ACS World Multifactor Equity Tracker Fund

A sub-fund of BlackRock Authorised Contractual Scheme I

Class X2 Accumulating GBP

ISIN: GB00BF1KF755

Manager: BlackRock Fund Managers Limited

Objectives and Investment Policy

- ▶ The Fund is a sub-fund of BlackRock Authorised Contractual Scheme I taking the form of a Co-ownership Scheme. As a consequence of this, the Fund may be treated as tax transparent for the purpose of income and/or capital gains by relevant taxing jurisdictions. Each investor should take appropriate professional advice as to the tax treatment of their investment in the Fund. Investors in the Fund must be Eligible Investors as defined in the Fund's prospectus and must have completed all relevant documentation prior to the purchase of units in the Fund.
- ▶ The Fund aims to provide a return on your investment (generated through an increase to the value of the assets held by the Fund and/or income received from those assets) by tracking closely the performance of the MSCI World Diversified Multiple-Factor Index, the Fund's benchmark index (the "Benchmark Index").
- ▶ The Fund is passively managed and the investment adviser has limited discretion to select the Fund's investments and in doing so may take into consideration the Benchmark Index.
- ▶ The Fund invests in equity securities (e.g. shares) of companies that make up the Benchmark Index.
- ▶ The Benchmark Index measures the performance of equity securities of large and mid-capitalisation companies across developed countries globally. The Benchmark Index is derived from the MSCI World Index ("the Parent Index") by selecting companies on account of their higher aggregate exposure to four 'style' factors compared to other companies in the Parent Index. These 'style' factors are: Value (i.e. companies selected based on indicators of good value, including forward share price to estimated future earnings, share price relative to book value and enterprise value (i.e. a measure of a company's value incorporating debt and equity) to operating cash flow); Momentum (i.e. shares which outperformed the market in the last 2 years and increased in price over the last 6 and 12 months (with a month lag)), Low Size (i.e. companies with a lower market capitalisation relative to other companies in the same country); and Quality (i.e. companies selected based on high return-on-equity, low levels of debt and low earnings variability). The constituents of the Benchmark Index are selected from the Parent Index using the index provider's screening model to maximize the exposure to the four targeted style factors while maintaining market risk similar to the Parent Index. The screening model is subject to certain risk diversification constraints relative to the Parent Index and ensures that the exposure to style factors other than the chosen four factors (e.g. volatility) in the Parent Index is restricted in the Benchmark Index.
- ▶ The Fund uses optimising techniques to achieve a similar return to its Benchmark Index. These techniques may include the strategic selection of certain securities that make up the Benchmark Index or other securities which provide similar performance to certain constituent securities. These may also include the use of derivatives (i.e. investments the prices of which are based on one or more underlying assets). Derivatives may be used for investment purposes. The use of derivatives is expected to be limited.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your units will be accumulating units (i.e. dividend income will be included in their value).
- ▶ Your units will be denominated in Sterling, the Fund's base currency.
- ▶ You can buy and sell your units daily. The minimum initial investment for this unit class is £10,000,000.

Risk and Reward Profile

- ▶ This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated six due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
 - Index Methodology Risk: Although the Index was created to select securities within the Parent Index which have a relatively higher exposure to four investment style factors, there is no guarantee this objective will be achieved.
 - Multi-Factor Focus Risk: Indices with a multi-factor focus are less diversified than their parent index because they focus on four investment style factors rather than a broader market exposure. Therefore they will be more exposed to factor related market movements. Investors should consider this Fund as part of a broader investment strategy.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 28 September 2023. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

** (i) To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges. (ii) Holders in this unit class will be subject to additional periodic charges outside of the Fund by way of separate agreement with BlackRock.
