Coutts Japan Enhanced Index Government Bond Fund

A sub-fund of BlackRock Solutions Funds ICAV

Class C Distributing EUR Hedged

ISIN: IE0004L7D8X3

Manager: BlackRock Asset Management Ireland Limited

Objectives and Investment Policy

- ▶ The Fund aims to achieve a total return on your investment, through a combination of capital growth and income, which aims to provide some outperformance (before deduction of the Fund's fees and expenses) of the return of the Bloomberg Japan Treasury Index GBP Hedged, the Fund's benchmark index (Index).
- ▶ The Fund has an enhanced index strategy which differs from a pure-index tracking strategy. Although both strategies invest in a similar range of fixed income (FI) securities (such as bonds), enhanced index strategies aim to take overweight and/or underweight positions relative to the Index in order to achieve some outperformance of the Index (before deduction of the Fund's fees and expenses).
- ▶ The Fund invests in the FI securities that predominantly make up the Index and instruments related to such FI securities, including financial derivative instruments (FDI) (i.e. investments the prices of which are based on one or more underlying assets). The Index predominantly comprises Japanese fixed rate government bonds and will have a credit rating which reflects that of the Japanese Treasury.
- ▶ Over an initial period of not more than three months from the Fund's launch date, the Fund may hold a significant proportion of its assets in money market funds, money market instruments (i.e. debt securities with short term maturities), deposits and cash.
- ▶ The Fund is actively managed in that, while the Fund's Investment Manager (IM) will invest in a similar universe of investments as the Index, it may take overweight and/or underweight positions relative to the Index in accordance with its enhanced index strategy. The Fund seeks to achieve the investment objective by typically taking a low to conservative level of active risk (i.e. degree of deviation from the Index) to achieve some outperformance of the return of the Index (before deduction of the Fund's fees and expenses) over the long term (i.e. 5 years or more).
- ▶ The investment manager may use FDIs to help achieve the Fund's investment objective and to reduce risk within the Fund's portfolio, reduce investment costs and generate additional income. In particular, the Fund will seek to hedge the investments of the Fund into GBP.
- ▶ The Fund may also engage in short-term secured lending of its investments to certain eligible third parties. This is used as a means of generating additional income and to off-set the costs of the Fund.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your shares will be distributing shares (i.e. dividend income will be paid on the shares quarterly based on the income received on the Fund's assets).
- ▶ The Fund's base currency is Sterling. Shares for this class are bought and sold in Euro. The performance of your shares may be affected by this currency difference.
- ▶ Your shares will be "hedged" with the aim of reducing the effect of exchange rate fluctuations between their denominated currency and the base currency of the Fund. FDIs, including FX forward contracts, will be used for currency hedging purposes. The hedging strategy may not completely eliminate currency risk and, therefore, may affect the performance of your shares.
- ▶ You can buy and sell your shares daily. The minimum initial investment for this share class is €200,000,000.

Risk and Reward Profile

- ▶ The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated three due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.

- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
- The Fund uses quantitative models in order to make investment decisions. As market dynamics shift over time, a quantitative model may become less efficient or may even present deficiencies under certain market conditions.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
 - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
 - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 31 August 2024. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

** (i) To the extent the Fund undertakes securities lending, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.
