### BlackRock Euro Credit Enhanced Index Fund

A sub-fund of BlackRock Fixed Income Dublin Funds plc

Class Institutional Distributing EUR

ISIN: IE00B8138T89

Manager: BlackRock Asset Management Ireland Limited

## Objectives and Investment Policy

- ▶ The Fund aims to achieve a total return on your investment, through a combination of capital growth and income, which aims to out-perform the return of the FTSE Non-EGBI Euro Broad Investment-Grade Index, the Fund's benchmark index.
- ▶ The Fund has an enhanced index strategy which differs from a pure-index tracking strategy. Although both strategies invest in a similar range of fixed income (FI) securities (such as bonds), enhanced strategies aim to take overweight and/or underweight positions relative to the benchmark index in order to achieve some out-performance of the benchmark index.
- ▶ The Fund invests predominantly in the FI securities that make up the Fund's benchmark index (which comprises credit bonds).
- ▶ The FI securities may be issued by companies and to a lesser extent by governments, government agencies and supranationals (e.g. the European Investment Bank) of both EMU member states and non-EMU member states and will be investment grade rated by Moody's, Standard & Poor's or Fitch Ratings (i.e. meet a specified level of credit worthiness) at the time of purchase. If the credit rating of a FI security is downgraded, the Fund may continue to hold this, until it is practicable to sell the position.
- ▶ The benchmark index measures the performance primarily of non-government investment grade issues of FI securities issued or guaranteed by a sovereign or a supranational issuer. The benchmark index may also include securities issued by non-EMU governments and/or European Union domiciled supranationals.
- ▶ The Fund is designed to provide investors with a selected exposure to the Index as described in its objectives and policy, which may generate a modest tracking difference. The Fund is designed to provide investors with achievement of the investment objective by typically taking a low to conservative level of active risk relative to the Index, in order to seek a commensurate active return in excess of applicable management fees over the medium term (i.e. 3 years or more).
- ▶ The investment manager may use financial derivative instruments (i.e. investments the prices of which are based on one or more underlying assets) for efficient portfolio management purposes or to protect against exchange rate risk.
- ▶ The Fund may also engage in short-term secured lending of its investments to certain eligible third parties. This is used as a means of generating additional income and to off-set the costs of the Fund.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your shares will be distributing shares (i.e. dividend income will be paid on the shares semi-annually).
- ▶ Your shares will be denominated in Euro, the Fund's base currency.
- ▶ You can buy and sell your shares daily. The minimum initial investment for this share class is €500,000.

## Risk and Reward Profile

- ▶ This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated three due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
  - Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
  - The Fund uses quantitative models in order to make investment decisions. As market dynamics shift over time, a quantitative model may become less efficient or may even present deficiencies under certain market conditions.
- ▶ Particular risks not adequately captured by the risk indicator include:
  - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
  - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
  - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

## Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

\*Subject to a charge of up to 2% paid into the Fund where the Manager suspects arbitrage by an investor on the yield of the Fund.

The ongoing charges figure is based on the fixed annualised fees charged to the Fund as set out in the Fund's prospectus. This figure excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

\*\* To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.
