ACS Japan Equity Tracker Fund

A sub-fund of BlackRock Authorised Contractual Scheme I

Class X1H Accumulating GBP

ISIN: GB00BD71ZD41

Manager: BlackRock Fund Managers Limited

Objectives and Investment Policy

- ▶ The Fund is a sub-fund of BlackRock Authorised Contractual Scheme I taking the form of a co-ownership scheme. As a consequence of this, the Fund may be treated as tax transparent for the purpose of income and/or capital gains by relevant taxing jurisdictions. Each investor should take appropriate professional advice as to the tax treatment of their investment in the Fund. Investors in the Fund must be Eligible Investors as defined in the Fund's prospectus and must have completed all relevant documentation prior to the purchase of units in the Fund.
- ▶ The Fund aims to provide a return on your investment (generated through an increase to the value of the assets held by the Fund and/or income received from those assets) by tracking closely the performance of the FTSE Custom Japan ESG Screened Index, the Fund's benchmark index (the "Benchmark Index").
- ▶ The Fund invests in equity securities (e.g. shares) of companies that make up the Benchmark Index. The Fund may use derivatives (i.e. investments the prices of which are based on one or more underlying assets) to help achieve its investment objective or for efficient portfolio management purposes (EPM) (i.e. to reduce risk or costs within the Fund's portfolio, or generate additional income). The use of derivatives is expected to be limited. The Fund may engage in short-term secured lending of its investments to certain eligible third parties to generate additional income and off-set costs.
- ▶ The Benchmark Index aims to reflect the performance characteristics of a subset of equity securities within the FTSE Japan Index ("Parent Index") which comply with the index provider's environmental, social and governance ("ESG") exclusionary criteria (as described in the Fund's prospectus). The Fund may obtain indirect exposure (through including but not limited to, derivatives and units in collective investment schemes) to securities considered not to satisfy the ESG criteria.
- ▶ The Parent Index measures the performance of large and mid capitalisation Japanese companies that are constituents of the FTSE All-World Index. The Benchmark Index excludes issuers based on their involvement in certain activities deemed by the index provider to have negative environmental or social outcomes based on their involvement in the following: (i) weapons (including anti-personnel mines, nuclear weapons, cluster weapons, biological and chemical weapons, depleted uranium, and white phosphorus munitions); (ii) small arms; (iii) thermal coal; (iv) oil sands or (v) tobacco. In addition, issuers which are classified as violating the United Nations Global Compact principles (which are widely accepted corporate sustainability principles that meet fundamental responsibilities in areas such as anti-corruption, human rights, labour and environmental) are also excluded. The remaining securities are then weighted in proportion of their free float-adjusted market capitalisation. Free float-adjusted means that only shares readily available in the market rather than all of a company's issued shares are used in calculating the Benchmark Index. Free float-adjusted market capitalisation is the share price of a company multiplied by the number of shares readily available in the market.
- ▶ The Fund's investment in the equity securities that make up the Benchmark Index will, at the time of purchase, comply with the ESG requirements of the Benchmark Index. Where securities no longer meet such requirements, the Fund may continue to hold them until they cease to form part of the Benchmark Index and it is practicable to sell them.
- ▶ The Fund is passively managed and the investment adviser has limited discretion to select the Fund's investments and in doing so will take into consideration the Benchmark Index.
- ▶ The Fund intends to replicate the Benchmark Index by holding the equity securities, which make up the Benchmark Index, in similar proportions to the Benchmark Index.
- ▶ Class X1 Accumulation units are available for investment only by UK domiciled insurance companies in connection with their pension business (as defined by section 58 of Finance Act 2012)
- ▶ Class X1 Accumulation units are available for investment only by UK domiciled insurance companies in connection with their pension business (as defined by section 58 of Finance Act 2012)
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your units will be accumulating units (i.e. dividend income will be included in their value).
- ▶ Your units will be denominated in Sterling, the Fund's base currency.
- ▶ You can buy and sell your units daily. The minimum initial investment for this unit class is £10,000,000.

Risk and Reward Profile

- ▶ This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated six due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
 - The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
 - The benchmark index only excludes companies engaging in certain activities inconsistent with ESG criteria if such activities exceed the thresholds determined by the index provider. Investors should therefore make a personal ethical assessment of the benchmark index's ESG screening prior to investing in the Fund. Such ESG screening may adversely affect the value of the Fund's investments compared to a fund without such screening.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
 - Tax treatment of Fund: The tax treatment of this fund structure is so far untested which could lead to adverse tax consequences for the investor. Changes to the tax status of the Fund could lead to taxation being due.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 31 August 2023. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

** (i) To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges. (ii) Holders in this unit class will be subject to additional periodic charges outside of the Fund by way of separate agreement with BlackRock.
