INTERIM MANAGEMENT REPORT AND SEMI-ANNUAL REPORTS FOR ISHARES (DE) I INVESTMENTAKTIENGESELLSCHAFT MIT TEILGESELLSCHAFTSVERMÖGEN

Interim management report as at 31/08/2022

1. General provisions

iShares (DE) I Investmentaktiengesellschaft mit Teilgesellschaftsvermögen ("iShares (DE) I") is an investment fund in the form of an externally-managed investment stock company with variable capital as defined by Section 108 Paragraph 1 in conjunction with Section 1 Paragraph 13 of the German Investment Code (Kapitalanlagegesetzbuch – "KAGB"). It was incorporated on 13 October 2008 for an unlimited duration in the form of an umbrella fund. The initial shareholders' capital of the investment stock corporation is divided into 3,000 company shares, exclusively held by BlackRock Asset Management Deutschland AG ("BAMDE"). The Group parent company of all BlackRock companies is BlackRock Inc., New York, USA.

1.1. Business activities

The objective of the Company is to invest and manage its own funds for the benefit of the shareholders, in accordance with a fixed investment strategy and the principle of risk diversification for collective investment, in accordance with Sections 162 to 213 of the KAGB, and with the respectively applicable investment conditions.

iShares (DE) I is structured as an investment stock company (Investmentaktiengesellschaft) in the form of an umbrella construction. Since its formation on 13/10/2008 up to 31/08/2022, iShares (DE) I has set up twenty-two sub-fund accounts ("SFA"). These are the founding sub-fund iShares I Founder Shares and twenty-one other sub-funds authorised for distribution. In addition, two share classes each were launched in two SFA's.

As of 31/08/2022, the share capital contained in the iShares I Founder Shares sub-fund was invested in six of the Group's own investment fund units, in order to comply with the requirements of Section 206 (4) of the German Investment Code. The ordinary net income calculated in the reporting period will be reinvested in the sub-funds after the corresponding tax deduction, including solidarity surcharge, at the end of the financial year.

The twenty-one sub-funds admitted for distribution focus on replicating individual segments of the capital market that are tracked in an index. The aim is to achieve a low tracking error by replicating the index as closely as possible.

State Street Bank International GmbH, Munich was appointed as custodian bank under the terms of a custodian bank agreement.

1.2. Third-party management agreement

iShares (DE) I has appointed BAMDE as an external Management Company as defined in Section 112 Para. 1 KAGB. Under the third-party management agreement concluded with BAMDE, the external Management Company is responsible for the investment and administration of the Company's funds and for carrying out the general management activities of iShares (DE) I, including distribution. The third-party management agreement is for an indefinite period and may be terminated by either party with a notification period of 12 months to the end of each calendar month.

In accordance with this third-party management agreement, BAMDE may, in particular, take all the investment decisions and represent iShares (DE) I when buying or selling assets. BAMDE is also responsible for exercising voting rights. BAMDE will provide the necessary materials and staff to carry out the general management duties. The services provided by BAMDE include, in particular, finance, fund administration and controlling, legal and product governance, product development, public relations, marketing and distribution. BAMDE manages the sub-funds in line with the funds it manages itself.

The risk management system of iShares (DE) I, including the risk management of the sub-fund assets which has been transferred to BAMDE, has been correspondingly integrated into the risk management system of the Management Company. The risk management system of BAMDE ensures that the risks associated with the investment positions as well as their respective effect on the entire risk profile for the Investment Stock Company can be monitored and measured at any time.

BAMDE receives a management fee from the respective sub-fund for its work under the third-party management agreement in accordance with the respective sub-fund's regulations on costs. BAMDE's liability is limited to the fulfillment of its obligations under the third-party management agreement. In particular, BAMDE is not liable for performance or a desired investment result.

iShares (DE) I has not signed any outsourcing agreements. Under the third-party management agreement, BAMDE, as Management Company, may partially or completely outsource contractual services to external service providers. BAMDE outsourced fund administration, inter alia, to State Street Bank International GmbH, Munich.

2. Economic report

Development of the industry and the economy as a whole

Economic output in Germany stagnated in the second quarter of 2022. According to the Federal Statistical Office's flash estimate, seasonally adjusted real gross domestic product (GDP) stalled compared with the previous quarter. Growth for the first quarter was revised significantly upwards to 0.8% as against the previous publication. This meant that GDP was recently barely short of its level in the fourth quarter of 2019, the quarter before the outbreak of the coronavirus crisis. The economy was caught between opposing forces in the second quarter. Although the elimination of most coronavirus mitigation measures lent a strong boost to previously beleaguered service providers, surging prices and uncertainty associated with the war in Ukraine put pressure on households and enterprises. Industry was also confronted with weaker demand and the persistence of marked supply bottlenecks. Shortages of materials weighed on the construction sector, too, which was already suffering from a labour mismatch. Furthermore, construction activity had expanded sharply in the first quarter owing to favourable weather conditions, resulting in a countermovement in the second quarter. Unfavourable developments in the gas market since mid-June have been dampening the outlook for economic activity. Overall, German economic output could stagnate again in the third quarter, while at the same time the probability of GDP declining in the fourth quarter of 2022 and the first quarter of 2023 has increased significantly.

Economic strains also left their mark on the labour market in the second quarter. The labour market's rapid catch-up process following the lifting of pandemic restrictions lost considerable momentum. Even so, employment continued to rise. Only relatively little use of short-time work was still being made. Whilst unemployment increased considerably starting in early June 2022, this was due solely to the fact that Ukrainian refugees were included in German social security legislation. Positive expectations regarding future developments were pared back slightly.

