Brown to Green Materials Fund

A sub-fund of BlackRock Global Funds

Class A2 USD

ISIN: LU2600819937

Management Company: BlackRock (Luxembourg) S.A.

Objectives and Investment Policy

- ▶ The Fund seeks to maximise total return.
- ▶ The Fund invests at least 80% of its total assets in the equity securities of companies globally that directly contribute to the transitioning materials theme. The transitioning materials theme covers the need for materials to build lower carbon technologies and efforts to reduce the emissions intensity of the materials sector.
- ▶ The Fund will aim to invest in line with the principles of the transition theme as determined by the Investment Adviser (IA). In normal market conditions the Fund will invest in a portfolio of equity securities of companies with large, medium and small market capitalisation, across all industry sectors, that contribute to the advancement of the transition theme across three categories as described in the prospectus: Emission Reducers, Enablers and Green Leaders. The companies are rated by the IA based on their ability to manage the risks and opportunities associated with the transition theme and on their environmental, social and governance (ESG) risk and opportunity credentials. The Fund's total assets will be invested in accordance with its ESG Policy as disclosed in the prospectus.
- ▶ The Fund may obtain limited exposure (through, including but not limited to, financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets) and units in collective investment schemes) to securities which may not satisfy these ESG criteria.
- ▶ The IA may use financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets) for investment purposes in order to achieve the investment objective of the Fund, and/or to reduce risk within the Fund's portfolio, reduce investment costs and generate additional income. The Fund may, via FDIs, generate varying amounts of market leverage (i.e. where the Fund gains market exposure in excess of the value of its assets).
- ▶ The Fund is actively managed, and the IA has discretion to select the Fund's investments. In the opinion of the IA, the MSCI All Countries World Index (the "Index") is a fair representation of the Fund's investment universe and should be used by investors to compare the performance of the Fund. The Index measures the performance of large and mid-capitalisation stocks across developed and emerging markets countries.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your shares will be non-distributing (i.e. dividend income will be included in their value).
- ▶ Your shares will be denominated in US Dollar, the Fund's base currency.
- ▶ You can buy and sell your shares daily. The minimum initial investment for this share class is US\$5,000 or other currency equivalent.

Risk and Reward Profile

- ▶ The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated six due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
 - Currency Risk: The Fund invests in other currencies. Changes in exchange rates will therefore affect the value of the investment.
 - The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
 - The Fund seeks to exclude companies engaging in certain activities inconsistent with ESG criteria. Investors should therefore make a personal ethical assessment of the Fund's ESG screening prior to investing in the Fund. Such ESG screening may adversely affect the value of the Fund's investments compared to a fund without such screening.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
 - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure shown here is an estimate of the annualised charges. An estimate is being used because the Fund (or share class) was newly launched or it has been launched within the reported period. The Fund's annual report for each financial year will include detail on the exact charges made.

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.
