

**KEY INVESTOR INFORMATION**

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

**iShares Global Securitised Index Fund (IE)**

A sub-fund of BlackRock Fixed Income Dublin Funds plc

**Class S Hedged CHF Accu**

**ISIN: IE00000IFTU0**

**Manager: BlackRock Asset Management Ireland Limited**

**Objectives and Investment Policy**

- ▶ The Fund aims to achieve a total return on your investment, through a combination of capital growth and income, which reflects the return of the Bloomberg Global Aggregate Securitized ex ABS ex CMBS Index, the Fund's benchmark index.
- ▶ The Fund invests predominantly in fixed income securities (such as covered securitised fixed-rate bonds and mortgaged backed securities ("MBS")) that make up the Fund's benchmark index.
- ▶ The Fund's benchmark index measures the performance of a sub-set of multi-currency denominated, investment grade, securitized, fixed income securities, which the index provider has determined form part of the Bloomberg Global Aggregate Index (the parent index) including, covered bonds and MBS Pass-Through securities. The securitised sector is designed to capture fixed income instruments whose payments are backed or directly derived from a pool of assets.
- ▶ The Fund's benchmark index comprises bonds from issuers on a global basis, including emerging markets, however the Fund's exposure to issuers in emerging markets will not be material.
- ▶ The Fund will not invest in asset-backed securities or commercial mortgage-backed securities and Fund's investments will normally be listed or traded on Regulated Markets.
- ▶ At the time of purchase, the Fund's FI securities will have received a long term credit rating which complies with the credit rating requirements of the Fund's benchmark index, being currently at least investment grade from Moody's, Standard & Poor's or Fitch Ratings or are deemed, by the investment manager, to be of an equivalent rating. If the credit rating of a Fund's FI security is downgraded, the Fund may continue to hold this, until it is practicable to sell the position.
- ▶ The Fund intends to use optimisation techniques in order to achieve a similar return to the Fund's benchmark index and it is therefore not expected that the Fund will hold each and every underlying constituent of the Fund's benchmark index at all times or hold them in the same proportion as their weightings in the Fund's benchmark index.
- ▶ The Fund uses techniques for efficient portfolio management purposes or to protect against exchange rate risk. These techniques may include futures, foreign exchange contracts, swaps, options, and TBAs ("to be announced").
- ▶ The Fund can invest on a global basis although it may, from time to time, become concentrated in single countries or regions, where relevant, to reflect the Benchmark Index.
- ▶ The price of fixed income securities may be affected by changing interest rates which in turn may affect the value of your investment. Fixed income securities prices move inversely to interest rates. Therefore, the market value of fixed income securities may decrease as interest rates increase. The credit rating of an issuing entity will generally affect the yield that can be earned on fixed income securities; the better the credit rating the smaller the yield.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your shares will be accumulating shares (i.e. dividend income will be included in their value).
- ▶ The Fund's base currency is US Dollar. Shares for this class are bought and sold in Swiss Franc. The performance of your shares may be affected by this currency difference.
- ▶ Your shares will be "hedged" with the aim of reducing the effect of exchange rate fluctuations between their denominated currency and the base currency of the Fund. FDIs, including FX forward contracts, will be used for currency hedging purposes. The hedging strategy may not completely eliminate currency risk and, therefore, may affect the performance of your shares.
- ▶ You can buy and sell your shares daily. The minimum initial investment for this share class is CHF200,000,000.

**Risk and Reward Profile**

- ▶ The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated four due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.

- Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
- Mortgage backed securities are subject to the same risks described for fixed income securities. These instruments may be subject to 'Liquidity Risk', have high levels of borrowing and may not fully reflect the value of underlying assets.
- ▶ Particular risks not adequately captured by the risk indicator include:
  - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
  - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
  - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

## Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

\*Subject to a charge of up to 2% paid into the Fund where the Manager suspects arbitrage by an investor on the yield of the Fund.

The ongoing charges figure is based on the fixed annualised fees charged to the Fund as set out in the Fund's prospectus. This figure excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

\*\* To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.