The ongoing loss of purchasing power due to high inflation is likely to play an increasingly important role in upcoming wage negotiations. The trade unions' minimum demand is compensation for the high inflation rates. In the metal-working and electrical engineering industry and at Volkswagen AG, the IG-Metall trade union demanded a wage increase of 8% to apply for a 12-month period. Wage increases will be dampened somewhat by the ongoing high level of uncertainty, concerns about jobs and the limited scope for income distribution resulting from higher import prices. Nonetheless, wage settlements will probably be higher than in the second quarter because of growing labour market shortages, amongst other factors.

Fiscal policy continues to stabilise macroeconomic developments, supporting households and enterprises with numerous measures this year as well. Nevertheless, the deficit is projected to be significantly lower than in 2021 (3.7% of GDP) as the fiscal burden caused by the coronavirus crisis eases. In the first half of the year, this was reflected in the sharp rise in tax revenue and the fall in pandemic expenditure. Accordingly, the budget outturns of central government, state governments and the Federal Employment Agency improved considerably in the financial statistics. As things currently stand, new burdens from the war in Ukraine and measures to offset high prices will not outweigh this recovery.¹

BAMDE has a broad product portfolio, which reflects very well the overall economy in Germany and Europe. Good economic development also has a positive effect on the development of administered products and therefore is crucial to our business development.

In the first half of 2022, investors ordered mutual fund units worth €240 billion gross, despite the Ukraine war, inflation worries and recession fears. This was only 2.2 percent less than in the previous half-year, although gross sales rose by 24.9 percent at the same time. Investors obviously continue to see opportunities in fund investments despite the stress phase on the financial markets. A look back shows that the current development is not an exceptional case: Due to the Corona pandemic, there was a net outflow of 21.6 billion euros from mutual funds in March 2020. In contrast, however, gross inflows rose to a record level of 68.8 billion euros. This reflected high trading activity. Against the backdrop of the abrupt change in the economic situation, many investors shifted funds into lower-risk funds. Even at the height of the global financial crisis, when investors withdrew a net 45.8 billion euros from mutual funds, gross new business remained at a roughly constant level. On trend, gross sales of mutual funds have increased by over 600 million euros per year since 2004. Due to the zero-interest rate environment of recent years and the rapid price recovery after the stock market drop in March 2020, many private investors have rediscovered fund investment.²

In the first half of 2022, the European market for Exchange Traded Products (ETPs) continued to develop dynamically. ETPs are selected financial instruments, such as ETFs, that are traded throughout the day in national stock exchanges. In H1 2022, iShares achieved net inflows of 31.7 billion US dollars, or 30.3 billion euros, in the entire EMEA region (Europe, Middle East & Africa) (previous year: USD 44.5 billion, or EUR 37.5 billion). This is the highest percentage of inflows into ETFs and the highest market share in the EMEA region (43.9% vs. 43.7% in the previous first half of the year).³

Exchange-traded funds (ETFs) continue to be an important part of Germany's investment funds industry. As of 31 August 2022, the investment volume of the 56 ETFs launched and managed by BAMDE in Germany under the iShares brand totalled approx. USD 39.6 billion, or EUR 39.3 billion. The iShares STOXX Europe 600 UCITS ETF (DE) is the largest mutual fund launched and managed by BAMDE, with a volume of USD 5.2 billion or EUR 5.2 billion (as of 31 August 2022).

3. The Company's Situation

3.1. Presentation of the sub-funds

The Directive-compliant iShares I Founder Shares founding sub-fund comprises the initial capital of its founder, BAMDE, and is allocated to investment assets. The initial shareholders' capital amounted to EUR 300,000 divided into 3,000 registered company shares, which exclusively represent rights to the sub-fund iShares I Founder Shares. Each company share gives one vote in the Annual General Meeting and is issued as a non-par value share. All of the 3,000 iShares I Founder Shares with a value of EUR 286,740.42 as at 31/08/2022 are held by BlackRock Asset Management Deutschland AG. In accordance with the investment conditions, the Management Company receives an annual management fee of 0.09% based on the sub-fund's net asset value determined on each exchange trading day. The "iShares I Founder Shares" sub-fund generated ordinary net income of EUR 281.38 in the reporting period.

According to the investment conditions of the iShares MSCI Brazil UCITS ETF (DE) sub-fund, the Management Company receives an annual management fee of 0.30% based on the sub-fund's net asset value determined on each exchange trading day. For the remaining twenty sub-funds, the Management Company BAMDE receives for the management of these sub-funds a flat fee of 0.45% per annum based on the net asset value of the sub-fund determined each exchange trading day. The twenty-one iShares (DE) I sub-funds admitted for distribution are fully replicating open-ended ETFs.

The number of non-voting investment shares and the total volume as at 31/08/2022, the ordinary net income and the interim distribution during the financial year from 01/03/2022 through 31/08/2022 of the sub-funds - on share class level - admitted for distribution are as follows:

3.3. Income

The major income components for the fund assets are dividends from domestic and foreign issuers. After deducting the management fee and other expenses, net ordinary income from all sub-funds amounted to EUR 354,091,793.38. After taking into account realized gains and losses on disposals, the realised net profit for the financial year amounted to EUR 473,621,816.35.

4. Risk Report

4.1 Operative organisation

The Management Board of the external Management Company, BlackRock Asset Management Deutschland AG, has overall responsibility for implementing an appropriate risk management system. The Management Board of BAMDE is supported in the implementation of risk management by the Chief Risk Officer (CRO), Mr Rayk Philipp, who is responsible for the coordination and implementation of risk management within BlackRock Asset Management Deutschland AG. The CRO acts hierarchically and functionally independently of the operational business and reports directly to the Chairman of the BAMDE Management Board.

