BlackRock Global Corporate Sustainable Credit Screened Fund

A sub-fund of BlackRock Funds I ICAV

Class X Distributing (Semi-annual) GBP Hedged

ISIN: IE00BL5H0T14

Manager: BlackRock Asset Management Ireland Limited

Objectives and Investment Policy

- ▶ The Fund aims to achieve a total return on your investment through a combination of capital growth and income on the Fund's assets, by investing at least 80% of its assets in investment grade (IG) (i.e. meet a specified level of credit worthiness) fixed income (FI) securities (such as bonds) issued by corporate issuers in developed markets and instruments related to such FI securities, including financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets) for investment purposes which may generate varying amounts of market leverage (i.e. where the Fund gains market exposure in excess of the value of its assets). The Fund may invest up to 20% of its assets in emerging markets.
- ▶ The Fund may invest in FI securities issued by governments, government agencies and supranationals and/or FI securities which are IG, instruments related to such FI securities, money market instruments (debt securities with short-term maturities), deposits and cash.
- ▶ The IM considers certain environmental, social and governance (ESG) characteristics when selecting securities to be held directly by the Fund. For further details please see the BlackRock website at <https://www.blackrock.com/baselinescreens>
- ▶ More than 90% of the issuers of securities the Fund invests in are ESG rated or have been analysed for ESG purposes. The IM will create a portfolio with a higher ESG outcome versus Bloomberg Global Aggregate Corporate Index (the Index). The weighted average ESG rating of the Fund will be higher than the Index's ESG rating. The IM intends the Fund to have a lower carbon emissions intensity score than the Index.
- ▶ The Investment Manager (IM) will use a 'credit screening' strategy to minimise exposure to FI securities perceived to be most at risk of a sharp deterioration in price.
- ▶ To achieve its objectives the Fund may obtain indirect exposure to securities through, inter alia, the use of FDIs and investments in units of collective investment schemes which may not satisfy the Fund's ESG criteria.
- ▶ The Fund is actively managed and the IM has discretion to select the Fund's investments. The IM refers to the Index when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy as further described in the prospectus. The Index should be used by investors to compare the performance of the Fund.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your shares will be distributing shares (i.e. dividend income will be paid on the shares semi-annually).
- ▶ The Fund's base currency is US Dollar. Shares for this class are bought and sold in Sterling. The performance of your shares may be affected by this currency difference.
- ▶ Your shares will be "hedged" with the aim of reducing the effect of exchange rate fluctuations between their denominated currency and the base currency of the Fund. FDIs, including FX forward contracts, will be used for currency hedging purposes. The hedging strategy may not completely eliminate currency risk and, therefore, may affect the performance of your shares.
- ▶ You can buy and sell your shares daily. The minimum initial investment for this share class is US\$1,000,000 or other currency equivalent.

Risk and Reward Profile

- ▶ The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated four due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
 - Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfer of assets, failed/delayed delivery of securities or payments to the Fund and sustainability-related risks.
 - The Fund seeks to exclude companies engaging in certain activities inconsistent with ESG criteria. Investors should therefore make a personal ethical assessment of the Fund's ESG screening prior to investing in the Fund. Such ESG screening may adversely affect the value of the Fund's investments compared to a fund without such screening.
 - The Fund uses quantitative models in order to make investment decisions. As market dynamics shift over time, a quantitative model may become less efficient or may even present deficiencies under certain market conditions.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
 - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
 - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for any charges which they themselves may apply.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on the fixed annualised fees charged to the Fund as set out in the Fund's prospectus. This figure excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

** (i) To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges. (ii) Holders in this share class will be subject to additional periodic charges outside of the Fund by way of separate agreement with BlackRock.
