurrence of a “chargeable event”. A chargeable event includes any distribution payments to shareholders or any encashment, redemption, cancellation or transfer of shares and the holding of shares at the end of each eight year period beginning with the acquisition of such shares.

No Irish tax will arise on the Entity in respect of chargeable events in respect of:

- a) A shareholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997, as amended, are held by the Entity; or the Entity has been authorised by the Irish Revenue to make gross payments in the absence of appropriate declarations; and
- b) Certain exempted Irish tax resident shareholders who have provided the Entity with the necessary signed annual declarations; and
- c) Any transaction (which might otherwise be a chargeable event) in relation to shares held in a recognised clearing system as designated by order of the Irish Revenue Commissioners (such as CREST) will not constitute a chargeable event. It is the current intention of the Directors that all the shares in the Entity will be held in CREST or another recognised clearing system.

Overseas tax

Dividends, interest and capital gains (if any) received on investments made by the Entity may be subject to withholding taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Entity or its shareholders.

For financial reporting purposes, and in accordance with FRS 104, the Entity must recognise a provision for deferred tax payable arising from material timing differences between the taxation of unrealised gains in the financial statements and actual realisable taxable profits.

The Organisation for Economic Co-operation and Development (“OECD”) released Pillar Two Model Rules, which contemplate a global 15% minimum tax rate. The OECD continues to release additional guidance, including administrative guidance on interpretation and application of Pillar Two, and many countries are passing and updating legislation as well as local guidance to comply with Pillar Two.

Based on the available legislation, the Entity concluded there was no material impact on income taxes with respect to Pillar Two for the financial period ended 31 December 2024. The Entity will continue to evaluate the potential future impacts of Pillar Two and will continue to review and monitor the issuance of additional guidance.

8. Share capital

Authorised

The authorised share capital of the Entity is 2 subscriber shares of a par value of EUR1.00 each and 500,000,000,000 participating shares of no par value.

Subscriber shares

2 subscriber shares are currently in issue and are held by the Manager or by nominees of the Manager at 31 December 2024 and 30 June 2024. They do not form part of the NAV of the Entity. They are thus disclosed in the financial statements by way of this note only. In the opinion of the Directors this disclosure reflects the nature of the Entity’s investment business.

Voting rights

The holders of the subscriber shares and redeemable shares shall, on a poll, be entitled to one vote per share.