INTERIM MANAGEMENT REPORT AND SEMI-ANNUAL REPORTS FOR ISHARES (DE) I INVESTMENTAKTIENGESELLSCHAFT MIT TEILGESELLSCHAFTSVERMÖGEN

4.2 Methods and objectives of the risk management system

4.2.1 General requirements

The risk management system is ensured by the external Management Company BAMDE by means of the third-party management agreement. It is thus in conformity with the processes of the internal control and risk management systems, which are also applicable to the funds launched and managed by BAMDE.

The risk management system covers all areas of the external Management Company, as well as the level of assets under management, including the sub-funds. The main goal is the ongoing assurance of the interests of the investors. In addition to ensuring adequate organisational conditions, particular focus is placed on the lasting, sensible and appropriate handling of the risks associated with day-to-day business (risk culture). The central positioning of risk management within the external Management Company, combined with its relevance to all areas of the Company, ensures a systematic and consistent management of risks.

In order to be able to handle current and potential risks for investors in the sub-fund and the Company as efficiently and effectively as possible, risk management focuses on identifying potential risks as early as possible as well as dealing with any encountered risks in an appropriate and transparent manner. Early detection of potential risks should enable them to be adequately analysed and, as a result, to be effectively managed. For risk situations that have already occurred, it is crucial for them to be handled in an appropriate and transparent manner.

The external Management Company's local risk management system is integrated into the BlackRock Group's global risk management system. In order to implement Group-wide standards while observing local legal and supervisory requirements, the Company utilises established systems and processes from the global risk management system.

4.2.2 Business and risk strategy

The conditions for dealing with risk are defined by the external Management Company's risk strategy. The risk strategy, which is reviewed at least once a year and adapted if necessary, is based on the Management Company's business strategy, which is also reviewed annually. In addition, a risk policy was implemented that describes the risk management and controlling processes at the level of the investment funds and sub-funds. The risk strategy and risk policy are supplemented by further instructions and process descriptions regarding individual components of the risk management system.

4.2.3 Risk and Control Committee

BAMDE, as an external Management Company, maintains a Risk and Control Committee (RCC) under the leadership of the CRO and the Compliance Officer. The RCC is an essential component in the governance and operational implementation of the risk management system within BAMDE. In accordance with the rules of internal procedure of the RCC (as of January 2022), at least six meetings per calendar year must be held. Nine meetings of the Committee took place during the period under review. The heads of the Portfolio Engineering, GAAPS, GPO, Tax, Legal departments as well as representatives from the areas of finance oversight and human resources are always represented in this Committee. All members of the Management Board of the Company are represented as "standing invitees" and can attend all meetings. If required, representatives of the non-permanently represented areas can be consulted. Members of the Committee are encouraged to report on potential risks or developments involving risks. In addition, regular discussions are held on the occurrence of errors and damages, their causes and effects as well as what measures have been taken.

Moreover, the RCC deals with current issues or initiatives in the areas of risk management and compliance. These are presented by the CRO or the compliance officers and discussed jointly.

4.2.4 Risk management at the level of the external Management Company - Operational risks

A key component in the management and controlling of operational risks is the early warning system, comprising the Key Risk Indicator System and ad hoc reporting. In addition, all cases of damage identified are subject to analysis and documentation. The performance of Risk and Control Self Assessments serves to consistently identify major, relevant risks across various areas of the Company.

The purpose of the Key Risk Indicator System is to regularly monitor risks in all business areas. It is supplemented by the ad hoc reporting system. Using this instrument, significant developments involving risks and affecting the sub-funds or Company can be immediately escalated, as required, in order to appropriately take into account the duty to report critical situations immediately.

Damages and cases of operational failure (operating events) are documented in detail in a loss database. This also takes place for cases of damage that have no financial consequences. As part of treatment for cases of damage or cases of operational failure, any necessary process adjustments are also mentioned. This should result in a reduction in the probability or impact of a repeated occurrence.

Another instrument used to identify and manage operational risk is the "Risk and Control Self-Assessment" (RCSA).

This constitutes a risk inventory to determine the key risks in the area being examined. Corresponding controls in place are compared to key risks identified. By means of evaluating the design and reliability of a control, the control efficiency per risk as well as on aggregate level is determined for the area of business inspected. The control efficiency and amount of residual risk identified is then used to determine any required action.

In addition, the risk management function is significantly involved in carrying out planned outsourcing.

It is the CRO's responsibility to carry out and coordinate an outsourcing risk analysis. This serves to determine any relevant risks related to outsourcing initiatives. A decision model is created for the Management Board based on the results of this analysis.

INTERIM MANAGEMENT REPORT AND SEMI-ANNUAL REPORTS FOR ISHARES (DE) I INVESTMENTAKTIENGESELLSCHAFT MIT TEILGESELLSCHAFTSVERMÖGEN

4.2.5 Risk management at the level of the sub-funds

Market risk relating to sub-funds is monitored on a daily basis by verifying fund leverage using the simple approach as per Section 15 et seq. of the German Derivatives Ordinance (DerivateV). In order to ensure compliance with legal and regulatory limits, more restrictive limits are used internally. Relative market risk is monitored through regular monitoring of the tracking error as per the recommendations of the ESMA Guidelines on ETFs and other UCITS issues (ESMA/2014/937).

Furthermore, for sub-funds that replicate an equity index, the duplication percentage is monitored daily. Global processes and units within the BlackRock Group are used for monitoring and managing counterparty risk. All counterparties for the sub-funds (so-called Authorised Participants) are constantly monitored using the Group-wide capacities of global credit risk management.

Liquidity risk is monitored at the level of sub-funds in accordance with the requirements of Section 30 of the German Capital Investment Code (KAGB). The liquidity management system ensures that the liquidity risks of sub-funds are monitored on a regular basis. In addition, liquidity risk stress tests are regularly carried out.

