Global Listed Infrastructure Fund

A sub-fund of BlackRock Global Funds

Class X2 EUR Accu

ISIN: LU2893521984

Management Company: BlackRock (Luxembourg) S.A.

Objectives and Investment Policy

- ▶ The Fund seeks to maximise long term total returns
- ▶ The Fund invests at least 70% of its total assets in infrastructure companies globally that are facilitating, enabling and leading the transition to a low carbon economy. The Fund's primary investment universe will be in the areas of electricity and gas networks, water networks, transportation infrastructure, renewable energy; and communications infrastructure (telecommunication towers, data centres and satellites.)
- ▶ The Fund will aim to invest in line with the principles of the transition theme as determined by the Investment Adviser (IA). In normal market conditions the Fund will invest in a portfolio of equity securities of infrastructure companies with large, medium and small market capitalization. The Fund will invest at least 70% of its assets in equities or equity-related securities of infrastructure companies, that contribute to the advancement of the transition theme in any of the three categories described in the prospectus: improvers, solutions providers, peer group leaders.
- ▶ Although it is likely that most of the Fund's investments will be in companies located in developed markets globally, the Fund may also invest in emerging markets. The Fund is a Stock Connect Fund and may invest directly up to 20% of its total assets in the PRC by investing via the Stock Connects (capitalized terms shall have the same meaning as given to them in the prospectus).
- ▶ The Fund's total assets will be invested in accordance with its ESG Policy as disclosed in the prospectus.
- ▶ The Fund may gain limited indirect exposure (through, including but not limited to, derivatives and shares or units of CIS) to issuers with exposures that do not meet the transition criteria above.
- ▶ The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management
- ▶ The Fund is actively managed, and the IA has discretion to select the Fund's investments. In doing so, the IA will refer to the FTSE Developed Core Infrastructure 50/50 Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your shares will be non-distributing (i.e. dividend income will be included in their value).
- ▶ The Fund's base currency is US Dollar. Shares for this class are bought and sold in Euro. The performance of your shares may be affected by this currency difference.
- ▶ You can buy and sell your shares daily. The minimum initial investment for this share class is US\$10,000,000 or other currency equivalent.

For more information on the Fund, share/unit classes, risks and charges, please see the Fund's prospectus, available on the product pages at www.blackrock.com

Risk and Reward Profile

- ▶ The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated six due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfer of assets, failed/delayed delivery of securities or payments to the Fund and sustainability-related risks.
 - Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
 - The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
 - Investments in infrastructure securities are subject to environmental or sustainability concerns, taxes, government regulation, price, supply and competition.
 - The Fund seeks to exclude companies engaging in certain activities inconsistent with ESG criteria. Such ESG screening may reduce the potential investment universe and this may adversely affect the value of the Fund's investments compared to a fund without such screening
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
 - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure shown here is an estimate of the annualised charges. An estimate is being used because the Fund (or share class) was newly launched or it has been launched within the reported period. The Fund's annual report for each financial year will include detail on the exact charges made.

** (i) To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges. (ii) Holders in this share class will be subject to additional periodic charges outside of the Fund by way of separate agreement with BlackRock.
