Asian Tiger Bond Fund

A sub-fund of BlackRock Global Funds

Class A8 CNH Hedged

ISIN: LU1257007309

Management Company: BlackRock (Luxembourg) S.A.

Objectives and Investment Policy

- ▶ The Fund aims to maximise the return on your investment through a combination of capital growth and income on the Fund's assets.
- ▶ The Fund invests at least 70% of its total assets in fixed income securities. These include bonds and money market instruments (i.e. debt securities with short term maturities).
- ▶ The fixed income securities may be issued by governments and, government agencies of, and companies and supranationals (e.g. the Asian Development Bank) domiciled in, or the main business of which is in, Asian Tiger countries.
- ▶ The term Asian Tiger countries refers to South Korea, the People's Republic of China, Taiwan, Hong Kong, the Philippines, Thailand, Malaysia, Singapore, Vietnam, Cambodia, Laos, Myanmar, Indonesia, Macau, India and Pakistan.
- ▶ The Fund will invest in the full range of fixed income securities which may include investments with a relatively low credit rating or which are unrated.
- ▶ The investment adviser (IA) may use financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets) for investment purposes in order to achieve the investment objective of the Fund, and/or to reduce risk within the Fund's portfolio, reduce investment costs and generate additional income. The Fund may, via FDIs, generate varying amounts of market leverage (i.e. where the Fund gains market exposure in excess of the value of its assets).
- ▶ The Fund is actively managed, and the IA has discretion to select the Fund's investments. In doing so the IA will refer to the J.P. Morgan Asia Credit Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The IA is not bound by the components or weighting of the Index when selecting investments. The IA may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the geographical scope of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the performance of the Fund.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your shares will be distributing. The amount of dividend income payable on the shares will be determined by a committee appointed by the Directors of the Fund, which will aim to pay stable dividend income monthly, although this is not guaranteed. Dividends will be calculated on the basis of the expected gross income and expected gains, if any, arising from share class hedging over a given period. In the event dividend income is paid from the capital of the Fund, it will result in capital erosion and may constrain further capital growth.
- ▶ The Fund's base currency is US Dollar. Shares for this class are bought and sold in Renminbi. The performance of your shares may be affected by this currency difference.
- ▶ Your shares will be "hedged" with the aim of reducing the effect of exchange rate fluctuations between their denominated currency and the base currency of the Fund. FDIs, including FX forward contracts, will be used for currency hedging purposes. The hedging strategy may not completely eliminate currency risk and, therefore, may affect the performance of your shares.
- ▶ You can buy and sell your shares daily. The minimum initial investment for this share class is US\$5,000 or other currency equivalent.

Risk and Reward Profile

- ▶ This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated four due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
- Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfer of assets, failed/delayed delivery of securities or payments to the Fund and sustainability-related risks.
- Derivatives may be highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains, resulting in greater fluctuations in the value of the Fund. The impact to the Fund can be greater where derivatives are used in an extensive or complex way.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
 - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
 - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 31 December 2023. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

One-off charges taken before or after you invest	
Entry Charge	5.00%
Exit Charge	None*

This is the maximum that might be taken out of your money before it is invested or before proceeds of your investments are paid out.

Charges taken from the Fund over each year	
Ongoing Charges	1.21%**
Charges taken from the Fund under certain conditions	
Performance Fee	None

Past Performance

Past performance is not a guide to future performance.

The chart shows the Fund's annual performance in CNH for each full calendar year over the period displayed in the chart. It is expressed as a percentage change of the Fund's net asset value at each year-end. The Fund was launched in 1996. The share class was launched in 2015.

Performance is shown after deduction of ongoing charges. Any entry/exit charges are excluded from the calculation.

†J.P. Morgan Asia Credit Index (USD)

It is not intended that the performance of the Fund will track the index.