4.3 Risk reporting

The Company's Management Board receives a quarterly risk report in which the Risk Manager details the Company's current risk profile and that of its managed sub-funds. In addition to presenting the relevant risks, if necessary, the risk report may also contain recommendations by the Risk Manager, who is independent from the operational departments. Ad hoc reporting outside of the quarterly reporting cycle is used to report any significant developments involving risks for the managed sub-funds or the Company that require immediate escalation to the Management Board.

4.4 Potential economic risks

The COVID-19 pandemic, in particular due to the possible occurrence of other virus variants, such as of the Omicron variant, will continue to contribute to uncertainty with regard to macroeconomic development, as further impairments of economic activity cannot be ruled out. Uncertainties also exist in the further development of inflation and the corresponding response of the central banks.

With our wide range of products geared towards the interests of investors and the market, we consider ourselves well-equipped to deal with competition in the future even though the persistently low interest rate level, which increases investors' cost sensitivity, and the increasing competitive pressure resulting from the market entry of additional and in some cases large competitors, for example, increase the pressure on margins in the asset management industry. In order to remain market leader in the future despite the increasing level of competition on the ETF market, we are planning a host of client-group specific and individualised activities for 2022.

4.5 Potential legal risks

No potential risk can be identified under the current legal and tax framework. Changes in this framework could result in a different assessment.

4.6 Operational functions

The external Management Company BAMDE takes account of operational risks through its organisational and technical procedures and staff instructions. BAMDE possesses the appropriate data acquisition, management and control instruments for the risks indicated. In the operating model, important parts are outsourced within the Group and to external service providers. In order to appropriately control the operational risks arising from the outsourcing relationships, BAMDE has created an outsourcing controlling framework that is linked to the risk management system.

4.7 Other risks

Russian invasion of Ukraine

Since the start of the Russian Federation's invasion of the sovereign neighboring state of Ukraine on 24 February 2022, economic sanctions against Russia that have already been in place since 2014 have been significantly expanded. In addition to the European Union, these sanctions have also been enacted by other international organisations and nation states, such as the United Kingdom, Norway and Switzerland, against companies, individuals or officials. The sanctions are supplemented by further directives and regulatory measures, which have significantly restricted trading in Russian securities, among other things. The long-term consequences of the conflict are difficult to assess at this time. The sub-funds had no direct exposure to Russian or Ukrainian securities as at the reporting date.

5. Statement on the appropriateness of legal transactions with affiliated companies pursuant to Section 312 Para. 3 of the German Stock Corporation Act (Aktiengesetz – AktG)

The Management Board hereby declares that for the legal transactions listed in the report on relations with affiliated companies the Company agreed/received appropriate compensation for each legal transaction under the circumstances known to the Management Board at the time such transactions were undertaken and that the Company neither took nor omitted to take any measures as defined in Section 312 of the AktG.

2. Accounting and valuation principles

Valuation of the investment fund units in the "iShares I Founder Shares" sub-fund and the equities and derivatives in the other twenty-one sub-funds was carried out at the last known stock exchange prices or those determined on 31/08/2022. Securities in the twenty-one exchange-traded sub-funds as at the reporting date were valued without exception on the basis of prices traded on the stock exchange. Assets not admitted for trading on stock exchanges nor admitted to another regulated market or included in such market, or for which no tradable value is available, are valued at current market values, which shall be assessed with due care using appropriate valuation models and taking into consideration current market conditions.

Investment fund units are generally valued at their last determined redemption price or the last available traded price which ensures a reliable valuation. If these values are not available, investment fund units are valued at their current market value, assessed with due care using appropriate valuation models and taking into consideration the current overall market situation.

Derivatives admitted for trading on a stock exchange or another regulated market are valued at the closing price on the relevant valuation date. Cash in bank accounts and existing receivables are valued at their current nominal value. Existing liabilities are reported at the amounts payable.

Securities not denominated in euros are converted at the WM11_USD_Cross exchange rate on the same day. The iShares MSCI Brazil UCITS ETF (DE) sub-fund was also converted at the same daily WM11_USD_Cross exchange rate.

Other information

Number of fund units in circulation and value of a fund unit on the reporting date pursuant to Section 16 Para. 1 No. 1 of the German Capital Investment Accounting and Valuation Ordinance (KARBV)

Share value	EUR	95.58
Shares in circulation	Units	3,000

Information on the valuation process for assets pursuant to Section 16 Para. 1 No. 2 KARBV

Security prices and market prices

The sub-fund assets are valued on the basis of the following market prices:

Investment fund units: Latest determined redemption prices or latest available tradable prices

The valuation of assets generally took place during the financial year and at the balance sheet date on the basis of the last traded stock exchange price.

Assets not admitted for trading on stock exchanges nor admitted to another regulated market or included in such market, or for which no tradable value is available, are valued at current market values, which shall be assessed with due care using appropriate valuation models and taking into consideration current market conditions.

Investment fund units are generally valued at their last determined redemption price or the last available traded price which ensures a reliable valuation. If these values are not available, investment fund units are valued at their current market value, assessed with due care using appropriate valuation models and taking into consideration the current overall market situation.

Money in bank accounts and existing receivables are valued at their current nominal value. Existing liabilities are reported at the amounts payable.

Further information necessary for understanding the report pursuant to Section 7 No. 9 d) KARBV

Explanation of the calculation of net change in unrealised gains and losses

Determination of net change in unrealised gains and losses takes place by means of comparing, in each financial year, the valuations of assets included in the unit price with the relevant historical purchase prices, the level of the positive differences in the sum of unrealised gains included, the level of the negative differences in the sum of unrealised losses included and by determining the net changes from a comparison of the sum totals at the end of the financial year with those at the beginning.

