ESG Global Conservative Income Fund

A sub-fund of BlackRock Global Funds

Class A4G EUR

ISIN: LU1845137063

Management Company: BlackRock (Luxembourg) S.A.

Objectives and Investment Policy

- ▶ The Fund aims to provide a conservative level of income on your investment, i.e. within the appropriate risk parameters, with a focus on capital stability in a manner consistent with the principles of environmental, social and governance (ESG) focused investing.
- ▶ The Fund invests globally in the full range of assets in which a UCITS may invest, including equity securities (e.g. shares), fixed income securities (such as bonds), funds, cash, deposits and money market instruments (i.e. debt securities with short term maturities).
- ▶ The Fund's total assets will be invested in accordance with its ESG Policy as disclosed in the prospectus. For further details regarding the ESG characteristics please refer to the prospectus and the BlackRock website at <https://www.blackrock.com/baselinescreens>.
- ▶ The Fund is actively managed and the investment adviser (IA) has discretion to select the Fund's investments. In doing so, the IA may refer to a composite benchmark comprising 30% MSCI World Index EUR Hedged and 70% Bloomberg Global Aggregate Bond Index EUR Hedged (Index) for performance comparison and risk management purposes as further described in the Benchmark section in the prospectus. The Fund's portfolio is expected to deviate materially from the Index. The IA will create a portfolio that seeks to deliver a higher ESG score than the investable universe. The Fund's ESG score will be calculated as the total of each security's ESG score (where applicable), weighted by its market value. The ESG score of the investable universe will be calculated using the ESG scores of the relevant asset class indices weighted to reflect the asset class exposure in the Fund. The IA intends the Fund to have a lower carbon emissions intensity score than the investable universe, represented by the relevant asset class indices weighted to reflect the asset class exposure in the Fund. The components of the Index and the ESG scores for individual asset classes or allocation weighted may be quoted separately in marketing material related to the Fund.
- ▶ The Fund's investments in fixed income securities and money market instruments may be issued by governments, government agencies, companies and supranationals (e.g. the International Bank for Reconstruction and Development), including those domiciled in, or the main business of which is in, emerging market countries. These may include securities with a relatively low credit rating or which are unrated. The assets held by the Fund may be denominated in a wide variety of currencies.
- ▶ The IA may use financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets) for investment purposes in order to achieve the investment objective of the Fund, and/or to reduce risk within the Fund's portfolio, reduce investment costs and generate additional income. The Fund may, via FDIs, generate varying amounts of market leverage (i.e. where the Fund gains market exposure in excess of the value of its assets).
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your shares will be distributing (i.e. dividend income will be paid annually on the shares).
- ▶ Your shares will be denominated in Euro, the Fund's base currency.
- ▶ You can buy and sell your shares daily. The minimum initial investment for this share class is US\$5,000 or other currency equivalent.

Risk and Reward Profile

- ▶ This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated four due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfer of assets, failed/delayed delivery of securities or payments to the Fund and sustainability-related risks.

- Equities and equity-related securities can be affected by daily stock market movements. Fixed Income securities can be affected by changes to interest rates, credit risk and potential or actual credit rating downgrades. Non-investment grade FI securities can be more sensitive to these events. ABS and MBS may have high levels of borrowing and not fully reflect the value of underlying assets. FDIs are highly sensitive to changes in the value of the asset they are based on. The impact is greater where FDIs are used in an extensive or complex way.
- The Fund seeks to exclude companies engaging in certain activities inconsistent with ESG criteria. Such ESG screening may reduce the potential investment universe and this may adversely affect the value of the Fund's investments compared to a fund without such screening.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
 - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
 - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 31 December 2024. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

One-off charges taken before or after you invest	
Entry Charge	5.00%
Exit Charge	None*

This is the maximum that might be taken out of your money before it is invested or before proceeds of your investments are paid out.

Charges taken from the Fund over each year	
Ongoing Charges	1.30%**
Charges taken from the Fund under certain conditions	
Performance Fee	None

Past Performance

Past performance is not a guide to future performance.
