Sustainable Global Allocation Fund

A sub-fund of BlackRock Global Funds

Class A2 USD

ISIN: LU2488 12 1257

Management Company: BlackRock (Luxembourg) S.A.

Objectives and Investment Policy

- ▶ The Fund aims to maximise the return on your investment, in a sustainable way, through a combination of capital growth and income on the Fund's assets.
- ▶ The Fund invests globally at least 70% of its total assets in equity securities (e.g. shares) and fixed income (FI) securities in normal market conditions. FI securities include bonds and money market instruments (i.e. debt securities with short term maturities). It may also hold deposits and cash. The asset classes and the extent to which the Fund is invested in these may vary without limit depending on market conditions.
- ▶ The FI securities may be issued by governments, government agencies, companies and supnationals (e.g. the International Bank for Reconstruction and Development) and may include securities with a relatively low credit rating or which are unrated.
- ▶ At least 90% of the issuers of securities the Fund invests in are environmental, social and governance (ESG) rated or have been analysed for ESG purposes.
- ▶ The Investment Adviser (IA) will also employ a proprietary methodology to assess investments based on the extent to which they are associated with positive or negative externalities, that is environmental and social benefits or costs as defined by the IA.
- ▶ The IA will, in addition to the investment criteria set out above, take into account certain ESG characteristics when selecting the securities to be held directly by the Fund and, in doing so, may use data provided by external ESG research providers and proprietary models. For further details regarding the ESG characteristics (and the applicable levels) please refer to the BlackRock website at <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf>. The Fund may obtain indirect exposure (through, including but not limited to, financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets) and units in collective investment schemes) to securities which may not satisfy these ESG criteria.
- ▶ The Fund is actively managed, and the IA has discretion to select the Fund's investments. In doing so, the IA will refer to a composite benchmark comprising the MSCI All Country World Index (60%) and Bloomberg Global Aggregate Index (40%) (the "Index") when constructing the Fund's portfolio and also for risk management purposes. The ESG policy reduces the investment universe of the Fund by 20%. For the purposes of measuring this reduction only, MSCI All Country World Index and Bloomberg Global Aggregate Index are used to define the investment universe and are reduced separately. The Index should be used by investors to compare the performance of the Fund.
- ▶ The Fund may use FDIs for investment purposes and for the purposes of efficient portfolio management.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your shares will be non-distributing (i.e. dividend income will be included in their value).
- ▶ Your shares will be denominated in US Dollar, the Fund's base currency.
- ▶ You can buy and sell your shares daily. The minimum initial investment for this share class is US\$5,000 or other currency equivalent.

For more information on the Fund, share/unit classes, risks and charges, please see the Fund's prospectus, available on the product pages at www.blackrock.com

Risk and Reward Profile

- ▶ The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated six due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - Changes to interest rates, credit risk and/or issuer defaults will have a significant impact on the performance of fixed income securities. Non-investment grade fixed income securities can be more sensitive to changes in these risks than higher rated fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
- The value of equities and equity-related securities can be affected by daily stock market movements, political factors, economic news, company earnings and significant corporate events.
- Derivatives may be highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains, resulting in greater fluctuations in the value of the Fund. The impact to the Fund can be greater where derivatives are used in an extensive or complex way.
- The Fund seeks to exclude companies engaging in certain activities inconsistent with ESG criteria. Such ESG screening may reduce the potential investment universe and this may adversely affect the value of the Fund's investments compared to a fund without such screening.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
 - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
 - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 31 December 2024. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

One-off charges taken before or after you invest	
Entry Charge	5.00%
Exit Charge	None*

This is the maximum that might be taken out of your money before it is invested or before proceeds of your investments are paid out.

Charges taken from the Fund over each year	
Ongoing Charges	1.60%**
Charges taken from the Fund under certain conditions	
Performance Fee	None

Past Performance

Past performance is not a guide to future performance.

The chart shows the Fund's annual performance in USD for each full calendar year over the period displayed in the chart. It is expressed as a percentage change of the Fund's net asset value at each year-end. The Fund was launched in 2022. The share class was launched in 2022.

Performance is shown after deduction of ongoing charges. Any entry/exit charges are excluded from the calculation.

†¹MSCI All Country World Index (60%) and Bloomberg Global Aggregate Index (40%) (USD)

Historic performance to 31 December 2024