Additional notes in accordance with Regulation (EU) 2015/2365 on securities financing transactions

In the period under review, no transactions as defined by Article 3 (11) and (18) of Regulation (EU) 2015/2365 on transparency of securities financing transactions and of reuse and amending Regulation (EU) No 648/2012 were carried out, i.e. securities financing transactions or total return swaps.

Share value	USD	32.82
Shares in circulation	Units	45,400,000

Information on the valuation process for assets pursuant to Section 16 Para. 1 No. 2 KARBV

Security prices and market prices

The sub-fund assets are valued on the basis of the following market prices:

Derivatives:	Closing prices on the respective valuation dates
All securities:	Closing prices on the respective valuation dates

The valuation of assets generally took place during the financial year and at the balance sheet date on the basis of the last traded stock exchange price.

Assets not admitted for trading on stock exchanges nor admitted to another regulated market or included in such market, or for which no tradable value is available, are valued at current market values, which shall be assessed with due care using appropriate valuation models and taking into consideration current market conditions.

Derivatives admitted for trading on a stock exchange or another regulated market are valued at the closing price on the relevant valuation date.

Money in bank accounts and existing receivables are valued at their current nominal value. Existing liabilities are reported at the amounts payable.

Explanation of the calculation of net change in unrealised gains and losses

Determination of net change in unrealised gains and losses takes place by means of comparing, in each financial year, the valuations of assets included in the unit price with the relevant historical purchase prices, the level of the positive differences in the sum of unrealised gains included, the level of the negative differences in the sum of unrealised losses included and by determining the net changes from a comparison of the sum totals at the end of the financial year with those at the beginning.

Additional notes in accordance with Regulation (EU) 2015/2365 on securities financing transactions

In the period under review, no transactions as defined by Article 3 (11) and (18) of Regulation (EU) 2015/2365 on transparency of securities financing transactions and of reuse and amending Regulation (EU) No 648/2012 were carried out, i.e. securities financing transactions or total return swaps.

Information on the valuation process for assets pursuant to Section 16 Para. 1 No. 2 KARBV

Security prices and market prices

The sub-fund assets are valued on the basis of the following market prices:

Derivatives:	Closing prices on the respective valuation dates
All securities:	Closing prices on the respective valuation dates

The valuation of assets generally took place during the financial year and at the balance sheet date on the basis of the last traded stock exchange price.

Assets not admitted for trading on stock exchanges nor admitted to another regulated market or included in such market, or for which no tradable value is available, are valued at current market values, which shall be assessed with due care using appropriate valuation models and taking into consideration current market conditions.

Derivatives admitted for trading on a stock exchange or another regulated market are valued at the closing price on the relevant valuation date.

Money in bank accounts and existing receivables are valued at their current nominal value. Existing liabilities are reported at the amounts payable.

Tracking error level at the end of the reporting period pursuant to Section 16 Para. 2 No. 1 KARBV 0.94 percentage points
Due to the new launch of this share class in April 2022, a data history of 3 years is not yet available for the calculation of the realised tracking error. The difference between the estimated tracking error and the actual tracking error is therefore not meaningful.

Share class: iShares STOXX Europe 600 Automobiles & Parts UCITS ETF (DE) EUR (Dist)

Tracking error level at the end of the reporting period pursuant to Section 16 Para. 2 No. 1 KARBV 0.34 percentage points

Further information necessary for understanding the report pursuant to Section 7 No. 9 d) KARBV

Explanation of the calculation of net change in unrealised gains and losses

Determination of net change in unrealised gains and losses takes place by means of comparing, in each financial year, the valuations of assets included in the unit price with the relevant historical purchase prices, the level of the positive differences in the sum of unrealised gains included, the level of the negative differences in the sum of unrealised losses included and by determining the net changes from a comparison of the sum totals at the end of the financial year with those at the beginning.

Additional notes in accordance with Regulation (EU) 2015/2365 on securities financing transactions

In the period under review, no transactions as defined by Article 3 (11) and (18) of Regulation (EU) 2015/2365 on transparency of securities financing transactions and of reuse and amending Regulation (EU) No 648/2012 were carried out, i.e. securities financing transactions or total return swaps.

Information on the valuation process for assets pursuant to Section 16 Para. 1 No. 2 KARBV

Security prices and market prices

The sub-fund assets are valued on the basis of the following market prices:

Derivatives:	Closing prices on the respective valuation dates
All securities:	Closing prices on the respective valuation dates

The valuation of assets generally took place during the financial year and at the balance sheet date on the basis of the last traded stock exchange price.

Assets not admitted for trading on stock exchanges nor admitted to another regulated market or included in such market, or for which no tradable value is available, are valued at current market values, which shall be assessed with due care using appropriate valuation models and taking into consideration current market conditions.

Derivatives admitted for trading on a stock exchange or another regulated market are valued at the closing price on the relevant valuation date.

Money in bank accounts and existing receivables are valued at their current nominal value. Existing liabilities are reported at the amounts payable.

Explanation of the calculation of net change in unrealised gains and losses

Determination of net change in unrealised gains and losses takes place by means of comparing, in each financial year, the valuations of assets included in the unit price with the relevant historical purchase prices, the level of the positive differences in the sum of unrealised gains included, the level of the negative differences in the sum of unrealised losses included and by determining the net changes from a comparison of the sum totals at the end of the financial year with those at the beginning.

Additional notes in accordance with Regulation (EU) 2015/2365 on securities financing transactions

In the period under review, no transactions as defined by Article 3 (11) and (18) of Regulation (EU) 2015/2365 on transparency of securities financing transactions and of reuse and amending Regulation (EU) No 648/2012 were carried out, i.e. securities financing transactions or total return swaps.

