BlackRock Tactical Opportunities Fund

A sub-fund of BlackRock Funds I ICAV

Class X Accumulating AUD Hedged

ISIN: IE00BK4PZY95

Manager: BlackRock Asset Management Ireland Limited

Objectives and Investment Policy

- ▶ The Fund seeks to achieve a positive absolute return on your investment through a combination of capital growth and income with a limited correlation to market movements.
- ▶ The Fund has a flexible approach to asset allocation and will seek to gain exposure across a variety of asset classes. In order to achieve its objective the Fund will invest globally in equity securities (e.g. shares), equity-related (ER) securities, fixed income (FI) securities (e.g. bonds), FI-related securities, money market instruments (MMIs) (e.g. debt instruments with short-term maturities), asset backed securities (ABS) and mortgage-backed securities (MBS) (i.e. financial securities backed by cash flows from debt), deposits, cash and other funds (including exchange traded funds). The FI securities and MMIs may be issued by governments, government agencies, companies and supranationals (e.g. the International Bank for Reconstruction and Development) globally and may include investments with a relatively low credit rating or which are unrated. The Investment Manager (IM) will use a combination of systematic (i.e. rule based) models and discretionary investment techniques. The IM seeks to identify investment opportunities across a global investment universe according to the macroeconomic categories of 'growth' (focusing on assets with attractive exposure to economic growth), 'inflation' (focusing on FI securities with attractive real rates of return), 'policy' (focusing on countries with monetary policy regimes with a tendency to take steps to stimulate economic growth) and 'pricing' (focusing on attractively priced assets globally).
- ▶ The IM takes into account certain environmental, social and governance (ESG) related characteristics when determining whether an investment is appropriate for the Fund. The IM will do this by seeking to limit and/or exclude direct investment in companies which, in the opinion of the IM, have certain levels of exposure to, or ties with, certain sectors, as detailed in the Fund's Prospectus. The Fund may have indirect exposure (e.g. through FDIs and other funds) to issuers with exposures that are inconsistent with the IM's ESG analysis.
- ▶ The IM may use financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets) to help achieve the Fund's investment objective and may thereby generate market leverage (i.e. market exposure in excess of the value of its assets). A significant proportion of the Fund's portfolio may consist of FDIs on a daily basis.
- ▶ The Fund is actively managed. The IM has discretion to select the Fund's investments and is not constrained by any benchmark in this process.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your shares will be accumulating shares (i.e. dividend income will be included in their value).
- ▶ The Fund's base currency is US Dollar. Shares for this class are bought and sold in Australian Dollar. The performance of your shares may be affected by this currency difference.
- ▶ Your shares will be "hedged" with the aim of reducing the effect of exchange rate fluctuations between their denominated currency and the base currency of the Fund. FDIs, including FX forward contracts, will be used for currency hedging purposes. The hedging strategy may not completely eliminate currency risk and, therefore, may affect the performance of your shares.
- ▶ You can buy and sell your shares daily. The minimum initial investment for this share class is US\$1,000,000 or other currency equivalent.

Risk and Reward Profile

- ▶ This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated four due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - Equities and equity-related securities can be affected by daily stock market movements. Fixed Income securities can be affected by changes to interest rates, credit risk and potential or actual credit rating downgrades. Non-investment grade FI securities can be more sensitive to these events. ABS and MBS may have high levels of borrowing and not fully reflect the value of underlying assets. FDIs are highly sensitive to changes in the value of the asset they are based on. The impact is greater where FDIs are used in an extensive or complex way.
 - Due to its investment strategy an 'Absolute Return' fund may not move in line with market trends or fully benefit from a positive market environment.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
 - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
 - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for any charges which they themselves may apply.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on the fixed annualised fees charged to the Fund as set out in the Fund's prospectus. This figure excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

** (i) To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges. (ii) Holders in this share class will be subject to additional periodic charges outside of the Fund by way of separate agreement with BlackRock.
