BlackRock Systematic ESG World Equity Fund

A sub-fund of BlackRock Strategic Funds

Class X2 GBP

ISIN: LU1264796118

Management Company: BlackRock (Luxembourg) S.A.

Objectives and Investment Policy

- ▶ The Fund aims to maximise total return in a manner consistent with the principles of environmental, social and governance “ESG” focused investing.
- ▶ The Fund seeks to gain at least 80% of its investments exposure to equity securities of companies domiciled in, or the main business of which is in, developed countries worldwide. This is achieved by investing at least 80% of its total assets in equity securities and other equity-related securities. The Fund may, when determined appropriate, invest in money market instruments (MMIs) (i.e. debt securities with short-term maturities), deposits and cash. The equity-related securities include financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets).
- ▶ The MMIs may be issued by governments, government agencies, companies and supranationals (e.g. the International Bank for Reconstruction and Development) and may be investment grade (i.e. meet a specified level of credit worthiness), non-investment grade or unrated at the time of purchase.
- ▶ In order to achieve its investment objective and policy, the Fund will invest in a variety of investment strategies and instruments. In particular, the Fund will use quantitative (i.e. mathematical or statistical) models in order to achieve a systematic (i.e. rule based) approach to stock selection. This means that stocks will be selected based on their ESG outcomes and the expected contribution to portfolio returns when risk and transaction cost forecasts are taken into account.
- ▶ The investment adviser (IA) will also take into account certain environmental, social and governance-related (ESG) characteristics when selecting the securities to be held directly by the Fund and, in doing so, may use data provided by external ESG research providers and proprietary models. For further details regarding the ESG characteristics (and the applicable levels) please refer to the BlackRock website at <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf> The Fund may also have indirect exposure (through, including but not limited to, FDIs and other funds) to issuers with exposures that are inconsistent with the IA's ESG analysis.
- ▶ The Fund is actively managed and the IA has discretion to select the Fund's investments. In doing so, the IA may refer to the MSCI World Index (the “Index”) when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The IA is not bound by the components or weighting of the Index when selecting investments. The IA may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. The Fund's portfolio holdings are expected to deviate materially from the Index. The Index should be used by shareholders to compare the performance of the Fund.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your shares will be non-distributing (i.e. dividend income will be included in their value).
- ▶ The Fund's base currency is US Dollar. Shares for this class are bought and sold in Sterling. The performance of your shares may be affected by this currency difference.
- ▶ You can buy and sell your shares daily. The minimum initial investment for this share class is US\$10,000,000 or other currency equivalent.

- ▶ This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated five due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.

- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.

 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 31 July 2024. This figure may vary from year to year.