Information on the valuation process for assets pursuant to Section 16 Para. 1 No. 2 KARBV

Security prices and market prices

The sub-fund assets are valued on the basis of the following market prices:

Derivatives:	Closing prices on the respective valuation dates
All securities:	Closing prices on the respective valuation dates

The valuation of assets generally took place during the financial year and at the balance sheet date on the basis of the last traded stock exchange price.

Assets not admitted for trading on stock exchanges nor admitted to another regulated market or included in such market, or for which no tradable value is available, are valued at current market values, which shall be assessed with due care using appropriate valuation models and taking into consideration current market conditions.

Derivatives admitted for trading on a stock exchange or another regulated market are valued at the closing price on the relevant valuation date.

Money in bank accounts and existing receivables are valued at their current nominal value. Existing liabilities are reported at the amounts payable.

Explanation of the calculation of net change in unrealised gains and losses

Determination of net change in unrealised gains and losses takes place by means of comparing, in each financial year, the valuations of assets included in the unit price with the relevant historical purchase prices, the level of the positive differences in the sum of unrealised gains included, the level of the negative differences in the sum of unrealised losses included and by determining the net changes from a comparison of the sum totals at the end of the financial year with those at the beginning.

Additional notes in accordance with Regulation (EU) 2015/2365 on securities financing transactions

In the period under review, no transactions as defined by Article 3 (11) and (18) of Regulation (EU) 2015/2365 on transparency of securities financing transactions and of reuse and amending Regulation (EU) No 648/2012 were carried out, i.e. securities financing transactions or total return swaps.

Information on the valuation process for assets pursuant to Section 16 Para. 1 No. 2 KARBV

Security prices and market prices

The sub-fund assets are valued on the basis of the following market prices:

Derivatives:	Closing prices on the respective valuation dates
All securities:	Closing prices on the respective valuation dates

The valuation of assets generally took place during the financial year and at the balance sheet date on the basis of the last traded stock exchange price.

Assets not admitted for trading on stock exchanges nor admitted to another regulated market or included in such market, or for which no tradable value is available, are valued at current market values, which shall be assessed with due care using appropriate valuation models and taking into consideration current market conditions.

Derivatives admitted for trading on a stock exchange or another regulated market are valued at the closing price on the relevant valuation date.

Money in bank accounts and existing receivables are valued at their current nominal value. Existing liabilities are reported at the amounts payable.

Explanation of the calculation of net change in unrealised gains and losses

Determination of net change in unrealised gains and losses takes place by means of comparing, in each financial year, the valuations of assets included in the unit price with the relevant historical purchase prices, the level of the positive differences in the sum of unrealised gains included, the level of the negative differences in the sum of unrealised losses included and by determining the net changes from a comparison of the sum totals at the end of the financial year with those at the beginning.

Additional notes in accordance with Regulation (EU) 2015/2365 on securities financing transactions

In the period under review, no transactions as defined by Article 3 (11) and (18) of Regulation (EU) 2015/2365 on transparency of securities financing transactions and of reuse and amending Regulation (EU) No 648/2012 were carried out, i.e. securities financing transactions or total return swaps.

Information on the valuation process for assets pursuant to Section 16 Para. 1 No. 2 KARBV

Security prices and market prices

The sub-fund assets are valued on the basis of the following market prices:

Derivatives:	Closing prices on the respective valuation dates
All securities:	Closing prices on the respective valuation dates

The valuation of assets generally took place during the financial year and at the balance sheet date on the basis of the last traded stock exchange price.

Assets not admitted for trading on stock exchanges nor admitted to another regulated market or included in such market, or for which no tradable value is available, are valued at current market values, which shall be assessed with due care using appropriate valuation models and taking into consideration current market conditions.

Derivatives admitted for trading on a stock exchange or another regulated market are valued at the closing price on the relevant valuation date.

Money in bank accounts and existing receivables are valued at their current nominal value. Existing liabilities are reported at the amounts payable.

Explanation of the calculation of net change in unrealised gains and losses

Determination of net change in unrealised gains and losses takes place by means of comparing, in each financial year, the valuations of assets included in the unit price with the relevant historical purchase prices, the level of the positive differences in the sum of unrealised gains included, the level of the negative differences in the sum of unrealised losses included and by determining the net changes from a comparison of the sum totals at the end of the financial year with those at the beginning.

Additional notes in accordance with Regulation (EU) 2015/2365 on securities financing transactions

In the period under review, no transactions as defined by Article 3 (11) and (18) of Regulation (EU) 2015/2365 on transparency of securities financing transactions and of reuse and amending Regulation (EU) No 648/2012 were carried out, i.e. securities financing transactions or total return swaps.

Shares in circulation	Units	8,230,000

Information on the valuation process for assets pursuant to Section 16 Para. 1 No. 2 KARBV

Security prices and market prices

The sub-fund assets are valued on the basis of the following market prices:

Derivatives:	Closing prices on the respective valuation dates
All securities:	Closing prices on the respective valuation dates

The valuation of assets generally took place during the financial year and at the balance sheet date on the basis of the last traded stock exchange price.

Assets not admitted for trading on stock exchanges nor admitted to another regulated market or included in such market, or for which no tradable value is available, are valued at current market values, which shall be assessed with due care using appropriate valuation models and taking into consideration current market conditions.

Derivatives admitted for trading on a stock exchange or another regulated market are valued at the closing price on the relevant valuation date.

Money in bank accounts and existing receivables are valued at their current nominal value. Existing liabilities are reported at the amounts payable.

Explanation of the calculation of net change in unrealised gains and losses

Determination of net change in unrealised gains and losses takes place by means of comparing, in each financial year, the valuations of assets included in the unit price with the relevant historical purchase prices, the level of the positive differences in the sum of unrealised gains included, the level of the negative differences in the sum of unrealised losses included and by determining the net changes from a comparison of the sum totals at the end of the financial year with those at the beginning.

Additional notes in accordance with Regulation (EU) 2015/2365 on securities financing transactions

In the period under review, no transactions as defined by Article 3 (11) and (18) of Regulation (EU) 2015/2365 on transparency of securities financing transactions and of reuse and amending Regulation (EU) No 648/2012 were carried out, i.e. securities financing transactions or total return swaps.

Information on the valuation process for assets pursuant to Section 16 Para. 1 No. 2 KARBV

Security prices and market prices

The sub-fund assets are valued on the basis of the following market prices:

Derivatives:	Closing prices on the respective valuation dates
All securities:	Closing prices on the respective valuation dates

The valuation of assets generally took place during the financial year and at the balance sheet date on the basis of the last traded stock exchange price.

Assets not admitted for trading on stock exchanges nor admitted to another regulated market or included in such market, or for which no tradable value is available, are valued at current market values, which shall be assessed with due care using appropriate valuation models and taking into consideration current market conditions.

Derivatives admitted for trading on a stock exchange or another regulated market are valued at the closing price on the relevant valuation date.

Money in bank accounts and existing receivables are valued at their current nominal value. Existing liabilities are reported at the amounts payable.

Explanation of the calculation of net change in unrealised gains and losses

Determination of net change in unrealised gains and losses takes place by means of comparing, in each financial year, the valuations of assets included in the unit price with the relevant historical purchase prices, the level of the positive differences in the sum of unrealised gains included, the level of the negative differences in the sum of unrealised losses included and by determining the net changes from a comparison of the sum totals at the end of the financial year with those at the beginning.

Additional notes in accordance with Regulation (EU) 2015/2365 on securities financing transactions

In the period under review, no transactions as defined by Article 3 (11) and (18) of Regulation (EU) 2015/2365 on transparency of securities financing transactions and of reuse and amending Regulation (EU) No 648/2012 were carried out, i.e. securities financing transactions or total return swaps.

Information on the valuation process for assets pursuant to Section 16 Para. 1 No. 2 KARBV

Security prices and market prices

The sub-fund assets are valued on the basis of the following market prices:

Derivatives:	Closing prices on the respective valuation dates
All securities:	Closing prices on the respective valuation dates

The valuation of assets generally took place during the financial year and at the balance sheet date on the basis of the last traded stock exchange price.

Assets not admitted for trading on stock exchanges nor admitted to another regulated market or included in such market, or for which no tradable value is available, are valued at current market values, which shall be assessed with due care using appropriate valuation models and taking into consideration current market conditions.

Derivatives admitted for trading on a stock exchange or another regulated market are valued at the closing price on the relevant valuation date.

Money in bank accounts and existing receivables are valued at their current nominal value. Existing liabilities are reported at the amounts payable.

Explanation of the calculation of net change in unrealised gains and losses

Determination of net change in unrealised gains and losses takes place by means of comparing, in each financial year, the valuations of assets included in the unit price with the relevant historical purchase prices, the level of the positive differences in the sum of unrealised gains included, the level of the negative differences in the sum of unrealised losses included and by determining the net changes from a comparison of the sum totals at the end of the financial year with those at the beginning.

Additional notes in accordance with Regulation (EU) 2015/2365 on securities financing transactions

In the period under review, no transactions as defined by Article 3 (11) and (18) of Regulation (EU) 2015/2365 on transparency of securities financing transactions and of reuse and amending Regulation (EU) No 648/2012 were carried out, i.e. securities financing transactions or total return swaps.

Shares in circulation	Units	5,036,750

Information on the valuation process for assets pursuant to Section 16 Para. 1 No. 2 KARBV

Security prices and market prices

The sub-fund assets are valued on the basis of the following market prices:

Derivatives:	Closing prices on the respective valuation dates
All securities:	Closing prices on the respective valuation dates

The valuation of assets generally took place during the financial year and at the balance sheet date on the basis of the last traded stock exchange price.

Assets not admitted for trading on stock exchanges nor admitted to another regulated market or included in such market, or for which no tradable value is available, are valued at current market values, which shall be assessed with due care using appropriate valuation models and taking into consideration current market conditions.

Derivatives admitted for trading on a stock exchange or another regulated market are valued at the closing price on the relevant valuation date.

Money in bank accounts and existing receivables are valued at their current nominal value. Existing liabilities are reported at the amounts payable.

Explanation of the calculation of net change in unrealised gains and losses

Determination of net change in unrealised gains and losses takes place by means of comparing, in each financial year, the valuations of assets included in the unit price with the relevant historical purchase prices, the level of the positive differences in the sum of unrealised gains included, the level of the negative differences in the sum of unrealised losses included and by determining the net changes from a comparison of the sum totals at the end of the financial year with those at the beginning.

Additional notes in accordance with Regulation (EU) 2015/2365 on securities financing transactions

In the period under review, no transactions as defined by Article 3 (11) and (18) of Regulation (EU) 2015/2365 on transparency of securities financing transactions and of reuse and amending Regulation (EU) No 648/2012 were carried out, i.e. securities financing transactions or total return swaps.

Information on the valuation process for assets pursuant to Section 16 Para. 1 No. 2 KARBV

Security prices and market prices

The sub-fund assets are valued on the basis of the following market prices:

Derivatives:	Closing prices on the respective valuation dates
All securities:	Closing prices on the respective valuation dates

The valuation of assets generally took place during the financial year and at the balance sheet date on the basis of the last traded stock exchange price.

Assets not admitted for trading on stock exchanges nor admitted to another regulated market or included in such market, or for which no tradable value is available, are valued at current market values, which shall be assessed with due care using appropriate valuation models and taking into consideration current market conditions.

Derivatives admitted for trading on a stock exchange or another regulated market are valued at the closing price on the relevant valuation date.

Money in bank accounts and existing receivables are valued at their current nominal value. Existing liabilities are reported at the amounts payable.

Explanation of the calculation of net change in unrealised gains and losses

Determination of net change in unrealised gains and losses takes place by means of comparing, in each financial year, the valuations of assets included in the unit price with the relevant historical purchase prices, the level of the positive differences in the sum of unrealised gains included, the level of the negative differences in the sum of unrealised losses included and by determining the net changes from a comparison of the sum totals at the end of the financial year with those at the beginning.

Additional notes in accordance with Regulation (EU) 2015/2365 on securities financing transactions

In the period under review, no transactions as defined by Article 3 (11) and (18) of Regulation (EU) 2015/2365 on transparency of securities financing transactions and of reuse and amending Regulation (EU) No 648/2012 were carried out, i.e. securities financing transactions or total return swaps.

Information on the valuation process for assets pursuant to Section 16 Para. 1 No. 2 KARBV

Security prices and market prices

The sub-fund assets are valued on the basis of the following market prices:

Derivatives:	Closing prices on the respective valuation dates
All securities:	Closing prices on the respective valuation dates

The valuation of assets generally took place during the financial year and at the balance sheet date on the basis of the last traded stock exchange price.

Assets not admitted for trading on stock exchanges nor admitted to another regulated market or included in such market, or for which no tradable value is available, are valued at current market values, which shall be assessed with due care using appropriate valuation models and taking into consideration current market conditions.

Derivatives admitted for trading on a stock exchange or another regulated market are valued at the closing price on the relevant valuation date.

Money in bank accounts and existing receivables are valued at their current nominal value. Existing liabilities are reported at the amounts payable.

Explanation of the calculation of net change in unrealised gains and losses

Determination of net change in unrealised gains and losses takes place by means of comparing, in each financial year, the valuations of assets included in the unit price with the relevant historical purchase prices, the level of the positive differences in the sum of unrealised gains included, the level of the negative differences in the sum of unrealised losses included and by determining the net changes from a comparison of the sum totals at the end of the financial year with those at the beginning.

Security prices and market prices

The sub-fund assets are valued on the basis of the following market prices:

Derivatives:	Closing prices on the respective valuation dates
All securities:	Closing prices on the respective valuation dates

The valuation of assets generally took place during the financial year and at the balance sheet date on the basis of the last traded stock exchange price.

Assets not admitted for trading on stock exchanges nor admitted to another regulated market or included in such market, or for which no tradable value is available, are valued at current market values, which shall be assessed with due care using appropriate valuation models and taking into consideration current market conditions.

Derivatives admitted for trading on a stock exchange or another regulated market are valued at the closing price on the relevant valuation date.

Money in bank accounts and existing receivables are valued at their current nominal value. Existing liabilities are reported at the amounts payable.

Explanation of the calculation of net change in unrealised gains and losses

Determination of net change in unrealised gains and losses takes place by means of comparing, in each financial year, the valuations of assets included in the unit price with the relevant historical purchase prices, the level of the positive differences in the sum of unrealised gains included, the level of the negative differences in the sum of unrealised losses included and by determining the net changes from a comparison of the sum totals at the end of the financial year with those at the beginning.

Additional notes in accordance with Regulation (EU) 2015/2365 on securities financing transactions

In the period under review, no transactions as defined by Article 3 (11) and (18) of Regulation (EU) 2015/2365 on transparency of securities financing transactions and of reuse and amending Regulation (EU) No 648/2012 were carried out, i.e. securities financing transactions or total return swaps.

Explanation of the calculation of net change in unrealised gains and losses

Determination of net change in unrealised gains and losses takes place by means of comparing, in each financial year, the valuations of assets included in the unit price with the relevant historical purchase prices, the level of the positive differences in the sum of unrealised gains included, the level of the negative differences in the sum of unrealised losses included and by determining the net changes from a comparison of the sum totals at the end of the financial year with those at the beginning.

Additional notes in accordance with Regulation (EU) 2015/2365 on securities financing transactions

In the period under review, no transactions as defined by Article 3 (11) and (18) of Regulation (EU) 2015/2365 on transparency of securities financing transactions and of reuse and amending Regulation (EU) No 648/2012 were carried out, i.e. securities financing transactions or total return swaps.

Information on the valuation process for assets pursuant to Section 16 Para. 1 No. 2 KARBV

Security prices and market prices

The sub-fund assets are valued on the basis of the following market prices:

All securities: Closing prices on the respective valuation dates

The valuation of assets generally took place during the financial year and at the balance sheet date on the basis of the last traded stock exchange price.

Assets not admitted for trading on stock exchanges nor admitted to another regulated market or included in such market, or for which no tradable value is available, are valued at current market values, which shall be assessed with due care using appropriate valuation models and taking into consideration current market conditions.

Money in bank accounts and existing receivables are valued at their current nominal value. Existing liabilities are reported at the amounts payable.

Further information necessary for understanding the report pursuant to Section 7 No. 9 d) KARBV

Explanation of the calculation of net change in unrealised gains and losses

Determination of net change in unrealised gains and losses takes place by means of comparing, in each financial year, the valuations of assets included in the unit price with the relevant historical purchase prices, the level of the positive differences in the sum of unrealised gains included, the level of the negative differences in the sum of unrealised losses included and by determining the net changes from a comparison of the sum totals at the end of the financial year with those at the beginning.

Additional notes in accordance with Regulation (EU) 2015/2365 on securities financing transactions

In the period under review, no transactions as defined by Article 3 (11) and (18) of Regulation (EU) 2015/2365 on transparency of securities financing transactions and of reuse and amending Regulation (EU) No 648/2012 were carried out, i.e. securities financing transactions or total return swaps.
